in Maine, District of Columbia, New Hampshire, Connecticut, Rhode Island, Maryland, Delaware, Massachusetts, New Jersey, and points in Pennsylvania on and east of U.S. Highway 15; (C) from points in Ohio on, west, and south of a line beginning at the Ohio-West Virginia State line, and extending along Ohio Highway 43 to junction U.S. Highway 30, thence along U.S. Highway 30 to Ohio Highway 4, thence along Ohio Highway 4 to Lake Erie, to points in Vermont; (D) from points in Ohio on, and west of U.S. Highway 250, to points in Pennsylvania east of U.S. Highway 219; (E) from points in Ohio on and north of Interstate Highway 70, to points in Virginia on and east of U.S. Highway 202; (F) from points in Ashtabula, Lake, Medina, Geauga, Trumbull, Mahoning, Belmont, Wayne, Tuscarawas, Portage, Carroll, Jefferson, Harrison, Summitt, Cuyahoga, Columbiana and Stark Counties, Ohio, to points in Tennessee; (G) from points in Ashtabula, Trumbull, Mahoning and Columbiana counties, Ohio, to points in Kentucky; (H) from points in Trumbull, Mahoning, Stark, Columbiana, Carroll, Jefferson, Harrison, Belmont and Monroe counties, Ohio, to points in Indiana and Michigan; (I) from points in Columbiana, Jefferson, Harrison, Belmont, and Monroe counties, Ohio, to points in Illinois; (J) from points in Columbiana, Mahoning, Jefferson, Harrison, Belmont, Monroe and Washington counties, Ohio, to points in Wisconsin; (K) from points in Ashtabula, Trumbull, Mahoning, Summitt, Portage, Medina, Lorain, Cuyahoga, Lake, Geauga, Columbiana, Stark, Wayne, Huron, and Erie counties, Ohio to points in Missouri, Iowa, and Minnesota. The purpose of this filing is to eliminate the gateway of Martins Ferry, Ohio, and Beech Bottom, W. Va.

No. MC 92983 (Sub-No. E19), filed June 4, 1974. Applicant: AMERICAN BULK TRANSPORT CO., 818 Grand Ave., P.O. Box 2508, Kansas City, Mo. 64142. Applicant's representative: H. B. Foster, (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *cottonseed oil, soybean oil* and *blends thereof*, in bulk, in tank vehicles, from points in South Carolina to Kansas City, Mo.; (B) *cottonseed oil, soybean oil* and *blends thereof, cottonseed oil products*, and *soybean oil products*, (except soap products & paints) in bulk, in tank vehicles; from points in South Carolina to Osceola, Ark., and Dallas, Tex.; (c) *vegetable oil* and *vegetable oil products*, (except soap products and paint) in bulk, (1) from points in South Carolina located in Barnwell, Allendale, Bamberg, Colleton, Hampton, Jasper, and Beauford Counties and those parts of Charleston County located south of the Cooper River including the Charleston Commercial Zone to points in Michigan located in Marquette, Iron, Barga, Houghton, Keweenaw, Onionagon, and Gogeric Counties; (2) from points in South Carolina located in Spartanburg, Darlington, Cherokee, Union, York, Chester, Lancaster, Kershaw, Chesterfield, Marlboro, Lee, Florence, Dillon, Marion and Horry Counties to points in Mississippi located in Adams County on and west of U.S. Highway 61 and points in Jefferson, Clarborne, Warren, Issaquena, Sharkey, Washington, Hunphreys, Le Flore, Tallahatchie, Panola, Tate, De Sota, Tunica, Quitman, Coahoma, Bolivar and Sunflower Counties.

(3) From points in South Carolina located in and west and south of Pickens, Anderson, Abbeville, Greenwood, Saluda, Lexington, Calhoun, Orangeburg, Berkeley and Charleston Counties except Jasper County and those portions of Beaufort County located south of Broad River to points in Louisiana west and north of a line beginning at the Louisiana-Texas State line and extendng east along Interstate Highway 10 to its junction with Louisiana Highway 27, thence north along Louisiana Highway 27 to junction with U.S. Highway 190, thence east on U.S. Highway 190 to its junction with Louisiana Highway 112, thence east and north on Louisiana Highway 112 to its intersection with the southern boundary of Rapides Parish, thence along the southern and eastern boundaries of Rapides, La Salle, Caldwell, Ouachita and Morehouse Parishes to the Arkansas-Louisiana State line; (4) from points in South Carolina located in and north of Greenville, Laurens, Newberry, Richland, Sumter, Clarendon, Williamsburg and Georgetown Counties to points in Louisiana located in and north and west of Concordia, Avoyelles, St. Landry, Lafayette and Vermillion Parishes; (D) vinegar, in bulk, in tank vehicles, from points in South Carolina to points in Arkansas; (E) fats and oils intended for use as animal and poultry feed or ingredients, in bulk, in tank vehicles, from points in South Carolina to points in Arkansas; (F) chemicals (except liquid hydrogen, nitrogen, and oxygen to missile storage, launching or test facilities or plants producing liquid hydrogen, nitrogen and oxygen and (except petroleum and petroleum products) in bulk, (1) from points in South Carolina located in Aiken, Barnwell, Allendale, Bamberg, Colleton, Hampton, Jasper, Beaufort, and Charleston Counties to points in Minnesota located on and west of a line beginning at the Minnesota-Iowa State line and extending north along Minnesota Highway 15 to junction with U.S. Highway 12, thence west along U.S. Highway 12 to the junction with Minnesota Highway 4, thence north on Minnesota Highway 4 to junction with Interstate Highway 94, thence west on Interstate Highway 94 to junction with U.S. Highway 71, thnece north on U.S. Highway 71 to its junction with Minnesota Highway 72 in Blacqduck, thence north on Minnesota Highway 72 to the Canadian Border.

(2) From points in South Carolina to points in Missouri located north and west of a line beginning at the Iowa-Missouri State line and extending south on U.S. Highway 63 to its junction with U.S. Highway 36, thence west on U.S. Highway 36 to its junction with Missouri Highway 3, thence south on Missouri Highway 3 to its junction with Missouri Highway 5, thence south on Missouri Highway 5 to junction with Missouri Highway 87, thence south on Missouri Highway 87 to the Intersection with the southern boundary on Moniteau County, thence along the eastern and southern boundaries of Moniteau, Morgan, Benton, Hickory, Cedar, Dade and Jasper Counties to the Missouri-Kansas State line; (G) acids and liquid chemicals (except hydrogen, nitrogen and oxygen to missile storage, launching or test facilities or plants producing liquid hydrogen, nitrogen and oxygen and (except those derived from petroleum and petroleum products) in bulk, in tank or hopper vehicles; (1) from points in South Carolina to points in Texas located in and north and west of Parmer, Deaf Smith, Randall, Carson, Gray and Hemphill Counties; (2) from points in South Carolina located in and north and east of Spartanburg, Union, Fairfield, Richland, Sumter, Clarendon, Berlekey and Charleston Counties to points in Texas located in Cochran, Bailey, Lamb, Hale, Castro, Swisher, Briscoe, Armstrong, Donley, Collingsworth and Wheeler Counties; (H) Acids and Chemicals, (except liquid hydrogen, oxygen, or nitrogen, to missile storage or missile launching sites, missile test facilities or manufacturing plants producing liquid oxygen, hydrogen, or nitrogen in bulk; (1) from points in South Dakota, North Dakota, Wyoming, Montana, and Idaho; (2) from points in South Carolina to points in Arizona, California, Nevada, Oregon, and Utah; (3) from points in South Carolina to points in New Mexico except Lea and Eddy Counties.

(4) From points in South Carolina located in and north and east of Spartanburg, Union, Fairfield, Richland, Sumter, Clarendon, Williamsburg and Georgetown Counties to points in Lea and Eddy Counties, New Mexico; (I) Acids and chemicals (except liquid hydrogen, nitrogen and oxygen to missile storage, launching or test facilities or plants producing liquid hydrogen, nitrogen and oxygen), in bulk, in tank or hopper vehicles; (1) from points in South Carolina to points in Oklahoma located in and north and west of Beckham, Custer, Blaine, Kingfisher, Logan, Payne, Pownee, Osage, Washington and Nowata Counties; (2) from points in South Carolina located in and north and east of Spartanburg, Union, Fairfield, Richland, Sumter, Clarendon, Berkeley and Charleston Counties to points in Oklahoma located in Harmon, Greer, Jackson, Kiowa, Washita, Caddo, Canadian, Oklahoma, Lincoln, Creek, Tulsa, Rogers, Craig and Ottawa Counties; (3) from points in South Carolina to points in Iowa located in and west of Worth, Cerro Gordo, Franklin, Hardin, Story, Polk, Warren, Lucas and Wayne Counties; (4) from points in South Carolina located in and south of Abbeville, Greenwood, Saluda, Lexington, Richland, Sumter, Florence, Marion and Horry Counties to points in Iowa located in Marshall, Jasper, and Marion Counties; those portions of Monroe and Appanoose located on and west of U.S. Highway 63, and those portions of Mitchell, Floyd, Butler and Grundy Counties located on and west of a line starting at the Iowa-Minnesota State line and extending south along U.S. Highway 218 to junction with U.S. Highway 18, thence south on U.S. Highway 18 to Charles City, thence west and south on Iowa Highway 14 to Grundy Center, thence east and south on unnumbered Highway to the Southern boundary of Grundy County; (5) from points in South Carolina to points in Missouri located in and west of Putnam, Sullivan, Linn, Charlton, Saline, Pettis, Benton, St. Clair, Cedar, Dade and Parton Counties and that part of Jasper County located on and west of U.S. Highway 71, and points in Colorado, Kansas, and Nebraska.

(6) From points in South Carolina located in Jasper and Beaufort Counties to points in Minnesota located on and west of a line beginning at the Canadian Border and extending south along U.S. Highway 75 to junction with Minnesota Highway 11, thence west on Minnesota Highway 11 to junction with Minnesota Highway 220 to east Grand Forks on Minnesota-North Dakota State line; (J) Liquid chemicals, (except hydrogen, nitrogen and oxygen to missile storage, launching sites or test facilities or plants producing liquid hydrogen, nitrogen, and oxygen), in bulk, in tank or hopper vehicles; from points in South Carolina located in Lancaster, Kershaw, Chesterfield, Lee, Darlington, Marlboro, Dillon, Florence, Marion, Williamsburg, Georgetown and Horry Counties and points on and east of a line extending from the South Carolina-North Carolina State line along U.S. Highway 321 to the junction of South Carolina Highway 97, at Chester, thence along South Carolina Highway 97 to the western border of Lancaster County to points in Texas located in Hartley, Sherman and Dallam Counties; (K) Acids and chemicals, (except liquid hydrogen, oxygen, or nitrogen to missile storage or missile launching sites, missile test facilities or manufacturing plants producing liquid oxygen, hydrogen, or nitrogen), in bulk, from points in South Carolina to points in Washington. The purpose of this filing is to eliminate the gateways of: (A) Memphis, Tenn., and Evadale, Ark.; (B) Memphis, Tenn.; (C) Memphis, Tenn.; (D) Memphis, Tenn.; (E) points in Arkansas within the Memphis, Tenn., Commercial Zone; (F) (1) Kansas City, Kans.-Missouri Commercial zone, and Iowa City, Iowa (a point within 15 miles of Windham, Iowa); (F) (2) Kansas City, Kans.-Missouri, Commercial zone; (G) Kansas City, Kans.-Missouri Commercial zone, and Lawrence, Kansas; (H) (1) Kansas, City, Kans.; (H) (2)–(4) Kansas City, Kans.-Missouri Commercial zone; (I) (1)–(5) those points in both the Olathe, Kans., and Kansas City, Kans., commercial zones; (I) (6) those points that are in both the Olathe, Kans., and Kansas City, Kans., commercial zones, and the plantsite of Iowa-Guttenburg Terminal, Inc., located approximately two miles south of Guttenburg, Iowa; (J) those points that are in both the Olathe, Kans., and Kansas City, Kans., commercial zone, and Springfield, Mo.; and (K) Kansas City, Kans.-Missouri Commercial zone.

No. MC 113855 (Sub-No. E24, filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd., S.E., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (i) *loaders, conveyors, screens, grizzlies and attachments, accessories and parts*, which because of their size or weight require the use of special equipment, and (ii) *self-propelled articles*, described in (i) above, each weighing 15,000 pounds or more, and *related parts*, moving in connection therewith, (restricted to commodities transported on trailers), restricted in (i) and (ii) above against the transportation of iron and steel articles, (A) (1) from points in Iowa and points in Nebraska on and east of U.S. Highway 81 and on and north of Nebraska Highway 92, to points in Idaho and Nevada; (2) from points in Nebraska on and east of U.S. Highway 281, to points in Boundary County, Idaho; (3) from points in Nebraska, to points in New York on and east of a line beginning at Lake Ontario and extending along New York Highway 57 to junction interstate Highway 81, to the New York-Pennsylvania State line, and points in Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire and Maine; (4) from points in Nebraska west of U.S. Highway 73, to points in New York; (5) from points in Iowa on and north of Iowa Highway 92, to points in Arizona; (6) from points in Iowa on and west of U.S. Highway 169, to points in New York and Connecticut; (7) from points in Iowa south and east of a line beginning at the Iowa-Illinois State line and extending along U.S. Highway 6 to junction Interstate Highway 35, thence along Interstate Highway 35 to the Iowa-Missouri State line, to points in Arizona on and west of U.S. Highway 89.

(8) From points in Iowa on and west of U.S. Highway 59, to points in Rhode Island, Massachusetts, Vermont, New Hampshire and Maine; (Sioux Falls, S.D.)* (B) (1) from points in Massachusetts, Connecticut, Rhode Island, New Jersey, Delaware, and points in New York on and east of a line beginning at Lake Ontario and extending along New York Highway 57, thence along New York Highway 57 to junction Interstate Highway 81, thence along Interstate Highway 81 to the New York-Pennsylvania State line, to points in Arizona; (2) from points in Maryland on and east of a line beginning at the Maryland-Pennsylvania State line and extending along Interstate Highway 83, thence along Interstate Highway 83 to junction Interstate Highway 95, thence along Interstate Highway 95 to the Maryland-District of Columbia Boundary line, to points in Arizona on, west and north of a line beginning at the Utah-Arizona State line and extending along U.S. Highway 89, thence along U.S. Highway 89 to junction Interstate Highway 17, thence along Interstate Highway 17 to junction U.S. Highway 80, thence along U.S. Highway 80 to the Arizona-California State line; (points in Pennsylvania on and east of a line beginning at the Maryland-Pennsylvania State line and extending along unnumbered highway to junction Business U.S. Highway 15, near Fairplay to junction U.S. Highway 15, to junction unnumbered highway through Clear Spring to junction U.S. Highway 15, to the Pennsylvania-New York State line (except points in Berks, Bucks, Chester, Delaware, Montgomery and Philadelphia Counties, Pa., and points in Pennsylvania on and east of the above described line in Adams, York, Cumberland, Perry, Dauphin, Lebanon, and Lancaster Counties, Pennsylvania, and points in Pennsylvania on and east of U.S. Highway 15 and north of the East Branch of the Susquehanna River in Tioga, Bradford, Lycoming, Sullivan, Union, Snyder, Northumberland, Montour, and Columbia Counties, Pennsylvania, and Sioux Falls, S.D.)* (C) (1) from points in West Virginia, to points in Arizona on and west of U.S. Highway 89; (2) from points in West Virginia on and north of U.S. Highway 33, to points in Arizona; (Elgin, Ill., and Sioux Falls, S.D.)* The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 113855 (Sub-No. E46), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd., S.E., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic and aluminum pipe* (except oilfield pipe as described in *Mercer Extension—Oil Field Commodities*, 74 M.C.C. 459), which because of its size or weight requires the use of special equipment, (A) (1) from points in Minnesota, to points in Arizona, New Mexico, Texas and points in Oklahoma west of U.S. Highway 75; (2) from points in Minnesota on and west of U.S. Highway 71, to points in Louisiana; (3) from points in Iowa on and north of U.S. Highway 20, to points in Oklahoma on and west of Interstate Highway 35 and points in Texas; (4) from points in Iowa, to points in New Mexico and Arizona; (5) from points in Wisconsin on and north of Wisconsin Highway 60, to points in Texas and points in Oklahoma on and west of Interstate Highway 35; (6) from points in Wisconsin to points in New Mexico, Arizona and Colorado; (7) from points in Wisconsin on and north of U.S. Highway 10, to points in Kansas on and west of U.S. Highway 81; (8) from points in Illinois on and north of U.S. Highway 36, to points in Arizona (except Apache, Greenlee and Graham Counties).

(9) From points in Illinois on and north of Illinois Highway 9, to points in New Mexico; (10) from points in Indiana to points in Arizona (except Navajo,

V 40 214 NOV 5 75 XUM

Apache, Greenlee, Graham and Cochise Counties); (11) from points in Indiana on and north of Indiana Highway 26, to points in New Mexico; (12) from points in Michigan to points in Arizona, points in Oklahoma on and west of U.S. Highway 283, points in Kansas on and west of U.S. Highway 281, and points in Texas on and north of U.S. Highway 87; (13) from points in the Upper Peninsula of Michigan to points in Texas and Oklahoma; (14) from points in Pennsylvania to points in Arizona, New Mexico, points in Oklahoma on and west of U.S. Highway 83 and points in Texas on and west of U.S. Highway 277; (15) from points in Ohio to points in Arizona, points in New Mexico on and west of Interstate Highway 25, and points in Oklahoma on and west of U.S. Highway 83; (16) from points in Ohio on and north of U.S. Highway 36 to points in New Mexico east of Interstate Highway 25; (South Dakota, and Hall County, Nebr.)* (B) (1) from points in New York (except points in Niagara, Erie, Cattaraugus, and Chautauqua Counties), to points in Arizona; (2) from points in New York east of Cayuga, Tomkins and Tioga Counties), to points in New Mexico; (3) from points in Massachusetts, Connecticut, Rhode Island and New Jersey, to points in Arizona, New Mexico and points in Texas on and west of U.S. Highway 83; (points in Pennsylvania on and east of a line beginning at the Maryland-Pennsylvania State line and extending along unnumbered highway to junction Business U.S. Highway 15, near Fairplay, to junction U.S. Highway 15, to junction unnumbered highway through Clear Spring to junction U.S. Highway 15 to junction the Pennsylvania-New York State line (except points in Berks, Bucks, Chester, Delaware, Montgomery and Philadelphia Counties, Pa., and points in Pennsylvania on and east of the above described line in Adams, York, Cumberland, Perry, Dauphin, Lebanon, and Lancaster Counties, Pennsylvania, and points in Pennsylvania on and east of U.S. Highway 15 and north of the East Branch of the Susquehanna River in Tioga, Bradford, Lycoming, Sullivan, Union, Snyder, Northumberland, Montour, and Columbia Counties, Pennsylvania, South Dakota and Hall County, Nebr.)* The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 113855 (Sub-No. E74), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Road, S.E., Rochester, Minnesota 55901. Applicant's representative: Michael E. Miller, 502 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) commodities which because of their size or weight require the use of special equipment, and *related machinery parts* and *related contractors' materials and supplies*, when their transportation is incidental to the transportation of the above-described commodities, and (2) *self-propelled articles*, each weighing 15,000 pounds or more, and *related machinery, tools, parts and supplies*, moving in connection therewith (restricted to commodities transported on trailers), between points in North Dakota, on the one hand, and, on the other, (A) points in Iowa, (points in Minnesota within 50 miles of Sioux Falls, S.D., or points in South Dakota east of South Dakota Highway 73)* (B) points in Kansas, Missouri, Illinois, Indiana, Ohio, Pennsylvania and Wisconsin. (South Dakota)* The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 113855 (Sub-No. E76), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Road S.E., Rochester, Minnesota 55901. Applicant's representative: Michael E. Miller, 502 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *commodities* which because of their size or weight require the use of special equipment, and *related machinery parts and related contractors' materials and supplies*, when their transportation is incidental to the transportation of the above-specified commodities and (2) *self-propelled articles*, each weighing 15,000 pounds or more, and *related machinery, tools, parts and supplies*, moving in connection therewith (restricted to commodities transported on trailers), between points in Montana, on the one hand, and, on the other, (A) points in Wisconsin (points in South Dakota east of the Missouri River),* (B) points in Illinois, Michigan and Missouri. (points in South Dakota east of the Missouri River or east of South Dakota Highway 73)* (C) points in Indiana, (points in South Dakota east of the Missouri River or east of South Dakota Highway 73; or points in South Dakota east of the Missouri River, Davenport, Iowa and Elgin, Ill.)* The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 113855 (Sub-No. E83), filed May 30, 1975. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd., S.E., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *tractors, loaders, agricultural earth-moving, excavating and loading machinery and equipment*, and, when moving in combination loads on the same vehicle from the same consignors of the above-specified commodities, *attachments and parts*, of or for the above-specified equipment and machinery, and *accessories* for loaders, (A) from points in Illinois south of a line beginning at the Iowa-Illinois State line and extending along U.S. Highway 6 to junction U.S. Highway 30, to the Illinois-Indiana State line, and on and north of U.S. Highway 36, to points in California in, east and north of Santa Cruz, Santa Clara, Stanislaus, Calaveras and Alpine Counties; (B) from points in Milwaukee and Waukesha Counties, Wis., to points in California. The purpose of this filing is to eliminate the gateway of Gwinner or Fargo, N.D.

No. MC 113855 (Sub-No. E88), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd., S.E., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (A) (1) *commodities*, (except boats) which, because of their size or weight require the use of special equipment, and *related machinery, parts and related contractors' materials and supplies*, when their transportation is incidental to the transportation of the above-described commodities, and (2) *self-propelled articles*, each weighing 15,000 pounds or more, and *related machinery, tools, parts and supplies*, moving in connection therewith (restricted to commodities transported on trailers), (a) between points in Idaho south of Lehmi, Valley and Idaho Counties, on the one hand, and, on the other hand, points in South Dakota. (Utah)* (b) between points in Idaho, on the one hand, and, on the hand, points in South Dakota east of the Missouri River. (Montana or Wyoming)* (c) (1) between points in Idaho, on the one hand, and, on the other, points in Nebraska (except Sheridan, Box Butte, Dawes and Sioux Counties). (ii) between points in Idaho (except Benewah, Shoshone, Kastenal, Bonner and Boundary counties, on the one hand, and, on the other, points in Nebraska. (Utah, Montana, or Wyoming; and points in South Dakota east of the Missouri River)* (B) (1) *heavy machinery and other contractors' materials, supplies, and equipment*, which because of size or weight require the use of special equipment, and (2) *self-propelled articles*, each weighing 15,000 pounds or more and *related machinery, tools, parts and supplies*, moving in connection therewith (restricted to commodities transported on trailers), (a) between points in Idaho, on the one hand, and, on the other, points in South Dakota east of South Dakota Highway 73. (Montana or Wyoming)* (b) between points in Idaho, on the one hand, and, on the other, points in Nebraska. (Montana or Wyoming, and points in South Dakota east of South Dakota Highway 73)* The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 113855 (Sub-No. E90), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd., S.E., Rochester, Minn. 55001. Applicant's representative: Michael E. Miller, 502 First Nat'l Bank Bldg., Fargo, N. Dak 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (I) *commodities* which, because of their size or weight require the use of special equipment (except boats and iron and steel articles), and *related machinery parts and related contractors' materials and supplies*, when their transportation is incidental to the transportation by said carrier of

the above-described commodities, and (II) *self-propelled articles*, each weighing 15,000 pounds or more and *related machinery, tools, parts and supplies*, moving in connection therewith (restricted to commodities transported on trailers), (A) between points in Colorado, on the one hand, and, on the other, (1) points in West Virginia, points in Indiana on and north of Interstate Highway 74. (2) points in Kentucky in and east of Mason, Fleming, Bath, Menifee, Breathitt, Knott and Letcher Counties. (South Dakota, Davenport, Iowa, and Elgin, Ill.)* (B) (1) between points in Colorado, on the one hand, and, on the other, points in New York on and east of U.S. Highway 15, points in Maryland on and east of Interstate Highway 81, points in Virginia on, north and east of a line beginning at the Virginia-West Virginia State line and extending along U.S. Highway 33 to junction U.S. Highway 301, to the Virginia-North Carolina State line, points in North Carolina in and east of Hertford, Bertie, Beaufort and Pemlico Counties, and the District of Columbia.

(2) Between points in Colorado (except Logan, Sedgwick, Phillips, Washington, Yuma, Lincoln, Kit Carson, Cheyenne, Kiowa, Prowers, Bent, and Baca Counties), on the one hand, and on the other, points in New York west of U.S. Highway 15 and on and east of a line beginning at Lake Ontario and extending along New York Highway 98 to junction New York Highway 63, thence along New York Highway 63 to junction New York Highway 19, thence along New York Highway 19 to the New York-Pennsylvania State line. (South Dakota and points in Pennsylvania on and east of a line beginning at the Maryland-Pennsylvania State line and extending along unnumbered highway to junction Business U.S. Highway 15, near Fairplay, to junction U.S. Highway 15, to junction unnumbered highway through Clear Spring to junction U.S. Highway 15, to the Pennsylvania-New York State line (except points in Berks, Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pa., and points in Pennsylvania on and east of the above described line in Adams, York, Cumberland, Perry, Dauphin, Lebanon, and Lancaster Counties, Pennsylvania and points in Pennsylvania on and east of U.S. Highway 15 and north of the East Branch of the Susquehanna River in Tioga, Bradford, Lycoming, Sullivan, Union, Snyder, Northumberland, Montour, and Columbia Counties, Pennsylvania)*. The purpose of this filing is to eliminate the gateways indicated in asterisks above.

No. MC 113855 (Sub-No. E122), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First National Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (I) *loaders, conveyors, screens, grizzlies and attachments, accessories and parts*, which because of size or weight require the use of special equipment, and *related machinery and parts* when their transportation is incidental to the transportation of the above-described commodities, and (II) *self-propelled articles*, each weighing 15,000 pounds or more, and *related machinery, and parts* moving in connection therewith, (restricted to commodities transported on trailers), (A) (1) from points in Minnesota and points in Walsh, Pembina, Nelson, Grand Forks, Griggs, Steele, Traile, Barres, and Cass Counties; to points in California (except points in San Bernadino and Riverside counties, east of U.S. Highway 395 and points in Imperial County); (2) from points in Iowa to points in California (except San Bernadino, Los Angeles, Orange, Riverside, San Diego, Imperial, Ventura, and Kern Counties); (3) from points in Iowa on and north of a line beginning at the Iowa-Illinois State line and extending along U.S. Highway 20 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction Iowa Highway 3, thence along Iowa Highway 3 to the Iowa-South Dakota State line, to points in California; (4) from points in Nebraska on and east of U.S. Highway 81, to points in California in and north of Santa Cruz, Santa Clara, Stanislaus, Calaveras, and Alpine Counties; (Sioux Falls, S.D., and Sparks, Nev.)*.

(B) (1) From points in Colorado, Montana, and Wyoming, to points in New York, New Jersey, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, and Maine; (2) from points in Michigan, Wisconsin, Ohio, Pennsylvania, points in Illinois on and north of Illinois Highway 6, points in Indiana on and north of Indiana Highway 26, and points in North Dakota on and east of a line beginning at the U.S.-Canada International Boundary line and extending along U.S. Highway 52 to junction North Dakota Highway 3, to the North Dakota-South Dakota State line, to points in Arizona; (3) from points in Kansas (a) on and west of U.S. Highway 281, to points in New York, Connecticut, Rhode Island, Massachusetts, and Vermont; (b) on and west of U.S. Highway 283, to points in New Jersey; (c) on and west of U.S. Highway 81, to points in Maine and New Hampshire; (4) from points in Illinois on and north of Illinois Highway 9, to points in Arizona on, west, and north of a line beginning at the Utah-Arizona State line and extending along U.S. Highway 89 to junctioh Interstate Highway 17, thence along Interstate Highway 17 to junction U.S. Highway 80, thence along U.S. Highway 80 to the Arizona-California State line; (5) from points in North Dakota on and east of North Dakota Highway 3, to points in Nevada (except Elko county); (6) from points in North Dakota, to points in New York, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, and Maine;. (Sioux Falls, S.D.)*. The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 113855 (Sub-No. E123), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First National Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (I) *Mechanical lifting equipment*, and *attachments and parts* for mechanical lifting equipment, which because of size or weight require the use of special equipment, and (II) *self-propelled mechanical lifting equipment*, each weighing 15,000 pounds or more, and *related parts and attachments* when moving in connection therewith (restricted to commodities transported on trailers), (A) (1) from points in Nebraska to points in Maine, Vermont, New Hampshire, Maryland, points in New York on, east, and south of New York Highway 14, points in Virginia on and east of U.S. Highway 220, points in North Carolina on and east of U.S. Highway 52, and the District of Columbia. (2) From points in Colorado to points in Maine, Vermont, New Hampshire, Maryland, New York, points in Virginia on and east of U.S. Highway 220, and points in North Carolina on and east of a line beginning at the Virginia-North Carolina State line and extending along U.S. Highway 220 to junction U.S. Highway, 1 to the North Carolina-South Carolina State line.

(3) From points in Iowa on and west of U.S. Highway 71, to points in Maine, Vermont, New Hampshire, New York (except points on and west of U.S. Highway 11), Virginia (except points west of U.S. Highway 15), Maryland (except points west of U.S. Highway 15), and the District of Columbia. (4) From points in Kansas on and west of U.S. Highway 75, to points in Maine, Vermont, New Hampshire, and points in New York in, east, and south of Jefferson, Lewis, Herkimer, Otsego, and Delaware Counties. (South Dakota and Fulton County, Pa.)* (B) (1) From points in Montana to points in South Carolina, Maine, Vermont, New Hampshire, New York, Virginia, points in North Carolina on and east of U.S. Highway 220, points in Georgia on and east of U.S. Highway 441, points in Florida in, east and south of Jefferson County, points in Maryland, and the District of Columbia. (2) From points in Wyoming to points in Maine, Vermont, New Hampshire, New York, Maryland, Virginia, points in North Carolina on and east of U.S. Highway 321, points in South Carolina on and east of a line beginning at the North Carolina-South Carolina State line, and extending along U.S. Highway 321, to junction U.S. Highway 176, to the Atlantic Ocean, and the District of Columbia. (3) From points in Wyoming (except Laramie, Albany, Platte, and Goshen counties), to points in South Carolina west of the line described in (2) above. (Points in South Dakota east of the Missouri River and Fulton county, Pa.)* (6) From points in North Dakota to points in Maine, Vermont, New Hamsphire, New York, Virginia, points in North Carolina on and east of U.S. Highway 220, points

V 40 214 NOV 5 75 XUM

in Georgia on and east of U.S. Highway 221, points in Florida in, east, and south of Jefferson County, and points in Maryland, the District of Columbia and South Carolina. (South Dakota or points in Minnesota within Sioux Falls, S.D.; and Fulton County, Pa.) * (D) (1) from points in South Dakota to points in Maine, Vermont, New Hampshire, Maryland, points in North Carolina on and east of U.S. Highway 220, points in South Carolina on and east of U.S. Highway 221, and the District of Columbia. (2) From points in South Dakota west of the Missouri River to points in Georgia on and east of U.S. Highway 221 and points in Florida, in, east and south of Jefferson County. (Fulton County, Pa.) *

(E) From points in Minnesota on and west of a line beginning at the U.S.-Canada International Boundary Line and extending along U.S. Highway 59 to junction U.S. Highway 10, thence along U.S. Highway 10 to junction U.S. Highway 71, thence along U.S. Highway 71 to the Minnesota-Iowa State line; to points in Maine, Vermont, New Hampshire, points in New York on and east of U.S. Highway 11, the District of Columbia, points in Maryland, Virginia, North Carolina, and points in South Carolina on and east of U.S. Highway 15. (Points in Minnesota North of a line beginning at the Minnesota-North Dakota State line and extending along U.S. Highway 2 to junction U.S. Highway 71, thence along U.S. Highway 71 to the U.S.-Canada International Boundary line; South Dakota; and Fulton County, Pa.) * The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 113855 (Sub-No. E125), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First National Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Road construction machinery and equipment*, as defined by the Commission, and *lift trucks* in flatbed trailers, restricted to commodities which because of size or weight require the use of special equipment, provided that the loading and/or unloading which necessitates the special equipment is performed by consignor or consignee, or both, (1) between points in South Dakota, on the one hand, and, on the other, points in Maine, Vermont, New Hampshire, South Carolina, Georgia, Florida, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, and North Carolina. (2) Between points in South Dakota on and north of U.S. Highway 14, on the one hand, and, on the other, points in Tennessee, Mississippi, and points in Arkansas on and east of a line beginning at the Missouri-Arkansas State line and extending along U.S. Highway 65 to junction U.S. Highway 167, to the Arkansas-Louisiana State line. (3) Between points in South Dakota south of U.S. Highway 14 and on and north of U.S. Highway 16, on the one hand, and, on the other, points in Tennessee on and east of Tennessee Highway 69, and points in Mississippi on and east of U.S. Highway 51. (4) Between points in South Dakota (except Charles Mix, Douglas, Hutchinson, Turner, Lincoln, Bon Homme, Yankton, Clay and Union Counties), on the one hand, and, on the other, points in Alabama.

(B) (1) *Road construction equipment and machinery*, and *lift trucks*, which, because of their size and weight require the use of special equipment, (ii) *self-propelled articles*, described in (i) above, each weighing 15,000 pounds or more (restricted to commodities transported on trailers), (1) from points in South Dakota to points in Maine, Vermont, New Hampshire, South Carolina, Georgia, Florida, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, and North Carolina. (2) From points in South Dakota on and north of U.S. Highway 14, to points in Tennessee, Mississippi and points in Arkansas on and east of a line beginning at the Missouri-Arkansas State line and extending along U.S. Highway 65 to junction U.S. Highway 167, to the Arkansas-Louisiana State line. (3) From points in South Dakota south of U.S. Highway 14 and on and north of U.S. Highway 16, to points in Tennessee on and east of Tennessee Highway 69, and points in Mississippi on and east of U.S. Highway 51. (4) From points in South Dakota (except Charles Mix, Douglas, Hutchinson, Turner, Lincoln, Bon Homme, Yankton, Clay, and Union Counties), to points in Alabama. (C) *Street sweeping machines* which, because of their size or weight require the use of special equipment, and *related street sweeper parts and attachments* when their transportation is incidental to the transportation of the above-described commodities, and (2) *self-propelled articles* described in (1) above, each weighing 15,000 pounds or more, and *related machinery, and parts* moving in connection therewith (restricted to commodities transported on trailers), (1) from points in South Dakota to points in Maine, Vermont, New Hampshire, South Carolina, Georgia, Florida, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, North Carolina, and the District of Columbia. (2) From points in South Dakota on and north of U.S. Highway 14, to points in Tennessee, Mississippi, and those points in Louisiana and Arkansas on and east of U.S. Highway 167.

(3) From points in South Dakota south of U.S. Highway 14 and on and north of U.S. Highway 16, to points in Tennessee on and east of Tennessee Highway 69, and points in Mississippi on and east of U.S. Highway 51. (4) From points in South Dakota (except Charles, Mix, Douglas, Hutchinson, Turner, Lincoln, Bon Homme, Yankton, Clay, and Union Counties), to points in Alabama. (D) *Street sweeping machines* (except commodities which because of size or weight require the use of special equipment or special handling), in flatbed trailers only, (1) from points in Maine, Vermont, New Hampshire, South Carolina, Georgia, Florida, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, and North Carolina to points in South Dakota. (2) From points in Tennessee, Mississippi, and points in Arkansas on and east of a line beginning at the Missouri-Arkansas State line and extending along U.S. Highway 65 to junction U.S. Highway 167, to the Arkansas-Louisiana State line, to points in South Dakota on and north of U.S. Highway 14. (3) From points in Tennessee on and east of Tennessee Highway 69 to points in South Dakota on and north of U.S. Highway 16 and south of U.S. Highway 14. (4) From points in Alabama to points in South Dakota (except Charles, Mix, Douglas, Hutchinson, Turner, Lincoln, Bon Homme, Yankton, Clay, and Union counties). The purpose of this filing is to eliminate the gateway of Minneapolis, Minn.

No. MC 113855 (Sub-No. E171), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First National Bank Bldg., Fargo, N.Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Street sweeping machines* (except those which because of size or weight require the use of special equipment), in flat bed trailers, (1) from points in Utah, to points in Maine, Vermont, New Hampshire, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, North Carolina, Michigan, Ohio, West Virginia, Maryland, Pennsylvania, New Jersey, Wisconsin, and the District of Columbia; (2) from points in Box Elder, Cache, Rich, Weber, Tooele, Davis, Morgan, Salt Lake, Utah, and Wasatch Counties, Utah, to points in Tennessee on and east of Interstate Highway 65, points in South Carolina, Georgia, Florida (except Escambia, Santa Rosa, Okaloosa, Walton Holmes, Washington, and Bay Counties), Alabama (except Washington, Mobile, Baldwin, and Escambia Counties), Indiana and points in Illinois on and north of U.S. Highway 6; (3) from points in Maine, Vermont, New Hampshire, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, North Carolina, Michigan, (except Battle Creek and Benton Harbor), to points in Utah; (4) from points in Tennessee on and east of Interstate Highway 25, points in South Carolina, Georgia, Florida, (except Escambia, Santa Rosa, Okaloosa, Walton Holmes, Washington, and Bay Counties), Alabama (except Washington, Mobile, Baldwin, and Escambia Counties), Indiana (except points in the corporate limits of Hammond, Whiting, East Chicago, and Gary) and points in Illinois on and north of U.S. Highway 6, to points in Box Elder, Cache, Rich, Weber, Tooele, Davis, Morgan, Salt Lake, Utah and, Wasatch Counties, Utah; (Minneapolis, Minn.) *.

(B) *Road construction machinery and equipment*, as defined by the Commission, and lift trucks (except commodities which because of size or weight require the use of special equipment), in flat bed trailers, (1) from points in Utah, to points in Maine, Vermont, New Hampshire, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, North Carolina, and Michigan; (2) from points in Box Elder, Cache, Rich, Weber, Tooele, Davis, Morgan, Wasatch, Salt Lake, and Utah Counties, Utah, to points in Tennessee on and east of Interstate Highway 65, points in South Carolina, Georgia, Florida (except Escambia, Santa Rosa, Okaloosa, Walton Holmes, Washington, and Bay Counties), Alabama, (except Washington, Mobile, Baldwin, and Escambia Counties), and Indiana; (3) from points in Maine, Vermont, New Hampshire, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, North Carolina, and Michigan (except Benton Harbor and Battle Creek), to points in Utah; (4) from points in Tennessee on and east of Interstate Highway 65, points in South Carolina, Georgia, Florida, (except Escambia, Santa Rosa, Okaloosa, Walton Holmes, Washington, and Bay Counties), Alabama (except Washington, Mobile, Baldwin, and Escambia Counties) and Indiana, (except points in the corporate limits of Hammond, Whiting, East Chicago, and Gary). (Minneapolis or St. Paul, Minn., or points within 15 miles thereof.) * (c) (1) Road construction machinery and equipment, as defined by the Commission, and lift trucks, in flatbed trailers, restricted to commodities which because of size or weight require the use of special equipment, provided that the loading and/or unloading which necessitates the use of special equipment is performed by the consignor or consignee or both, (ii) road construction equipment and machinery and lift trucks, which because of size and weight require the use of special equipment, (iii) self-propelled articles, described in (ii) above, each weighing 15,000 pounds or more, (restricted to commodities transported on trailers).

(1) From points in Utah, to points in Maine, Vermont, and New Hampshire; (2) from points in Box Elder, Cache, Rich, Weber, Tooele, Davis, Morgan, Salt Lake, Utah, and Wasatch counties, Utah, to points in Tennessee on and east of Interstate Highway 65, points in South Carolina, Georgia, Florida (except Escambia, Santa Rosa, Okaloosa, Walton Holmes, Washington, and Bay Counties) and Alabama (except Washington, Mobile, Baldwin, and Escambia Counties); (South Dakota and Minneapolis or St. Paul, Minn., or points within 15 miles thereof or of the commercial zone thereof; or, Nebraska or Iowa, and points in Minnesota within 50 miles of Sioux Falls, S.D., and Minneapolis or St. Paul, Minn., or points within 15 miles thereof or of the commercial zone thereof).* The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 113855 (Sub-No. E187), filed April 4, 1975. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First National Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Signs, sign parts, and sign accessories*, restricted to iron and steel articles, as defined by the Commission, (A) from points in Washington, and Idaho, to points in Arizona, New Mexico, and Colorado; (B) from points in Oregon to points in New Mexico and Colorado; (C) from points in Oregon (except Coos, Curry, Douglas, Josephine, Jackson, Klamath, and Lake Counties), to points in Arizona (except Yuma and Mohave counties); (D) from points in Nevada (except Esmerelda, Nye, Lincoln, and Clark Counties), to points in Colorado (except Rio Blanco, Garfield, Mesa, Gunnison, Delta, Montrose, Ouray, Hinsdale, Mineral, Rio Grande, Conejos, Archuleta, San Juan, La Plata, San Miguel, Dolores, and Montezuma Counties); (E) from points in California in and north of Santa Cruz, Santa Clara, Stanislaus, Tuolumne, and Alpine Counties, to points in Colorado. The purpose of this filing is to eliminate the gateway of Clearfield, Utah.

No. MC 119777 (Sub-No. E6), (Correction) filed April 9, 1974, published in the FEDERAL REGISTER October 17, 1975. Applicant: LIGON SPECIALIZED HAULER, INC., P.O. Drawer L, Madisonville, Ky. 42431. Applicant's representative: Jean Holmes (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *iron and steel*, and *iron and steel articles*, which require special handling, because of size and weight (except machinery, materials, supplies, and equipment incidental to or used in the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum, and incidental to, or used in connection with (a) the discovery, development, production, and preservation of natural gas and petroleum, (b) the construction operation, repairs, servicing, dismantling, and maintenance of pipe lines and facilities for the storage of natural gas, gasoline, and petroleum, and (c) the dismantling and maintenance of plants and facilities for refining, recycling, processing, repressuring, and blending gasoline, natural gas, and petroleum); (60) from points in Kentucky on and east of a line beginning at Covington, Ky., thence along U.S. Highway 27 to junction U.S. Highway 460, thence along U.S. Highway 460 to junction Kentucky Highway 11, thence along Kentucky Highway 11 to junction Kentucky Highway 30, thence along Kentucky Highway 30 to junction U.S. Highway 25, thence along U.S. Highway 25 to junction U.S. Highway 25E, thence along U.S. Highway 25E to the Kentucky-Tennessee State line to points in Missouri on and north of a line beginning at the Missouri-Illinois State line extending along U.S. Highway 36 to junction U.S. Highway 24, thence along U.S. Highway 24 to the Missouri-Kansas State line. The purpose of this partial correction is to eliminate a duplicate appearing in (Part 60). The remainder of the application remains as previously published.

No. MC 124813 (Sub-No. E3), filed June 1, 1974. Applicant: UMTHUM TRUCKING CO., Eagle Grove, Iowa. Applicant's representative: William L. Fairbank, 1980 Financial Center, Des Moines, Iowa 50300. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry Commercial, animal and poultry feed*, in bags and in bulk, between points in that part of Illinois on and east of U.S. Highway 51 and on and north of U.S. Highway 36, on the one hand, and, on the other, points in Nebraska on and north of U.S. Highway 92 to junction U.S. Highway 30, thence along U.S. Highway 30 to the Nebraska-Wyoming State line. The purpose of this filing is to eliminate the gateway of Fort Dodge, Iowa.

No. MC 126034 (Sub-No. E5), filed June 3, 1974. Applicant: BUCKS COUNTY CONSTRUCTION CO., P.O. Box 196, Penndel, Pa. 19047. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such lime*, fence materials and building materials as would be embraced within machinery (including pumps, condensers, dynamos, motors and parts): (A) (1) from points in Delaware to those points in New Jersey on and north of a line beginning at the Delaware River on the Rancocas Creek near Riverside, New Jersey, thence extending east along said Creek to Browns Mills, New Jersey, where it crosses New Jersey Highway 530, thence east on New Jersey Highway 530 to the Barnegat Bay below Toms River, New Jersey; (2) from points in Maryland on and west of Interstate Highway 81 to points in New Jersey north and east of a line beginning at the Delaware River between Pennsylvania and New Jersey, thence south and east along New Jersey Highway 47 to its junction with an unmarked Highway near Heislerville, New Jersey, thence south along said unmarked Highway to the Delaware Bay near Moore's Beach, New Jersey; (3) from points that are both on and east of Interstate Highway 81 and on and west of Interstate Highway 95 to points in New Jersey on and north of a line beginning at the Delaware River between New Jersey and Pennsylvania at or near Burlington, New Jersey, thence extending east along New Jersey Highway 528 to its junction with New Jersey Highway 527, thence south along New Jersey Highway 527 to its junction with New Jersey Highway 37, thence south and east along New Jersey Highway 37 to the Atlantic Ocean at or near Seaside Heights, New Jersey.

(4) Points in Maryland on and east of U.S. Highway 1, (including those points in Maryland on the Delmarva Peninsula) to points in New Jersey on and north of a line beginning at the Delaware River between Pennsylvania and New Jersey near Trenton, New Jersey, thence extending east along New Jersey Highway 528, to its junction with New Jersey Highway 527, thence south along New Jersey Highway 527 to its junction with

V 40 214 NOV 5 75 XUM

New Jersey Highway 37, thence east along New Jersey Highway 37 to the Atlantic Ocean near Seaside Heights, N.J.; (B) *Such lime,* fence materials, and building materials, as would be embraced within construction machinery and equipment from points in Delaware and Maryland to those points in Pennsylvania and New Jersey which are both within forty miles of Philadelphia, Pennsylvania (including Philadelphia, Pennsylvania) and are also on and north of a line beginning at Lakewood, New Jersey and extending west on New Jersey Highway 526 to its junction with Interstate Highway 195, thence west along Interstate Highway 195 to its junction with New Jersey Highway 206, thence west along New Jersey Highway 206 to its junction with U.S. Highway 1 near Trenton, New Jersey, thence south and west along U.S. Highway 1 to Pennsylvania Highway 413, thence north and west along Pennsylvania Highway 413 to its junction with U.S. Highway 202, thence west along U.S. Highway 202 to its junction with Pennsylvania Highway 422, thence north and west along Pennsylvania Highway 422 to its junction with Pennsylvania Highway 61 near Reading, Pennsylvania. The purpose of this filing is to eliminate the gateways of (A) (1)–(4) unincorporated points in Bucks County, Pennsylvania that lie within the Philadelphia, Pennsylvania commercial zone. (B) Unincorporated points in Bucks County, Pa., that are within 40 miles of Philadelphia, Pa.

No. MC 126034 (Sub-No. E6), filed June 3, 1974. Applicant: BUCKS COUNTY CONSTRUCTION COMPANY, P.O. Box 196, Penndel, Pa. 19047. Applicant's representative: E. Stephen Heisley, 666 Eleventh St., NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes transporting: (A) *Such machinery* and boilers, and factory equipment, together with stocks and supplies when part of the movement of a factory as would be embraced within machinery (including pumps, condensers, dynamos, motors, and parts), between Wilmington, Delaware, on the one hand, and, on the other, points in New York, Connecticut, Massachusetts, Sayre and Erie, Pennsylvania, Martinsburg, West Virginia, and those in Pennsylvania on and east of the Susquehanda River; (B) *Such machinery* and boilers, and factory equipment, together with stocks and supplies when part of the movement of a factory as would be embraced within lime, fence materials, and building materials, from points in New York, Connecticut, Massachusetts, Washington, D.C., Sayre and Erie, Pennsylvania, Aberdeen, Maryland, Martinsburg, West Virginia, and those in Pennsylvania on and east of the Susquehanna River, to all unincorporated points in Bucks County, Pennsylvania; (C) *Such machinery* and boilers, and factory equipment together with stocks and supplies when part of the movement of a factory as would be embraced within construction machinery and equipment, (1) between points in Connecticut, New York, Massachusetts, on the one hand, and on the other, those points in Delaware within a forty mile radius of Philadelphia, Pennsylvania and those in Pennsylvania that are within forty mile radius of Philadelphia and are on and east of a line extending along Pennsylvania Highway 100 to its junction with U.S. Highway 202, thence south on U.S. Highway 202 to the Delaware line.

(2) Between Sayre and Erie, Pennsylvania, on the one hand, and, on the other, those points in Delaware within a forty mile radius of Philadelphia, Pennsylvania; (3) between Washington, D.C., and Aberdeen, Maryland, on the one hand, and, on the other, those points in Pennsylvania and Delaware which are within forty miles of Philadelphia, Pennsylvania and which are also on and east of a line beginning at St. Georges, Delaware and extending north along U.S. Highway 13 to its junction with Pennsylvania Highway 291, thence north along Pennsylvania Highway 291 to its junction with Pennsylvania Highway 611, thence north along Pennsylvania Highway 611 to its junction with U.S. Highway 202, thence north and east along U.S. Highway 202 to the Delaware River near New Hope, Pennsylvania; and (4) between Martinsburg, West Virginia, on the one hand, and, on the other, those points in Delaware within a forty mile radius of Philadelphia, Pennsylvania and those in Pennsylvania that are within a forty mile radius of Philadelphia, Pennsylvania and are on and east of a line beginning on Pennsylvania Highway 309 near Allentown, Pennsylvania and extending south on Pennsylvania Highway 309 to its junction with Pennsylvania Higway 611, thence south and west on U.S. Highway 1 to its junction with U.S. Highway 202, thence south of U.S. Highway 202 to the Delaware-Pennsylvania State line. The purpose of this filing is to eliminate the gateways of: (A) points in New Jersey that are within the Philadelphia, Pennsylvania commercial zone; (B) New Jersey; (C) points in New Jersey that are within forty miles of Philadelphia, Pa.

By the Commission.

[Notice No. 907]

ASSIGNMENT OF HEARINGS

OCTOBER 31, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 124947 Sub 38, Machinery Transports, Inc., now assigned November 12, 1975 at Denver, Colorado, is canceled and the application is dismissed.

MC 110144 Sub 15, Jack C. Robinson, d.b.a. Robinson Freight Lines continued to November 25, 1975 (1:00 p.m.) at Nashville, Tenn., in the Department of Labor's Conference Room, C-1 Cordell Hull Building.

MC 125433 Sub 59, F-b Truck Line Company, a Corp., now assigned December 2, 1975 at San Francisco, Calif., will be held in Room 13025, Federal Bldg., & U.S. Courthouse, 450 Golden Gate Avenue, San Francisco, Calif.

MC 97710 Sub 7, Peters Truck Lines, now assigned December 8, 1975 at Sacramento, California, is cancelled and reassigned for hearing on the 3rd day of December, 1975, (3 days), at San Francisco, California in Room 13025, Federal Building & U.S. Courthouse, 450 Golden Gate Avenue; and continued to Medford, Oregon on December 8, 1975, (2 weeks), at the Medford Holiday Inn, 2300 Biddie Road.

MC 99140 Sub 11, Midway Motor Freight Lines, Inc., now assigned December 2, 1975 at Little Rock, Arkansas is postponed to January 12, 1975 (2 weeks) at Little Rock, Arkansas; in a hearing room to be designated later.

[Ex Parte No. 270 (Sub-No. 9)]

GRAIN AND GRAIN PRODUCTS

Investigation of Railroad Freight Rate Structure

It appearing, That petitions were filed on August 28, 1975, by the Western Railroad respondents; on September 9, 1975, by the New Orleans Traffic and Transportation Bureau; on September 15, 1975, by the New York State Department of Transportation; on October 20, 1975, by the Special Projects Staff; and numerous letters were received from interested parties requesting the Commission to conduct prehearing conferences in this proceeding for the purpose of clarifying the issues and objectives of this investigation; seeking agreement and accord as to source material and marketing evidence in order to avoid repetition and redundancy in the evidence submitted; and determining whether it is possible to select typical and representative rates to be utilized as a basis for cost studies to be adduced in this proceeding;

It further appearing, That no impediment whatsoever exists to prevent any party or parties to this proceeding from coordinating their activities or cooperating in their efforts to avoid redundancy in the assimilation of evidence for submission in the course of this proceeding;

It further appearing, That numerous parties in this proceeding convened in St. Louis, Missouri, on June 12, 1975, and addressed themselves to the issues raised in the aforementioned petitions;

It further appearing, That our order of May 19, 1975 specifies with sufficient clarity the issues and objectives of our investigation and the procedures to be followed in this proceeding;

And it further appearing, That, because of problems that have occurred in

connection with studies being conducted outside this Commission, it has become necessary to postpone the filing dates in this proceeding:

Wherefore, and good cause appearing:

It is ordered, That the petitions moving for a prehearing conference in this proceeding are hereby denied for the reason that insufficient grounds exist to warrant granting the action sought at this time.

It is further ordered, That the filing schedule contained in our order of July 24, 1975, shall be, and it is hereby, modified to the extent that opening statements of fact and argument may be submitted by any parties to this proceeding on or before February 2, 1976; rebuttal statements may be submitted on or before April 5, 1976; and replies (surrebuttal) may be submitted on or before May 17, 1976.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy in the office of the Commission's Secretary and by filing a copy with the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., on this 24th day of October, 1975.

By the Commission, Commissioner Hardin, Coordinator.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Notice No. 13]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

OCTOBER 31, 1975.

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application), to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules-Motor Carriers of Passengers, 1969 (49 C.F.R. 1042.2(c)(9)) and notice thereof to all interested persons is hereby given as provided in such rules (49 C.F.R. 104.2(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 C.F.R. 1042.2(c)(9)) at any time, but will not operate to stay commencement of the proposed operations unless filed on or before December 5, 1975.

Successively filed letter-notices of the same carrier under the Commission's Revised Deviation Rules-Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

MOTOR CARRIERS OF PASSENGERS

No. MC 1515 (Deviation No. 699), GREYHOUND LINES, INC., Greyhound Tower, Phoenix, Ariz. 85077. filed October 23, 1975. Carrier proposes to operate as a *common carrier,* by motor vehicle, of *passengers and their baggage,* and *express* and *newspapers* in the same vehicle with passengers, over a deviation route as follows: From Pittsburgh, Pa., over U.S. Highway 22 to junction Interstate Highway 79, thence over Interstate Highway 79 to junction unnumbered highway west of Morgantown, W. Va., thence over unnumbered highway to junction U.S. Highway 19, thence over U.S. Highway 19 to Morgantown, W. Va., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property, over a pertinent service route as follows: From Pittsburgh, Pa., over Pennsylvania Highway 51 to junction unnumbered highway, thence over unnumbered highway to junction Pennsylvania Highway 51, thence over Pennsylvania Highway 51 to Uniontown, Pa., thence over U.S. Highway 119 to Morgantown, W. Va., and return over the same route.

By the Commission.

[Notice No. 40]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

OCTOBER 31, 1975.

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application), to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules-Motor Carriers of Property, 1969 (49 C.F.R. 1042.4(c)(11)) and notice thereof to all interested persons is hereby given as provided in such rules (49 C.F.R. 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 C.F.R. 1042.4(c)(12)) at any time, but will not operate to stay commencement of the proposed operations unless filed on or before December 5, 1975.

Successively filed letter-notices of the same carrier under the Commission's Revised Deviation Rules-Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

MOTOR CARRIERS OF PROPERTY

No. MC 906 (Deviation No. 9), CONSOLIDATED FORWARDING CO., INC., 1300 N. Tenth St., St. Louis, Mo. 63106, filed October 20, 1975. Carrier proposes to operate as a *common carrier,* by motor vehicle, of *general commodities,* with certain exceptions, over a deviation route as follows: From junction U.S. Highway 66 and U.S. Highway 36, over U.S. Highway 36 to junction Interstate Highway 35, thence over Interstate Highway 35 to Kansas City, Mo., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From junction U.S. Highway 66 and U.S. Highway 36, over U.S. Highway 66 to junction U.S. Highway 40, thence over U.S. Highway 40 to Kansas City, Mo., and return over the same route.

No. MC 59680 (Deviation No. 94), STRICKLAND TRANSPORTATION CO., INC., P.O. Box 5689, Dallas, Tex. 75222, filed October 20, 1975. Carrier proposes to operate as a *common carrier,* by motor vehicle, of *general commodities,* with certain exceptions, over a deviation route as follows: From North Little Rock, Ark., over Interstate Highway 40 (using portions of U.S. Highway 66 where Interstate Highway 40 is incomplete) to junction U.S. Highway 287, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Little Rock, Ark., over U.S. Highway 67 to Texarkana, Tex., thence over U.S. Highway 82 to Paris, Tex., thence over Texas Highway 24 to Greenville, Tex., thence over U.S. Highway 67 to Dallas, Tex., thence over Texas Highway 114 to Rhome, Tex., thence over U.S. Highway 287 to junction Interstate Highway 40 and return over the same route.

No. MC 109533 (Deviation No. 8), OVERNITE TRANSPORTATION COMPANY, P.O. Box 1216, Richmond, Va. 23309, filed October 9, 1975. Carrier proposes to operate as a *common carrier,* by motor vehicle, of *general commodities,* with certain exceptions, over a deviation route as follows: From Bluefield, W. Va., over U.S. Highway 21 to Charleston, W. Va., thence over U.S. Highway 35 to junction Ohio Highway 7, thence over Ohio Highway 7 to Gallipolis, Ohio, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Bluefield, W. Va., over U.S. Highway 460 to junction West Virginia Turnpike (Interstate Highway 77), thence over West Virginia Turnpike to Charleston, W. Va., thence over Interstate Highway 64 to Huntington, W. Va., thence over U.S. Highway 52 to Chesapeake, Ohio, thence over Ohio Highway 7 to

V 40 214 NOV 5 75 XUM

Gallipolis, Ohio, and return over the same route.

No. MC 134308 (Deviation No. 3), CADDO EXPRESS, INC., P.O. Box 10280, Palo Alto, Calif. 94303, filed October 20, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Selling, Okla., over U.S. Highway 60 to junction U.S. Highway 183, thence over U.S. Highway 183 to Clinton, Okla., thence over Interstate Highway 40 to junction U.S. Highway 281, thence over U.S. Highway 281 to Anadarko, Okla., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Selling, Okla., over U.S. Highway 270 to Oklahoma City, Okla., thence over U.S. Highway 62 to Anadarko, Okla., and return over the same route.

By the Commission.

[Notice No. 87]

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

OCTOBER 31, 1975.

The following publications include motor carrier, water carrier, broker, freight forwarder and rail proceedings indexed as follows: (1) grants of authority requiring republication prior to certification; (2) notices of filing of petitions for modification of existing authorities; (3) new operating rights' applications directly related to and processed on a consolidated record with finance applications filed under sections 5(2) and 212(b); (4) notices of filing of sections 5(2) and 210(a)(b) finance applications; and (5) notices of filing of section 212(b) transfer applications.

Each applicant (except as otherwise specifically noted) states that there will be no significant effect on the quality of the human environment resulting from approval of its application in compliance with the requirements of 49 C.F.R. § 1100.250.

Protests to the granting of the requested authority must be filed with the Commission on or before December 5, 1975 (unless otherwise specified). Failure seasonably to file a protest will be constructed as a waiver of opposition and participation in the proceeding. A protest should comply with section 247(d) or section 240(c) as appropriate of the Commission's General Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and a detailed description of the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest (except for petitions and Finance Dockets under Rule 40 requiring the original and six (6) copies of the protest) shall be filed with the Commission, and a copy shall be served concurrently upon applicant's or petitioner's representative, or applicant or petitioner if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) or section 240(c)(4) of the special rules, and shall include the certification required therein.

No. MC 105566 (Sub-No. 92) (Republication), filed December 22, 1972, and published in the Federal Register issue of February 1, 1973, and republished this issue. Applicant: SAM TANKSLEY TRUCKING, INC., P.O. Box 1119, Cape Girardeau, Mo. 63701. Applicant's representative: Thomas F. Kilroy, P.O. Box 624, Springfield, Va. 22150. A Decision and Order of the Commission, Division 1, dated October 15, 1975, and served October 23, 1975, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over *irregular routes*, of (1) *such merchandise* as is dealt in by wholesale, retail, and chain grocery and food business houses, and (2) *equipment, materials, and supplies* used in the conduct of such businesses when moving in mixed loads with the commodities in (1) above, from Cincinnati, Ohio to Memphis, Tenn., Irving, Tex., and points in California, restricted to the transportation of traffic originating at and destined to the facilities owned or utilized by The Kroger Company. The purpose of this republication is to indicate the grant of authority to Irving, Tex., rather than Irwin, Tex. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a Certificate in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate, petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

No. MC 12645 (Notice of Filing of Petition to Modify License), filed October 10, 1975. Petitioner: PARAGON TRAVEL AGENCY, INC., 680 Purchase Street, New Bedford, Mass. 02740. Petitioner's representative: S. Harrison Kahn, Suite 733 Investment Building, Washington, D.C. 20005. Petitioner holds a license to engage in operation as a *broker* at New Bedford, Mass., in MC 12645, issued February 4, 1957, to sell or offer to sell the transportation of *Passengers and their baggage*, in special or charter operations, between points in the United States. By the instant petition, petitioner seeks to establish an employee-staffed office at Dartmouth, Mass., in the above authority. Any interested person or persons desiring to participate may file an original and six copies of his written representations, views or arguments in support of or against the petition within 30 days from the date of publication in the FEDERAL REGISTER.

No. MC 110060 (Notice of Filing of Petition to Modify Certificate), filed October 16, 1975. Petitioner: TRANSPORTES CHIHUAHUENSES. S.A. de C.V., 16 de Septiembre 250 Ote, Juarez Chihuahua, Mexico. Petitioner's representative: Horacio Ortega D., 111 San Francisco Street, El Paso, Tex. Petitioner holds a motor *common carrier* certificate in MC 110060, issued December 6, 1962, authorizing transportation, over regular routes, of *Passengers and their baggage, and newspapers, express and mail* in the same vehicle with passengers, between the United States-Mexico Boundary line and El Paso, Tex., serving no intermediate points: From the United States-Mexico Boundary line at El Paso over city streets

to the site of the bus terminal located at the intersection of Chihuahua and San Francisco Streets in El Paso, and return over the same route. Restriction: The service authorized herein is restricted against the transportation of traffic solely between El Paso, Tex., and Juarez, Mexico. By the instant petition, petitioner seeks to delete the bus terminal located at the intersection of Chihuahua and San Francisco Streets in El Paso, Tex., in the above described authority and to substitute in lieu thereof, 111 San Francisco Street in El Paso. The rest of the certificate will remain the same. Any interested person or persons desiring to participate may file an original and six copies of his written representations, views or arguments in support of or against the petition within 30 days from the date of publication in the FEDERAL REGISTER.

No. MC 133591 (Sub-No. 20) (Notice of Filing of Petition to Modify Commodity Description), filed October 17, 1975. Petitioner: WAYNE DANIEL TRUCK, INC., P.O. Box 303, Mount Vernon, Mo. 65712. Petitioner's representative: Arnold L. Burke, Suite 3520, 180 North La Salle Street, Chicago, Ill. 60601. Petitioner holds a motor *common carrier* certificate in No. MC 133591 (Sub-No. 20), issued September 2, 1975, authorizing transportation, as pertinent, over *irregular routes*, of *Frozen vegetables*, from points in Idaho, to Kansas City, Mo. By the instant petition, petitioner seeks to add *Frozen potatoes* to the commodity description in the above described authority. Any interested person or persons desiring to participate may file an original and six copies of his written representations, views or arguments in support of or against the petition within 30 days from the date of publication in the FEDERAL REGISTER.

No. MC 138235 (Notice of Filing of Petition To Modify Permit), filed October 17, 1975. Petitioner: DECKER TRANSPORT COMPANY, INCORPORATED, 5 Ida Street, Haledon, N.J. 07508. Petitioner's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Petitioner holds a motor *contract carrier* permit in No. MC 138235, issued November 21, 1974, authorizing transportation, over irregular routes, of (1) *Steel storage buildings, shelving, screen houses*, and *aluminum products*, and (2) *materials, equipment, and supplies* used in the manufacture or sale of the commodities in (1) above (except commodities in bulk), Between the facilities of Arrow Group Industries, Incorporated, at or near Cucamonga, Calif., Breese, Ill., and Pompton Plains, N.J., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), under a continuing contract or contracts with Arrow Group Industries, Incorporated. By the instant petition, petitioner seeks to add *Plastic articles* to the commodity description in the above described authority, and to add St. Louis, Mo., as a terminal point, so as to read, (1) *Steel storage buildings, shelving, screen houses, aluminum products*, and *plastic articles*, and (2) *materials, equipment and supplies* used in the manufacture or sale of the commodities in (1) above (except commodities in bulk), Between the facilities of Arrow Group Industries, Incorporated, at or near Cucamonga, Calif., Breese, Ill., Pompton Plains, N.J., and St. Louis, Mo., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), under a continuing contract or contracts with Arrow Group Industries, Incorporated. Any interested person or persons desiring to participate may file an original and six copies of his written representations, views or arguments in support of or against the petition within 30 days from the date of publication in the FEDERAL REGISTER.

APPLICATIONS UNDER SECTIONS 5 AND 210a(b)

The following applications are governed by the Interstate Commerce Commission's Special Rules governing notice of filing of applications by motor carriers of property or passengers under Sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto. (49 C.F.R. 1.240).

MOTOR CARRIERS OF PROPERTY

APPLICATIONS FOR CERTIFICATES OR PERMITS WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATION UNDER SECTION 5 GOVERNED BY SPECIAL RULE 240 TO THE EXTENT APPLICABLE

No. MC 8028 (Sub-No. 3), filed September 25, 1975. Applicant: BARRIEAU EXPRESS, INC., 301 Murphy Road, Hartford, Conn. 06114. Applicant's representative: Robert J. Gallagher, 1776 Broadway, New York, N.Y. 10019. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, (1) between points in Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont, on the one hand, and, on the other, points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, New Jersey, Delaware, West Virginia, Kentucky, Tennessee, Ohio, Michigan, Indiana, Illinois, Missouri, Iowa, Wisconsin, Minnesota, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Texas, Louisiana, Arkansas, Mississippi, Alabama, Georgia and Florida. The purpose of this filing is to eliminate the gateway of Hartford, Conn. and points within 20 miles thereof, (2) between points in Connecticut, New York, and New Jersey bounded by a line beginning at Long Island Sound, and extending along the Connecticut-Rhode Island and Connecticut-Massachusetts State Line to junction Massachusetts Highway 12 thence along Massachusetts Highway 12 to junction U.S. Highway 20, thence west along U.S. Highway 20 to junction Massachusetts Highway 23, thence along Massachusetts and New York Highways 23 to Catskill, N.Y., thence south along U.S. Highway 9-W to junction U.S. Highway 202, thence south along U.S. Highway 202 to Somerville, N.J., thence east along New Jersey Highway 28 to junction New Jersey Highway S-28, thence along New Jersey Highway S-28 to Old Bridge, N.J., thence northeast along unnumbered highway via Runyon, N.J. and Ernston, N.J., to junction U.S. Highway 9, thence along U.S. Highway 9 to South Amboy, N.J., thence to the Raritan Bay, and thence along the bay and ocean shores to the points of beginning at the Connecticut-Rhode Island State line, including points on Long Island, N.Y., and those on the indicated portions of the highways specified, on the one hand, and, on the other, points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, New Jersey, Delaware, West Virginia, Kentucky, Tennessee, Ohio, Michigan, Indiana, Illinois, Missouri, Iowa, Wisconsin, Minnesota, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Texas, Louisiana, Arkansas, Mississippi, Alabama, Georgia and Florida. The purpose of this filing is to eliminate the gateway of Chicago, Ill. and points within 50 miles thereof.

NOTE.—This is a gateway elimination request and is a matter directly related to a Section 5(2) proceeding in MC-F-12607 published in the FEDERAL REGISTER issue of August 20, 1975. If a hearing is deemed necessary, applicant requests it be held at Hartford, Conn.

No. MC 8958 (Sub-No. 30) (Partial Correction), filed September 29, 1975 published in the FEDERAL REGISTER issue of October 16, 1975, and republished as corrected in part this issue. Applicant: THE YOUNGSTOWN CARTAGE CO., a corporation, 825 West Federal Street, P.O. Box 119, Youngstown, Ohio 44501. Applicant's representative: John P. McMahon, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Contractors' equipment, machinery, and iron and steel articles* of the kind used in construction and manufacture, which because of size or weight require specialized handling or rigging, between points in Allegheny, Westmoreland, Fayette, Washington and Greene Counties, Pa., and points in Ohio and West Virginia, on the one hand, and, on the other, points in Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Delaware, Pennsylvania, Ohio, West Virginia, the District of Columbia and points in Maryland on and east of U.S. Highway 15. The purpose of this filing is to eliminate the gateways at Ohio Turnpike Interchange No. 15, Niles, Ohio, Toledo, Ohio, Steubenville, Ohio and its commercial zone, Martins Ferry, Ohio and its commercial zone, any point in that part of Ohio on and east of U.S. Highway 21 and on and north of a line beginning at junction U.S. Highways 21 and 36 and extending eastward along U.S. Highway 36 to junction U.S. Highway 22, thence along U.S. Highway 22 to the Ohio-West Virginia State Boundary line, points in New York, and those in Pennsylvania on and east of U.S. Highway 15.

V 40 214 NOV 5 75 XUM

(2) *Wire and wire products, steel, steel ware, steel coal doors, steel channels, steel fence posts, solder, sheet steel, tinpate, and terne plate* of the kind used in construction and manufacture, between points in that part of Indiana south of a line beginning at the Ohio-Indiana State Boundary line and extending along U.S. Highway 30 to Etna Green, Ind., thence along Indiana Highway 19 to junction Indiana Highway 10, thence along Indiana Highway 10 to the Indiana-Illinois State Boundary line, and north of a line beginning at the Ohio-Indiana State Boundary line and extending along U.S. Highway 50 to junction Indiana Highway 7, thence along Indiana Highway 7 to Columbus, Ind., thence along Indiana Highway 46 to Bloomington, Ind., thence along Indiana Highway 45 to junction Indiana Highway 54, thence along Indiana Highway 54 to the Indiana-Illinois State Boundary line, including points on the indicated portions of the highways specified, on the one hand, and, on the other, points in Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Delaware, Pennsylvania, West Virginia, District of Columbia, points in that part of Maryland on and east of U.S. Highway 15 and points in that part of Ohio on and east and north of U.S. Highway 250.

The purpose of this filing is to eliminate the gateways at Columbus, Portsmouth and Niles, Ohio, Ohio Turnpike Interchange 15, any point in that part of Ohio on and east of U.S. Highway 21 and on and north of a line beginning at junction U.S. Highway 21 and 36 and extending eastward along U.S. Highway 36 to junction U.S. Highway 22, thence along U.S. Highway 22 to the Ohio-West Virginia State Boundary line, Wheeling, W. Va., and points within 25 miles of Wheeling, W. Va., points in New York, and those in Pennsylvania on and east of U.S. Highway 15.

NOTE.—The purpose of this partial republication is to correct the territorial description in (1) above, and the commodity description in (2) above. This is a gateway elimination request and is directly related to a Section 5(2) proceeding in MC–F–12582, published in the FEDERAL REGISTER issue of June 4, 1975. If a hearing is deemed necessary, applicant does not specify a location.

No. MC 111398 (Sub-No. 15), filed October 14, 1975. Applicant: FISCHBACH TRUCKING CO., a Corporation, 921 Sherman Street, Akron, Ohio 44309. Applicant's representative: John P. McMahon, Suite 1800, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Such merchandise* as is manufactured or dealt in by persons whose primary business purpose is the manufacture, processing or distribution of rubber products and, in connection therewith, *equipment, materials and supplies* used in the conduct of such business when moving to or from plants, warehouses or other facilities used by such persons or wholesale or retail outlets for such products, (a) between points in Ohio, on the one hand, and, on the other, points in Massachusetts, Connecticut, Rhode Island, New Jersey, that part of New York on and east of a line beginning at the International Boundary line between the United States and Canada and extending along the St. Lawrence River to Alexandria Bay, N.Y., thence along New York Highway 12 to Binghamton, N.Y., thence along U.S. Highway 11 to the New York-Pennsylvania State Boundary line, and that part of Pennsylvania on and south of U.S. Highway 22 and on and east of Interstate Highway 83, and (b) between points in Ohio, on the one hand, and, on the other, Chicago and Chicago Heights, Ill. The purpose of this filing is to eliminate the gateway of Akron, Ohio.

(2) *Such commodities* as are manufactured, processed or dealt in by persons whose primary business purpose is the manufacture, processing or distribution of asbestos products when moving from or to plants, warehouses or other facilitis used by such presons, or wholesale or retail outlets for such products, from Amber, Pa., to points in Ohio south of U.S. Highway 40 and *returned shipments* of the above specified commodities, from points in Ohio south of U.S. Highway 40, to Amber, Pa. The purpose of this filing is to eliminate the gateways of Akron, Ohio and points in Ohio on and north of U.S. Highway 40. (3) *Such commodities* as are manufactured, processed and dealt in by rubber manufacturers and steel products manufacturers, and equipment, materials and supplies used in the conduct of such businesses, from points in Ohio, to points in that part of New York from Watertown, N.Y. over U.S. Highway 11 to its intersection with New York Highway 12, thence north along New York Highway 12 to Watertown, N.Y., including points on the indicated portions of the highways specified. The purpose of this filing is to eliminate the gateway of Akron, Ohio.

NOTE.—This is a gateway elimination request and is a matter directly related to a section 5(2) proceeding in MC–F–12656 published in the FEDERAL REGISTER issue of October 30, 1975. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC–F–12660. Authority sought for purchase by FAYETTEVILLE MOVING & STORAGE, INC., P.O. Box 3574, Fayetteville, NC 28305, of a portion of the operating rights of RABON TRANSFER, INC., Route #3, Box 61, Chadbourn, NC 28431, and for acquisition by JOHN K. BOYETTE, and ELOISE N. BOYETTE, both of 2213 Winterlochen Rd., Fayetteville, NC 28305, of control of such rights through the purchase. Applicants' attorney: Vaughan S. Winborne, 1108 Capital Club Bldg., Raleigh, NC 27601. Operating rights sought to be transferred: *Household goods*, as defined by the Commission, as a *common carrier* over irregular routes, between Whiteville, N.C., and points in North Carolina within 50 miles of Whiteville, on the one hand, and, on the other, points in Florida, Georgia, South Carolina, Maryland, Pennsylvania, and the District of Columbia. Vendee is authorized to operate as a *common carrier* in North Carolina, South Carolina, Georgia, Florida, Virginia, Maryland, Pennsylvania, and the District of Columbia. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–12661. Authority sought for purchase by RAU CARTAGE, INC., 1107 E. Noble St., Monroe, MI 48161, of a portion of the operating rights of FAIRALL TRUCKING COMPANY, 18472 Allen Road, Wyandotte, MI 48192, and for acquisition by JAMES E. RAU, JACK K. RAU, ROBERT E. BISHOP, AND OLLIEBELLE RAU, all of 1107 E. Noble St., Monroe, MI 48161, of control of such rights through the purchase. Applicants' attorneys: Wilhelmina Boersma, 1600 First Federal Bldg., Detroit, MI 48226, and William B. Elmer, 21635 E. Nine Mile Road, St. Clair Shores, MI 48080. Operating rights sought to be transferred: *Paper and paper products*, as a *contract carrier* over irregular routes, from Monroe, Mich., to points in that part of Pennsylvania on and west of U.S. Highway 19; *raw materials* used for the manufacture of paper and paper products, from points in that part of Pennsylvania on and west of U.S. Highway 19 to Monroe, Mich., with restriction; *paper and paper products*, between Donora, Pa., on the one hand, and, on the other, points in Michigan, Ohio, and Indiana, with restriction. Vendee is authorized to operate as a *contract carrier* in Michigan, Ohio, Indiana, Pennsylvania, Illinois, Wisconsin, and West Virginia. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–12662. Authority sought for control by IOWA PACKERS XPRESS, INC., 920 32nd Avenue West, Spencer, IA 51301, of ROBERT W. GROH, Box 3320, Sioux City, IA 51101, and for acquisition by WILLIAM E. HUSBY, and PATRICIA L. HUSBY, both of 1114 West 7th St., Spencer, IA 51301, of control of ROBERT W. GROH, through the acquisition by IOWA PACKERS XPRESS, INC. Applicants' representative: William E. Husby, 920 32nd Ave., West, Spencer, IA 51301. Operating rights sought to be controlled: *Edible bakery supplies*, as a *contract carrier* over irregular routes, from the plant site of Globe Products Company, of Clifton, N.J., to points in Colorado, Utah, Nevada, Arizona, California, Washington, and Oregon, with restriction. IOWA PACKERS XPRESS, INC., is authorized to operate as a *common carrier* in Iowa, Ohio, Connecticut, Massachusetts, Maryland, New Jersey, New York, Pennsylvania, Virginia, Nebraska, Delaware, Maine, Rhode Island, Vermont, New Hampshire, South Dakota, West Virginia, Minnesota, North Dakota, Kansas, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

SOUTHERN PACIFIC TRANSPORTATION COMPANY, One Market Street, San Francisco, California 94105, represented by Mr. Tom M. Davis, 3000 One Shell Plaza, Houston, Texas 77002, hereby gives notice that, on the 20th day of October, 1975, it filed with the Interstate

Commerce Commission at Washington, D.C., an application under Section 5(2) of the Interstate Commerce Act for an order approving and authorizing the acquisition of trackage rights over the Missouri Pacific Railroad Company between Harlingen, Cameron County and Placedo, Victoria County, and traversing Willacy, Kenedy, Kleberg, Nueces, San Patricio and Refugio Counties, all in the State of Texas, a distance of approximately 196.84 miles in lieu of operating on its own routes between Harlingen and Victoria, segments of which are sought to be abandoned in Docket No. AB–12 (Sub-No. 20), which application was assigned Finance Docket No. 28024.

In the opinion of the applicant, the subject matter of this application will not have any significant effect on the quality of the human environment. In accordance with the Commission's regulations (49 C.F.R. 1100.250) in *Ex Parte No. 55 (Sub-No. 4), Implementation—Nat'l Environmental Policy Act, 1969*, 340 I.C.C. 431 (1972), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall include information relating to the relevant factors set forth in Ex Parte No. 55 (Sub-No. 4), *supra*, Part (b) (1)–(5), 340 I.C.C. 431, 461.

The proceeding will be handled without public hearings unless protests are received which contain information indicating a need for such hearings. Any protests submitted shall be filed with the Commission no later than 30 days from the date of first publication in the FEDERAL REGISTER.

SOUTHERN PACIFIC TRANSPORTATION COMPANY, One Market Street, San Francisco, California 94105, represented by Charles W. Burkett, General Solicitor, Southern Pacific Transportation Company, One Market Street, San Francisco, California 94105, hereby gives notice that, on the 16th day of October, 1975, it filed with the Interstate Commerce Commission at Washington, D.C., an application under Section 5(2) of the Interstate Commerce Act for an order approving and authorizing the acquisition of trackage rights over the Atchison, Topeka and Santa Fe Railway Company between mile post 66 plus 1196.1 feet at Rosenberg, Fort Bend County and mile post 125 plus 3412.2 feet at Brenham, Washington County, a distance of approximately 59.62 miles, all in the State of Texas, for the routing of trains presently operated between Giddings and Houston via Hearne, which application was assigned Finance Docket No. 28023.

In the opinion of the applicant, the subject matter of this application, involving only the operation of one train a day in each direction, will not have any significant effect on the quality of the human environment. In accordance with the Commission's regulations (49 C.F.R. 1100.250) in Ex Parte No. 55 (Sub-No. 4), *Implementation—Nat'l Environmental Policy Act, 1969*, 340 I.C.C. 431 (1972), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall include information relating to the relevant factors set forth in Ex Parte No. 55 (Sub-No. 4), *supra*, Part (b) (1)–(5), 340 I.C.C. 431, 461.

The proceeding will be handled without public hearing unless protests are received which contain information indicating a need for such hearings. Any protests submitted shall be filed with the Commission no later than 30 days from the date of first publication in the FEDERAL REGISTER.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary*.

MOTOR CARRIER INTRASTATE APPLICATIONS

Notice of Filing

OCTOBER 31, 1975.

The following applications for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962. These applications are governed by Special Rule 1.245 of the Commission's Rules of Practice, published in the FEDERAL REGISTER, issue of April 11, 1963, page 3533, which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

California Docket No. A–55846, filed August 1, 1975. Applicant: PENINSULA AIR DELIVERY, 2443 Wyandotte Street, Mountain View, Calif. 94040. Applicant's representative: Dennis D. Kendall, (same address as applicant). Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *General commodities* (except as hereinafter provided), (1) Between all points and places in the San Francisco Territory as previously granted in decision No. 82198 and as set forth in exhibit "A" herein; and (2) Between all points and places on or within 20 lateral miles of the following routes: (a) U.S. Highway 101 between Healdsburg and Salinas, inclusive; (b) State Highway One between Carmel and its intersection with State Highway 17, inclusive; (c) State Highway 17 between its intersection with State Highway One and its intersection with Interstate Highway 580, inclusive; (d) Interstate Highway 580 between its intersection with State Highway 17 and its intersection with Interstate Highway 5, inclusive; (e) Interstate Highway 5 between its intersection with State Highway 4 at Stockton and its intersection with State Highway 152, inclusive; (f) State Highway 4 between its junction with Interstate Highway 80 near Pinole, and Stockton, inclusive; (g) State Highway 120 between its intersection with Interstate Highway 5 and its intersection with State Highway 99, inclusive; (h) State Highway 99 between Sacramento and Fresno, inclusive; (i) Interstate Highway 80 between its intersection with State Highway 37 at Vallejo and Sacramento, inclusive; (j) Interstate Highway 680 between its intersection with Interstate Highway 80 and its intersection with Interstate Highway 580.

(k) State Highway 116 between its junction with State Highway 101 and its junction with State Highway 29, inclusive; (l) State Highway 29 between its itersection with State Highway 37 and Napa, inclusive; and (m) State Highway 37 between its intersection with State Highway 29 and Interstate Highway 80, inclusive; In performing the service herin authorized, applicant may make use of any and all streets, roads, highways, and birdges necessary or convenient for the performance of said service. (Except that pursuant to the authority herein granted, carrier shall not transport any shipments of): (1) Used household goods, personal effects and office, store and institution furniture, fixtures and equipment not packed in accordance with the crated property requirements set forth in Item 5 of Minimum Rate Tariff 4–B. (2) Automobiles, trucks and buses, viz.: new and used, finished or unfinished passenger automobiles (including jeeps), ambulances, hearses and taxis; freight automobiles, automobile chassis, trucks, truck chassis, truck trailers, trucks and trailers combined, buses and bus chassis. (3) Livestock, viz.: barrows, boars, bulls, butcher hogs, calves, cattle, cows, dairy cattle, ewes, feeder pigs, gilts, goats, heifers, hogs, kids, lambs, oxen, pigs, rams (bucks), sheep, sheep camp outfits, sows, steers, stags, swine or wethers. (4) Liquids, compressed gases, commodities in semi-plastic form and commodities in suspension in liquids in bulk, in tank trucks, tank trailers, tank semitrailers or a combination of such highway vehicles. (5) Commodities when transported in bulk in dump trucks or in hopper-type trucks. (6) Commodities when transported in motor vehicles equipped for mechanical mixing in transit. (7) Portland or similar cements, in bulk or packages, when loaded substantially to capacity of motor vehicle. (8) Logs. (9) Commodities of unusual or extraordinary value. (10) Trailer coaches and campers, including integral parts and contents when the contents are within the trailer coach or camper. (11) Commodities requiring the use of special refrigeration or temperature control in specially designed and constructed refrigerator equipment; and (12) Explosives or dangerous articles. Intrastate, interstate and foreign commerce authority sought.

V 40 N 214 NOV 5 75 XUM

Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to the Public Utilities Commission, State of California, State Bldg., Civic Center, 455 Golden Gate Avenue, San Francisco, Calif. 94102.

Texas Docket No. 2603–B, filed October 21, 1975. Applicant. OBIE NATIONS, doing business as, TYLER BUS LINES, 2315 Lingner, Tyler, Tex. 75701. Applicant's representative: Paul D. Angenend, P.O. Box 2207, Austin, Tex. 78767. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *Passengers and their baggage* in intrastate, interstate and foreign commerce, between Tyler, Texas, and Hearne, Texas, as follows: From Tyler over Texas Highway 155 to Palestine, thence over U.S. Highway 79 to Hearne, and return over the same route, serving all intermediate points.

NOTE.—Applicant proposes to tack and coordinate the proposed additional services with all services authorized in intrastate commerce under Motor Bus Certificate No. 2603 and with all services now authorized in interstate and foreign commerce under authority granted in Docket No. MC 139829.

Hearing: Date, time and place will be scheduled approximately 30 days after publication in the FEDERAL REGISTER. Requests for procedural information should be addressed to the Railroad Commission of Texas, Capitol Station, P.O. Drawer 12967, Austin, Tex. 78711 and should *not* be directed to the Interstate Commerce Commission.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice No. 109]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

NOVEMBER 5, 1975.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before November 25, 1975. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC–76099. By order of October 31, 1975, the Motor Carrier Board approved the transfer to Wallace Hoffman, Doing Business as Hoffman Garage, Wathena, Kansas, of Certificate No. MC 124369, issued to Ray E. Leman, Doing Business as Leman Motor Service, Hiawatha, Kansas, authorizing the transportation of wrecked and disabled automobiles, trucks, truck-tractors, and trailers (except trailers designed to be drawn by passenger automobiles) by the use of wrecker equipment only, between points in Brown County, Kans., on the one hand, and, on the other, points in Missouri and Nebraska. Clyde N. Christey, 641 Harrison, Topeka, Kansas 66603 Attorney for applicants.

No. MC–FC–76135. By order of October 31, 1975, the Motor Carrier Board approved the transfer to Metals Transport, Inc., Wauwatosa, Wis., of the operating rights in Permit No. MC 138002 (Sub-No. 2) issued November 28, 1973, to Red Mountain Transport, Inc., Birmingham, Ala., authorizing the transportation of material handling equipment, parts and accessories therefor, and material, equipment, and parts supplies used in the manufacture and repair of such commodities, between points in the United States, including Alaska but excluding Hawaii. Richard A. Westley, 4506 Regent Street, Suite 100, Madison, Wis. 53705 Attorney for applicants.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.75-29769 Filed 11-4-75;8:45 am]

WISCONSIN HOLDING CO. AND McLOUTH STEEL CORP.

OCTOBER 31, 1975.

WISCONSIN HOLDING COMPANY AND McLOUTH STEEL CORPORATION, 300 South Livernois, Detroit, Michigan 48209, represented by Messrs. Donald A. Lochhead, Vice President and Treasurer and Gene E. Gann, Chairman of the Board and Chief Executive Officer, 300 South Livernois, Detroit, Michigan 48209, hereby give notice that, on the 2nd day of October, 1975, they filed with the Interstate Commerce Commission at Washington, D.C., a joint application under Section 5(2) of the Interstate Commerce Act for an order approving and authorizing the proposed transaction whereby the Wisconsin Holding Company shall purchase all of the outstanding capital stock of the Chicago, West Pullman & Southern Railroad Company, a carrier subject to Part I of the Act.

Applicant is not a carrier subject to either Part I or Part III of the Act, but all of applicant's stock is owned by McLouth Steel Corporation, which in turn owns all of the capital stock of R–W Service System, Inc., which is a common motor carrier subject to Part II of the Act.

The operations to be controlled are those of a switching and terminal line whose routes generally extend from 120th Street and Ashland Avenue, Chicago, Illinois, to 106th Street and Torrence Avenue, South Chicago, Illinois each of which points are termini. The mileage of the line to be purchased is 29.62 miles, which application was assigned Finance Docket No. 28007.

In the opinion of the applicants, the granting of the authority sought will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. In accordance with the Commission's regulations (49 CFR 1100.250) in Ex Parte No. 55 (Sub-No. 4), Implementation—Nat'l Environmental Policy Act, 1969, 340 I.C.C. 431 (1972), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall include information relating to the relevant factors set forth in Ex-Parte No. 55 (Sub-No. 4), supra, Part (b)(1)–(5), 340 I.C.C. 431, 461.

The proceeding will be handled without public hearings unless protests are received which contain information indicating a need for such hearings. Any protests submitted shall be filed with the Commission no later than December 5, 1975.

[SEAL] ROBERT L. OSWALD,
Secretary.

FEDERAL TRADE COMMISSION

MAIL ORDER MERCHANDISE

Promulgation of Trade Regulation Rule; Statement of Basis and Purpose

V 40 214 NOV 5 75 XUM

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

PART 435—MAIL ORDER MERCHANDISE

Promulgation of Trade Regulation Rule

Correction

In FR Doc. 75-28203, appearing at page 49492, in the issue for Wednesday, October 22, 1975, the following text was inadvertently omitted. It should appear after the signature on page 49494.

STATEMENT OF BASIS AND PURPOSE

CHAPTER I. HISTORY OF THE PROCEEDING

On September 28, 1971 the Commission announced the initiation of a proceeding for the promulgation of a Trade Regulation Rule concerning undelivered mail order merchandise and services and published a proposed Rule.[1] All interested persons were invited to file written data, views or arguments concerning the proposed Rule or to present such information orally at public hearings in Washington, D.C.

Public hearings were held in Washington, D.C., March 27-29, 1972,[2] with Mr. William D. Dixon, Assistant Director Rules and Guides of the Bureau of Consumer Protection presiding. Every person who had expressed a desire to present his views orally at these hearings was accorded the opportunity to do so. Written statements and comments concerning the proposal were received for a period of seven months from September 28, 1971, until April 28, 1972.

After careful consideration of the Record thereby produced, the Commission published a revised proposed Rule on March 8, 1974, and invited written comments on the revisions.[3]

The Public Record of this proceeding closed June 14, 1974.[4]

The Record includes 447 pages of transcript from the hearings held in Washington, D.C.,[5] some 3,200 pages of prenotice consumer letters complaining of mail order practices,[6] a compilation of some 8,000 pages of general record composed mainly of consumer complaints,[7] about 2,300 pages of substantive record contributed by industry members, government and private groups, as well as news articles and Commission complaint proceedings on point,[8] and finally some 1,200 pages of comments on the revised proposed Rule as well as many more recent consumer complaints received by the Commission.[9]

Upon careful analysis and review of the entire Record described above, the Commission has made modifications to the revised proposed Rule published March 8, 1974. The revisions do not raise issues of law or fact which were not fully addressed in the Record. Therefore the Commission is promulgating this Rule without further invitaton for comment on the aforesaid modifications. A summary of the Rule's provisions appears below in Chapter VI, Mechanics of the Rule.

CHAPTER II. NATURE OF MAIL ORDER SALES

"Mail order sales" refers to a marketing method whereby orders are solicited for goods which are to be ordered by mail. Some of the means by which orders are solicited include magazine and newspaper advertisements, catalogs, direct mail solicitations and telephone solicitations. While the method of payment may be cash, check, money order, credit card or debit of the buyer's account, in most instances payment is made at the time of ordering. A variety of goods are offered in this manner including books, records, wearing apparel, home furnishings, novelty items, magazines, and nursery items.

Less mobile consumers especially, including the elderly, the sick or those living in remote or rural areas shop in this manner as a matter of convenience. Others do so because of possible savings or the variety or uniqueness of goods offered.

There are about 6,000 firms in the mail order industry[10] with sales estimated at over 40 billion dollars annually.[11]

CHAPTER III. PROBLEMS WITH MAIL ORDER SALES

The Record of this proceeding contains well over 10,000 pages of complaints regarding mail order sales coupled with hundreds of pages of letters and supporting materials, as well as testimony, from state and local agencies and consumer groups urging action by the Commission to correct these problems. The overwhelming majority of these complaints deal with delays in delivery or outright failure to deliver merchandise and almost half express extreme frustration due to the failure of mail order sellers to responsively answer inquiries concerning orders. In addition, a significant number of complaints concern failure to make refunds, or excessive delays in making refunds, on long overdue orders.

A. *Failure to deliver.* Failure to deliver pre-paid merchandise is by far the most frequent consumer complaint in mail order sales. The experience of federal agencies as well as state and local officials and consumer interest groups in recent years confirm the magnitude of this problem.[12]

In 1970 the Federal Trade Commission participated with other federal, state and local agencies in the formation of consumer protection coordinating committees in Boston, Chicago, Los Angeles, Philadelphia and San Francisco. Through a cooperative effort, consumer complaints from these cities were analyzed and statistics were compiled ranking the most frequent consumer complaints and linking specific types of businesses to the practices complained of during a six month period. Failure to deliver merchandise that has been paid for was found to be by far the most frequent consumer complaint and complaints against mail order houses for failure to deliver ranked near the top in terms of the type of business complained about most by consumers.[13]

For the last seven months of 1971, the President's Office of Consumer Affairs received over 1,100 consumer complaints concerning mail order practices, exceeded in volume only by complaints concerning automobiles and auto service. An analysis of two representative months revealed that non-delivery of ordered merchandise comprised over 60 percent of mail order complaints.[14]

The New York City Department of Consumer Affairs "was plagued by large numbers of complaints from consumers who had pre-paid for advertised merchandise only to find that all they ever received in return was their cancelled check" and as a result, Regulation 8 of the New York City Consumer Protection Law was promulgated in 1971 requiring delivery or a refund within six weeks.[15]

The Bay Area Consumer Protection Coordinating Committee reported in 1971 that failure to deliver mail order merchandise was the "most common complaint" received and that "the largest

[1] 36 FR 19092 (1971).

[2] Public hearings originally scheduled for January 24 and 25, 1972, were rescheduled at the request of industry members. 37 FR 622 (1972).

[3] 39 FR 9201 (1974).

[4] The original April 15, 1974 deadline for receipt of comments was extended to June 14, 1974, in response to petitions from industry members. 39 Fed. Reg. 13563 (April 15, 1974). The Record was re-opened briefly for inclusion of a data submission and comments thereon. 39 Fed. Reg. 40515 (November 18, 1974).

[5] R. 215-33-1-1 (Hereinafter Tr.).

[6] R. 215-1-4, Vols. 1-6 (Hereinafter R.I.). These letters were received before the Commission initiated this proceeding. In almost all cases permission was granted to place these complaints in the public record. (Where permission was not obtained names, addresses and references to parties have been deleted.)

[8] R. 215-33-1-2, Vols. 1-4 (Hereinafter R. III).

[9] R. 215-33-1-3, Vols. 18-20 (Hereinafter R. IV).

[10] R. IV, pp. 8869, 9202, 9214.

[11] Statement of Mrs. Virginia Knauer, Special Assistant to the President for Consumer Affairs, (Hereinafter Knauer) Tr. 10; Statement of Congressman Benjamin Rosenthal, Tr. 18; Statement of Mr. John J. Daly, Vice President, Direct Mail Advertising Association, Tr. 32 quoting from "Business and the Consumer: The Creative Interface" by Peter Weaver. A more recent estimate placed industry annual sales at 14.4 billion dollars. N.Y. Times, August 24, 1975, § 3 at 1, col. 3.

[12] It is difficult to determine whether persons complaining of failure to deliver merchandise have experienced a total failure to deliver or are victims of unreasonably long delays who will ultimately receive their orders. The Record does contain instances of persons writing to complain of non-delivery writing at a later date to report that the seller had finally tendered the merchandise or a refund.

number of complaints concern[ed] mail order houses".[16]

Failure to deliver mail order merchandise and services has continued to be a major consumer complaint as demonstrated, for example, by a report from the Attorney General of Wisconsin who wrote to the Commission in support of the revised proposed Rule, by letter dated April 10, 1974:

> In 1970, failure to deliver ranked first in the number of complaints received categorized by the nature of the practice. In 1971, failure to deliver again ranked first while in 1972 and 1973, failure to deliver was second in this regard. In 1973, my Office of Consumer Protection received 2,125 complaints involving failure to deliver which represented 10 percent of the total responses in the nature of complaint area.[17]

The Record of this proceeding contains over 3,000 consumer complaint letters against more than 800 mail order sellers, of which over 90 percent concern failure to deliver mail order merchandise.[18] Many consumers complained about more than one company.

Almost half of all complainants—48.7 percent—reported that they never received any communication whatsoever concerning their unfilled order.[19] Typical of these complaints is one received from a Dayton, Ohio consumer who wrote:

> Last June a new prouct, a small movie projector, was described in the Sunday feature, * * * which I subsequently ordered. My check * * * was deposited * * * a few days after they received my order and returned to me cancelled (PAID). About a month later I sent a letter of inquiry to them which they never answered. Since then I have sent them three more letters, two by certified mail which they received and the Direct Mail/Marketing Association * * * has asked them twice to check into the problem, all without results. No response to date [April 8]; neither the projector or [sic] a reply.[20]

Another example came from a Chicago man who wrote:

> On July 1971 I placed an order with this firm for a stereo amplifier kit and enclosed payment in full, in the form of a personal check for $153.00. By the beginning of August, I had neither received the amplifier nor any reply from this firm to indicate whether my order had been received, or when the item would be shipped, so on August 9th I wrote a follow-up letter of inquiry. * * * At the end of August, I received the deposited-and-cancelled check back through my bank, indicating that my order was, in fact received. However, as of this date [October 24], I still have not received the amplifier, nor any other communication from [the company], and it appears that I have lost $153.00.[21]

Other consumers reported receiving correspondence from a company concerned stating: the order was being processed,[22] shipment of the order was delayed for various reasons [23] or the order had already been shipped.[24]

Consumers also complained that partially filled orders were never completed. For example one consumer wrote:

> In June I ordered a combination of 9 records and books * * * I pre-paid the order and on or about July 13 I received 3 of the ordered records along with a note saying that two items were out of stock. They also informed me that all the rest of my order was on back order and I would receive it soon. In mid-July I sent * * * another pre-payment * * * for two or three items. They have cashed my checks but I have never received the rest of my two orders * * * I would be very much appreciative if you could assist me.[25]

More than a few consumers, after many unsuccessful attempts to obtain either the merchandise ordered or a refund, learned that the mail order company had either gone out of business, moved to an unknown address, filed for reorganization or been petitioned into bankruptcy.[26]

B. *Failure to deliver within a reasonable time.* The Record also contains many letters from irate consumers who received their ordered merchandise only after waiting unreasonable periods of time, often without any explanation being given by the seller for the delays.

Frequently the need for such merchandise has long since passed before it is ever received. A classic example came from a consumer who wrote in support of the original proposed Rule:

> From personal experience, I have found that some mail order houses are not only unbelievably slow, but will ignore inquiries about orders. Last November, I ordered Christmas decorations from * * * a prominent mailorder gift business. When Christmas neared, I wrote them inquiring why I had not received the order. There was no answer so I wrote back asking for a refund. This second letter was also ignored. My Christmas decorations finally did arrive. In early January. They had been shipped the day before Christmas.[27]

Another consumer writing to support the original proposed Rule summed up similar experiences by concluding: "It is very disheartening to receive supposed Christmas presents (ordered in September and October) at Easter time." [28]

Sometimes, delays in filling orders are unavoidable and out of the control of the seller. On the other hand, delays can frequently be attributed to the fact that many sellers place advertisements or solicit orders for merchandise either without a sufficient quantity on hand to fill the orders which might be reasonably expected or with no stock on hand at all.[29] In the latter instance, the buyer is, in effect, providing the seller with an interest-free loan with which to purchase the advertised goods. Even where the order is not prepaid the seller is still causing the buyer great inconvenience by soliciting an order he cannot fill within a reasonable time and is also competing unfairly against other merchants. Although the lack of inventory does not always mean long delay in filling orders, all too often it does.

Although there was no unanimity of opinion among consumers as to what is a "reasonable time" for shipment where the seller has given no indication of shipping time, the specification of thirty days in § 435.1(a)(1) of the Rule is soundly

[29] One witness at the hearings, an attorney for several mail order companies, stated flatly that it is a widespread business practice not to have an item in stock when advertised and that some advertisers may never have any stock at all. Statement of Monty Levy, Esq. Tr. 211, 222.

Several consumers noted incredulously that the concern they were dealing with was still advertising and soliciting orders long after they had sent back-order notices. One reported: "I recently had an inordinate amount of difficulty with a lamp order * * * I sent a check with my order (approx. $30.00). The first reply from the company was a form card which came along in about two weeks and advised that the lamps were out of stock and would be shipped later—about 1-2 weeks. They dribbled me along like this for about six months, at which time I requested my money back. I allowed over three weeks . . . to process the money back; and getting no reply I appealed to action line [Direct Mail Adv. Assn], [The company] finally refunded my money, claiming computer error. Item: *Over six months after I placed this lamp order, [the company] was still offering the lamp in their current catalog.*" (Emphasis added.) R. IV, p. 8732. *See also* R. II, pp. 92, 94, 128, 165, 391, 394, 635, 771, 874, 2052, 3300, 3766, 4885, 4912, 4916, 5097, 5721, 5927, 6420, 6974, 7886.

The practice of soliciting mail orders for merchandise prior to making a decision as to whether or not to fill the orders may in certain circumstances be a lawful business practice. For example, in the book publishing business there is a practice called "dry testing" in which marketer disseminates promotional material to the general public soliciting subscriptions to a continuity book series before the books have been published. Whether or not the book series is actually published depends on the size of the response to the solicitation. The Commission has stated that it does not object to the use of dry testing a continuity book series to be sold by mail order where the solicitation does not have the capacity or tendency to mislead the public into believing that the books have been or will be published, the terms and conditions of the transaction and other material facts are clearly and conspicuously disclosed and persons who subscribe are given timely notice of the status of their orders. See Advisory Opinion to Wentworth Press, Inc. dated March 27, 1975 (File No. 753 7003).

V 40 214 NOV 5 75 XUM

based upon the evidence in the Record."[20] A substantial number of consumers writing the Commission concerning mail order transactions reported their distress and dissatisfaction when they did not receive ordered goods within approximately 30 days of placing their order.[21] In addition, many consumers who wrote supporting the published proposed Rules expressed approval of the time limits contained therein of either 21 [22] or 30 [23] days.

Consumer surveys conducted by a mail order merchandiser, Sunset House, and a trade association, Direct Mail/Marketing Association, also show that substantial numbers of consumers expect shipment of mail order merchandise within 30 days of receipt of an order. For example in the Sunset House survey, persons not in back order situations (persons in the same situation as someone about to order merchandise) were asked what their wishes would be "[i]f you ordered merchandise from Sunset House that was not available for immediate shipment at the time your order was received • • •" Specifically, they were asked "• • • how would you like us to handle the matter?" 554 persons who were past Sunset House customers were asked to choose between "I would be willing to wait 15 days. If you can't ship by the 15th day, I want you to *automatically* refund my remittance at that time" and "I would be willing to wait 15 days or longer provided I could expect a prompt refund if I requested one at a later date." 212 persons responded with 100 choosing to wait only 15 days more and 112 choosing the option of waiting more than 15 days with the right to request a refund. Thus 18.1 per cent of the total sample (and 47.2 per cent of the responding persons) stated that they would not wait more than 15 days beyond "immediate shipment" for Sunset House to ship merchandise.[24] The Commission notes that it is not possible to establish, from Sunset House's submission describing the survey and its results, the statistical significance of the cited results, but the survey *does* indicate that substantial numbers of consumers who are in the position of someone exposed to a solicitation for an order express a clear expectation that merchandise will be shipped in far less than 30 days of the seller's receipt of the order and that a delay in shipment beyond that point would be totally unacceptable.

The consumer survey conducted for Direct Mail/Marketing Association (DM/MA) also provides support for the proposition that a substantial number of consumers expect goods to be shipped within 30 days of receipt of an order. Once again, on the basis of the submission describing the survey and its results, the Commission is not able to evaluate the statistical significance of the survey.

The DM/MA survey asked respondents the following question: "Suppose a company were not able to ship a product in 30 days—and it notified you by mail about this fact stating when shipment would be made. • • • Generally speaking do you think in most cases you would want to wait for your order?" [25] 17.6 percent of the persons queried stated that they would not want to wait more than 30 days,[26] providing further information that substantial numbers of consumers when placing mail orders expect the seller to ship within 30 days of receipt of the order.

The DM/MA survey also records the response of persons who had received at least part of their order when asked how much longer they would have waited. Of persons who had waited less than two weeks for their order, 10.2 percent reported that they would not have waited an additional 15 days.[27] Once again the survey results indicate the expectations of a substantial number of consumers familiar with mail order transactions that sellers will ship mail order merchandise within thirty days of receipt of an order.

Thus, although there may be no unanimity as to what is a reasonable time for shipment, the Record indicates that a substantial number of persons, if not otherwise informed, will believe that thirty days is a reasonable time within which to ship merchandise. The Record demonstrates that a substantial number of consumers, in fact, not only expect shipment of merchandise within 30 days under such circumstances; they virtually demand shipment within that time.

C. *Failure to refund promptly.* Many consumers have found it extremely difficult, and in some cases impossible, to obtain refunds on long overdue orders.

"What recourse does a citizen of one State have when doing business with a company in another State?" queried a disgruntled Ohio consumer upon relating his experience in attempting, unsuccessfully, to secure a refund on a long overdue order:

> Last winter an ad appeared . . . promoting [lettered] T-shirts • • • My children pooled their allowance money and a check for $6.50 was sent to [the company]. The company cashed the check, however, we have yet to receive the shirts. For the past 6 months I have been attempting to get a refund on the shirts—but to no avail. It is a disgrace that business is permitted to cheat the public—and now children seem to be fair play.[28]

Consumers also reported that refunds were made only after numerous requests to the seller, pleas to a governmental agency to intercede and months of waiting as the following excerpt of a consumer letter demonstrates:

> I received a check today • • • exactly 110 days after the purchase was ordered by mail. The company enclosed no letter of comment or apology. In view of the prompt response after four letters and months of being ignored, it does not seem unreasonable to believe that my telling the company I was referring the problem to the FTC had something to do with it • • • [I]t remains an outrageous situation when a consumer has to go directly to the FTC to get a company to conduct its business in a responsible manner.[29]

The Record also demonstrates that refunds are no more readily forthcoming where the consumer receives a part of an order.[30]

In a related matter, a number of persons expressed concern and outrage over the practice of some sellers who, when unable to ship prepaid merchandise, give "refunds" in the form of a credit "voucher", "slip" or "memo" instead of cash or a negotiable instrument.[31] Upon becoming a victim of this practice one consumer wrote: "I was furious at this tactic." [32] Another consumer who had a similar experience concluded that "I definitely think there should be a time limit on refunds, and that credit slips should not be issued." [33]

D. *Failure to responsively answer consumer inquiries.* The Record reveals that many mail order sellers either refuse to respond to consumer inquiries, or fail to responsively answer consumer inquiries, regarding delayed orders or refund demands. Almost half—48.7 percent—of the consumer letters received complained of the total non-responsiveness of mail order sellers.[34]

One consumer asserted in this regard: "Even where there is a legitimate reason for such delay, mail order firms, even the most reputable, are very lax in first advising of the delay and subsequently informing the customer of the progress of his order. They also fail in many instances to respond to inquiries from the consumer regarding the non-delivery of merchandise." [35]

Another consumer wrote: "I have long been seething about my loss of bank interest on my money in the *many* cases in which such firms have, for any number of unexplained reasons, delayed shipment for inexcusably long periods. Inquiries are met by the blank wall of silence, or at best, the old form letter or card ploy, which explains nothing." [36]

[20] The Reasons for Revisions of Original Proposal published with the Revised Proposed Rule at 39 Fed. Reg. 9202 (1974) stated that the choice of thirty days was arbitrary. This statement has been used by some industry spokesmen to attack the choice of thirty days as having arisen from caprice or being made at random and without reason. *See, e.g.*, DM/MA submission at R. IV/pp. 8803, 8892, 8916. On the contrary, the statement merely meant that the choice of the times called for in the Rule lay in the discretion of the Commission. *See, e.g.*, Webster's Seventh New Collegiate Dictionary 45 (7th ed. 1970).

[21] *See, e.g.*, R. II, pp. 402, 411, 507, 3304, 3439, 3447, 3567, 3727, 3900, 3955, 4038, 4112, 4263, 4284, 4691, 4696, 4810, 5105, 5432, 5509, 5564, 5610, 5668, 5765, 5775, 6038, 6470, 6565, 6700, 6729, 6918, 7441, 7467, 7539, 7615, 7620, 7711, 7716, 7751, 7844, 7878, 7882, 7893, 8008. The DM/MA sponsored analysis of complaint letters in the Record states that 247 of the 3128 complaint letters—7.9 percent—record a buyer's initial complaint within 30 days of the order. Of the complaint letters specifying the time between the order and the initial complaint, 1550, these 247 letters represent almost 16 per cent. R. IV, p. 9295.

"The unfilled mail order" wrote the Executive Director of the Michigan Consumer's Council "is a problem particularly aggravating to the aggrieved consumer because of his practical inability to deal, except by mail, with the seller in an attempt to resolve his complaint. The consumer who has paid money for undelivered mail order goods or services, and confronts nothing but cold unresponsiveness or broken pledges from the distant seller finds himself with very little viable recourse." [37] A consumer complained that "[f]ollowing up, for the buyer, is a difficult and time consuming process as he is never quite sure where he can write to get results." [38] As one Michigan consumer described her experience with a California seller: "It is difficult to describe the helpless frustration a consumer feels at a time like this. California is so far away from Michigan." [39]

Because of strict requirements of proof and the absence of subpoena power, prosecutions by the Postal Service under the postal criminal fraud statute and civil-administrative actions pursuant to the postal false representation statute have been limited and ineffective in curtailing complaints of mail order abuses.[40] The Record contains a number of consumer letters reporting unsuccessful efforts by consumers to obtain action by the Postal Service on mail order complaints.[41]

CHAPTER IV. INADEQUACY OF EXISTING REMEDIES

The mail order buyer is in a far less advantageous position in seeking to rectify complaints than one who purchases from a local merchant. The purchaser who shops locally has the opportunity of taking his grievance directly to a store representative or manager and in a personal way explaining his difficulty or complaint. The mail order buyer, on the other hand, must deal with a seller who is often hundreds and even thousands of miles away. The use of ordinary first class mail is often totally unsuccessful or time consuming. The use of costly registered letters and long-distance telephone calls is also frequently resorted to, but the distance involved shields mail order sellers from personally resolving complaints. The Record demonstrates consumer frustration with complaints involving companies which only reveal a Post Office box number and withhold their street addresses or telephone numbers.[42]

The high costs of going to court as well as jurisdictional limitations prevent consumers from seeking remedial legal action. "From the consumer's point of view • • • in many cases the amount of money involved is significant, but not enough to mke it worthwhile to the consumer to force the seller to fill the order, or to try to recover his money through the use of legal remedies. In these situations, the individual is simply at the mercy of the mail-order merchandiser." [43]

Totally frustrated by the inaction and silence of the seller and economically blocked from taking traditional legal avenues, victims of mail order abuses are faced with no other alternative but to launch intensive letter-writing campaigns, at no small expense, to postal authorities, other federal and state agencies and officials and the Better Business Bureaus or Chambers of Commerce.

Little has been accomplished on the State or local level to correct these mail order problems, the most notable exception being New York.[44] Since most mail order transactions occur in interstate commerce (i.e., they involve a seller in one State and a buyer in another), remedial action by officials on the State level is often hampered by various jurisdictional limitations. A State consumer protection official reported: "We at the intrastate level are virtually helpless in reaching the practices of the mail-order house operating from outside [the State]." [45] And the Attorney General of West Virginia added in a similar vein: "In these cases we face the same difficulty as do consumer protection agencies in most states—the selling firm is located outside our jurisdiction, and for all practical purposes is not accessible to us." [46] A spokesman for the Consumer Protection of Attorneys General reported that at a meeting attended by representatives from approximately 20 States, the action of the Commission in proceeding toward the promulgation of a Rule governing the sale of mail order merchandise was unanimously supported.[47] Another spokesman for the Consumer Protection Committee stated that when dealing with mail order sellers in other States "• • • we as state authorities, find ourselves with no effective way of helping the consumer. Only an organization with nationwide authority can be truly effective in this area." [48] These groups, along with others such as consumer interest groups, Better Business Bureaus and Chambers of Commerce, often can do no more than join the consumer in his letter-writing campaign.

In February 1972, David L. Ordway, "ombudsman" for the Postal Service, was prompted to warn postal customers to

[35] R. II, p. 6456.

[36] R. II, p. 1211.

[37] R. III, pp. 336, 1374, 2043, 2238, R. IV, p. 8428.

[38] R. III, p. 564 (Hon. Chauncey H. Browning, Jr. Attorney General of West Virginia). A consumer charged: "It is quite apparent that [some mail order companies] find comfort [in the fact] • • • that the amount of money involved does not warrant the expense of legal action for recovery." R. II, p. 6628. *See also*, R. III, pp. 564, 1115,

[39] R. II, p. 77.

[40] R. II, p. 3765.

[41] "Successful prosecution of unscrupulous mail order merchants under the postal criminal fraud statute (18 U.S.C. § 1341) requires proof, beyond reasonable doubt, of the seller's intent to defraud. In many cases ability successfully to prove intent to defraud is frustrated by the seller being able to prove shipment of some of the orders received and the inability of the Postal Service to prove that these represent mere token shipments. The postal laws do not obligate the seller to maintain any shipment records, nor is the Postal Service authorized to compel the production of any records a seller may have maintained. Generally speaking, a successful criminal prosecution cannot be premised upon mere failure to effect reasonably prompt shipment—and successful prosecution results in no relief to injured consumers.

"Civil-administrative action pursuant to the postal false representation statute (39 U.S.C. § 3005) is premised upon the seller obtaining money or property through the mails by virtue of misrepresentation of a material fact. Successful application of this statute can result in but one remedy—a "Mail Stop Order" denying the seller the right to receive any mail, or redeem any Postal Money Order, relating to the scheme upon which the Order was predicated. Where, prior to issuance of the Order, the seller discontinues the practice complained of, the Order is generally of no practical value. Successful application of the statute cannot be based upon failure of the seller to effect reasonably prompt shipment except where the Postal Service can demonstrate that the seller has consistently failed to honor a specific representation respecting the time within which orders will be shipped. Such proof is difficult because the seller is under no legal obligation to maintain records indicating the dates upon which orders were received and shipments made and because the Postal Service lacks authority to compel the production of any records maintained by a mailer. Again, successful application of this statute does not result in any direct relief to an injured consumer." David A. Nelson, Senior Assistant Postmaster General and General Counsel, R. III, pp. 536–537. *See also* letter of William J. Cotter, Assistant Postmaster General, Inspection Service, R. III, pp. 1239–41.

[42] *See, e.g.*, R. II, pp. 3357, 3929, 4984, 5898, 7735.

[43] New York City, home for many mail order businesses, was prompted to promulgate a six week delivery or refund regulation after its Department of Consumer Affairs was flooded with complaints. The New York Attorney General's Office has also been active in recent years in this area and after proceeding on a case-by-case basis for a period of time encouraged the State legislature to pass a law setting reasonable standards of business conduct in the mail order industry which became effective March 1, 1975 (1974 McKinney Session Laws, Chapters 1038, 1039). California enacted regulations covering mail order sales. *See, e.g.*, R. III, pp. 1117, 1403, 2049, R. IV, pp. 8754–58.

be cautious in ordering merchandise or services by mail from unknown mail order merchants and he advised these consumers to consult first with the Better Business Bureau, Chamber of Commerce or a consumer protection agency to determine the reliability of the mail order seller.[59]

Congressman Benjamin Rosenthal, in testifying at the Commission hearings in this proceeding, summed up the problem and potentiality for abuse in mail order marketing by saying,

> While most mail order firms are run by honest businessmen who serve their customers quickly and fairly • • • under existing laws the unscrupulous mail order house can • • • [hide] behind a Post Office Box number and/or a fabricated business name, it can deliver inferior merchandise, or no merchandise at all, disregard consumer complaints and, if things get too uncomfortable, file for bankruptcy or simply leave town. The consumer with cancelled check in hand, is left remediless, often after months of frustrated letter-writing to consumer groups, Better Business Bureaus, Congressmen, the President's Advisor and the firm itself.[60]

CHAPTER VI THE FINAL RULE

The Trade Regulation Rule has undergone several modifications since it was originally published in 1971.[61] A revised proposed Rule accompanied by Reasons For Revisions of Original Proposal was published in March, 1974 and contained substantial modifications of the 1971 proposal.[62] The 1971 proposal was based, with certain exceptions, on the premise that "if goods are not shipped within 21 days, the buyer prefers an immediate refund."[63] The revised proposed Rule extended this time to 30 days "because the Record does not support the 21-day rule."[64] The 1971 proposal required an affirmative disclosure of the "21-day Rule" in each solicitation. The revised proposed Rule abandoned this disclosure provision as being impractical in small classified ads and unnecessary because of the notice a seller would send to solicit a buyer's consent to delayed shipment.[65] The record-keeping requirements of the 1971 proposal included a record of each mail order transaction. The revised proposed Rule reduced the record-keeping requirements to maintaining for 18 months a record of each complaint of failure to deliver and a general record keeping requirement of maintenance of system and procedures designed to show compliance with the Rule. This revision was prompted by concern that the original requirement would have been very expensive while the revised proposed Rule was believed to facilitate enforcement of the Rule while reducing the costs. *See*, fn 65.

In the following discussion of the promulgated Rule, the significant modifications of the previous proposals and the reasons for these modifications are discussed in detail.

A. *Authority of the commission.* Any doubt as to the authority of the Commission to promulgate Trade Regulation Rules has been settled by *National Petroleum Refiners Association, et al. v. F.T.C.*, 482 F.2d 672 (DC. Cir. 1973), *cert. den.* 415 U.S. 951, 39 L.Ed. 2d 567, 94 S. Ct. 1475 (1974)[66] and the action of the Congress in enacting in late 1974 § 202 of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act.[67]

The Commission's powers to define unfair or deceptive practices outlined in *Sperry & Hutchison Co. v. F.T.C.*, 405 U.S. 233, 31 L.Ed.2d 170, 92 S.Ct. 898 (1972), are expansive. *National Petroleum Refiners v. F.T.C.*, 482 F.2d at 685. Similarly, the Commission has broad discretion in determining what is necessary to prevent unfair acts or practices. "The Commission is the expert body to determine what remedy is necessary to eliminate unfair or deceptive trade practices which have been disclosed. It has wide latitude for judgment and the courts will not interfere except where the remedy selected has no reasonable relation to the unlawful practices found to exist." *Jacob Siegel Co. v. F.T.C.*, 327 U.S. 608, 612–613, 90 L.Ed. 888, 66 S.Ct. 758 (1946). In carrying out its function of preventing unfair or deceptive practices, "• • • the Commission is not limited to prohibiting the illegal practice in the precise form in which it is found to have existed in the past • • •" but may "• • • effectively close all roads to the prohibited goal • • •" *F.T.C. v. Ruberoid Co.*, 343 U.S. 470, 473, 1 L.Ed.2d 438, 77 S.Ct. 502 (1942).

B. *Basis for the rule.* It should first be noted that the promulgated Rule is not limited to "pre-paid" mail order transactions in the strictest sense of the term, but is written to include credit transactions where the buyer's account has been charged. While it is true that the vast bulk of the complaints and other information in the Record is concerned with orders where the buyer has literally "pre-paid" (i.e., tendered payment in the form of cash, check or money order),[68] the Commission recognizes that the types of abuses addressed by the Rule are not only relevant to such "pre-paid" transactions.[69] Indeed, the Record contains substantial information that mail order credit transactions are in fact subject to the abuses addressed by the Rule.[70] As a result the Commission has determined that, to the greatest extent possible, the Rule should "close all roads to the prohibited goal", and thus under its authority to define unfair or deceptive acts or practices and to promulgate rules prescribed for the purposes of preventing such act or practices, the Commission has retained the scope of the revised proposed Rule published March 8, 1974 and included credit transactions where the seller charges the buyer's account for the order prior to shipment.

It should also be noted that the promulgated Rule is narrower than the published proposed Rules in that it is limited to merchandise and does not cover "services connected with merchandise." The reasons stated elsewhere for the exclusion of mail order photo finishing are equally applicable to "services connected with merchandise" in general. Although the Commission has received a number of complaints concerning services connected with merchandise,[71] the vast bulk of the information contained in the Record, whether in the form of complaint letters, analyses of the published proposed Rules or alternatives to the published proposed Rules, deals with the problems associated with mail order merchandise. The Commission is therefore reluctant on the basis of the current Record to include "services connected with merchandise" within the scope of the final Rule. This conclusion should not be interpreted as a finding by the Commission that mail order "services connected with merchandise" are not subject to abuses which constitute violations of the Federal Trade Commission Act or as a statement that the Commission will not address any such abuses in the future.

Section 435.1(a) of the Rule requires sellers of mail order merchandise to have a reasonable basis for making certain express and implied representations, at the time of making, with respect to the delivery of mail order merchandise.

Section 435.1(a)(1) of the promulgated Rule is, in essence, a revision of Paragraph A of the revised proposed Rule published in March, 1974.[72] Subparagraph I(A) of the revised proposal prohibited a seller from soliciting a mail order unless the merchandise "will be shipped" within the applicable time set forth in the Rule unless the seller complied with certain provisions of Paragraph (B) of the revised proposed Rule. Paragraph (B) allowed sellers to solicit a buyer's consent to delayed shipment where the delay is due to circumstances beyond the buyer's control. The revisions contained in the promulgated Rule make explicit the obvious, although arguably implicit, intent of the revised proposed Rule to prohibit the solicitation of orders where the seller does not have a reasonable basis to expect shipment within 30 days or the time stated in the solicitation. § 435.1(a)(2) and (3) of the Rule are additions not explicitly found in the previous proposed Rules and are intended to make it clear that sellers must have a reasonable basis for making representations mandated in § 435.1(b) of the Rule.

The requirements of § 435.1(a)(1), (2) and (3) that a seller have a reasonable basis for express representations made about the time of shipment are merely a restatement of the existing legal standard which has been expressed by the Commission on a number of occasions[73] and affirmed by reviewing courts.[74] The Commission has concluded on the basis of the Record and its own expertise that where a seller makes an express representation to a buyer concerning the time of delivery, such a representation has the capacity or tendency to create the impression in the buyer's mind that the seller has a reasonable basis for making such a representation.[75] The failure of the seller to have a reasonable basis for making such a representation constitutes an unfair and deceptive act or practice in violation of Section 5 of the Federal Trade Commission Act.[76]

Where the seller does not make a direct representation as to the time of shipment, the application of the above principles requires a similar result. Where the seller of mail order merchandise does not state a shipping time, what shipping time is implied by the solicitation of an order made by a seller to a prospective buyer? The information in the Record described above establishes that where a seller so solicits an order, the solicitation has the capacity or tendency to create the impression in the buyer's mind that shipment will be made within 30 days. Indeed, the Record clearly and persuasively demonstrates that substantial numbers of consumers purchasing mail order merchandise in fact expect shipment within 30 days of the seller's receipt of an order. Thus, under such circumstances the seller is making the implied promise that he can ship within 30 days of receipt of an order and the mail order purchaser is entitled "as a matter of marketplace fairness" to rely upon the seller "to have a 'reasonable basis' for making performance claims." [77] Where the seller does not have a reasonable basis to expect shipment within 30 days of receipt of an order, or in fact has reason to believe that shipment cannot be made within 30 days of receipt of an order, the Commission finds that soliciting an order for mail order merchandise without disclosing the expected shipping time is unfair and deceptive within the meaning of Section 5 of the Federal Trade Commission Act.

The Record of this proceeding shows that substantial numbers of consumers are not getting mail order merchandise shipped within that time which consumers have been led to believe shipment would be made. The Record also demonstrates that sellers have solicited orders for which they had no reasonable basis to expect shipment within that time expected by many buyers.[78] In addition, the substance of § 435.1(a)(1) of the Rule was supported by many commentators on the Rule including members and representatives of the mail order industry as a reasonable remedy for abuses in the industry.[79] § 435.1(a)(1) is, therefore, within the authority of the Commission as it is both a definition of an unfair and deceptive practice and a requirement prescribed for the purpose of preventing unfair or deceptive acts or practices.

Section 435.1(a)(2) and (a)(3) of the Rule address practices associated with sellers giving buyers notice of delayed shipment. The practice of sending buyers notices of delayed shipment is widespread,[80] but all too often buyers report that sellers have failed in meeting shipping or delivery dates promised in their notices of delay.[81]

A number of complaint letters regarding undelivered mail order merchandise reported that sellers had sent delay notices which were indefinite about the length of the delay[82] and some notices included "explanations" for the delay.[83]

On the basis of the Record and its own expertise, the Commission finds that § 435.1(a)(2) and (a)(3) constitute definitions of unfair or deceptive practices and are also within the power of the Commission to promulgate as requirements to prevent violations of Section 5 of the Federal Trade Commission Act. § 435.1(b) of the Rule requires that sellers confronted with delays notify buyers of the delays and offer the opportunity to cancel the order. § 435.1(a)(2) and (a)(3) assure that such notices do not contain representations which the seller does not have a reasonable basis for making.

Section 435.1(a)(3) in addition requires that where a seller is informing the buyer that he is unable to make any representation regarding the length of any delay, the seller must also inform the buyer of the reasons for the delay. Sellers will be so informing buyers of indefinite delays as part of providing buyers with options to cancel orders or accept delays.[84] The Commission finds that the reasons for an indefinite delay are material facts necessary for a consumer to intelligently exercise the option to cancel the order and that the failure to disclose these material facts constitutes a violation of Section 5 of the Federal Trade Commission Act.

Finally, § 435.1(a) establishes a rebuttable presumption in any action brought by the Federal Trade Commission alleging a violation of § 435.1(a): the failure to produce certain records or other documentary proof will create a rebuttable presumption[85] that the seller

[66] This case clearly establishes that the Commission can promulgate rules defining unfair or deceptive practices using either bright line standards or rebuttable presumptions, 482 F.2d at 691.
[67] § 202 (designated as 15 USC § 18), which merely codified the Commission's rulemaking authority, states that the Commission is empowered to prescribe: "rules which define with specificity acts or practices which are unfair or deceptive acts or practices in or affecting commerce • • • Rules under this subparagraph may include requirements prescribed for the purposes of preventing such acts or practices."
[68] For example, the DM/MA sponsored analysis of consumer letters states that close to 93 per cent of complainants had paid with their orders. R. IV, p. 9290.
[69] For example, where a seller solicits an order without having a reasonable basis for expecting that he can ship the ordered merchandise within the time expected by many buyers, it is an unfair or deceptive act or practice regardless of the method of payment.
[70] For example, the DM/MA sponsored survey of consumers complaints in the Record indicates that 141 involved credit transactions. R. IV, p. 9290.
[71] The DM/MA sponsored analysis of consumer complaint letters in the Record states that 56 complaints (1.8 per cent of the total complaints) involved "services with merchandise". R. IV, p. 9289.

[75] The Commission may utilize its accumulated expertise to determine what direct and implied representations are contained in advertising. *Pfizer, Inc., supra* at 59.
[76] *Id.*, at 58 to 65.
[77] *Id.*, at 62.

[78] For example, Roy Hedberg, President of Sunset House, stated that there are mail order sellers who are not responsible. He stated: "There are those who will promote an item by mail—without *any* inventory and will accumulate customer orders when received—and *then*, and only then, initiate action to *procure* merchandise—since at this point no inventory risks are involved. Obviously, months of delay in receiving merchandise and shipping customer orders may be involved." (emphasis in the original) R. IV, p. 8750. Popular Services, Inc. urged the Commission to take action against "• • • the one problem that exists—i.e. the solicitation of prepayments for merchandise which is not on hand and which the seller has no real expectation of ordering within a reasonable period of time • • •" R. IV, p. 8975 B. *See also* R. II, pp. 243, 286, 336, 535, 1622, 2053–4, R. IV, p. 8985.
[79] *See, e.g.*, R. III, pp. 243, 286, 236–7, 535, 1107, 1498, 2053–4, R. IV, pp. 8873A, 8975B, 8985.
[80] The DM/MA commissioned analysis of consumer complaint correspondence in the Record states that 503 complaints (16 per cent of the total complaints in the Record) reported that a delay notice was the seller's first post-order correspondence with the buyer.
[81] For example, a consumer reported that a seller wrote her in April, 1971, that, with respect to an order placed in January, 1971, "You may expect shipment within 3–4 weeks" but that she had been unable to secure either the merchandise or a refund as late as December, 1971. R. III, p. 3628. Another consumer wrote a company in December about an order placed the previous July: "I have written you twice concerning this order and each time I have received a post card putting me off." The post cards in question had promised delivery within 2 weeks and within 3 weeks. R. III, p. 4494. Another complainant reported receiving in July, 1971 a promise by a seller that although delayed, the order would be delivered within "5 to 6 weeks." The complainant's letter to the Commission, dated February 14, 1972, stated "We are still waiting for the [refund] check or order. At this point we would rather have the check." R. III, p. 5784. *See also* R. III, pp. 3540, 3543, 3558, 3598, 3612, 3904, 3909, 4015, 4060, 4155, 4214, 4280, 4068.
[82] *See, e.g.*, R. III, pp. 4039, 5517, 5761.
[83] Explanations ranged from "We have been let down by our suppliers" (R. III, p. 3535), to a statement that the item was temporarily out of stock (R. III, p. 5113), to stating that the seller's warehouse was being revamped (R. III, p. 5138).
[84] See § 435.1(b)(1)(i) and (b)(2)(i of the Rule.
[85] The Commission's authority to establish rebuttable presumptions in Trade Regulation Rules has been expressly recognized in the Circuit Court of Appeals decision which held that the Commission had the authority to promulgate substantive rules. *National Petroleum Refiners, et al. v. F.T.C., supra.* In addition, the use of presumptions has gained wide acceptance in the law. *See, e.g.*, Rules of Evidence § 301 (Pub. L. No. 93–595

V 40 214 NOV 5 75 XUM

lacked a reasonable basis in violation of § 435.1(a). The use of a rebuttable presumption was chosen by the Commission in lieu of the extensive record keeping provisions contained in Paragraph (C) of the published revised proposed Rule. The Commission is unprepared, on the basis of the Record in this proceeding, to conclude that the recordkeeping requirements of proposed Paragraph (C) should be uniformly imposed on sellers to prevent unfair or deceptive acts or practices. After weighing the potential cost to business[46] of the proposed Paragraph (C) recordkeeping requirements against the potential economic gain for consumers and the potential ease of law enforcement the Commission is not convinced that the Rule should contain an absolute recordkeeping requirement. The Commission has instead made the finding that records or other documentary proof establishing the use of systems and procedures specified in § 435.1(a) of the promulgated Rule may constitute a reasonable basis for expectation of shipment within the applicable time set forth in § 435.1(a) of the Rule and that the failure to maintain such records shall constitute a rebuttable presumption of non-compliance with § 435.1(a) of the Rule.[47] The Commission recognizes that the question of what constitutes a reasonable basis is essentially a factual issue affected by the interplay of many considerations[48] and while the Commission has promulgated a Rule which establishes that the failure to maintain such records or other documentary proof shall create a rebuttable presumption that the seller lacked a reasonable basis, nothing prevents a seller from rebutting the presumption and demonstrating that he had the required reasonable basis.

Section 435.1(b)(1) of the Rule addresses the situation where a seller is unable to ship merchandise within the time represented, directly or by implication, to the buyer as the time of shipment. The Rule proceeds from the proposition that where the seller is faced with such a situation, fundamental fairness in the marketplace requires that the seller offer the buyer the option of cancelling the order or consenting to delayed shipment.[49]

Section 435.1(b)(1) of the Rule governs situations where the seller has solicited an order and has become aware that shipment cannot be made within the time stated in the solicitation for the order, or if no time is so stated, within 30 days of receipt of the order. The Record contains over 1500 complaint letters reporting the failure of a seller to communicate with buyers about delays in shipment.[50] The Rule requires sellers to (1) notify buyers of delays in shipment, (2) offer such buyers the opportunity to cancel the order and receive, where appropriate a prompt refund and (3) provide the buyer with the material facts necessary for the buyer to make an intelligent choice.

The main departure of § 435.1(b)(1) from the previously published proposed Rules is in the area of what action the consumer must take to cancel the order when given the option to do so. The published proposed Rules took the approach of uniformly requiring receipt by the seller of a positive response by the buyer prior to the expiration of the time stated in the solicitation, or if no time was stated, within 21 or 30 days of receipt of an order from the buyer. The Record contains a number of statements in support of the proposals,[51] while industry spokesmen almost universally condemned this aspect of the proposals as imposing an intolerable burden on the mail order industry.[52]

Although industry spokesmen attempted to extol the concept of "silence equals consent" to a delay as the normal and reasonable solution to consent problems[53] an examination of contract law clearly establishes that silence is not normally to be construed as consent or acceptance regardless of whether the act of the seller in notifying the buyer of delay and proffering an option to cancel the order is viewed as an offer, a counteroffer or an offer to modify an already existing contract.[54] Thus, if the Commission were to uniformly proscribe the use by sellers of the silence of buyers as consent for shipment delays, there would be ample authority for the Commission declaring such a practice unfair and prescribing that sellers not take such silence to mean consent.

Some industry spokesmen attempted to analogize this Rule to that governing the use of negative option plans, 16 CFR 425,[55] however the situations are hardly analogous. As the Statement of Basis and Purpose accompanying the Rule governing the negative option plans pointed out, most buyers in such plans understood the systems before they joined[56] and thus were agreeing in advance to systems requiring them to notify the seller if they did not want to purchase a selection. That Rule assures that all future buyers in such plans will be notified of the negative option feature of the plan prior to joining.[57] In addition, users of negative option plans claimed that the negative option features of their plans were absolutely essential and that not allowing them to use this key feature of their marketing plan would have catastrophic effects. Although sellers alleged in this proceeding that there would be serious problems arising from the published proposed Rules' positive option (silence does not equal consent to a delay), it is clear from the forgoing that the negative option is not of the same importance here as in situations governed by 16 CFR 425.

As has been explained in detail above, where a seller solicits orders and states a time for shipment, many buyers will quite reasonably expect shipment within that time. Similarly when no time is stated in the solicitation, the Record amply demonstrates that the solicitation, at the very least, has the capacity or tendency to create the impression in the minds of buyers that shipment will be made within 30 days of receipt of the order. Where the seller is not able to make shipment within the applicable time he is, in effect (1) rejecting the buyer's offer by making a counteroffer, (2) seeking to alter a contract, or (3) in breach of contract.[58] If a seller simply remains silent and ships the merchandise late or merely notifies the buyer of delay without offering the opportunity to cancel the order, both of which the Record demonstrates occur in a substantial number of instances, the seller is attempting to impose upon the buyer a contract far different from the one the buyer thought he was entering into. The imposition of a contract upon a buyer (1) without giving the buyer the opportunity to freely accept or reject the contract or (2) where there is surprise has been proscribed by statute and widely condemned in decisions as oppressive and contrary to public policy.[59] In light of the existing law, and of the widespread acceptance by persons commenting in this Rule-making proceeding, the Commission adopts the proposition that the failure of a seller to position that the failure of a seller to offer a buyer the option to cancel an order where the seller encounters a delay in shipment beyond the times specified in the Rule is an unfair or deceptive act or practice in violation of the Federal Trade Commission Act.

Although the Commission could have adopted the approach of the published proposed Rules and uniformly applied the generally accepted contract law principle that a seller may not construe silence as consent to delay in shipment, it has chosen not to do so in § 435.1(b)(1) of the promulgated Rule. Instead, § 435.1(b)(1) has adopted a more flexible approach to regulating "first delay" situation—i.e. those where the seller is unable to ship within the time set forth in the solicitation or, if no time is stated in the solicitation, within 30 days of receipt of a properly completed order.

Section 425.1(b)(1)(ii) states that, where a seller is faced with a definite revised shipping date of 30 days or less later than the applicable shipping date set forth in § 435.1(a)(1) of the Rule, the lack of a response from the buyer rejecting the delay and cancelling the order will be deemed as the buyer's consent to the delay of 30 days or less. § 435.1(b)(1)(iii) states that, where the seller is faced with a definite revised shipping date of more than 30 days later than the applicable date set forth in § 435.1(a)(1) of the Rule or when the seller is unable to make any representation about the length of the shipping delay, the seller must deem the order cancelled unless (1) the seller ships the merchandise within 30 days of the applicable time set forth in § 435.1(a)(1) and prior to receiving a cancellation of the order from the buyer or (2) the seller has received within 30 days of the applicable time set forth in § 435.1(a)(1) the buyer's express consent to the delay. The net effect of § 435.1(b)(1)(ii) is to make silence equal consent to a delay of definite duration of 30 days or less. The net effects of § 435.1(b)(1)(iii) are to give a seller 1) a minimum of 30 days to actually obtain the buyer's consent to an indefinite delay or a delay of more than 30 days beyond the applicable time set forth in §§ 435.1(a)(1) and (2) and 2) a period of up to an additional 30 days beyond the applicable time set forth in § 435.1(a)(1) to fill an order without having obtained the buyer's express consent to the delayed shipment.

In adopting the regulatory approach of §§ 435.1(b)(1)(ii) and (b)(1)(iii) the Commission has taken into account all of the basic economic facts and considerations presented in the Record and has weighed the burden and cost to vendors against the loss to buyers.[100] The result is differing requirements depending on the nature of the "first delay."

A number of material considerations underlie the Commission's decision to adopt this regulatory approach. First, in most instances, sellers ship merchandise within 30 days of receipt of an order,[101] and as a result sellers will normally state no time for shipment in their solicitations, impliedly representing shipment within 30 days. The Parcel Post Association succinctly described the practical problems sellers would face if they had to receive the buyer's consent to a delay within 30 days of receipt of an order:

> Thirty days allows the seller only 7–10 days to determine whether or not he can ship before the end of the 30-day period. That is because the seller must not only prepare and mail the notice to the buyer, he must allow sufficient time for the buyer to receive it, to fill it out, to return it and for the seller to receive it.[102]

In addition, the available information appears to indicate that in "first delay" situations involving delays of 30 days or less, those covered by § 435.1(b)(1)(ii) of the Rule, the majority of purchasers would prefer to wait for their orders, although the longer the anticipated delay, the more buyers would prefer to cancel their orders. For example, a survey conducted by Sunset House,[103] a mail order seller, indicated that most persons responding to a questionnaire expressed a preference to wait when confronted with a delay, although the longer the delay period, the lower the percentage of respondents who expressed such a preference; of persons in a "back order" situation responding to a questionnaire sent approximately 15 days after receipt of an order, 91 percent stated they would be willing to wait 15 days more for shipment while only about 54 percent stated a willingness to wait more than an additional 45 days for shipment. R. IV p. 8781.

A survey conducted for Direct Mail/Marketing Association[104] showed similar results: the survey population consisted of mail order users who had received at least part of a mail order in 1974. The population was asked how long they waited for their order and how much longer they would have waited for delivery of their order. Of all respondents who had received part of their order within four weeks of placing it, approximately 86 percent stated they would wait an additional 14 days for delivery, approximately 62 percent an additional 30

(Jan. 2, 1975)), Rules of Evidence for the United States Courts and Magistrates § 301, Comment (Revised Proposed Draft, March 1971). Also, while there is some authority for the proposition that the Commission cannot shift the burden of proof, at least in a case where to do so would sweep "across lawful and unlawful conduct without distinction," *Federated Nationwide Wholesalers, et al. v. F.T.C.*, 398 F.2d 253 (2d Cir. 1968), the recognized distinction between burdens of proof and presumptions makes inappropriate the use of such a proposition in any analysis of the Commission's authority to establish rebuttable presumptions in Trade Regulation Rules. *See, e.g.*, 9 S. Wigmore, Wigmore on Evidence, § 2485 (3rd Ed. 1940), McCormick, McCormick on Evidence, §§ 336–347 (2d. Ed. 1972).

[46] *See, e.g.*, R. IV, p. 8094 (Jay Norris Corp.); R. IV, p. 8458 (Frederick's of Hollywood, suggested the requirement "would seriously discriminate against small companies that are not geared up to automated processing and recordkeeping"); R. IV, p. 8862 (MOAA stated that "Industry costs of maintaining specific records for stated periods would be substantial and very likely passed on to customers"); R. IV, p. 9009 (Parcel Post Association); R. IV, pp. 9213–9214 (Sears pointed out that "keeping the generation of paperwork and its accumulation to the barest minimum consistent with serving the customer's need is an important factor in keeping the cost of merchandise as low as possible. This includes the prompt destruction of records once they have served their purpose.")

[47] The lack of any documentary evidence showing the use of systems which assure the shipment of merchandise within any applicable time set forth in the Rule, in the absence of any information to the contrary, clearly justifies the conclusion that a seller lacks a reasonable basis for expecting to be able to ship within said time. Indeed, the proposed alternate Rule of the Direct Mail Advertising Association includes provisions requiring a reasonable basis and the maintenance of records showing the employment of systems and procedures designed to provide shipment within the applicable time set forth in the Rule. R. III, p. 1710. Paragraph C of the revised proposed Rule also contained such a recordkeeping requirement.

[48] *Pfizer, Inc., supra* at 64.

[49] This principle was contained in the two proposed Rules published by the Commission, both of which received widespread consumer support; the Commission received about 200 letters in support of the March 8, 1974 published revised proposed rule alone. R. IV, pp. 8044, 8045, 8047, 8049, 8052, 8053, 8061B, 8074, 8081, 8082, 8083, 8092, 8098, 8102, 8103, 8125, 8126, 8127, 8128, 8136, 8137, 8138, 8143, 8146, 8148, 8149, 8153, 8164, 8165, 8166, 8168, 8169, 8178, 8180, 8187, 8188, 8194, 8195, 8200, 8201, 8202, 8203, 8204, 8212, 8213, 8217, 8218, 8219, 8222, 8223, 8224, 8225, 8230, 8231, 8233, 8236, 8237, 8240, 8242, 8243, 8247, 8255, 8257, 8258, 8259, 8260, 8261, 8268, 8273, 8280, 8281, 8282, 8283, 8284, 8285, 8286, 8287, 8288, 8289, 8290, 8291, 8292, 8293, 8294, 8295, 8296, 8297, 8298, 8299, 8300, 8318, 8319, 8323, 8329, 8330, 8331, 8332, 8333, 8334, 8335, 8336, 8337, 8338, 8343, 8344, 8345, 8346, 8347, 8353, 8354, 8364, 8365, 8368, 8375, 8376, 8378, 8379, 8382, 8388, 8389, 8403, 8405, 8407, 8408, 8409, 8414, 8423, 8430, 8434, 8435, 8438, 8440, 8453, 8458, 8460, 8462, 8463, 8467, 8468, 8476, 8477, 8480, 8481, 8482, 8483, 8485, 8501, 8513, 8514, 8516, 8523, 8530, 8534, 8535, 8547, 8548, 8550, 8553, 8554, 8555, 8556, 8559, 8560, 8562, 8563, 8564, 8565, 8566, 8573, 8574, 8575, 8577, 8578, 8580, 8626, 8629, 8634, 8637, 8638, 8732, 8735, 8737, 8758, 8765, 8766, 8806, 8951.

In addition a number of industry spokesmen, while disagreeing with the specific approaches taken by the Commission's published proposed Rules, supported this fundamental proposition. *See, e.g.*, submission of Direct Mail/Marketing Association (R. III, pp. 1502, 1497, 1561), L. L. Bean, Inc. (R. III, p. 1103), Mail Order Association of America (R. III, p. 1399, R. IV, p. 8853), Associated Third Class Mail Users (R. III, p. 1277), Prentice-Hall, Inc. (R. III, p. 1638), Sunset House (R. IV, p. 8748), Popular Services, Inc. (R. IV, p. 8853), Parcel Post Association (R. IV, p. 9003).

V 40 N 214 NOV 5 75 XUM

days and approximately 31 percent an additional 45 days.[105]

The available information therefore tends to indicate that of all the buyers who will receive notices of options pursuant to § 435.1(b)(1)(ii) of the Rule, (i.e. those receiving notices of delays of 30 days or less), a substantial majority will prefer to consent to the delay. As a result, requiring buyers to affirmatively consent to delays of 30 days or less will apparently cost significantly more, due to postage and handling for example, than allowing sellers to construe silence as consent in a "first delay" situation. In addition, the assertion has been made by a number of trade associations and companies that, whether due to inertia, forgetfulness or the like, substantial numbers of consumers apparently will not respond to the query of a seller and express their preference, even if they know that not to respond will result in the seller interpreting this silence to mean the opposite of their preference.[106] This assertion also suggests that there is an intangible "cost" to requiring consumer responses in the form of time, effort and inconvenience related to filling out and mailing response forms. This consideration coupled with the apparent desire of most buyers in a "first delay" situation to wait 30 days or less and the above described time pressure placed on sellers has caused the Commission to conclude that, on the basis of the available information, it should not uniformly apply the approach of "silence does not equal consent" to situations involving a definite delay of 30 days or less.

An analysis similar to that described immediately above has led the Commission to a different conclusion with respect to "first delay" situations where the seller provides a definite revised shipping date more than 30 days later than the applicable time set forth in § 435.1(a)(1) or is unable to give a definite revised shipping date. The available information indicates that although most buyers will consent to a delay of up to 30 days, the longer the delay, the less willing buyers are to wait. Where the delay is in excess of thirty days the information in the Record fails to demonstrate that a sizeable majority of buyers prefers to wait, and in fact some of the information suggests the contrary. For example, the DM/MA survey results state that of all respondents who had received part of their order, 84.7 per cent would have waited an additional 14 days to receive their order, 64.0 per cent an additional 30 days and only 33.7 per cent an additional 45 days.[107] The survey conducted by Sunset House also demonstrated a marked decline in consumer willingness to accept delayed shipment as the length of the delay increased: while only 8.7 per cent of respondents in a "back order" situation sent a questionnaire approximately 15 days after receipt of an order stated they would not be willing to accept a 15 day delay, almost half—45.4 per cent—stated they would not accept a delay in excess of 45 days.[108]

Section 435.1(b)(1)(iii) allows a seller 30 days beyond the applicable time set forth in § 435.1(a)(1) to either obtain the seller's consent to a further delay or to ship the order. Where there is a delay beyond 30 days, there is simply no substantial information to support the contention that a sizeable majority of buyers prefers to wait. Thus, the available information indicates that § 435.1(b)(1)(iii)'s requirement of a buyer's consent to a delay beyond 30 days will not result in significantly higher costs than allowing silence to equal consent to a delay of any duration. In "first delays" 45 days or longer, the DM/MA survey strongly suggests that requiring consent to a delay will actually substantially reduce postage and clerical costs because just over ⅓ of the buyers were shown to prefer to wait that long. The same information mandates the conclusion that the approach of § 435.1(b)(1)(iii) will also minimize the number of people who due to inertia, forgetfulness or the like will have their true preference frustrated. Also minimized will be the number of people burdened with responding to the queries of sellers.

In allowing sellers 30 days beyond the applicable time set forth in § 435.1(a)(1) the Commission is not only taking consumer preference into account, it is also dealing equitably with the potential problems sellers would have faced in actually obtaining consent within the applicable time set forth in § 435.1(a)(1). Although sellers might have encountered such problems under the published proposed Rules, under § 435.1(a)(1), of the promulgated Rule the seller has, at the very least, 30 days to obtain the buyer's consent or ship the merchandise in the absence of an express cancellation from the buyer.

Section 435.1(b)(1)(iii) provides additional protection to buyers who expressly consent to indefinite delays: the seller must grant the buyer the continuing option to cancel at any time after the applicable time in § 435.1(a)(1) by so notifying the seller prior to the time of shipment. The Commission, while seeking to avoid interference with the ability of both buyer and seller to maintain an order when an indefinite delay is encountered, recognizes that consumer injury may result if a buyer were locked into the prior acceptance of an indefinite delay, regardless of how long the delay persisted. The Commission believes that the solution in § 435.1(b)(1)(iii) represents an equitable balance of the interests of both buyer and seller and will prevent acts or practices which violate Section 5 of the Federal Trade Commission Act.

Section 435.1(b)(1)(iv) addresses the problems which may arise for sellers due to the provisions of § 435.1(b)(2) of the Rule which require that a seller faced with an additional delay receive a response from the buyer accepting the delay period prior to the delayed shipping date previously consented to by the buyer. This provision enables a seller to obtain the express consent of a buyer to a delay beyond the time the seller has stated as the anticipated delay, enabling a seller to avoid a potential race against time should a further unanticipated delay arise near the end of a delay period consented to by a buyer pursuant to this Rule.

Section 435.1(b)(1)(iv) contains the same provision found in § 435.1(b)(1)(iii) which provides a buyer consenting to an indefinite delay with a right to cancel prior to actual shipment. The reasons for such a provision in § 435.1(b)(1)(iii) are of equal validity for § 435.1(b)(1)(iv) and are at the heart of the Commission's decision to apply it in § 435.1(b)(1)(iv).

Section 435.1(b)(2) of the Rule governs situations where a seller has already obtained explicit consent of a buyer to a delay of specific duration (whether pursuant to § 435.1(b)(1)(iii) or (iv) or § 435.1(b)(2)) or has deemed the buyer to have consented to a definite delayed shipping date pursuant to § 435.1(b)(1)(ii) and discovers that he is unable to ship within that time. The Rule requires the seller to notify the buyer of the delay, and, where possible, its anticipated duration, and to inform the buyer of his option to cancel the order. Section 435.1(b)(2) retains the provision of the published proposed Rules that, in such circumstances, silence of the buyer may not be deemed consent to the delay and that an order must instead be deemed cancelled unless the seller receives the buyer's express consent to the further delay prior to the expiration of the delay period previously consented to by the buyer.

The need for the notice and option to cancel requirements of the Rule have been exhaustively examined above. The considerations which went into the Commission's decision to adopt the flexible regulatory approach of § 435.1(b)(1) to govern "first delay" situations (which were discussed in detail in the analysis of § 435.1(b)(1)) are equally persuasive in support of a uniform adoption of "silence does not equal consent" in "multiple delay" situations. Not only is there no substantial information in the Record to support a deviation by the Commission from the generally accepted contract law concept that "silence does not equal consent", there is substantial information indicating that such a course of action would be not in the public interest.

For example, it has previously been mentioned that the Record demonstrates that the longer the delay, the more buyers prefer to cancel their orders. The survey for DM/MA showed that although

[105] The percent figures are calculations made from data from the survey appearing at R. IV, p. 9330.

[106] R. IV, pp. 8517, 8842 (Associated Third Class Mail Users), 9058 (Downe Communications, Inc.), 9199 (Sears, Roebuck & Co.). *See also* survey of Sunset House which showed that over 20 percent of customers did not respond to requests for instructions on how to handle a delayed shipment. R. IV, p. 8771.

[107] R. IV, p. 9330.

[108] R. IV, p. 8781.

84.7 percent of respondents who received at least part of their order said they would have waited 14 days longer to receive their order, less than two-thirds would have waited 30 days longer, only about one-third stated a willingness to wait 45 days, less than one-fourth would have been willing to wait an additional 60 days; a mere 16.7 percent stated willingness to wait beyond an additional 60 days for delivery.[109]

The consumer survey conducted by Sunset House also shows that consumers in multiple delay situations are less inclined to accept further delay than consumers who have received fewer notices of delayed shipment. Of persons responding to a questionnaire sent in lieu of a "First Delay Card," 13.9 per cent stated their unwillingness to accept specified delays,[110] while 19.0 per cent of persons responding to a questionnaire sent about 15 days after being sent a "First Delay Card" stated their unwillingness to accept identical specified delays.[111] This survey's respondents also showed more reluctance to tolerate delay, the longer the delay became. For example, of persons responding to a questionnaire sent 15 days after a "First Delay Card," 11.6 per cent expressed unwillingness to accept an additional 15 day delay, while almost half rejected an additional delay of more than 45 days.[112]

Since it has not been demonstrated that an overwhelming majority of persons will consent to "multiple delays" (in fact, the available information suggests that such is not the case), the costs incurred in financing the responses of buyers consenting to "multiple delays" do not weigh as heavily in any policy argument for the Commission allowing sellers to construe silence as consent in circumstances governed by § 435.1(b)(2).[113] Furthermore, even if it were demonstrated that a sizeable majority of buyers in "multiple delay" situations would prefer to wait, the number of consumers involved in "multiple delay" situations should be only a small fraction of the buyers who experienced a "first delay," again indicating a much smaller cost impact. Also, the Commission is acutely aware of the fact that many consumers will not return cards due to inertia and the like and is unwilling to allow sellers "two bites" at this apple.[114]

The Commission recognizes that a seller faced with unanticipated multiple delays will be required to meet a high standard where "silence equals cancellation." Although the seller is dealing with a delay which was "unanticipated" (if it were otherwise the seller would be in violation of § 435.1(a) of the Rule), the seller in a "multiple delay" situation has been put on notice that there is a problem in getting the particular item shipped and thus has the opportunity to keep an especially careful watch on the developing situation. Such a seller also is given the opportunity under § 435.1(b)(1)(iv) of the Rule to solicit, in advance of a further unanticipated delay, the consent of a buyer to a delay beyond that anticipated.

The above considerations have led the Commission to conclude that the practice of a seller in a "multiple delay" situation of imposing a further delay in delivery where the buyer has not expressly consented thereto is a violation of Section 5 of the Federal Trade Commission Act. Section 435.1(b)(2) of the Rule is in addition a reasonable prescription for preventing Section 5 violations.

Section 435.1(b)(3) of the Rule states that it is a Section 5 violation for a seller giving any option pursuant to § 435.1(b)(1) or (b)(2) to fail to furnish a buyer with adequate means, at the seller's expense, to exercise such an option. There was virtually no opposition in the Record for the proposition that the seller should bear the expenses of buyers communicating their decisions on options made necessary by the Rule.[115] The Commission's Rule governing the use of negative option plans, 16 CFR 425, does not require that sellers supply postage paid forms to buyers for use in expressing the decision to purchase or not to purchase, but the negative option plan situation is readily distinguishable from the situation governed by this Rule; in the negative option situation the buyer is made aware of the steps he must take to reject a selection prior to entering into any contractual arrangement with the buyer and every buyer thus expects to incur this expense and potential inconvenience.

In the situation governed by this Rule the buyer who must decide whether or not to exercise an option under the Rule is confronted with a situation which was not anticipated at the time he or she placed the order. He or she should not be confronted with any more unanticipated inconvenience or expense than is absolutely necessary. It is true that if sellers are required to pay for the responses of buyers to options, sellers will in all likelihood pass the costs which arise on to buyers, however in that event the cost of buying merchandise, including the seller's costs in paying for such buyer responses, will be disclosed prior to the time of placing an order. In addition, industry spokesmen repeatedly raised the problems associated with obtaining responses from consumers to inquiries. The requirement that the seller bear the initial expense of buyer responses will minimize the burden placed on consumers and hence will increase the likelihood of consumer response.

Section 435.1(b)(3) of the Rule establishes two related rebuttable presumptions which are similar in content to provisions contained in the published revised proposed Rule, which required a seller to send the specified notices to the buyer by first class mail accompanied by means in writing (by business reply mail or with postage prepaid) by which the seller could signify his option to cancel the order or accept delayed shipment. Although there was fairly wide-spread acceptance of the reasonableness of such requirements, it was pointed out that other means of communication, such as the use of the telephone, were of possibly superior efficacy and should not be forbidden by any Commission Rule.[116]

The Commission is of the view that the methods for contacting buyers and for providing a response mechanism described in the rebuttable presumption are the only methods which have a presently demonstrable ability to insure that buyers are provided with intelligible information and are given a meaningful opportunity to exercise their option to cancel their order or consent to delayed shipment. Pursuant to its authority to prescribe requirements for the prevention of unfair or deceptive practices, the Commission could have imposed in this Rule the notice and reply requirements of the published revised proposed Rule. However, the Commission does not wish to absolutely bar sellers from making use of other means of communication which are consistent with the requirements of the Rule and which can be demonstrated to be of equal or superior efficacy to the methods contained in these two rebuttable presumptions.

The final segment of § 435.1(b) makes it clear that, like the published proposed Rules, the final Rule is not designed to prevent a seller, who is unable to make shipment within the time set forth in § 435.1(a)(1) or within any delay period consented to by the buyer, from deciding to consider the order cancelled, notifying the buyer of this decision and providing a prompt refund. This provision of the Rule is not a judgment of any Commission that the activity of any seller in so doing is not, under any circumstances, a breach of contract or a violation of Section 5 of the Federal Trade Commission Act. It is merely a result of the Commission's conclusions that the present Record does not indicate that such activity is causing significant consumer injury and that regulating such activity is not necesary for the proper functioning of the Rule.

Section 435.1(c) of the Rule mandates that sellers deem orders cancelled and provide prompt refunds in enumerated situations. The first three are merely restatements of those situations where the buyer has taken a course of action or inaction under § 435.1(b) of the Rule which

[114] An unfairness analysis weighs the burden and cost to vendors against losses to buyers. *Id.* at 62.

[115] Direct Mail/Marketing Association, while not objecting to the seller paying for the postage a buyer will need to transmit a cancellation notice, did object to prepaid postal devices as a substantial and unnecessary burden. R. IV, p. 8929. The Commission finds this distinction insubstantial, especially in light of a submission from the president of DM/MA's predecessor organization, Direct Mail Advertising Association, which lauded business reply mail because of "• • • the convenience it affords the customer. Also, responses can be returned to the mailer at the mailer's postage expense." R. III, p. 579.

[116] *See, e.g.*, R. IV, pp. 8855, 8983.

V 40 214 NOV 5 75 XUM

would constitute cancellation of the order and entitle him to a refund. The reasons for requiring sellers to deem action or inaction on the part of a buyer as a cancellation of an order have been discussed above and shall not be repeated here.

The fourth situation mandating a seller to deem an order cancelled and to make a prompt refund is where the seller has notified a buyer of his inability to make shipment and his decision to cancel the order instead. Section 435.1(b) of the Rule specifically states that this Rule does not prohibit a seller from doing so. Section 435.1(c)(4) of the Rule assures that sellers opting to take this course of action do in fact deem orders cancelled and make prompt refunds.

Section 435.1(c)(5) is merely a restatement of the provision of the revised proposed Rule which required a refund where the seller is unable to ship within 30 days of receipt of an order or within the time stated in the solicitation and in addition fails to offer the option prescribed by § 435.1(b)(1). The Rule obviously cannot permit a seller who (1) fails to ship as required and (2) in addition violates the Rule's requirement of an offer to the buyer to cancel the order to retain any benefits from the transaction. The requirement of § 435.1(c)(5) makes it clear that the Rule does not permit such unfair or deceptive conduct.

The Record, not surprisingly, shows widespread support for the proposition that where an order is cancelled, the seller should provide a prompt refund.[117] The disagreement over what should constitute a "prompt refund" is discussed below.

In any action alleging a violation of this Rule, the failure of a seller to have records or other documentary proof establishing the use of systems which assure compliance, in the ordinary course of business, with any requirement of § 435.1 (b) or (c) of the Rule will create a rebuttable presumption that the seller failed to comply with said requirement. The revised proposed Rule made such a failure in itself a violation of the Rule and such a requirement was suggested by industry representatives as an alternative to the extensive recordkeeping requirements of the revised proposal.[118] Although the Commission, on the basis of the Record, could have made the establishment and maintenance of such records or other documentary proof an absolute requirement, it has chosen instead to establish that the failure to do so will create a rebuttable presumption of non-compliance with the Rule. By establishing this rebuttable presumption the Commission provides businesses with guidance while not preventing a business not wishing to undertake a recordkeeping expense from rebutting the presumption and demonstrating that it has complied with the Rule.

The definition of "Receipt of a properly completed order" § 435.2(b) has been rewritten to reflect the realities of the marketplace. The revised proposed Rule, published in March, 1974, measured events from "receipt of payment," however, the final Rule has adopted "receipt of a properly completed order" as more precise and also more reflective of the fact that credit sales are covered by the Rule.

§ 435.2(b) as it appears in the final Rule addresses the concern expressed by some sellers that improperly completed order forms could prevent them from shipping within the time requirements of the Rule and thus trigger the Rule's notice of delay and refund provisions.[119] The final Rule eliminates this problem by expressly providing that an order must contain all the information needed by the seller before the time standards of the Rule apply. Although the Rule's notice of delay and refund provisions are modified to take into account illegible or improperly completed orders, the Rule is not an invitation for sellers to knowingly enjoy the use of funds tendered with such orders while not undertaking any obligations with respect to the buyers placing the orders.

It should be noted that § 435.2(b) has also taken into account sellers' fears that they may be the victims of unscrupulous buyers. The Record contains a number of submissions expressing concern that the Rule would facilitate the defrauding of sellers with "bad checks."[120] § 435.2(b) is responsive to such concerns. The definition makes it clear that the seller is not forced to ship merchandise or meet the Rule's notice and refund requirements where the buyer's check or money order has been dishonored or where the seller discovers that the buyer does not qualify for a credit sale.

Finally, it should be noted that § 435.2(b) retains credit sales within the Rule's scope where the seller charges the buyer's account prior to shipping the merchandise. The reasons for retaining the scope of the revised proposed Rule are discussed in detail below in the analysis of the Commission's decision to not exempt credit transactions.

The revised Rule published in March, 1974 contained a definition of "prompt refund" (II(C) of the proposal). The final Rule has split this definition into individual "refund" and "prompt refund" definitions to facilitate understanding. In addition both of these definitions contain revisions from the earlier proposal to reflect valid comments in the Record.

The definition of "refund" has only been altered for credit sales and this alteration was made to give sellers the greatest possible flexibility in removing charges, preventing charges from being made and in notifying buyers of such actions.[121] The Rule's requirements for "refunds" is credit sales are in no way inconsistent with the requirements of the recently enacted Fair Credit Billing Act.[122] In fact the requirements of the Rule will facilitate the correction of any "billing errors" pursuant to the Act by assuring that in, most instances, a buyer availing himself of the Act's provisions will have some acknowledgement from the seller that a charge for goods is not appropriate.

The definition of "refund" has also been drafted to make it explicit that, where a buyer tenders payment in the form of cash, check or money order, the seller must return the amount tendered in the form of cash, check or money order. The Record has demonstrated that the practice of sellers issuing credit memoranda or the like has occurred and that such a practice should not be tolerated where the order is cancelled due to a delay in shipping.[123]

The definition of "prompt refund" contained in the final Rule makes a distinction between credit sales and those where the buyer has tendered payment in the form of cash, check or money order. In the latter case the March, 1974 proposed Rule's 7 working days requirement for refunds remains unchanged, except that the Rule requires that the refund be *sent* to the buyer by first class mail within 7 working days and not that it be received by the buyer within 7 working days.[124]

A number of industry spokesmen suggested that 7 working days was not enough time to make refunds, even with the "sent" modification in the final Rule. The Mail Order Association of America (MOAA), representing "most of the nation's major catalog retailers",[125] suggested that 14 working days [126] and, later, 10 working days [127] would be more realistic. Direct Mail/Marketing Association, with over 1600 members,[128] also suggested 10 working days.[129] MOAA stated that 7 working days was marginal for larger mail order houses,[130] however, Sears, Roebuck & Co. limited its objection to the refund provision of the March, 1974 proposed Rule to the requirement that the

[117] *See, e.g.*, R. III, pp. 276, 1107, 1277, 1399, 1498, 1597, 1617, 2077, R. IV pp. 8499, 8748, 8873A, 8975B, 8985.

customer *receive* a refund within 7 workdays days.[131] MOAA's second objection dealt specifically with the receipt within seven working days requirement of the March, 1974 proposal,[132] a requirement which has been modified to meet the objection. MOAA's final objection dealt with credit sales,[133] an objection which has been meoted by the final Rule, as is discussed below.

The Parcel Post Association, which represents over 200 members, submitted a revised proposed rule for consideration by the Commission which incorporates the final Rule's 7 working day requirement.[134] In addition several companies suggested that the 7 working days requirement of the final Rule was workable.[135]

The Commission finds on the basis of the above Record that the defining of "prompt refund" in terms of 7 business days, as is done in the final Rule, is both fair and workable. It gives the buyer back his money as soon as possible while not putting an unobtainable or unreasonable time constraint on sellers.

Where there is a credit sale, the Commission has defined "prompt refund" in terms of one billing cycle. A number of industry spokesmen express concern that a requirement such as 7 working days for refunds in credit sales would wreak havoc on credit billing systems and was totally unworkable.[136] The Commission has concluded that since the buyer has not been deprived of his money in situations governed by § 435.2(d)(2) and the practical difficulties involved with adjusting charge accounts are widely acknowledged taking up to one billing cycle to make a "prompt refund" where there is a credit sale is not unfair or deceptive and the Rule reflects that finding.[137]

Section 435.2(e) "time of solicitation" identifies the precise time at which a seller making a solicitation incurs an obligation to have the reasonable basis mandated by § 435.1(a) of the Rule. Although a seller must have a reasonable basis prior to making the solicitation,[138] the Commission recognizes that there can be a significant time lag between the time the seller has made firm arrangements for a solicitation and the time such solicitation reaches the public.[139] The Commission therefore realizes that at the time a solicitation is actually disseminated unanticipated events may have increased the expected shipping time beyond that reasonably anticipated at the time the solicitation was prepared. The Commission does not believe, on the basis of the available information, that the potential for consumer injury that would arise in those relatively rare instances covered by § 435.2(e)(2) and (3), when weighed against the "substantial expense" contemplated by these provisions, compels a conclusion that economic fairness requires sellers to bear such an expense.

Note 3 of the Rule exempts collect-on-delivery (C.O.D.) sales from the application of the Rule. The Record contains almost no complaints or other comments on C.O.D. mail order transactions [140] and neither of the two published proposed Rules had any application to C.O.D. mail order sales. Although the Commission is clearly empowered to "close all roads" as part of the process of preventing unfair or deceptive trade practices, the combination of virtually no information in the Record concerning abuses involving C.O.D. sales or the advisability of applying the Rule to C.O.D. sales and the lack of any explicit notice to the public that the Commission's Rule might govern C.O.D. sales persuades the Commission that, at this time, the exclusion of collect-on-delivery transactions from the application of this Rule is appropriate.

Note 4 of the Rule makes it clear that the Rule does not govern transactions regulated by the Commission's Rule entitled "Use of Negative Option Plans by Sellers in Commerce", 16 CFR 245.[141] Although there may continue to be unfair or deceptive practices related to the use of such plans, the Commission believes that because of the unique nature of such plans, amendment of 16 CFR 245, rather than promulgation of this Rule, is the appropriate path to end any such practices.

The language of Note 5, dealing with the effect on State law and municipal ordinances, has been altered to clarify its meaning. There has been no alteration of the intended meaning of similar provisions in the earlier proposed Rules.

Note 6 is an addition to the Rule to make explicit the intent of the Commission that if any provision or application of the Rule is held invalid the remainder of the Rule or its application elsewhere shall not be affected.

Note 7 establishes the effective date of the Rule. There was very little comment in the Record on what the period of time should be between the promulgation of the Rule and the date upon which the Rule becomes effective.[142]

The Commission believes that since the Rule makes express provision for the use of previously prepared advertising materials after the effective date of the Rule and has otherwise been designed to place as small a burden on sellers consistent with protecting the public interest providing for the Rule to become effective 100 days after promulgation will be ample time for sellers to bring themselves into compliance.

It should be noted that although the Rule, in some instances, will allow sellers to use advertising materials prepared prior to the effective date of the Rule which would otherwise be in violation of § 435.1(a)(1), the remainder of the Rule will be applicable to all sellers where a seller receives a properly completed order on or after the effective date of the Rule, regardless of whether the seller's solicitation is exempt. The Commission, while recognizing that sellers may face practical problems with the preparation and use of advertising materials, does not believe that these problems should be used as an excuse for escaping the notice and refund provisions of the Rule.

C. *Requests for exemption from application of the rule.* A number of requests were received by the Commission for the exemption of certain mail order transactions from the scope of the Rule. The following is a discussion of the various requests and of the Commission's decisions granting or denying such requests.

1. *Credit transactions.* Direct Mail/Marketing Association sought to exclude credit transactions arguing that the number of complaints involving credit mail order transactions found in the Record is insignificant.[143] While it is true that most of the consumer complaints received by the Commission involved prepaid orders, a substantial number of complaints involved credit transactions.[144]

[137] "An unfairness analysis will take into account many basic economic facts and considerations, and will permit a broad focus in the examination of marketing practices. Unfairness is potentially a dynamic analytical tool capable of a progressive, evolving application which can keep pace with a rapidly changing economy." *Pfizer, Inc.*, *supra* at 61.

[138] *Pfizer, Inc.*, *supra* at 64.

[139] *See, e.g.*, submission of Sears, Roebuck & Co., where it is pointed out that catalogs are prepared long in advance of their distribution, R. IV, p. 9203.

[140] The DM/MA sponsored analysis of complaint letters states that only 6 of the 3138 letters in the Record involved C.O.D. transactions. R. IV, p. 9290.

[141] Some sellers using negative option plans governed by 16 CFR 245 were concerned that this Rule could be construed as imposing requirements on users of such plans. R. III, p. 1505 (Book-of-the-Month Club, Inc.).

[142] Comment came almost entirely from two mail order trade associations: Mail Order Association of America (MOAA) and Direct Mail/Marketing Association (DM/MA which at the time of the comment was named Direct Mail Advertising Association). MOAA stated that "To cover catalogs and other media in process or effect, and to avoid significant changeover problems of mail order houses during the peak Christmas holiday season, the Rule should not be made effective earlier than six months after promulgation, and should not apply to media printed prior to the effective date." RIV., p. 8856. Representatives of DM/MA also argued for a six month period between promulgation and the effective date. R. III, pp. 1704 and 2302.

[143] *See*, R. III, pp. 2299–2300, R. IV, pp. 8923–26.

[144] The DM/MA sponsored survey of consumer complaints in the Record indicates that 141 involved credit transactions. R. IV, p. 9290.

V 40 214
NOV 5 75
XUM

Direct Mail/Marketing Association also attacked the extent of the Rule's coverage of credit transactions as "unrealistic" and "unfair."[146] DM/MA charged that "[i]t is neither logical nor fair to impose a delivery obligation on the seller vis-a-vis a buyer who has incurred no pre-delivery obligation to pay • • • ."[147] The Commission notes that DM/MA's assertions are not universally shared by industry spokesmen. The Mail Order Association of America supported regulation of mail order credit transactions and declared that "[i]t is proper that 'receipt' of a credit order should begin at the time when the customer's account is charged."[147] The Commission, upon review of the entire Record, rejects DM/MA's assertions and finds that the Record amply justifies the action taken by the Commission in the area of credit transactions.[148]

While the consumer who paid in advance may feel more oppressed when faced with non-delivery or late delivery of merchandise, all consumers who order mail order merchandise are the victims of unfair or deceptive practices when the seller who solicited their orders lacked a reasonable basis for expecting to be able to ship within 30 days of receipt of the orders or within the time stated in the solicitations. All consumers who order mail order merchandise and who are faced with a delay in shipment beyond thirty days or the time represented by the seller are also victims of unfair or deceptive practices where they are unable to cancel the order and obtain, where applicable, a refund or credit adjustment. In conclusion, the Commission finds that the abuses present in the mail order industry which are addressed by the Rule are present or are capable of being used in all types of mail order transactions within the scope of the Rule. Thus the Commission finds that the exclusion of credit transactions would run contrary to the evidence in the Record and in addition would seriously dilute and undermine the effectiveness of the Rule.

An examination of the newly-enacted Fair Credit Billing Act[149] reveals that the enactment of this legislation does not obviate the need for Commission action in the area of mail order credit sales. The only area governed by the Rule which is affected by the Act is the billing for goods not delivered. The provisions of the Act relevant to a consideration of the Rule were intended to govern "billing errors"[150] while the Rule is intended to govern the entire mail order transaction and to prevent the occurrence of such "errors" in mail order transactions where a refund is called for.

2. *Premium offers and promotions.* The Premium Advertising Association of America sought to exclude promotions and premium offers arguing that responding consumers seek to take advantage of a unique bargain and, since such articles often cannot be obtained elsewhere, consumers want the merchandise not a refund.[151] It was also argued that the mail cost for notification of customers on a temporarily out of stock premium involving a modest cash requirement may operate to destroy a substantial part of the premium advertising business, consequently, in the alternative, an exemption for items less than $10.00 was sought.[152] While these so-called "box top" type offers may "represent a promotional rather than a profit-making activity",[153] the Record contains a significant number of consumer complaints, primarily related to non-delivery, involving premium offers.[154] The fact that a significant number of consumers took the time and expense to complain about dissatisfaction with transactions involving small amounts of money strongly suggests that an exclusion of premium offers would not be in the public interest. In addition, the Record shows that 43 per cent of the over 3000 consumer complaint letters involved amounts of $10 or less.[155] The suggestion that a precedent for an exemption of low dollar amount transactions exists in the Commission's Trade Regulation Rule concerning a Cooling-Off Period for Door-to-Door Sales, 16 C.F.R. 429,[156] is inapposite. In promulgating that Trade Regulation Rule the Commission justified the exclusion of sales under $25.00 by observing that "Virtually all of the examples of the sort of sales which outraged consumers were for amounts in excess of $25.00."[157] In the present proceeding the Commission has received more that 1300 complaints involving mail order sales of $10.00 or less and there is no substantial information to justify such an exclusion.

3. *Specialty items and sales between businesses.* Still another industry trade association, Specialty Advertising Association International, sought to exclude specialty items such as calendars, pens, ashtrays, etc., bearing advertising messages, which are not sold to the general consuming public.[158] The contention was also made that sales between businesses should not fall within the purview of the Rule.[159] The Record demonstrates, however, that businessmen have encountered the same problems as the general public when dealing with distant mail order sellers[160] and that there is no compelling reason to treat them differently from other members of the consuming public.

4. *Magazine subscriptions.* The Magazine Publishers Association, as well as several individual publishers, argued that because of their special nature, magazine subscriptions should not be covered by the Rule.[161] These arguments centered around explaining why magazine subscriptions often cannot be commenced within the 30-day delivery period specified in the revised, proposed and final Rules.

The Commission finds no compelling reason why magazine publishers who are unable to ship the first issue within thirty days of receipt of an order cannot simply disclose the anticipated time between the order and shipment of the first issue. Time, Inc. attempted to explain its opposition to the application of the Rule to magazine subscriptions by stating that the inclusion of shipping time would result in a decrease in the rate of response to subscription solicitations for reasons other than conscious adverse consumer reaction to the disclosed shipping time: *"Anything contained in a solicitation which is not essential and basic information which the recipient requires to enter his order must result in a reduction of response"* (emphasis in the original).[162]

The Commission has made a determination that information disclosing shipping time is material and must be disclosed. In addition, the assertion by Time, Inc. that the inclusion in a solicitation of anything "which is not essential and basic information" will hurt sales does not appear to be an iron rule governing the actual practices of magazine publishers including Time, Inc. For example, the Commission notes that a solicitation for subscriptions to FORTUNE magazine, a Time, Inc. publication, in the June, 1974 issue of MONEY magazine, also a Time, Inc. publication, ran to well over 300 words. The Commission also notes that a solicitation for subscriptions to MONEY appearing in

[149] The Record, in fact, justifies the inclusion of all credit sales of mail order merchandise within the scope of the Rule. However, neither published proposed Rule explicitly covered all credit transactions. The Commission wishes to give every reasonable opportunity for notice and comment upon the scope of Trade Regulation Rules and has therefore decided to retain the scope of the published revised proposed Rule.

the May, 1974 issue of MONEY contained over 250 words.[163]

To the extent that the inclusion of shipping information may unconsciously affect the decision making process of potential subscribers, the Commission believes that any such adverse effect is greatly outweighed by the need for the Rule to apply to magazine subscriptions.[164] The Commission is aware of no reason why publishers of magazines cannot disclose the anticipated time period between receipt of an order and the shipment of the first issue in a way which will not be false or deceptive.[165]

Finally, the Magazine Publishers Association asserted that the Commission already established as reasonable a period longer than 30 days for the beginning of a magazine subscription: "This entry period was established by the Commission in the various 'cease and desist' orders it issued over the past several years concerning the trade practices of field selling subscription agencies."[166] The Association cited order provisions requiring customer orders to be entered with publishers no later than 60 days after the date of sale and to refund money to persons not receiving magazines within 120 days of the date of sale. "Inherent in these two provisions is a recognition by the Commission of a minimum of 60 days for the transit of orders and entry of subscription service by the publishers as a reasonable standard for the industry."[167]

The Commission has indeed issued cease and desist orders containing the language cited by the Association. *Public Circulation Service, Inc.*, 81 F.T.C. 187 (1972), *Subscription Bureau, Inc.*, 81 F.T.C. 201 (1972), *Dixie Reader's Service, Inc.*, 81 F.T.C. 215 (1972), *Interstate Publishers Service, Inc., et al*, 82 F.T.C. 364 (1973). All four of the above cited cases involved consent orders with respondents pursuant to Section 2.34(b) of the Commission's Rules of Practice.

The argument of the Association that bringing mail order subscriptions within the purview of the Rule conflicts with the action taken in those four cases is defective for a number of reasons. First, the cease and desist orders were responsive to abuses alleged to have been committed by field selling subscriptions agencies, not by magazine publishers, and the cases involved consent agreements where it cannot justifiably be said that the Commission established a time period for the start of magazine subscriptions applicable to the entire magazine industry. The use of case-by-case adjudication to establish industry-wide standards has been criticized as depriving agencies of a broad range of criticism, ideas and data, *see, e.g., National Petroleum Refiners Association* v. *F.T.C., supra* at 682. The development of such a standard for an industry in consent orders involving a related industry would be even more open to such criticism.

Second, the orders referred to merely require that the respondent sellers give conspicuous notice that a buyer can request a refund if the magazine isn't received within a specified time period (a clear warning that the buyer may have to wait that long) and to refund money upon such requests. Thus, the sellers in the cease and desist orders mentioned by the Association are required to provide the very type of notice which the Association claims its members cannot make.

In addition the cease and desist orders set an outside time limit for delivery beyond which the buyer can demand a refund. The Rule does not establish any absolute period as reasonable for the delivery or shipment of merchandise as suggested by the Association. The Rule merely states that if the seller has reason to believe that shipment will not be made within 30 days of receipt of the order, the anticipated time of shipment must be disclosed and if the seller cannot in fact ship within 30 days of receipt of the order or within the time represented to the buyer, the seller must give the buyer an opportunity to cancel the order.

5. *Customized or made-to-order merchandise.* Manufacturers of made-to-order and customized merchandise, which may take longer than 30 days to prepare and ship, likewise sought exemption from the rule.[168] However, no industry spokesman explained persuasively why such merchandisers cannot affirmatively disclose the estimated shipping time in their order solicitations. In addition, the difficulties raised by some spokesmen with the revised proposed Rule's requirement of silence does not equal consent to a delay[169] have been alleviated by the flexible requirements of the promulgated rule.

Industry representatives admitted in their submissions that at times they can not ship goods within 30 days.[170] Thus, the Record establishes that the potential for consumer injury, which the Rule is designed to end, exists in this segment of the mail order industry. The Commission therefore concludes that, in the absence of any persuasive reasons for exemption, the request for an exemption should be denied.

6. *Seed and nursery businesses.* Submissions of seed and nursery businesses maintained that they should be given an exemption because such items are "shipped at the proper planting time for the customers' area", which they say is disclosed in ads and solicitations, and since this future shipment date depends on so many variables it can never be "clearly and conspicuously stated" in the solicitation to which the buyer responds.[171] These submissions also point out that the buyers of seeds and plants do not expect shipment within 30 days but at the proper time for planting.

The Commission has received a number of complaints from consumers involving mail order nurseries,[172] but has concluded that although there are apparently abuses which may merit Commission action, the nursery industry is so unique that it cannot be adequately regulated by this Rule. Thus, the sale of seeds and growing plants is excluded from coverage of the Rule.

7. *Mail order photo finishing.* A number of trade associations concerned with mail order photo finishing[173] and mail order photo finishing businesses[174] protested the published proposed Trade Regulation Rules. Although the great bulk of the criticism from mail order photo finishing industry spokesmen centered around the record keeping provisions of the proposed Rules, the Record reflects their concern that the Rule's application to their industry will impose a substantial burden while not producing measurable consumer benefit.

The Record indicates that, although the Commission has received a number of consumer complaints concerning mail order photo finishing,[175] the problem associated with mail order film processing

---

[164] Although the two solicitations described here are not part of the Record in this proceeding, their content is not open to factual dispute.

[165] The Record is replete with consumer complaints of non-delivery or unreasonable delays in delivery of magazine subscriptions. *See, e.g.*, R. II, pp. 700, 810, 937, 942, 947, 948, 150, 1155, 1217, 1243, 1337, 1340, 1341, 1342, 1345, 1347, 1350, 1499, 1588, 1657, 1726, 1732, 1840, 1903, 1985, 2055, 3013, 3101, 3125, 3318, 3389, 3589, 3747, 3805, 3904, 4130, 4235, 4292, 4439, 4461, 4577, 4690, 4758, 4830 4850, 4881, 5009, 5033, 5047, 5060, 5126, 5658, 5732 5954, 6012, 6191, 6206, 6317, 6485, 6608, 6632, 6731, 6844, 6863, 6865, 6999, 6915, 6919, 7005, 7023, 7100, 7171, 7412, A spokesman for the Kansas Attorney General stated that "Problems with regard to the shipment of magazines have gone completely out of hand . . ." [176] The DM/MA sponsored analysis of consumer letters states that the Record contains 34 complaints involving mail order photo finishing, R. IV, p. 9290.

V 40 I 214 NOV 5 75 XUM

are not the same as those which are the primary focus of the Rule. Photo finishing is essentially a service with normally very rapid processing and remailing to the customer.[17] There is virtually nothing in the Record to indicate that mail order photofinishers solicit orders when they do not have a reasonable basis to expect shipment within 30 days of receipt of an order or that photo finishers encounter, with any significant frequency, situations where they become aware that they will not be able to ship an order within 30 days.

Upon reflection, the Commission concludes that in the case of the mail order photo finishing industry the customer is ordering a service and not merchandise to be shipped and there is the absence of the "back order" situation which often occurs with mail order merchandise.[17] As a result the available information appears to support the contention that most of the problems associated with mail order photo finishing delays are the result of loss or theft and not "mere" delays in shipping orders.[18] Thus, film processing is exempted from the scope of the Rule.

CHAPTER VI. MECHANICS OF THE RULE

The following discussion of the mechanics of the Rule is in many respects a restatement of the information contained in the previous discussion of the Basis for the Rule. It is included to provide a brief analysis of the requirements of the Rule without the detailed legal discussions and analysis of the Record contained in the Basis for the Rule section. This discussion is provided to acquaint the reader with the general provisions of the Rule and is not designed to be an exhaustive description of the Rule's requirements.

A. *Transactions governed.* The Rule governs all transactions, except collect-on-delivery transactions and those credit transactions where the seller does not charge the buyer's account prior to shipment, wherein the seller solicits an order for the sale of merchandise to be ordered by the buyer through the mails.

B. *Requirements at the time of solicitation.* The Rule requires a seller to possess, at the time of solicitation of an order, a reasonable basis to expect that he will be able to ship merchandise within that time clearly and conspicuously stated in such solicitation or, if no time is stated in such solicitation, within 30 days after receipt of a properly completed order. "Receipt of a properly completed order", "shipment" and "solicitation" are clearly defined in § 435.2 (a), (b) and (e). § 435.2 (b) and (e) are discussed in detail below.

The Rule also provides guidance to businesses as to what the Commission will accept as a reasonable basis for expecting to be able to ship within the applicable time: the use of systems and procedures which assure the shipment of merchandise, in the ordinary course of business, within the applicable time. The Rule also states that the seller's lack of documentary proof establishing the use of such systems and procedures will create a rebuttable presumption that the seller lacked a reasonable basis.

C. *"First Delay" notice requirement: § 435.1(b)(1).* A "first delay" situation exists where a seller is unable to ship merchandise within the time clearly and conspicuously stated in a solicitation, or if no time is so stated, within 30 days of receipt of a properly completed order from the buyer. "First delay" situations are governed generally by § 435.1(b)(1).

In a "first delay" situation the seller is required to offer the buyer an option either to consent to the delay or to cancel the order and receive a prompt refund. The offer must be made within a reasonable time after the seller first becomes aware that he is confronted with a "first delay" situation, but in no event later than the applicable time set forth in § 435.1(a)(1). The information which must be included within any offer of the option is specified by §§ 435.1 (b)(1)(i), (b)(1)(ii) and (b)(1)(iii) of the Rule. The seller must, pursuant to § 435.1(a)(3), have a reasonable basis for making a representation regarding a definite revised shipping date. In addition, where a seller lacks a reasonable basis for making any representation regarding a definite revised shipping date § 435.1(a)(3) of the Rule requires that, in any offer of an option, the seller inform the buyer of the reason or reasons for the delay.

D. *No buyer response in "First Delay" situations.* Under § 435.1(b)(1) the significance of no response from a buyer to a notice of delayed shipment depends upon the nature of the "first delay." Where a seller in a "first delay" situation supplies the buyer with a definite revised shipping date which is not more than 30 days later than the applicable time set forth in § 435.1(a)(1), the failure of the buyer, prior to shipment, to respond to the offer and cancel the order shall be deemed to be a consent to shipment on or before the definite revised shipping date. Where a seller is unable to provide a definite revised shipping date or provides a definite revised shipping date more than 30 days later than the applicable time set forth in § 435.1(a)(1), the seller may ship the order within 30 days of the applicable time set forth in § 435.1(a)(1), unless the seller receives a notice of cancellation from the buyer prior to shipment. If the seller is in fact unable to ship within 30 days of the applicable time set forth in § 435.1(a)(1) the seller must deem the buyer's order cancelled unless the seller receives the buyer's express consent to the delay within the additional 30 day period. Where a buyer expressly consents to an indefinite delay, the Rule requires the seller to grant the buyer a continuing right to cancel the order at any time prior to actual shipment.

E. *"Multiple Delay" notice requirements of § 435.1(b)(2).* A "multiple delay" situation exists where the seller is unable to ship on or before (1) the definite revised shipping date consented to under §§ 435.1(b)(1)(ii) or (iii), (2) the specific date consented to by the buyer pursuant to § 431.1(b)(1)(iv) or (3) a definite revised shipping date previously established pursuant to § 431.1(b)(2).

As in "first delay" situations, the seller is required to offer the buyer an option either to consent to the delay or to cancel the order and receive a prompt refund. Once again the seller must make the offer within a reasonable time after first becoming aware that he is confronted with a "multiple delay" situation. The information required to be included with the offer is specified in § 435.1 (b)(2)(i), (b)(2)(ii), and (b)(2)(iii). The requirements of § 435.1(a)(2) and (a)(3) are once again applicable as in § 435.1(b)(1) of the Rule.

It should be noted that the Rule allows a seller to obtain the consent of the buyer to further delay more than once. The seller need only have a reasonable basis for expecting shipment within the times stated in the offers of options.

F. *No buyer response in "Multiple Delay" situations.* Where a seller in a "multiple delay" situation supplies the buyer with any offer of an option pursuant to § 435.1(b)(2)—whether the offer states a definite revised shipping date or informs the buyer of the seller's inability to provide a definite revised shipping date—the seller must deem the order cancelled and make a prompt refund unless prior to the expiration of (1) the old definite revised shipping date provided under § 435.1(b)(1)(i), (2) the specific date previously consented to pursuant to § 435.1(b)(1)(iv) or (3) the definite revised shipping date previously consented to pursuant to § 435.1(b)(2), the seller receives notification from the buyer specifically consenting to the further delay. The Rule is quite explicit that in "multiple delay" situations the seller *cannot* construe silence of the buyer as consent to the further delay.

G. *Obtaining consent to unanticipated delays.* Section 435.1(b)(1)(iv) provides a mechanism through which a seller may obtain, in advance, the express consent of the buyer to a delay beyond the time the seller has stated as the anticipated length of a delay in shipment. Thus a seller may avoid a potential "race against time" due to § 435.1(b)(2)'s "silence of the buyer must be construed as cancellation of the order" provision should the seller experience an unanticipated delay beyond that consented to by the buyer.

H. *Clear and conspicuous offers, notices and options.* Section 435.1 (b)(1) and (b)(2) mandate that required offers, notices and options to buyers be clear and conspicuous. Section 435.1(b)(3) of the Rule provides guidance as to what constitutes "clear and conspicuous" within the context of the Rule by stating the failure of a seller to provide any required offer, notice or option in writing and by first class mail will create a rebuttable presumption that a seller failed to give a clear and conspicuous offer, notice or option. Any seller wishing to do so may use other means of providing an

[17] It is estimated that most orders are on their way back to the customer within 48 hours of receipt. R. III, p. 1658.

[18] For example, Sunset House stated that it encounters 200,000 "back orders" a year. R. IV, p. 8750.

[19] *See, e.g.*, Statement of Mail Enterprises, Inc., R. III, p. 1229.

offer, notice or option which is of equal or superior efficacy to the method prescribed by the Rule.

I. *Providing adequate means for buyer response.* Section 435.1(b)(3) of the Rule requires a seller to provide buyers with adequate means, at the seller's expense, to exercise any option or to notify the seller regarding cancellation pursuant to this Rule. This provision governs situations where (1) the seller has given the buyer an option to cancel or consent to delayed shipment and (2) the buyer has a continuing right to cancel, such as that mandated by § 435.1 (b)(1)(iii) and (b)(1)(iv).

The Rule establishes a rebuttable presumption that failure to provide the buyer with the means in writing (by business reply mail or with postage prepaid) to exercise any option or to notify the seller regarding a decision to cancel constitutes a failure to provide adequate means to notify or cancel pursuant to the Rule. By establishing this presumption the Commission is providing guidance and is not preventing sellers from providing other means which are of equal or superior efficacy to the means prescribed by the Rule.

J. *Seller's right to cancel not proscribed by the rule.* § 435.1(b) of the Rule makes it clear that the Rule does not forbid a seller who is unable to make shipment within the time set forth in § 435.1(a)(1) or within any delay period consented to by the buyer pursuant to § 435.1(b) to decide to cancel the buyer's order notifying the buyer of this decision and providing a prompt refund.

K. *When does the buyer's right to a refund vest?* Section 435.1(c) of the Rule states with precision the times at which the seller must deem an order cancelled and make a prompt refund. These are also the times at which the buyer's right to a refund vests under the Rule.

L. *Record keeping to show compliance with the rule's notice and refund provisions.* Although the Rule does not absolutely require a seller to have records or other documentary proof establishing the use of systems which assure compliance with any requirements of § 435.1 (b) and (c) of the Rule, the failure of a seller to have such records will create a rebuttable presumption of non-compliance.

M. *"Receipt of a properly completed order."* Section 435.2(b), "receipt of a properly completed order" is extremely important as it establishes the precise moment from which seller must measure time under § 435.1 (a)(1) and (b)(1) of the Rule. It should be noted that receipt of the properly completed order is generally the time at which the seller actually receives an order from the buyer containing all the information requested by the seller accompanied, where required, by the proper payment. Where there is a credit sale, "receipt of a properly completed order" is the time at which the seller charges the buyer's account.

The Rule provides, however, that where the seller received notice that the buyer's check or money order has been dishonored or that the buyer does not qualify for a credit sale, receipt of a properly completed order is defined as the time when the seller (1) learns that the buyer's check or money for the proper amount has been honored, (2) receives cash from the buyer in the proper amount or (3) learns that the buyer qualifies for a credit sale.

N. *"Prompt refund".* The time for making a prompt refund in compliance with the Rule is dependent upon whether the seller is tendering a refund in cash, check or money order pursuant to § 435.2(c)(1) or (c)(2)(iii) or making a refund within the meaning of § 435.2(c)(2)(i) or (c)(2)(ii).

In cases where a seller is tendering a refund by cash, check or money order the seller must send the refund to the buyer by first class mail within seven working days of the date on which the buyer's right to a refund vests under the Rule.

Where a refund is made within the meaning of § 435.2(c)(2)(i) and (c)(2)(ii), a refund must be sent to the buyer by first class mail within one billing cycle from the date on which the buyer's right to a refund vests under the Rule.

O. *"Time of solicitation".* It should be noted that the rigors of § 5435.1(a)(1)'s requirement that a seller must have a reasonable basis at the time of the solicitation to expect shipment within the applicable time are tempered by the definition of "time of solicitation". The Commission recognizes that, because of the potential problems and delay involved in preparing solicitations for orders, a seller might have had a reasonable basis when preparing the solicitation, but that a later unanticipated event may have increased the shipping time prior to the time of the actual solicitation. Thus the definition contains within it provisions based on "substantial expense" to the seller, which, where appropriate, fix the "time of solicitation" at a time earlier than the time at which the seller actually mails or otherwise disseminates the solicitation to a prospective purchaser. It should be noted that where the "time of solicitation" is fixed at an earlier time, the seller has incurred an obligation under § 435.1(b)(1), upon receipt of an order, to inform the buyer of the fact that he cannot ship within the applicable time set forth in § 431.1(a)(1) of the Rule.

P. *Effective date of the rule.* The Rule provides in Note 7, that the Rule governs all transactions where receipt of a properly completed order occurs more than 100 days after promulgation of the Rule. Section 435.1(a)(1) of the Rule, which regulates seller conduct at the time of the solicitation of an order, governs all solicitations where the time of the solicitation is more than 100 days after the promulgation of the Rule.

The effect of Note 7 is to allow sellers to continue to use advertising material prepared prior to the effective date of the Rule where the materials cannot be changed or cancelled without incurring substantial expense. Sellers allowed to do so are still subject to the other provisions of the Rule. Thus a seller allowed to do so who is unable to ship within the time noted in the solicitation, or if no time is stated within 30 days of receipt of a properly completed order, will still have to comply with the remainder of the Rule.

Promulgated October 22, 1975, by the Federal Trade Commission.

CHARLES A. TOBIN,
Secretary.

SPECIAL UNEMPLOYMENT ASSISTANCE

Revision

V 40 214 NOV 5 75 XUM

Title 20—Employees' Benefits

CHAPTER V—MANPOWER ADMINISTRATION, DEPARTMENT OF LABOR

PART 619—SPECIAL UNEMPLOYMENT ASSISTANCE

Revision of Regulations

On February 6, 1975, a document was published in the FEDERAL REGISTER (40 FR 5502) establishing a new Part 619 in Chapter V of Title 20 of the Code of Federal Regulations. Corrections to that document were published on February 25, 1975 (40 FR 8075). Part 619 implements the Special Unemployment Assistance Program enacted in Title II of the "Emergency Jobs and Unemployment Assistance Act of 1975" (Pub. L. 93–567; 88 Stat. 1845, 1850). The Act created a new, temporary program of Special Unemployment Assistance (SUA), financed from Federal funds, to furnish unemployment benefits to individuals who are unemployed and unable to obtain work, and who have no right under any State or Federal law to compensation, assistance, or allowances with respect to their unemployment.

Although Part 619 was made effective upon publication in the FEDERAL REGISTER, comments were solicited through March 14, 1975.

In addition, subsequent to the publication of Part 619, amendments to Title II of Public Law 93–567 were enacted in Title II of the "Emergency Compensation and Special Unemployment Assistance Extension Act of 1975" (Pub. L. 94–45; 89 Stat. 236, 240), and the Special Unemployment Assistance Program was affected by a provision enacted in Chapter VI of Title I of the "Second Supplemental Appropriations Act, 1975" (Pub. L. 94–32; 89 Stat. 173, 178).

All comments received with respect to Part 619 were given due consideration, and Part 619 has been reviewed in the light of the statutory changes made by Pub. L. 94–32 and the Extension Act.

A. As a result of the statutory changes in Pub. L. 94–32 and the Extension Act, and further review, Part 619 has been substantially revised as follows:

1. Technical and clarifying changes are made throughout Part 619, including the addition of paragraph headings.

2. In § 619.1 the purpose of Part 619 is clarified, and two rules of construction have been added to preclude strict interpretation of the Act and Part 619, and to provide assurance of uniform interpretation of the Act and Part 619 in all States insofar as is possible. Another provision has been added for monitoring the application of the Act and securing uniformity.

3. In § 619.2(j) the terms "employment not covered" and "wages not covered" are substituted for the term "not covered" in accord with the clarifying amendment in section 203(a) of the Extension Act. These changes are effective throughout the effective period of the program.

4. A new § 619.2(m) is added to define "Special Unemployment Assistance benefit year" as it is defined by an amendment in section 203(b)(2) of the Extension Act.

5. In relettered § 619.2(o) the term "State agency" is redefined as it is defined by an amendment in section 203(b)(2) of the Extension Act.

6. A new § 619.2(q) defining the term "valid claim" is added so as to incorporate the valid claim concept in keeping with amendments in the Extension Act. References to "timely initial claim" in various sections are changed to "valid claim."

7. In relettered § 619.2(u) the definitions of the terms "week of partial unemployment" and "week of part-total unemployment" are amended by deleting from the definitions the clauses which require that a claimant's earnings be less than the earnings allowance prescribed by the applicable State law plus the claimant's weekly amount of SUA. The change clarifies the application of varying State law provisions on the calculation of rights to partial benefits.

8. In § 619.3(b) "1976" is changed to "1977" and "1975" is changed to "1976" (in two places), pursuant to amendments in section 201(b) of the Extension Act which extend the Special Unemployment Assistance Program for an additional year.

9. In § 619.4 a provision is added requiring that a week of unemployment, for which SUA is payable, must occur during the individual's Special Unemployment Assistance benefit year, as well as during a Special Unemployment Assistance Period, in accordance with amendments in sections 201(a) and 203(b)(2) of the Extension Act.

10. Following the semicolon in the first sentence of § 619.4(b), the words "by the applicable State law" are deleted the first time they appear, so as to conform to the definitions of employment and wages not covered.

11. In § 619.4(e) a requirement is added which provides that SUA shall not be payable after the expiration of the individual's Special Unemployment Assistance benefit year, in accordance with amendments in sections 201(a) and 203(b)(2) of the Extension Act.

12. Section 619.6(a) is revised to reflect amendments in the Extension Act. The maximum amount of SUA payable to an individual during a Special Unemployment Assistance benefit year is changed to 150 per centum of the maximum amount of regular compensation as calculated under the provisions of the applicable State unemployment compensation law. This amount may not exceed thirty-nine (formerly twenty-six) times the weekly benefit amount determined under § 619.5.

13. A new § 619.6(b) is added providing for a special reduction in the maximum amount of SUA payable to an individual, in accordance with the amendment in section 203(c) of the Extension Act.

14. A new § 619.6(d) is added for clarification, to express the rule for computing the maximum amount of SUA in a Special Unemployment Assistance benefit year in certain circumstances.

15. A new § 619.6(e) is added specifying an effective date of July 1, 1975, for the revised § 619.6, in accordance with section 204(c) of the Extension Act. For the period prior to July 1, 1975, the former § 619.6 remains in effect.

16. New §§ 619.8(b), 619.8(c), and 619.8(e) are added for clarification. Paragraph (b) provides for determinations of claims for waiting period credit and weekly payments of SUA. Paragraph (c) contains the provision on redeterminations of entitlement formerly in § 619.9(a). Paragraph (e) requires prompt payment of SUA when due.

17. Section 619.9 is revised to limit it to appeals and hearings on SUA claims, and to clarify its application. The provision on reconsideration in § 619.9(a) is deleted and is now covered by paragraphs (c) and (f) of § 619.8.

18. A new § 619.9(c) is added to provide expressly that the Secretary's "Standard for Appeals Promptness—Unemployment Compensation" (20 CFR Part 650) shall apply to SUA appeals, and to apply State law on advancement of unemployment compensation claims on judicial calendars to SUA claims.

19. Paragraphs (a)(6) and (a)(7) of § 619.12 are corrected to exclude the Trade Act of 1974 (Pub. L. 93–618; 88 Stat. 1978, 2020–2030; 19 U.S.C. 2291–2323), so that entitlement to a trade readjustment allowance under that Act will not make an individual ineligible for a payment of SUA or waiting period credit. Paragraph (h) is added to govern weeks in which an individual is entitled to both SUA or waiting period credit and a trade readjustment allowance under the Trade Act.

20. A new § 619.12(e) is added, precluding payment of SUA and waiting period credit to teachers and certain other school employees, during a period between academic years or terms in the circumstances specified. Paragraph (e) is added to implement the amendment in section 202 of the Extension Act and the provision enacted in Chapter VI of Title I of the Second Supplemental Appropriations Act, 1975, and applies to weeks of unemployment beginning on and after June 13, 1975.

21. Section 619.13 is revised to implement the new overpayment and fraud provisions in accordance with the amendments in section 203(b)(1) of the Extension Act. Paragraph (a) restates the statutory provisions. Paragraph (b) prescribes the application of the amendments and the prior provisions of § 619.13. Paragraph (c) specifies the methods of enforcing repayment of overpayments. Paragraph (d) is essentially the same as former paragraph (e). Paragraph (e) applies the rule of common law offset so that SUA payable to an individual may be offset against any debt due to the United States from the individual. Paragraph (f) specifies the provisions of State laws which are applicable and those which are inapplicable, in regard to overpayments and fraud.

22. A new § 619.14 is added for clarification. It prohibits waiver of rights to SUA, assignment of those rights, and any legal process against SUA except as provided in § 619.13 or by applicable Federal law. Discrimination against SUA claimants in regard to employment is also prohibited, as is obstruction of an individual's attempt to claim or receive SUA. These "inviolate rights to SUA" are similar to the inviolate rights to State unemployment compensation which are requirements for State unemployment compensation laws under section 303(a) of the Social Security Act (42 U.S.C. 503(a)), and section 3304(a) of the Internal Revenue Code of 1954 (26 U.S.C. 3304(a)).

23. A new paragraph (a) is added to § 619.15, formerly § 619.14, requiring State agencies to keep records under the Act. In paragraph (b) a provision is added limiting disclosure of information where such disclosure would conflict with the Freedom of Information Act (5 U.S.C. 552), or the Privacy Act (5 U.S.C. 552a), or regulations of the Department of Labor promulgated thereunder.

24. In § 619.19, formerly § 619.18, paragraph (a)(3) is amended to require that the appropriate Assistant Regional Directors for Manpower be notified when national "on" and "off" indicators are determined. Paragraph (b) is amended to require notice of area "on" and "off" indicators to be given to appropriate State agencies and Assistant Regional Directors for Manpower.

25. A new § 619.21 is added. It provides for public inspection and copying of Agreements under the Act.

B. The comments received on Part 619 were given due consideration, but were not adopted for the following reasons:

1. It is suggested that Part 619 is unclear on the extent of its coverage as it pertains to employment of students and students' spouses, and to individuals engaged in casual labor. The scope of the program's coverage is in general and specific terms, and § 619.2(j) has been revised in accordance with an amendment on this point in section 203(a) of the Extension Act. Because of the many differences in coverage of State unemployment compensation laws, the coverage of this program will vary from State to State. It is considered better to prescribe coverage of the program in the terms of the statute, rather than attempt to prescribe in a regulation the specific coverage of the program in each State.

2. Another comment questions the use of the term "individuals" in this Part, rather than "workers". When referring to the members of the public at large the term "individuals" is preferred to the term "workers".

3. It is suggested that § 619.8(a)(2) be amended to allow the use of affidavits where neither a record nor information regarding employment and wages is available. The suggestion criticizes § 619.8(a)(2) as working a hardship against migrant and seasonal farmworkers, since members of this group may not know who their employers are, and because some of such workers are paid as a family and may not know what portion of the wages are attributable to each family member. Information concerning employment and wages is required for the proper administration of the Act. An affidavit may be used where records of employment and wages are not available. Extra efforts are required in some instances to obtain inaccurate information, but a determination of entitlement may not be made under the Act in the absence of the required information.

Accordingly, 20 CFR Part 619 is revised as set forth below.

Since the Extension Act was enacted on June 30, 1975, and several of the amendments to the Act became effective on or before that date, it is essential to publish the revised Part 619 as quickly as possible. For this reason, I, as Secretary of Labor, find that it is contrary to the public interest to publish the revised Part 619 as a proposal with opportunity for comment, and further determine that 29 CFR 2.7 shall not apply to this document. For the same reason and, in addition, for the reason that maximum entitlement to Special Unemployment Assistance was increased, I find that it is necessary that the revised Part 619 shall become effective on November 5, 1975. Therefore, Part 619 as revised in this document shall take effect on November 5, 1975.

Although revised Part 619 is being published in final form and is made effective as stated above, it is the policy of the Department of Labor to solicit and consider comments on the regulations it issues. Therefore, comments will be received, just as though this document was a proposal, until December 5, 1975, after which time the comments received will be evaluated, and, if warranted, Part 619 will be appropriately amended. Meanwhile, in the interest of making revised Part 619 effective as stated above, it shall be in force upon publication in the FEDERAL REGISTER and shall remain in force until further revised.

Interested persons are invited to submit written data, views, or arguments on revised Part 619, to the U.S. Department of Labor, Manpower Administration, Room 7000, Patrick Henry Building, 601 "D" Street NW., Washington, D.C. 20213, on or before December 5, 1975. All material received in response to this invitation will be available for public inspection during normal business hours at that address.

Effective date: 20 CFR Part 619 is revised effective November 5, 1975.

Signed at Washington, D.C. this 28th day of October 1975.

JOHN T. DUNLOP,
Secretary of Labor.

Part 619 of Title 20, Code of Federal Regulations, is revised to read as follows:

Sec.
619.1 Purpose; rules of construction.
619.2 Definitions.
619.3 Effective period of the program.
619.4 Eligibility requirements for Special Unemployment Assistance.
619.5 Special Unemployment Assistance: weekly amount.
619.6 Special Unemployment Assistance: maximum amount.
619.7 Claims for Special Unemployment Assistance.
619.8 Determinations of entitlement; notices to individual.
619.9 Appeal and hearing.
619.10 Provisions of State law applicable to claims.
619.11 The applicable State for an individual.
619.12 Restrictions on entitlement.
619.13 Overpayments; penalty for fraud.
619.14 Inviolate rights to SUA.
619.15 Recordkeeping; disclosure of information.
619.16 Special Unemployment Assistance Period.
619.17 Determination of national and area unemployment rates.
619.18 Determination of "on" and "off" indicators.
619.19 Announcement of the beginning and ending of a Special Unemployment Assistance Period.
619.20 Grants to States.
619.21 Public access to Agreements.
619.22 Information, reports and studies.

AUTHORITY: Sec. 202, Pub. L. 93–567 (88 Stat. 1845, 1850).

§ 619.1 Purpose; rules of construction.

(a) *Purpose.* Title II of the "Emergency Jobs and Unemployment Assistance Act of 1974" created a temporary program of Special Unemployment Assistance (SUA) for individuals who are unemployed during a period of aggravated unemployment and who are not otherwise eligible for unemployment compensation or allowances with respect to their unemployment under any other law. The regulations in this part are issued to implement the Act as it has been amended and supplemented.

(b) *First rule of construction.* The Act and the implementing regulations in this Part shall be construed liberally so as to carry out the purposes of the Act.

(c) *Second rule of construction.* The Act and the implementing regulations in this Part shall be construed so as to assure insofar as possible the uniform interpretation and application of the Act throughout the United States.

(d) *Effectuating purpose and rules of construction.* (1) In order to effectuate the provisions of this section each State agency shall forward to the United States Department of Labor, not later than 10 days after issuance, a copy of each judicial or administrative decision ruling on an individual's entitlement to SUA or waiting period credit. On request of the Department, a State agency shall forward to the Department a copy of any determination or redetermination ruling on an individual's entitlement to SUA or waiting period credit.

(2) If the Department believes a determination, redetermination, or decision is inconsistent with the Secretary's interpretation of the Act, the Department may at any time notify the State agency of the Department's view. Thereafter the State agency shall appeal if possible, shall not follow such determination, redetermination, or decision as a precedent; and, in any subsequent proceedings which involve such determination, redetermination, or decision, or wherein such determination, redetermination, or de-

V 40 214 NOV 5 75 XUM

cision is cited as precedent or otherwise relied upon, the State agency shall inform the hearing officer or court of the Department's view and shall make all reasonable efforts, including appeal or other proceedings in any appropriate forum, to obtain modification, limitation, or overruling of the determination, redetermination, or decision.

(3) A State agency may request reconsideration of a notice that a determination, redetermination, or decision is inconsistent with the Act, and shall be given an opportunity to present views and arguments if desired. If a determination, redetermination, or decision setting a precedent becomes final, which the Department believes to be inconsistent with the Act, the Secretary will decide whether the Agreement with the State shall be terminated.

(4) Concurrence of the Department in a determination, redetermination, or decision shall not be presumed from the absence of a notice issued pursuant to this paragraph.

§ 619.2 Definitions.

For the purposes of the Act and this part:

(a) "Act" means title II of the "Emergency Jobs and Unemployment Assistance Act of 1974" (Pub. L. 93–567; 88 Stat. 1845, 1850, approved December 31, 1974), as amended and supplemented by chapter VI of title I of the Second Supplemental Appropriations Act, 1975 (Pub. L. 94–32; 89 Stat. 173, 178), and title II of the Emergency Compensation and Special Unemployment Assistance Extension Act of 1975 (Pub. L. 94–45; 89 Stat. 236, 240).)

(b) "Agreement" means an agreement entered into pursuant to the Act, between a State and the Secretary of Labor of the United States, under which the State agency of the State agrees to make payments of Special Unemployment Assistance in accordance with the Act and the regulations and procedures thereunder prescribed by the Secretary.

(c) "Applicable State law" means the State law of the State which is the applicable State for an individual.

(d) "Area" means an area designated by the Secretary as an area served by an entity which is eligible to be a prime sponsor under section 102(a) of the Comprehensive Employment and Training Act of 1973 (29 U.S.C. 812(a)).

(e) "Compensation" means cash benefits (including dependents' allowances) payable to individuals with respect to their unemployment, and includes regular, additional, extended, and emergency compensation as defined in this section, and unemployment compensation payable under the Hawaii Agricultural Unemployment Compensation Law.

(f) "Regular compensation" means compensation payable to an individual under any State law, and, when so payable, includes compensation payable pursuant to 5 U.S.C. chapter 85, but not including extended compensation or additional compensation.

(g) "Additional compensation" means compensation totally financed by a State and payable under a State law by reason of conditions of high unemployment or by reason of other special factors, and, when so payable, includes compensation payable pursuant to 5 U.S.C. chapter 85.

(h) "Extended compensation" means compensation payable to an individual for weeks of unemployment in an extended benefit period, under those provisions of a State law which satisfy the requirements of the Federal-State Extended Unemployment Compensation Act of 1970, as amended (title II, Public Law 91–373; 84 Stat. 695, 708), with respect to the payment of extended compensation, and, when so payable, includes additional compensation and compensation payable pursuant to 5 U.S.C. chapter 85.

(i) "Emergency compensation" means compensation payable under the Emergency Unemployment Compensation Act of 1974 (Pub. L. 93–572), as amended, and referred to as Federal Supplemental Benefits (20 CFR Part 618).

(j)(1) "Employment not covered" means services performed by an individual for another as an employee (as defined in 26 U.S.C. 3121(d)) within a State or within or among two or more States, or on or in connection with an American vessel or American aircraft (as specified and defined in 26 U.S.C. 3306 (c), (m), and (n)), or outside of the States (except in Canada) for an American employer (as defined in 26 U.S.C. 3306(j)(3)) if the individual is a citizen of the United States, if the services are not services covered for the purpose of determining eligibility for compensation under a State law, the Hawaii Agricultural Unemployment Compensation Law, the Railroad Unemployment Insurance Act, or 5 U.S.C. chapter 85, and if the services constitute employment as determined under 26 U.S.C. 3306(c) without regard to the exclusions specified in paragraphs (1) through (9), (10)(B)(ii), (14), (15), and (17) of that section.

The term "wages not covered" means wages for services performed in "employment not covered" as defined in this paragraph.

The term "United States" as used in 26 U.S.C. 3306(c) shall include the Virgin Islands for the purposes of determining "employment not covered" as defined in this paragraph.

(2) The definitions in paragraph (j)(1) of this section, revised in accordance with the amendment in section 203(a) of the Emergency Compensation and Special Unemployment Assistance Extension Act of 1975 (Pub. L. 94–45; 89 Stat. 236, 241), shall be effective throughout the effective period of the Special Unemployment Assistance Program as specified in § 619.3.

(k) "Secretary" means the Secretary of Labor of the United States.

(l) "Special Unemployment Assistance" (referred to in this Part as SUA) means the benefits payable under the Act to individuals.

(m) "Special Unemployment Assistance benefit year" means the fifty-two week period beginning with the first week for which an individual files a valid claim for SUA.

(n) "State" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the Virgin Islands.

(o) "State agency" means the agency of the State which administers the program established by the Act.

(p) "State law" means the unemployment compensation law of a State which has been approved by the Secretary under section 3304 of the Internal Revenue Code of 1954 (26 U.S.C. 3304), and further means, with respect to the Virgin Islands, the unemployment compensation law of the Virgin Islands.

(q) "Valid claim" means an initial claim filed by an individual with respect to which a determination is made that the individual meets the requirements of paragraphs (b) and (e) of § 619.4, and is totally, part-totally, or partially unemployed.

(r) "Wages" means remuneration for services performed for another in an employer-employee relationship.

(s) "Waiting period" means the waiting period as provided in the applicable State law.

(t) "Week" means a calendar week.

(u) "Week of unemployment" means any week during which an individual is totally, part-totally, or partially unemployed. A week of total unemployment is a week in which an individual performs no work and earns no wages or has less than full-time work and earns not more than the earnings allowance prescribed in the applicable State law. A week of part-total unemployment is a week of otherwise total unemployment during which an individual has odd jobs or subsidiary work with earnings in excess of the earnings allowance prescribed in the applicable State law. A week of partial unemployment is a week during which an individual works less than regular, full-time hours for the individual's regular employer, because of lack of work, and earns more than the earnings allowance, prescribed by the applicable State law.

§ 619.3 Effective period of the program.

(a) *Beginning date.* Except as provided in paragraphs (b) and (c) of this section, SUA shall be payable, or waiting period credited, with respect to a week of unemployment commencing with the week beginning on December 22, 1974.

(b) *Ending dates.* SUA shall not be payable to any individual with respect to any week of unemployment ending after March 31, 1977; and no individual shall be entitled to a payment of SUA with respect to any week of unemployment which begins after December 31, 1976, unless the individual has filed a valid claim for SUA which is effective with respect to a week that begins on or before December 31, 1976.

(c) *Agreement as precondition.* Notwithstanding any other provision of the Act or this Part, SUA shall be payable solely through a State agency and only pursuant to an Agreement, and with respect to weeks in which an Agreement is in effect.

§ 619.4 Eligibility requirements for Special Unemployment Assistance.

An individual shall be eligible to receive a payment of SUA or waiting period credit with respect to a week of unemployment which begins during a Special Unemployment Assistance Period, and the individual's Special Unemployment Assistance benefit year, in accordance with the provisions of the Act and this Part, if that week is within the effective period of the program as set forth in § 619.3 and if, with respect to that week, all of the following requirements of (a) through (f) are met.

(a) *Ineligibility under other laws.* The individual (1) is not eligible for compensation under any State or Federal unemployment compensation law, including the State law of any State, 5 U.S.C. chapter 85, the Emergency Unemployment Compensation Act of 1974, and the Hawaii Agricultural Unemployment Compensation Law, as such laws may be amended, with respect to that week of unemployment; and is not eligible for unemployment compensation under the Railroad Unemployment Insurance Act, as amended, with respect to that week of unemployment; (2) is not receiving compensation with respect to that week of unemployment under the unemployment compensation law of Canada, as amended; and (3) is not eligible for assistance or an allowance payable with respect to that week of unemployment under any other Federal law, such as the Public Works and Economic Development Act Amendments of 1974, the Disaster Relief Act of 1974, the Trade Expansion Act of 1962, or any successor legislation or similar legislation, as determined by the Secretary.

(b) *Qualifying requirements.* (1) The individual meets the qualifying employment and wage requirements of the applicable State law in a base year which, notwithstanding the State law, shall be the fifty-two week period preceding the first week with respect to which the individual files an initial claim for SUA, and meets such qualifying employment and wage requirements; and for the purpose of this paragraph employment and wages which are not covered shall be treated as though they were covered, and shall be combined with employment and wages covered by any State or Federal unemployment compensation law, including the Railroad Unemployment Insurance Act and the Hawaii Agricultural Unemployment Compensation Law, in determining whether the individual meets the qualifying employment and wage requirements of the applicable State law, except that employment and wages shall be excluded for this purpose to the extent that the individual is or was entitled to compensation on the basis of such employment and wages under any unemployment compensation law. Employment and wages considered in determining an individual's eligibility for and entitlement to SUA shall not thereafter be considered in determining the individual's eligibility for and entitlement to SUA in connection with any further claim for SUA.

(2) For the purpose of determining an individual's eligibility for SUA under a State law that bases eligibility on employment or wages by calendar quarters, any employment or wages during the fifty-two week base year which fall within two incomplete calendar quarters shall either be treated as falling within two quarters, or be added together and treated as falling within one quarter, whichever is most advantageous to the individual.

(c) *Status of individual.* The individual is totally, part-totally, or partially unemployed, and is able to work, available for work, and seeking work within the meaning of, or as required by, the applicable State law, and is not subject to disqualification as provided in § 619.12 (d) with respect to that week of unemployment.

(d) *Claim filed.* The individual has filed an initial claim for SUA, and, as appropriate, has filed a timely claim for waiting period credit or a payment of SUA with respect to that week of unemployment.

(e) *Employed in the area.* In the area in which the individual was last employed for at least five workdays prior to filing an initial claim for SUA, a Special Unemployment Assistance Period is in effect with respect to that week of unemployment: *Provided*, That, if the individual, except for the imposition of a disqualification, was otherwise eligible for a payment of SUA or waiting period credit with respect to a week of unemployment which began during a Special Unemployment Assistance Period, but did not exhaust entitlement to SUA during the period, entitlement shall continue after the end of the period, but SUA shall not be payable for any week of unemployment that begins more than twenty-six weeks after the end of the period, or which begins after the expiration of the individual's Special Unemployment Assistance benefit year, or which ends after the effective period of the Special Unemployment Assistance Program as specified in § 619.3.

(f) *Agreement in effect.* The State in which the individual was last employed for at least five workdays, prior to filing an initial claim for SUA has entered into an Agreement which is in effect in that week.

§ 619.5 Special Unemployment Assistance: weekly amount.

(a) *Total unemployment.* (1) The weekly amount of SUA payable to an eligible individual for a week of total unemployment shall be the weekly benefit amount for a week of total unemployment that would be payable to the individual as regular compensation, as computed under the provisions of the applicable State law: *Provided*, That, in computing the individual's weekly amount of SUA, the base year, notwithstanding the applicable State law, shall be the fifty-two week period preceding the first week with respect to which the individual files a valid claim for SUA; and for the purpose of this proviso employment and wages which are not covered by the applicable State law, and employment and wages which are covered by any unemployment compensation law, shall be treated in the same manner and with the same effect and exception as is provided in § 619.4(b).

(2) If the individual would have more than one weekly amount of regular compensation for total unemployment computed under the provisions of the applicable State law in accordance with this paragraph, the weekly amount of SUA for total unemployment shall be the higher of: (i) The average amount determined by (A) multiplying each weekly amount, including dependents' allowances, payable for total unemployment, by the number of weeks for which each amount would be payable, (B) totaling the products so obtained, and (C) dividing this sum by the total number of weeks involved in the computation; or (ii) the amount that is reasonably representative of the weekly amounts.

(b) *Partial and part-total unemployment.* The weekly amount of SUA payable for a week of partial or part-total unemployment shall be determined under the provisions of the applicable State law which apply to regular compensation.

(c) *Computation rule.* For the purpose of computing an individual's weekly amount of SUA under a State law that calculates the weekly benefit amount on the basis of distribution of employment or wages among calendar quarters, any employment or wages during the fifty-two week base year which fall within two incomplete calendar quarters shall either be treated as falling within two quarters, or be added together and treated as falling within one quarter, whichever is most advantageous to the individual.

§ 619.6 Special Unemployment Assistance: maximum amount.

(a) *Computation.* Except as provided in paragraph (b) of this section, the maximum amount of SUA which shall be payable to an individual during a Special Unemployment Assistance benefit year established for the individual shall be 150 per centum of the maximum amount of regular compensation that would be payable to the individual during such benefit year, as computed under the provisions of the applicable State law, on the basis of the individual's employment and wages creditable for this purpose under the Act and this Part, but not exceeding thirty-nine times the weekly benefit amount payable to the individual for a week of total unemployment as determined under § 619.5: *Provided*, That, for the purpose of computing an individual's maximum amount of SUA the individual's base year, notwithstanding the State law, shall be the fifty-two week period preceding the first week with respect to which the individual files a valid claim for SUA; and for the purpose of this proviso employment and wages which are not covered by the applicable State law, and employment and wages which are covered by any unemployment compensation law, shall

V 40 214 NOV 5 75 XUM

be treated in the same manner and with the same effect and exception as is provided in § 619.4(b).

(b) *Special reduction.* (1) The maximum amount of SUA computed in accordance with paragraph (a) of this section for an individual shall be reduced by the amount of compensation received by the individual during a benefit year established under any State law for purposes of regular compensation, if the Special Unemployment Assistance benefit year established for the individual commences on a date that occurs within the benefit year established under that State law for purposes of regular compensation.

(2) The special reduction in paragraph (b) (1) of this section shall not operate (i) to reduce the amount in the Special Unemployment Assistance Account of any individual more than the amount standing to the credit of the individual's account as of July 1, 1975, after the application of paragraph (c) (2) of this section, or (ii) to affect the amounts of SUA otherwise payable to the individual for weeks of unemployment which began prior to July 1, 1975.

(c) *Individual accounts.* (1) A Special Unemployment Assistance Account shall be established for each individual determined to be eligible for SUA, in the sum of the maximum amount potentially payable to the individual during the individual's Special Unemployment Assistance benefit year, as computed in accordance with paragraphs (a) and (b) of this section.

(2) In the case of a Special Unemployment Assistance Account established for an individual as of a date prior to July 1, 1975, the sum of the maximum amount potentially payable to the individual shall be recomputed in accordance with paragraphs (a) and (b) of this section, and the amount established in the account as of July 1, 1975, shall be the recomputed sum less the amounts paid to the individual with respect to weeks of unemployment which began prior to July 1, 1975. The recomputed sum shall include any amounts payable to the individual with respect to weeks of unemployment which began prior to July 1, 1975.

(3) If it is subsequently determined as the result of a redetermination or appeal that the individual is entitled to a different amount of SUA than was previously established, an appropriate change shall be made in the individual's Special Unemployment Assistance Account. The appropriate change in the individual's account shall be computed in accordance with this section and, insofar as applicable, § 619.4.

(d) *Computation rule.* For the purpose of computing an individual's maximum amount of SUA in a Special Unemployment Assistance benefit year under a State law that calculates the maximum amount of benefits on the basis of distribution of employment or wages among calendar quarters, any employment or wages during the fifty-two week base year which fall within two incomplete calendar quarters shall either be treated as falling within two quarters, or be added together and treated as falling within one quarter, whichever is most advantageous to the individual.

(e) *Effective date.* The provisions of this section, revised in accordance with the amendments to the Act made by sections 201(a) and 203(c) of the Emergency Compensation and Special Unemployment Assistance Extension Act of 1975 (Pub. L. 94–45, 89 Stat. 236, 240, 242), shall be effective with respect to weeks of unemployment beginning on or after July 1, 1975. This section as it read prior to this revision shall remain applicable with respect to weeks of unemployment which began prior to July 1, 1975 (40 FR 5502, 5504, February 6, 1975).

§ 619.7 Claims for Special Unemployment Assistance.

(a) *Initial claims.* An initial claim for SUA shall be filed by an individual with respect to the individual's applicable State and according to the applicable State law on a form prescribed by the Secretary, which shall be furnished to the individual by the State agency.

(b) *Weekly claims.* Claims for waiting period credit and payments of SUA for weeks of unemployment shall be filed with respect to the individual's applicable State at the times and in the manner as claims for regular compensation are filed under the applicable State law, and on forms prescribed by the Secretary which shall be furnished to the individual by the State agency.

(c) *Secretary's standard.* The procedures for reporting and filing claims for SUA and waiting period credit shall be consistent with this Part and the Secretary's "Standard for Claim Filing, Claimant Reporting, Job Finding and Employment Services" (*Employment Security Manual*, Part V, sections 5000 et seq.).

§ 619.8 Determinations of entitlement; notices to individual.

(a) *Determination of initial claim.* (1) The State agency shall promptly, upon the filing of an initial claim for SUA, determine whether the individual is eligible and whether a disqualification applies, and, if the claim is found to be a valid claim, the weekly and maximum amounts of SUA payable to the individual.

(2) Notwithstanding the provisions of the applicable State law, an individual's eligibility for SUA may be determined, where a record of employment and wages is not available, on the basis of an affidavit submitted to the State agency by the individual.

(b) *Determination of weekly claims.* The State agency shall promptly, upon the filing of a weekly claim for a payment of SUA or waiting period credit with respect to a week of unemployment, determine whether the individual is entitled to SUA or waiting period credit with respect to such week, and, if entitled, the amount of SUA or waiting period credit to which the individual is entitled.

(c) *Redetermination.* The provisions of the applicable State law concerning the right to request, or authority to undertake, reconsideration of a determination pertaining to regular compensation under the applicable State law shall apply to determinations pertaining to SUA.

(d) *Notices to individual.* The State agency shall give notice in writing to the individual of any determination or redetermination of an initial claim and determinations or redeterminations of all weekly claims with respect to weeks of unemployment (and any claim with respect to a waiting week, if applicable), and each notice of determination or redetermination shall include such information regarding the determination or redetermination and notice of right to reconsideration or to appeal, or both, as is furnished with written notices of determinations and written notices of redeterminations with respect to claims for regular compensation.

(e) *Promptness.* Full payment of SUA when due shall be made with the greatest promptness that is administratively feasible.

(f) *Secretary's standard.* The procedures for making determinations and redeterminations, and furnishing written notices of determinations, redeterminations, and rights of appeal to individuals claiming SUA or waiting period credit, shall be consistent with this part and the Secretary's "Standard for Claim Determinations—Separation Information" (*Employment Security Manual*, Part V, sections 6010 et seq.).

§ 619.9 Appeal and hearing.

(a) *Applicable State law.* The provisions of the applicable State law concerning the right of appeal and fair hearing from a determination or redetermination of entitlement to regular compensation shall apply to determinations and redeterminations of eligibility for or entitlement to SUA and waiting period credit. Any such determination or redetermination shall be subject to review only in the manner and to the extent provided in the applicable State law with respect to determinations and redeterminations of entitlement to regular compensation.

(b) *Rights of appeal and fair hearing.* The provisions on right of appeal and opportunity for a fair hearing with respect to claims for SUA and waiting period credit shall be consistent with this part and with sections 303(a) (1) and 303 (a) (3) of the Social Security Act (42 U.S.C. 503(a) (1) and 503(a) (3)).

(c) *Promptness on appeals.* Decisions on appeals under the SUA program shall accord with the Secretary's "Standard for Appeals Promptness—Unemployment Compensation" in Part 650 of this chapter.

Any provision of an applicable State law for advancement or priority of unemployment compensation cases on judicial calendars, or otherwise intended to provide prompt payment of unemployment compensation when due, shall apply to proceedings involving entitlement to SUA.

§ 619.10 Provisions of State law applicable to claims.

(a) *Particular provisions applicable.* Except where the result would be inconsistent with the provisions of the Act or this part and procedures thereunder prescribed by the Secretary, the terms and conditions of the applicable State law which apply to claims for, and the payment of, regular compensation shall apply to claims for, and the payment of, SUA and claims for waiting period credit. The provisions of the applicable State law which shall apply to claims for, and the payment of, SUA and claims for waiting period credit include, but are not limited to:

(1) Claim filing and reporting;

(2) Information to individuals, as appropriate;

(3) Notices to individuals and employers, as appropriate, including notice to each individual of each determination and redetermination of eligibility for or entitlement to SUA and waiting period credit;

(4) Determinations and redeterminations;

(5) Ability to work, availability for work, and search for work; and

(6) Disqualifications.

(b) *IBPP.* The Interstate Benefit Payment Plan shall apply, where appropriate, to individuals filing claims for SUA and waiting period credit.

(c) *Procedural requirements.* The provisions of the applicable State law which apply hereunder to claims for, and the payment of, SUA and claims for waiting period credit, shall be applied consistently with the requirements of Title III of the Social Security Act and the Federal Unemployment Tax Act which are pertinent in the case of regular compensation, including but not limited to those standards and requirements specifically referred to in the provisions of this Part.

§ 619.11 The applicable State for an individual.

(a) *Applicable State.* The applicable State for an individual shall be that State in which the individual last worked for at least five workdays prior to filing a valid claim for SUA.

(b) *Limitation.* SUA is payable to an individual only by an applicable State as determined pursuant to paragraph (a) of this section.

§ 619.12 Restrictions on entitlement.

(a) *Entitlement under other laws.* An individual otherwise entitled to waiting period credit or a payment of SUA with respect to a week of unemployment shall not be entitled to such credit or payment if, with respect to that week of unemployment, the individual has received or is entitled to receive a payment with respect to unemployment under any of the following laws, as amended:

(1) Any State law or the Agricultural Unemployment Compensation Law of Hawaii;

(2) Any Federal unemployment compensation law, including 5 U.S.C. chapter 85 and the Railroad Unemployment Insurance Act, but not including the Act;

(3) The Emergency Unemployment compensation Act of 1974;

(4) The Public Works and Economic Development Act Amendments of 1974;

(5) The Disaster Relief Act of 1974;

(6) The Trade Expansion Act of 1962, with respect to weeks of unemployment beginning before April 3, 1975; with respect to weeks of unemployment beginning on or after April 3, 1975, paragraph (h) of this section shall apply;

(7) Any other Federal law which is a successor to any of the laws referred to in (2) through (5) or is similar to such laws in providing for the payment of assistance or an allowance with respect to unemployment.

(b) *Entitlement under Canadian law.* An individual otherwise entitled to waiting period credit or a payment of SUA with respect to a week of unemployment shall not be entitled to such credit or payment if, with respect to that week of unemployment, the individual is receiving compensation under the unemployment compensation law of Canada.

(c) *Excluded employment and wages.* Employment and wages creditable pursuant to § 619.4(b) in determining an individual's eligibility for SUA shall not include employment or wages earned or paid for employment which is contrary to or prohibited by any Federal law.

(d) *Disqualification.* If the week of unemployment for which an individual claims SUA or waiting period credit is a week to which a disqualification for compensation applies under the applicable State law, or would apply but for the fact that the individual has no right to compensation, the individual shall not be entitled to a payment of SUA or to waiting period credit for that week: *Provided*, That, employment or wages required by a State law to end a disqualification shall not be applied subject to any restriction that the employment or wages must be covered under an unemployment compensation law.

(e) *Teachers and certain other school employees.* (1) An individual who performs services primarily in an instructional, research, or principal administrative capacity for an educational institutional or agency shall not be entitled to a payment of SUA or waiting period credit with respect to any week commencing during the period between two successive academic years (or, when the contract provides instead for a similar period between two regular but not successive term, during such similar period) if—

(i) Such individual performed services in any such capacity for any educational institution or agency for the first of such academic years or terms; and

(ii) Such individual has a contract to perform services in any such capacity for any educational institution or agency for the latter of such academic years or terms.

(2) The provisions of paragraph (e) (1) of this section, added in accordance with the provision enacted in Chapter VI of Title I, Second Supplemental Appropriations Act, 1975 (Pub. L. 94–32; 89 Stat. 173, 178), and the amendment in section 202 of the Emergency Compensation and Special Unemployment Assistance Extension Act of 1975 (Pub. L. 94–45; 89 Stat. 236, 240), shall be effective with respect to weeks of unemployment beginning on and after June 13, 1975.

(f) *MDTA allowances.* An individual who is entitled with respect to a week of unemployment to both SUA and a training allowance under section 203 of the Manpower Development and Training Act of 1962, as amended (42 U.S.C. 2583), shall be treated the same as the individual would be treated if entitled to both regular compensation and such an allowance.

(g) *CETA allowances.* An individual entitled to the payment with respect to a week of unemployment of a basic weekly allowance under section 111(a) of the Comprehensive Employment and Training Act of 1973 (29 U.S.C. 821(a)), shall not, by reason of entitlement to a payment under that Act, be ineligible for a payment of SUA or waiting period credit to which the individual otherwise is entitled with respect to that week.

(h) *Trade Act of 1974 allowances.* An individual who is entitled, with respect to a week of unemployment which begins on or after April 3, 1975, to a trade readjustment allowance under chapter 2 of title II of the Trade Act of 1974 (19 U.S.C. 2271 *et seq.*; 29 CFR Part 91), shall not, by reason of entitlement to a trade readjustment allowance, be ineligible for a payment of SUA or waiting period credit to which the individual otherwise is entitled with respect to that week.

(i) *Limit on restrictions.* The restrictions on entitlement specified in paragraphs (a), (b), (d), (e), (f), (g), and (h) of this section shall not apply so as to affect the establishment of a valid claim for SUA or a Special Unemployment Assistance benefit year.

§ 619.13 Overpayments; penalty for fraud.

(a) *Statutory provisions.* (1) The penalty for making a false statement, misrepresentation, or nondisclosure to obtain a payment of SUA is prescribed in section 205(c) of the Act. Provisions concerning the recovery of fraudulent and nonfraudulent overpayments, and authorizing waiver of recovery of nonfraudulent overpayments under certain conditions, are prescribed in section 205 (d) of the Act.

(2) Subsection (c) of section 205 of the Act provides that:

(i) If an individual knowingly has made, or caused to be made by another, a false statement or representation of a material fact, or knowingly has failed, or caused another to fail, to disclose a material fact, and as a result of such false statement or representation or of such nondisclosure the individual has received an amount of SUA under the Act to which the individual was not entitled, the individual—

(A) shall be ineligible for further SUA under the Act in accordance with the provisions of the applicable State unemployment compensation law relating to fraud in connection with a claim for unemployment compensation; and

(B) shall be subject to prosecution under section 1001 of title 18, United States Code.

V 40 214 NOV 5 75 XUM

(3) Subsection (d) of section 205 of the Act provides that:

(i) In the case of any individual who has received an amount of SUA under the Act to which the individual was not entitled, the State is authorized to require the individual to repay the amount of such SUA to the State agency, except that the State agency may waive such repayment if it determines that the payment of such SUA was without fault on the part of the individual, and that such repayment would be contrary to equity and good conscience;

(ii) The State agency may recover the amount to be repaid, or any part thereof, by deductions from any SUA payable under the Act or from any compensation payable to the individual under any Federal unemployment compensation law administered by the State agency or under any other Federal law administered by the State agency which provides for the payment of any assistance or allowance with respect to any week of unemployment, during the three-year period after the date the individual received the payment of SUA to which the individual was not entitled, except that no single deduction may exceed 50 per centum of the amount of the payment from which such deduction is made; and

(iii) No repayment shall be required, and no deduction shall be made until a determination of overpayment has been made, notice thereof and an opportunity for a fair hearing has been given to the individual, and the determination has become final.

(b) *Application of statutory provisions.* (1) Subsection (c) of section 205 of the Act, as set out in paragraph (a) (2) of this section, shall apply to statements and representations made on and after June 30, 1975, and nondisclosures on and after that date, including statements, representations and nondisclosures in an affidavit referred to in section 205(b) of the Act and in § 619.8(a)(2). The provisions of this section as in effect prior to June 30, 1975 (40 FR 5502, 5505, February 6, 1975), and the last sentence of section 205(b) of the Act as in effect prior to repeal by section 203(b)(1)(A) of the Emergency Compensation and Special Unemployment Assistance Extension Act of 1975 (Pub. L. 94–45, 89 Stat. 236, 241), shall remain applicable prior to June 30, 1975.

(2) Subsection (d)(1) of section 205 of the Act, as set out in paragraph (a)(3)(i) of this section, shall apply to all overpayments of SUA, made from and after the effective date of the Act on December 31, 1974, which have not been recovered prior to June 30, 1975. As to any amount of an overpayment of SUA which has not been recovered prior to June 30, 1975, a determination shall be made as to whether recovery of the overpayment is waived pursuant to subsection (d)(1) of section 205. Each determination or redetermination that an individual has received any amount of SUA to which the individual was not entitled, which is made on or after June 30, 1975, shall include a determination as to whether recovery of the overpayment is waived pursuant to subsection (d)(1) of section 205 of the Act unless it is determined that the overpayment was the result of a false statement, representation, or nondisclosure in violation of subsection (c) of section 205 of the Act.

(3) Subsection (d)(2) of section 205 of the Act, as set out in paragraph (a)(3)(ii) of this section, which concerns recoupment of overpayments from sums payable to an individual under the Act and other specified Federal statutes, shall apply to all such sums otherwise payable to the individual on and after June 30, 1975.

(4) Subsection (d)(3) of section 205 of the Act, as set out in paragraph (a)(3)(iii) of this section, is applicable to every determination and redetermination concluding that an overpayment has been made, which is made on or after June 30, 1975. Paragraph (g) of this section, as in effect prior to June 30, 1975 (40 FR 5502, 5506, February 6, 1975), shall remain applicable to every determination and redetermination, concluding that an overpayment has been made, which is made prior to June 30, 1975.

(c) *Enforcement of repayment.* Repayment of any overpayment of SUA shall be enforced by any action or proceeding which may be brought under State or Federal law, unless recovery of the overpayment is waived in accordance with the Act and this section.

(d) *Recovered overpayments.* Overpayments of SUA recovered in any manner shall be credited or returned to the appropriate account of the United States.

(e) *Debts due the United States.* SUA payable to an individual shall be applied by the State agency for the recovery by offset of any debt due to the United States from the individual, but shall not be applied or used by the State agency in any manner for the payment of any debt of the individual to any State or any other entity or person.

(f) *State law inapplicable.* The provisions in this section concerning overpayments, penalty for fraud, repayment and recoupment of overpayments, and waiver of overpayments, shall apply to the Special Unemployment Assistance Program in lieu of the provisions of the applicable State law except:

(1) As provided in subsections (c) and (d) of section 205 of the Act;

(2) As provided in paragraphs (c), (g), and (h) of this section; and

(3) With regard to disqualification for fraudulently claiming or receiving a payment of compensation.

(g) *Procedural requirements.* (1) The provisions of paragraphs (c), (d), and (f) of § 619.8 shall apply to determinations and redeterminations made pursuant to this section.

(2) The provisions of § 619.9 shall apply to appeals and hearings with respect to determinations and redeterminations made pursuant to this section.

(h) *Fraud detection and prevention.* Provisions in the procedures of each State with respect to detection and prevention of fraudulent overpayments of SUA shall be, as a minimum, commensurate with the procedures adopted by the State with respect to regular compensation which are consistent with this part and the Secretary's "Standard for Fraud and Overpayment Detection" (*Employment Security Manual*, Part V, sections 7510 et seq.).

§ 619.14 Inviolate rights to SUA.

(a) *Waiver of rights void.* Any agreement by an individual purporting to waive, release, or commute any right of the individual to SUA shall be void.

(b) *Assignment of rights void.* Any purported assignment, pledge, or encumbrance of any right of an individual to SUA shall be void.

(c) *Legal process prohibited.* Except as provided in § 619.13 or by applicable statute of the United States or regulation of the U.S. Department of Labor, any right of an individual to SUA shall be exempt from levy, execution, attachment, garnishment, order for the payment of attorney fees, or any other remedy whatsoever provided for the collection of debt, and such remedies shall be precluded absolutely. This prohibition shall apply to sums payable to an individual and to sums paid to the individual.

(d) *Discrimination prohibited.* No person shall discriminate against any individual in regard to hiring or tenure of work or any term or condition of employment on account of seeking, claiming, or receiving any right to SUA.

(e) *Obstruction prohibited.* No person shall in any manner obstruct or impede, or attempt to obstruct or impede, any individual in seeking, claiming, or receiving any right to SUA.

§ 619.15 Record keeping; disclosure of information.

(a) *Record keeping.* Each State agency will make and maintain records pertaining to the administration of the Act as the Secretary requires, and will make all such records available for inspection, examination, and audit by such Federal officials or employees as the Secretary may designate or as may be required by law.

(b) *Disclosure of information.* Information in records made and maintained by a State agency in administering the Act shall be kept confidential, and information in such records may be disclosed only in the same manner and to the same extent as information with respect to regular compensation and the entitlement of individuals thereto may be disclosed under the applicable State law. This provision on the confidentiality of information shall not apply, however, to the U.S. Department of Labor, or in the case of information, reports, and studies requested pursuant to § 19.23, or where the result would be inconsistent with the Freedom of Information Act (5 U.S.C. 552), the Privacy Act (5 U.S.C. 552a), or regulations of the U.S. Department of Labor promulgated thereunder.

§ 619.16 Special Unemployment Assistance Period.

(a) *Beginning and ending.* A Special Unemployment Assistance Period shall begin in an area of a State on the first day of the third calendar week after the week for which there is an "on" indicator in the area, and shall terminate with the last day of the third calendar week after the first week for which there is an "off" indicator in the area.

(b) *Duration.* A Special Unemployment Assistance Period which triggers "on" in any area shall have a duration of not less than thirteen weeks, but in no event shall SUA be paid for any week which is not within the effective period of the Special Unemployment Assistance Program as specified in § 619.3.

§ 619.17 Determination of national and area unemployment rates.

The Secretary shall determine the national and area unemployment rates for the purposes of establishing the beginning and ending dates of a Special Unemployment Assistance Period in any area. In making a determination the Secretary shall use:

(a) For a national unemployment rate, the rate of national unemployment (seasonally adjusted) for all States, as determined by the Secretary.

(b) For an area unemployment rate, the rate of unemployment (not seasonally adjusted) in the area, as determined by the Secretary.

§ 619.18 Determination of "on" and "off" indicators.

(a) *"On" indicator.* There shall be an "on" indicator in an area for a week, if for the most recent three consecutive calendar months ending before that week, for which data are available, the Secretary determines that:

(1) The rate of national unemployment (seasonally adjusted) averaged 6.0 per centum or more; or

(2) The rate of unemployment in the area (not seasonally adjusted) averaged 6.5 per centum or more.

(b) *"Off" indicator.* There shall be an "off" indicator in an area for a week if, for the most recent three consecutive calendar months ending before that week for which data are available, the Secretary determines that both paragraphs (a)(1) and (a)(2) of this section are not satisfied.

§ 619.19 Announcement of the beginning and ending of a Special Unemployment Assistance Period.

(a) *National indicators.* In the case of an indicator based on the rate of national unemployment—

(1) Whenever the Secretary determines that there is an "on" indicator, the Secretary shall cause to be published in the FEDERAL REGISTER notice of the determination, and shall include in such notice the week for which there was an "on" indicator, the week when a Special Unemployment Assistance Period will commence, and information regarding the nationwide scope of the Special Unemployment Assistance Program.

(2) Whenever the Secretary determines that there is an "off" indicator, the Secretary shall cause to be published in the FEDERAL REGISTER notice of the determination and shall include in such notice the week for which there was an "off" indicator, the week when the Special Unemployment Assistance Period will end, and the areas which shall remain in a Special Unemployment Assistance Period by reason of area continuing "on" indicators.

(3) The Secretary shall also cause to be notified the appropriate news media, the heads of all State agencies, and the Assistant Regional Directors for Manpower, of the determination of an "on" or "off" indicator and of its effect.

(b) *Area indicators.* In the case of area indicators, when there is not in effect an "on" indicator based on the rate of national unemployment, the Secretary shall cause to be published in the FEDERAL REGISTER any determination made by the Secretary that there is an "on" or "off" indicator in an area, the area to which the determination is applicable, and the beginning or ending date, as the case may be, of the Special Unemployment Assistance Period in the area, where the State in which the area is located has entered into an Agreement which is in effect. The Secretary shall cause to be notified of any such determination the head of the State agency of the State concerned and the Assistant Regional Director for Manpower of the region in which the State concerned is located.

(c) *Publicity; notice to individuals.* Whenever the head of a State agency is notified of the Secretary's determination that an "on" or "off" indicator will begin or end a Special Unemployment Assistance Period in an area in the State, the head of the State agency shall promptly announce the Secretary's determination and the beginning or ending date of the Special Unemployment Assistance Period through appropriate news media in the State. In the case of a Special Unemployment Assistance Period that is about to begin, the announcement shall also describe clearly the unemployed individuals who may be eligible for SUA during the period; and in the case of a Special Unemployment Assistance Period that is about to end, the announcement shall also describe clearly the individuals whose entitlement to SUA will be terminated. Whenever there has been a determination that a Special Unemployment Assistance Period will terminate in a State, the State agency shall provide written notice to each individual who is currently filing claims for SUA of the forthcoming end of the Special Unemployment Assistance Period and its effect on the individual's right to assistance.

§ 619.20 Grants to States.

Each State which has entered into an Agreement shall be paid by the United States, from time to time, prior to audit or settlement by the General Accounting Office, and either in advance or by way of reimbursement as the Secretary decides in each instance, such amounts as are deemed necessary by the Secretary to make payments of SUA in accordance with the Act and this part and the procedures thereunder prescribed by the Secretary, and such amounts as are determined by the Secretary to be equal to the necessary costs for the proper and efficient administration of the Act by the State.

§ 619.21 Public access to agreements.

The State Agency will make available to any individual or organization a true copy of the Agreement with that State for inspection and copying. Copies of an Agreement may be furnished on request to any individual or organization upon payment of the same charges, if any, as apply to the furnishing of copies of other records of the State agency.

§ 619.22 Information, reports and studies.

State agencies shall furnish to the Secretary such information and reports and make such studies as the Secretary decides are necessary or appropriate for carrying out the purposes of the Act.

PART IV:

FEDERAL ELECTION COMMISSION

ADVISORY OPINIONS

V 40 214 NOV 5 75 XUM

FEDERAL ELECTION COMMISSION

[11 CFR Part 107]

[Notice 1975–72]

FEDERAL CAMPAIGN FUNDS

Allocation of Candidate and Committee Activities

The Federal Election Commission today publishes proposed regulations covering allocation of campaign contributions and expenditures, generally 2 U.S.C. §§ 431–437.

Comment period. Interested parties are invited to submit written comments on these proposed regulations to the Rule making Section, Office of the General Counsel, Federal Election Commission, 1325 K Street, NW., Washington, D.C. 20463. Comments should be received on or before December 5, 1975.

Hearings. The schedule for public hearings on the proposed regulation will be published in the near future.

Effective date. These regulations shall become effective on a date specified in a future notice published in the FEDERAL REGISTER, which effective date shall not be less than 30 calendar days after the date of this notice of proposed rulemaking, nor before the approval by the United States Congress.

It is proposed to add Part 107 as set forth below:

PART 107—ALLOCATION OF CANDIDATE AND COMMITTEE ACTIVITIES

Sec.

107.1 Allocation of expenditures between primary and general elections.
107.2 Allocations of contributions between primary and general elections.
107.3 Allocation of expenditures among (or between) candidates.
107.4 Allocation of expenditures among States by candidates for Presidential nomination.
107.5 Allocation of expenses between campaign and non-campaign related travel.

AUTHORITY: Sec. 306, 86 Stat. 17, as amended, (2 U.S.C. 438). Interpret or apply sections 301–308, 86 Stat. 18, (2 U.S.C. §§ 431–437).

§ 107.1 Allocation of expenditures between primary and general elections.

a. *General rule:* Expenditures made prior to the primary election shall be attributed to the primary, and be reported as such, and expenditures made after the primary shall be reported as expenditures made for the general election.

b. *Exceptions:* 1. In the event expenditures are made after the primary election but are clearly and identifiably made in connection with the primary, such expenditures shall be paid from the primary campaign account(s), and be reported as primary expenditures.

2. In the event expenditures are incurred before the primary election, which are clearly identified as being for the general election, such expenditures should be paid from the general election campaign account(s), and be reported as general election expenditures.

3. Goods and/or services purchased before the primary election and used or distributed after the date of the primary election are attributable to the general election and reported as a contribution (transfer) in-kind from the primary campaign account(s), to the extent that the total value of the goods and/or services transferred exceeds $1,000.

§ 107.2 Allocations of contributions between primary and general elections.

a. *General rule.* Contributions received before the primary election shall be deposited in the primary election account, and be reported as contributions for the the primary election shall be deposited in the gneral election account(s), and be reported as contributions made with respect to the general election.

b. *Exceptions:* 1. Contributions received before the primary election, but clearly designated as contributions with respect to the general election, shall be deposited in the general election account(s) and be rported as such.

2. Contributions received after the primary election, but clearly identified as contributions for the primary election shall be deposited in the primary election account(s), and be reported as contributions with respect to the primary election.

§ 107.3 Allocation of expenditures among (or between) candidates.

a. *General rule:* Expenditures made on behalf of more than one candidate shall be attributed to each candidate in proportion to the benefit each can be reasonably expected to derive. The amount attributed should be paid for and be reported by each candidate or his authorized committee in proportion to the benefit derived, or be reported as an independent expenditure where appropriate.

b. *Exceptions:* 1. An authorized expenditure made by a candidate or political committee on behalf of another candidate shall be reported as a contribution (transfer) in-kinid to the candidate on whose behalf the expenditure was made.

2. Expenditure for rent, overhead and general administrative costs of political committees and political party organizations ned not be attributed to inidividual candidates, unless such expenditures are made on behalf of an identifiable candidate or candidates.

c. Expenditures for educational campaign seminars, expenditures for training of campaign workers and registration or get-out-the-vote drives are attributable to candidates only when such expenditures are made on behalf of a clearly identified candidate or candidates.

§ 107.4 Allocation of expenditures among States by candidates for Presidential nomination.

a. Expenditures made by a candidate or his authorized committee(s) which seek to influence the nomination of a candidate for the Office of the President in a particular state shall be attributed ot that state. Such allocation of expenditures shall be reported on FEC Form 1301.

b. Expenditures for administrative, staff, and overhead costs directly relating to the national campaign headquarters shall be reported but need not be attributed to individual states. Expenditures for staff, media, printing and other materials and services used iin specific states shall b attributed to those states.

c. An expenditure by a presidential candidate for use in two or more states, candidate for use in two or more States, which cannot be attributed in specific amounts to each state, shall be attributed to each state based on the voting age papulation in each state which can reasonably expected to be influenced by such expenditure.

1. Expenditures for publication and distribution of newspaper, magazine, radio, television and other types of advertisements distributed in more than one state shall be attributed to each state in proportion to the estimated viewing audience or readership which such publication will reach.

2. Expenditures for travel within a state shall be attributed to such state. Expenditures for travel between states need not be attributed to any individual state.

§ 107.5 Allocation of expenses between campaign and non-campaign related travel.

a. Where a trip involves both campaign-related and non-compaign related stops, the expenditures allocable for campaign purposes are reportable, and are calculated on the cost-per-mile based on standard airline, bus, train, automobile or other appropriate rate, times the distance of the trip, starting at the point of origin, via every campaign-related stop and ending at the point of origin.

b. Where a person conducts any campaign-related business in a location such location is a campaign-related stop and expenditures made are reportable.

c. Travel expenses paid for out of appropriated funds are not campaign-related expenditures and need not be reported.

d. Notwithstanding paragraph (c) of this section, the reportable expenditure for a candidate who uses government conveyance or accommodations for travel which is campaign-related is the rate for comparable commercial or rental. In the case of a candidate authorized by law or required by national security to be accompanied by staff and equipment, the allocable expenditures are the costs of facilities sufficient to accommodate the party, less authorized security personnel and equipment. If such a trip includes both campaign and non-campaign stops, equivalent costs are calculated in accordance with paragraphs (a) and (b) of this section.

Dated: November 3, 1975.

THOMAS B. CURTIS,
Chairman,
Federal Election Commission.

FEDERAL ELECTION COMMISSION

[Notice 1975–71]

ADVISORY OPINIONS

The Federal Election Commission announces the publication today of Advisory Opinions 1975–51, 1975–57, and 1975–77. The Commission's opinions are in response to questions raised by individuals holding Federal office, candidates for Federal office and political committees, with respect to whether any specific transaction or activity by such individual, candidate, or political committee would constitute a violation of the Federal Election Campaign Act of 1971, as amended, of Chapter 95 or Chapter 96 of Title 26 United States Code, or of Sections 608, 610, 611, 613, 614, 615, 616, or 617 of Title 18 United States Code.

The Commission points out that these advisory opinions should be regarded as interim rulings which are subject to modification by future Commission regulations of general applicability. In the event that a holding in either opinion is altered by the Commission's regulations, the persons to whom the opinions were issued will be notified.

ADVISORY OPINION 1975–51

USE OF EXCESS CAMPAIGN FUNDS TO PURCHASE CONGRESSIONAL OFFICE EQUIPMENT

This advisory opinion is issued pursuant to 2 U.S.C. 437f in response to a request by Congressman James L. Oberstar. The request was published in the September 3, 1975, FEDERAL REGISTER (40 FR 40678), and interested parties were given an opportunity to submit written comments pertaining to the request. No comments were received.

In his request, Congressman Oberstar stated:

> Our office plans to install a computer terminal to meet the demand of constituent mail. The cost of the terminal will exceed our office allotment and, therefore, we would like to use excess campaign funds to establish a separate Oberstar Office Equipment account.

Congressman Oberstar has asked whether the use of campaign funds in the manner described is legal.

Under 2 U.S.C. 439a, "[a]mounts received by a candidate as contributions that are in excess of any amount necessary to defray his expenditures, . . . may be used by such candidate or individual, . . . to defray any ordinary and necessary expenses incurred by him in connection with his duties as a holder of Federal office, . . . or may be used for any other lawful purpose." The use of excess campaign funds to install a computer terminal for use in handling constituent mail would be permitted under this section.

The Commission is currently in the process of proposing a regulation pertaining generally to office accounts and in particular to the applicability of expenditure limitations to nonappropriated funds expended to support the activities of an officeholder.

This advisory opinion is issued on an interim basis only pending the promulgation by the Commission of rules and regulations of general applicability.

ADVISORY OPINION 1975–57

APPLICATION OF LIMITS TO POST-ELECTION CONTRIBUTIONS TO SINGLE CANDIDATE COMMITTEE

This advisory opinion is rendered pursuant to 2 U.S.C. 437f. The request was published on Setpember 3, 1975, in the FEDERAL REGISTER, 40 FR 40679. Written comments were invited for a period of ten days. No comments were received.

The request was subinitted by the treasurer of the John L. Grady Campaign Fund (hereinafter Grady Committee). Mr. Grady was a candidate for the U.S. Senate in 1974.

The first question raised is whether there is any time limitation on the acceptance of contributions subsequent to an election. Upon further inqiury, the Commission determined that the contributions would be solicited and expended solely to liquidate campaign debts from the 1974 election. The second question posed is whether it is permissible to accept funds raised from testimonials, dinners, etc. to liquidate past campaign debts if such events are held subsequent to an election. Funds raised for the above purpose through testimonials, dinners, etc. are contributions as defined in 2 U.S.C. 431(e).

Advisory Opinion 1976–6, the Policy Statement of the Commission and Interim Guideline published in the FEDERAL REGISTER on July 25, 1975 (40 FR 31315), and August 5, 1975 (40 FR 32950 and 32952) respectively, detail the position of the Commission regarding the retirement of 1974 campaign debts. These three publications set out specifically the requirements a candidate or his campaign committee must meet in order to use contributions for liquidating past debts. The Commission refers the Grady Committee to these publications in answer to its first two questions.

The last issue is whether funds raised after the election may be used to repay the candidate for loans made by him to his campaign fund. A candidate may be repaid for loans made by him to his campaign out of funds raised after the election. If any loans were made by the candidate after January 1, 1975, with respect to his 1974 Senate campaign, then the loan or advance must be evidenced by a written instrument fully disclosing the terms and conditions of such loan or advance. 18 U.S.C. 608(a)(3). The Federal Election Campaign Act of 1971 limited to $35,000 the amount a candidate for Senate could expend from his or her own funds or those of his or her immediate family in connection with a Senate campaign. No change was made in this limitation in the 1974 Amendments. A loan is an "expenditure" as defined in 18 U.S.C. 591(f). Therefore, the outstanding loan(s) by a candidate (or his or her immediate family) to his or her campaign may not exceed $35,000 at any time during the campaign.

The John L. Grady Campaign Fund may repay the candidate for loans or advances made to it before January 1, 1975, even though such loan or advance is not evidenced by a writing. Any loan made by a candidate (or his or her immediate family) on or after January 1, 1975, may only be repaid if it is evidenced by a writing. A loan or advance is computed in arriving at the total expenditure "only to the extent of the balance of such loan or advance outstanding and unpaid." 18 U.S.C. 608(a)(4). While the candidate for Senate may lend his campaign more than $35,000 aggregated during an election, at no time shall the outstanding balance, plus other expenditures from "immediate family" funds, exceed $35,000.

The statute makes no distinction for purposes of campaign debts and obligations between those debts owed the candidate and those owed to other persons. The Commission is of the opinion that both types of debts may be retired from contributions solicited specifically for that purpose (and received on or before December 31, 1975) subsequent to the election.

This advisory opinion is issued on an interim basis only pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–77

WHETHER ROYALTIES ARE SUBJECT TO LIMITATIONS ON ACCEPTANCE OF EXCESSIVE HONORARIUMS

This advisory opinion is rendered under 2 U.S.C. 437f in response to a request for an advisory opinion which was submitted by J. Brian Smith, Press Secretary, for Congressman John J. Rhodes, which was published as AOR 1975–77 in the October 1, 1975, FEDERAL REGISTER (40 FR 45295). Interested parties were given an opportunity to submit written comments relating to the request. No comments were received.

The request asks whether royalties from the publication of a book by a Congressman would be limited by the provisions of section 616 of Title 18, United States Code. It is provided in 18 U.S.C. 616 that:

> "Whoever, while an elected or appointed officer or employee of any branch of the Federal Government—
>
> (1) accepts any honorarium of more than $1,000 • • • for any appearance, speech, or article; or
>
> (2) accepts honorariums • • • aggregating more than $15,000 in any calendar year; shall be fined not less than $1,000 nor more than $5,000.

This provision clearly limits honoraria accepted for any appearance, speech, or article. The question then arises as to whether, for purposes of this section, a royalty received for the publication of a book should be treated as identical to an honorarium accepted for an article. As 18 U.S.C. 616 is a criminal statute, the canons of statutory construction require that its language should be strictly con-

V 40 214 NOV 5 75 XUM

strued so that each word will be given only is plain meaning in the absence of strong evidence to the contrary. Thus in this case the Commission concludes that the word "article" should be read narrowly and not interpreted as meaning "any publication."

This view conforms with the explicit intent of Congress with regard to this section:

Mr. HUGH SCOTT. • • • I have been asked by one Senator to raise a question as regards publication of books as distinguished from magazine articles. There is a limitation here on honoraria of $1,000. I believe there is an exception that does permit Members of Congress to publish books and to receive compensation for that purpose. Is that correct?

Mr. CANNON. The intent is that the publishing of a book does not constitute an honorarium under the language used in the bill. • • •

120 *Cong. Rec.* S18526 (daily ed., Oct. 8, 1974)

Mr. FRENZEL. [Presenting comments for the House of Representatives on the Conference Report.] • • • The conference substitute limits honorariums to $1,000 per appearance and a total of $15,000 per calendar year. I concur with the discussion by Senators Scott and Cannon • • •.

120 *Cong. Rec.* H10334 (daily ed., Oct. 10, 1974)

Accordingly, it is the opinion of the Commission that royalties from the publication of a book by a Congressman would not be affected by the provisions of 18 U.S.C. 616.

This advisory opinion is issued only on an interim basis pending the promulgation by the Commission of rules and regulations of general applicability.

Date: OCTOBER 30, 1975.

THOMAS B. CURTIS,
Chairman for the
Federal Election Commission.

[FR Doc.75-29640 Filed 11-4-75;8:45 am]

[Notice 1975-73, AOR 1975-99]

ADVISORY OPINION REQUESTS

In accordance with the procedures set forth in the Commission's Notice 1975-4, published on June 24, 1975 (40 FR 26660), Advisory Opinion Request 1975-99 is published today.

Interested persons wishing to comment on the subject matter of the Advisory Opinion Request may submit written views with respect to such request on or before November 17, 1975. Such submission should be sent to the Federal Election Commission, Office of General Counsel, Advisory Opinion Section, 1325 K Street, NW., Washington, D.C. 20463. Persons requiring additional time in which to respond to any Advisory Opinion Request will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered by the Commission before it issues an advisory opinion. The Commission recommends that comments on pending Advisory Opinion Requests refer to the specific AOR number of the Request commented upon, and that statutory references be to the United States Code citations, rather than to the Public Law Citations.

AOR 1975-99: Application of 18 U.S.C. § 611 to Contributions Made by Government Contractors to Non-Federal Candidates or for Non-Federal Political Purpose (Request Edited by the Commission).

Dear Commissioners: Pursuant to 2 U.S.C. § 437f • • • the San Francisco Republican County Central Committee, a "committee" as defined by 18 U.S.C. § 591(b) • • • respectfully requests you issue an advisory opinion as to whether a person, as defined by 18 U.S.C. § 591(g), or a labor organization, as defined by 18 U.S.C. § 610, can make contributions to a segregated fund within this committee from which no funds are contributed to or spent on any Federal candidates or campaigns or used to influence Federal elections, without violating § 611 of Title 18 United States Code, if the person or labor union is a government contractor as defined in § 611.

The San Francisco Republican County Central Committee receives funds contributed originally from corporations, labor unions and individual contributors. All corporate and labor union fundsand some individual funds are deposited into a separate, restricted bank account, which is registered under *Califiornia's Political Reform Act of 1974* and reported thereunder. Such restricted funds have been and are used only for constitutional office candidates, legislative candidates, statewide ballot measures, county office candidates, county ballot measures, city council and mayoralty candidates, city and local ballot measures, and special district candidates such as local transit boards and boards of education. A second bank account has been established by the committee for the support of Federal candidates and only unrestricted funds are solicited and deposited into that account, which account has been registered and reported under Title 2, United States Code, and as required, under California's *Political Reform Act of 1974*.

Does § 611 of Title 18, United States Code, prohibit government contractors, as defined therein, from making contributions to this San Francisco Republican County Central Committee restricted account?

VIGO G. NIELSEN, Jr.,
Special Counsel.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4406

Emergency Medical Services Week, 1975

By the President of the United States of America

A Proclamation

Each week more than a thousand Americans die as a result of accidents, heart attacks and other medical emergencies because emergency assistance is not available.

For many years, physicians and health professionals have urged improved national services and facilities for emergency medical care. Since 1968, pursuant to the publication of Standard 11, "Emergency Medical Services" in accordance with the Highway Safety Act of 1966, the Department of Transportation has been engaged actively in improving Emergency Care at the onset of the emergency and in transit to more definitive care. In 1973, the Congress passed the "Emergency Medical Services Systems Act of 1973" to create an additional national thrust toward the goal of improved total emergency care.

Now two Federal agencies, the Department of Transportation and the Department of Health, Education, and Welfare, are working closely with States and communities to improve medical emergency services. Although many cities enjoy satisfactory services, the great majority of our communities, especially in rural areas, still require considerable improvement.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby designate the week beginning November 3 as Emergency Medical Services Week.

I call upon the Governors and Mayors and all other State and local officials to assist hospital administrators and physicians, fire departments, public safety agencies and all ambulance services in improving emergency medical services.

I call upon Federal agencies, especially the Departments of Transportation and Health, Education, and Welfare to continue, with renewed vigor, their assistance to States and communities in accelerating efforts to help those in need of emergency medical assistance.

V 40 215 NOV 6 75 XUM

I call upon all our people to lend their support to these efforts. We are a traveling nation and none of us knows when we might need help far from home.

Let us affirm that this national legislation is only the beginning of our effort to upgrade and perpetuate this part of our total health care system so no individual in this country will lack help whenever or wherever he needs it.

IN WITNESS WHEREOF, I have hereunto set my hand this fourth day of November, in the year of our Lord nineteen hundred seventy-five and of the Independence of the United States of America the two hundredth.

Gerald R. Ford

[FR Doc.75-30071 Filed 11-4-75;4:51 pm]

PROCLAMATION 4407

National Farm-City Week, 1975

By the President of the United States of America

A Proclamation

Our Nation, nurtured on individual self-reliance, began as a rural society. Through two centuries, it has developed into primarily an urban society of great cities.

This growth has firmly established an interdependence between farm and city, which is greater today than it was two hundred years ago. Although farmers and ranchers comprise less of our population than in the past, their production of food has more than kept pace with our fundamental needs. This capability to produce our plentiful food supply is, in turn, dependent upon the efforts of those in urban centers to provide the goods and services which our farmers and ranchers need.

It is appropriate to remember and renew our understanding of this continuing partnership between farm and city. Only out of this working partnership will our country achieve new abundance and prosperity in the future.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby designate the period November 21 through November 27, 1975, as National Farm-City Week.

I request interested persons to join with agricultural organizations, business and labor groups, youth and community groups, schools and others to focus attention upon the interrelationships which exist among the constructive labors of all individuals, whether on the farm or in the city.

I urge the Department of Agriculture, educational institutions and other organizations and governmental agencies and officials to mark the significance of National Farm-City Week with special study, public meetings, exhibits and other appropriate activities in the public interest.

IN WITNESS WHEREOF, I have hereunto set my hand this fourth day of November, in the year of our Lord nineteen hundred seventy-five, and of the Independence of the United States of America the two hundredth.

Gerald R. Ford

[FR Doc.75-30072 Filed 11-4-75;4:52 pm]

V 40 215 NOV 6 75 XUM

PROCLAMATION 4408

Bill of Rights Day Human Rights Day and Week, 1975

By the President of the United States of America

A Proclamation

As the United States of America looks forward to the two hundredth anniversary of our Nation's independence next July, it is appropriate that we pause and reflect on the principles of self-government that underlie our society and continue to nourish it.

Embodied in our great national documents—the Declaration of Independence, the Constitution and the Bill of Rights—are the imperishable ideas that all men are created equal, that they are endowed with unalienable rights of life, liberty, and the pursuit of happiness, and that it is the people of the United States themselves who have ordained and established the government which serves us all.

The Founding Fathers could not foresee in detail the threats to liberty that might arise as the Republic grew, but they had the wisdom to know that threats would appear and that the people must be protected against them. When the new Constitution was being discussed in 1787, Thomas Jefferson complained in a letter to James Madison of the absence of a Bill of Rights, saying: "Let me add that a bill of rights is what the people are entitled to against every government on earth, general or particular; and what no just government should refuse, or rest on inferences."

Madison became convinced of the need for a Bill of Rights and wrote Jefferson: "The political truths declared in that solemn manner acquire by degrees the character of fundamental maxims of free government, and as they become incorporated with the National sentiment, counteract the impulses of interest and passion." In the First Congress, Madison, the principal proponent of those amendments to the Constitution known as the Bill of Rights, defended them in these words: "If they are incorporated into the constitution, independent tribunals of justice will consider themselves in a peculiar manner the guardians of those rights; they will be an impenetrable bulwark against every assumption of power in the legislative or executive. . . ."

This has truly been our national experience. So also in the international community have we come to respect and rely on the Universal Declaration of Human Rights as a fundamental statement of principles reaffirming faith in the dignity and worth of the human person and in the equal rights of men and women as the foundation of freedom, justice and peace in the world.

V 40 215 NOV 6 75 XUM

On December 15 we mark the one hundred eighty-fourth anniversary of the adoption of the Bill of Rights and on December 10 we observe the twenty-seventh anniversary of the Universal Declaration. It is fitting that in 1975, which is International Women's Year, we should recognize especially the contributions of women to political and social progress and underline our commitment to remove promptly such barriers that still remain in the way of their full participation in our Nation's life.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby proclaim December 10, 1975, as Human Rights Day and December 15, 1975, as Bill of Rights Day. I call upon the American people to observe the week beginning December 10, 1975, as Human Rights Week. Further, I urge all Americans during the coming bicentennial year to contemplate the principles of liberty and justice enunciated in the Bill of Rights and the Universal Declaration of Human Rights and to draw on them as the best means to assure our Nation's continued progress.

IN WITNESS WHEREOF, I have hereunto set my hand this fifth day of November, in the year of our Lord nineteen hundred seventy-five, and of the Independence of the United States of America the two hundredth.

Gerald R. Ford

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Tangerine Regulation 47, Amdt. 2]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Amendment of Size Regulation

Effective November 10, 1975, this amendment increases from 2$^{1}/_{16}$ inches (size 210) to 2$^{5}/_{16}$ inches (size 176) the minimum diameter requirement applicable to fresh shipments of Florida tangerines, except that during any week of the period November 10 through November 23, 1975, each handler may ship a quantity of tangerines not smaller than 2$^{1}/_{16}$ inches in diameter equal to 15 percent of the volume of tangerines he shipped in the most recent previous week of the current fiscal period. This requirement is designed to prevent an excessive buildup of smaller size tangerines in fresh market outlets and maintain orderly marketing conditions.

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the regulation of tangerine shipments, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The amendment reflects the Department's appraisal of the need for regulation of tangerine shipments based on the available supply and current and prospective market conditions. The amendment is designed to provide ample supplies of tangerines of the more desirable sizes in the interest of both growers and consumers. The action is designed to prevent an excessive buildup of smaller size tangerines and maintain orderly marketing conditions by preventing the adverse effect on the market caused by shipment of excessive quantities of smaller size fruit when more than ample supplies of the more desirable sizes are available to serve consumers' needs and the smaller fruit will increase to more desirable sizes as the season progresses. For the season through October 26, 1975, fresh shipments of Florida tangerines totaled 570 carlots, and there were an estimated 3,930 carlots remaining for fresh shipment. This amendment is consistent with the objective of the act of promoting orderly marketing and protecting the interest of consumers.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of tangerines, grown in the production area, are presently subject to regulation by grade and size, pursuant to the amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on October 28, 1975; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this amendment, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such fruit; compliance with this amendment will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

Order. In § 905.561 (Tangerine Regulation 47; 40 FR 42318, 49765) the provisions of paragraph (a)(2) are revised to read as follows:

§ 905.561 Tangerine Regulation 47.

(a) * * *

* * * * *

(2) Any tangerines, grown in the production area, which are of a size smaller than 2$^{5}/_{16}$ inches in diameter, except that a tolerance for tangerines smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in the United States Standards for Florida Tangerines: *Provided*, That during any week of the period November 10, 1975, through November 23, 1975, any handler may ship a quantity of tangerines which are smaller than 2$^{1}/_{16}$ inches in diameter, including the aforesaid tolerance, if (i) the number of standard packed boxes of such smaller tangerines does not exceed 15 percent of the total shipments of tangerines by such handler during the last previous week, within the current fiscal period, in which he shipped tangerines; and (ii) such smaller tolerance for tangerines smaller than 2$^{1}/_{16}$ inches in diameter, except that a tolerance for tangerines smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in said United States Standards for Florida Tangerines.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: October 31, 1975, to become effective November 10, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-29846 Filed 11-5-75;8:45 am]

[Valencia Orange Regulation 523]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation fixes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period November 7–13, 1975. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908. The quantity of Valencia oranges so fixed was arrived at after consideration of the total available supply of Valencia oranges, the quantity of Valencia oranges currently available for market, the fresh market demand for Valencia oranges, Valencia orange prices, and the relationship of season average returns to the parity price for Valencia oranges.

§ 908.823 Valencia Orange Regulation 523.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part

V 40 215
NOV 6 75
XUM

908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the respective quantities of Valencia oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Valencia oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee further reports that the fresh market demand for Valencia oranges improved somewhat from last week.

Prices f.o.b. averaged $3.42 per carton on a reported sales volume of 535,000 cartons last week, compared with an average f.o.b. price of $3.21 per carton and sales of 428,000 cartons a week earlier.

Track and rolling supplies at 192 cars were down 5 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Valencia oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on November 4, 1975.

(b) *Order.* (1) The respective quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period November 7, 1975, through November 13, 1975, are hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 375,000 cartons;

(iii) District 3: Unlimited movement.

(2) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Sec. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: November 4, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-30116 Filed 11-5-7511:57 am]

PART 929—CRANBERRIES GROWN IN THE STATES OF MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW JERSEY, WISCONSIN, MICHIGAN, MINNESOTA, OREGON, WASHINGTON, AND LONG ISLAND IN THE STATE OF NEW YORK

Assignment or Adjustment of Base Quantities

This document amends the Subpart—Rules and Regulations (7 CFR 929.101 *et seq.*) currently in effect pursuant to the applicable provisions of the amended marketing agreement and Marketing Order No. 929 (7 CFR Part 929), as amended, hereinafter referred to collectively as the "order." Said amendment adds a section, as hereinafter set forth, which enumerates the factors to be considered by the Cranberry Marketing Committee as a basis for assigning base quantities to individual growers or adjusting such base quantities pursuant to the order provisions of § 929.48(a)(1). Those order provisions specify, in part, that each grower's base quantity shall be the average of the two years of his greatest sales of cranberries during the six-year base-building period (the "representative period") of 1968–69 through 1973–74 from acreage established on or before August 16, 1968. Individual grower allotments, if and when issued, would be computed as a specified uniform percentage of each grower's base quantity.

Said order provisions further specify that persons who, prior to June 21, 1968, had made firm and substantial commitments for the production of cranberries but who would have no base quantities as determined on representative period sales or whose base quantities would not be representative of such commitments, may file an application with the Cranberry Marketing Committee for adjustment of or a new base quantity. The committee shall, by rules and regulations approved by the Secretary of Agriculture, consider each application and, if appropriate, provide for the assignment or adjustment of base quantities to such producers consistent with such commitments as will be equitable to all growers. Several such applications have been filed. Hence, the amendment which specifies the factors for consideration by the committee. Those factors are (1) the crop and sales records on acreage from which the base quantity derives and on any other acreage under control of the grower, (2) the grower's production trend and the production trend of the adjacent growing area during the representative period 1968–69 through 1973–74, and (3) any other factors as are applicable pursuant to the provisions of the marketing order.

The order regulates the handling of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York. This is a regulatory program effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The amendment was unanimously proposed by the Cranberry Marketing Committee which was established pursuant to the order to administer the terms and provisions thereof.

Notice was published in the October 2, 1975, issue of the FEDERAL REGISTER (40 FR 45443) that the Department was giving consideration to the aforesaid proposal to amend the Subpart—Rules and Regulations. The notice invited interested persons to submit written data, views, or arguments on the proposal not later than October 20, 1975. No such material was submitted.

After consideration of all relevant matter presented, including the proposal set forth in the aforesaid notice, the recommendation and information submitted by the Cranberry Marketing Committee, and other available information, it is hereby found that amendment of said rules and regulations, as hereinafter set forth, is in accordance with the provisions of the order and will tend to effectuate the declared policy of the act. Therefore, said rules and regulations are hereby amended by adding a new section reading as follows:

§ 929.148 Assignment or adjustment of base quantities.

(a) The committee shall, as a basis for assigning or adjusting any base quantity, consider the following factors:

(1) Crop and sales records on acreage from which the base quantity derives;

(2) Previous crop records on all other acreage, if any, under control of the grower;

(3) The grower's production trend from the beginning of the representative period 1968–69 through 1973–74 until the time of the committee's decision on any request for assignment or adjustment of the base quantity;

(4) The production trend, during the representative period 1968–69 through 1973–74, of the growing area adjacent to the acreage related to the base quantity under consideration; and

(5) Such other factors as are applicable pursuant to this part.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: November 3, 1975, to become effective December 10, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-29847 Filed 11-5-75;8:45 am]

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS AND GRANTS PRIMARILY FOR REAL ESTATE PURPOSES

[FmHA Instruction 444.1]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Subpart A—Section 502 Rural Housing Loan Policies, Procedures and Authorizations

MAXIMUM ADJUSTED INCOME FOR LOW- AND MODERATE-INCOME FAMILIES

The Farmers Home Administration is amending Exhibits C and D of Subpart A of Part 1822 of Title 7, Code of Federal Regulations (39 FR 45005 40 FR 28463) to further improve the operation and administration of the section 502 rural housing loan program. This amendment revises the adjusted income limits for low- and moderate-income families applying for FmHA Rural Housing loan assistance.

It is the policy of this Department that rules relating to public property, loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. These regulations, however, are not published for proposed rulemaking because the changes increase the income limits for eligibility for a Rural Housing loan in some states and enable the Agency to expedite needed benefits to the public, and to delay issuance of such regulations by publishing for public comment would be contrary to the public interest.

Interested persons may submit written comments, suggestions, data or arguments to the Office of the Chief, Directives Management Branch, Farmers Home Adminstration, United States Department of Agriculture, Room 6316, South Building, Washington, D.C. 20250, thirty days after publication in the FEDERAL REGISTER. Material thus submitted will be evaluated and acted upon in the same manner as if this document was a proposal. However, this revised part shall remain effective until it is amended. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Chief, Directives Management Branch, during regular business hours (8:15 a.m.–4:45 p.m.).

As revised, Exhibits C and D of Subpart A of Part 1822, read as follows:

EXHIBIT C

MAXIMUM ADJUSTED INCOME FOR LOW-INCOME FAMILIES

State:	*Maximum adjusted income*
Alabama	$8,500
Arizona	8,500
Arkansas	8,500

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Recent Changes and Additions

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPs) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 8260–3, 8260–4, or 8260–5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97–696 (35 FR 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Information Center, AIS–230, 800 Independence Avenue SW., Washington, D.C. 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending, or canceling the following VOR–VOR/DME SIAPs, *effective December 18, 1975.*

Ardmore, OK—Downtown Ardmore Arpt., VOR–A, Amdt. 6.
Cleveland, MS—Cleveland Municipal Arpt., VOR–A, Amdt. 3.
Clovis, N.M.—Clovis Municipal Arpt., VOR/DME Rwy 21, Amdt. 4.
Hope, AR—Hope Municipal Arpt., VOR/DME Rwy 4, Amdt. 2.
Missoula, MT—Johnson-Bell Field, VOR/DME–B, Amdt. 2.
Montgomery, AL—Dannelly Field, VOR Rwy 33, Amdt. 17.
Sacramento, CA — Sacramento Executive Arpt., VOR Rwy 2, Amdt. 5.
Sacramento, CA — Sacramento Executive Arpt., VOR/DME Rwy 20, Amdt. 4.
San Antonio, TX—San Antonio Int'l Arpt., VOR Rwy 17, Amdt. 22.
San Juan, P.R.—Puerto Rico Int'l Arpt., VOR Rwy 25, Amdt. 14.

. . . *effective November 13, 1975.*

Gaylord, MI—Otsego County Arpt., VOR Rwy 9, Orig.

2. Section 97.25 is amended by originating, amending, or canceling the following SDF–LOC–LDA SIAPs, *effective December 18, 1975.*

Sacramento, CA—Sacramento Executive Arpt., LOC(BC) Rwy 20, Amdt. 5.

3. Section 97.27 is amended by originating, amending, or canceling the following NDB/ADF SIAPs, *effective December 18, 1975.*

Cleveland, MS—Cleveland Municipal Arpt., NDB 17, Amdt. 1.
Dallas, TX—Dallas Love Field, NDB Rwy 13L, Amdt. 8, Canceled.
Jackson, TN—McKellar Field, NDB Rwy 2, Amdt. 2.
Kingsville, TX—Kleberg County Arpt., NDB Rwy 13, Amdt. 1.
Sacramento, CA—Sacramento Executive Arpt., NDB Rwy 2, Amdt. 5.
San Antonio, TX—San Antonio Int'l Arpt., NDB Rwy 30L, Amdt. 5.
San Antonio, TX—San Antonio Int'l Arpt., NDB Rwy 3R, Amdt. 30.
San Antonio, TX—San Antonio Int'l Arpt., NDB Rwy 12R, Amdt. 15.

. . . *effective December 11, 1975.*

Sacramento, CA — Sacramento Executive Arpt., ILS Rwy 2, Amdt. 18.
San Antonio, TX—San Antonio Int'l Arpt., ILS Rwy 30L, Amdt. 1.
San Antonio, TX—San Antonio Int'l Arpt., ILS Rwy 3R, Amdt. 7.
San Antonio, TX—San Antonio Int'l Arpt., ILS Rwy 12R, Amdt. 4.
Traverse City, MI—Cherry Capital Arpt., ILS Rwy 28, Amdt. 2.

. . . *effective October 23, 1975.*

Colorado Springs, CO—Peterson Field, ILS Rwy 35, Amdt. 28.

. . . *effective October 22, 1975.*

International Falls, MN—Falls Int'l Arpt., ILS Rwy 31, Amdt. 3.

5. Section 97.31 is amended by originating, amending, or canceling the following Radar SIAPs, *effective December 18, 1975.*

San Antonio, TX—San Antonio Int'l Arpt., RADAR–1, Amdt. 19.

6. Section 97.33 is amended by originating, amending, or canceling the following RNAV SIAPs, *effective December 18, 1975.*

Fort Dodge, IA—Fort Dodge Municipal Arpt., RNAV Rwy 6, Orig.
Somerville, N.J.—Somerset Arpt., RNAV Rwy 12, Orig.

These amendments are made effective under the authority of Secs. 307, 313, 601, 1110, Federal Aviation Act of 1958; 49 U.S.C. 1438, 1354, 1421, 1510, and Sec. 6(c) Department of Transportation Act, 49 U.S.C. 1655(c).

Issued in Washington, D.C., on October 31, 1975.

JAMES M. VINES,
Chief, Aircraft Programs Division.

NOTE.—Incorporation by reference provisions in §§ 97.10 and 97.20 approved by the Director of the Federal Register on May 12, 1969 (35 FR 5610).

V 40 N 215 NOV 6 75 XUM

Title 20—Employees' Benefits

CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Regs. No. 16]

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED (1974.....)

Medically Determined Drug Addicts and Alcoholics

On February 4, 1974, there was published in the FEDERAL REGISTER (39 FR 4483) a Notice of Proposed Rule Making with proposed regulations in Subpart I of Regulations No. 16 relating to medically determined drug addicts and alcoholics under title XVI of the Social Security Act, as amended by section 301 of the Social Security Amendments of 1972 (Pub. L. 92–603), approved October 30, 1972. The proposed regulations provided that a disabled individual who is medically determined to be a drug addict or alcoholic must undergo appropriate, available treatment at an institution or facility approved by the Secretary in order to be an eligible individual or eligible spouse under the Supplemental Security Income for the Aged, Blind, and Disabled program.

Interested parties were given 30 days in which to submit data, views, and arguments. Four letters of comment were received in response to the proposals. There follows a discussion of the comments and the disposition thereof.

One agency commented that § 416.981 failed to define the term "contributing factor." The agency expressed opposition to the section in the absence of an amendment to the Appendix which would provide standards to medically determine drug addiction and alcoholism both as a primary disability and as a contributing factor to disability. Section 416.906(d) of the regulations states that: "The presence of a condition diagnosed or defined as addiction to alcohol or drugs will not by itself be the basis for a finding that an individual is or is not under a disability. As with any other condition, the determination as to disability in such instances shall be based on symptoms, signs and laboratory findings." Accordingly, while drug addicts and alcoholics may be determined to be disabled under any of the medical criteria in the Appendix to the regulations (Listing of Impairments), specific criteria for the evaluation of claims involving drug addiction and alcoholism are provided under section 12.04 (Functional Non-psychotic Disorders) of the Appendix. In the context of § 416.981, the term "contributing factor" means that drug addition or alcoholism is material to the finding that the individual is disabled, i.e., all other facts being the same, but for his drug addition or alcoholism, the individual would not be determined to be disabled. In light of the comment, § 416.981 has been expanded to further define "contributing factor."

One writer took exception to the requirement that drug addiction and alcoholism be *medically* determined, stating that either physicians or psychologists should be considered competent to assess disability or undertake restorative services as is provided in the Rehabilitation Act of 1973 (Pub. L. 93–112). The words "medically determined" which appear in the regulations are taken from the language in section 1611(e)(3) of the Act, which provides that no person who may qualify by reason of disability shall be eligible for any month in which he is medically determined to be a drug addict or an alcoholic unless he is undergoing appropriate treatment that is available. In making a determination that an individual is a drug addict or an alcoholic, all evidence, including that from psychologists, will be considered. Once the disabled individual is medically determined to be a drug addict or alcoholic, he is subject to the treatment requirement. Section 416.983 defines appropriate treatment as "• • • a recognized medical or other professional procedure for the individual's condition as a drug addict or alcoholic and carried out at, or under the supervision of, an approved treatment facility." Appropriate treatment may, thus, include treatment by a psychologist provided the treatment is carried out at, or under the supervision of, an approved treatment facility. Accordingly, the regulations are not in conflict with the provisions of § 103(a) of Pub. L. 93–112 which pertain to diagnostic and related services in connection with rehabilitation potential.

One writer questioned whether these regulations would provide aid to medical institutions which treat drug addicts and alcoholics and recommended that hospital expenses be provided for a retroactive period of up to four months for expenses incurred in the treatment of drug addicts or alcoholics. To include this within the purview of the subject amendments would require further legislative enactment, since title XVI, as amended by Public Law 92–603, does not specifically provide funds for the treatment of drug addiction and alcoholism. However, section 1615 of the Act does require referral of individuals eligible by reason of disability to the State agency administering the State plan for vocational rehabilitation services for a review of his need for and utilization of the rehabilitation services available to him. Where that State agency determines that an individual is eligible for vocational rehabilitation services, payment for treatment may be made by the agency. Where, for appropriate reasons, that agency determines that an individual is not eligible for vocational rehabilitation services, treatment for drug addiction or alcoholism and the funds for such treatment may be made available, by a qualified State drug or alcoholism authority having *access* to other Federal and State funds.

Another writer agreed for the most part with the proposed regulations but urged that the Social Security Administration fully consider in advance the administrative problems involved in effectively administering such regulations, especially with regard to due process rights of drug addicts and alcoholics to a complete and impartial determination of their status. Due process rights, which are available to all individuals who apply for benefits under title XVI, are protected by the provisions of Subparts M and N of Regulations No. 16. These guidelines assure that the individual who is medically determined to be a drug addict or alcoholic is afforded the same rights for appealing an unfavorable decision on his application for benefits as are granted other individuals who contest a disability determination.

That writer further questioned whether the application of an eligible spouse of a medically determined drug addict or alcoholic could be denied or benefits terminated if the addict or alcoholic refused treatment. Section 1614(b) of the Act provides that an eligible spouse is an aged, blind, or disabled individual who is the husband or wife of another aged, blind, or disabled individual. Only one may qualify as an eligible individual. Accordingly, where the eligible individual's benefits are terminated or he loses his eligibility, the eligible spouse may become an eligible individual, provided the eligible spouse continues to meet the requirements for eligibility. Therefore, the application of an eligible spouse will not be denied nor will benefits be terminated by reason of the refusal of treatment by the eligible individual who is a drug addict or alcoholic.

In addition, § 416.984(b)(2) has been expanded to include licensed facilities among those that will be deemed approved by the Secretary and to further define the utilization of appropriate treatment facilities other than those utilized by the State Vocational Rehabilitation agency.

Accordingly, the regulations are adopted as proposed except for changes in the first sentence of § 416.981 and in paragraph (b)(2) of § 416.984, and are set forth below.

(Secs. 1102, 1611, 1614, and 1631 of the Social Security Act, as amended; 49 Stat. 647, as amended, 86 Stat. 1466, 86 Stat. 1471, 86 Stat. 1475; 42 U.S.C. 1302, 1382, 1382c, and 1383.)

Effective date. These amendments shall be effective November 6, 1975.

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program.)

Dated: November 22, 1974.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: October 30, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended by adding §§ 416.981 through 416.985 reading as follows:

Subpart I—Determination of Disability or Blindness

Sec.

416.981 Medically determined drug addicts and alcoholics.
416.982 Treatment required for medically determined drug addicts and alcoholics.
416.983 Appropriate treatment.
416.984 Institutions or facilities approved by the Secretary.
416.985 Availability of treatment.

Subpart I—Determination of Disability or Blindness

§ 416.981 Medically determined drug addicts and alcoholics.

For purposes of this Part 416 an individual will be medically determined to be a drug addict or alcoholic only if he is under a disability (as defined in § 416.901(b)) and drug addiction or alcoholism is a contributing factor to such disability, i.e., is material to the finding of disability. An individual who is under a disability as defined in § 416.901(b) independent of his drug addiction or alcoholism will not be medically determined to be a drug addict or alcoholic for the purposes of Subpart Q of this part. This provision does not apply to any individual whose eligibility for benefits under this Part 416 is based on age or blindness.

§ 416.982 Treatment required for medically determined drug addicts and alcoholics.

No disabled person shall be an eligible individual or eligible spouse for any month if such individual is medically determined to be a drug addict or alcoholic, in accordance with § 416.981, unless he is undergoing treatment that is appropriate for his condition as a drug addict or alcoholic at an approved institution or facility (see § 416.984), so long as such treatment is available, and demonstrates that he is complying with the terms, conditions, and requirements of such treatment.

§ 416.983 Appropriate treatment.

For purposes of this Part 416, appropriate treatment is a recognized medical or other professional procedure for the individual's condition as a drug addict or alcoholic and carried out at, or under the supervision of, an approved treatment facility (see § 416.984). This treatment may include medical examination and treatment, psychiatric, psychological and vocational counselling, or other appropriate services. It may be furnished through one or more facilities as part of an individualized treatment plan intended to insure that the individual is receiving treatment appropriate to his specific needs.

§ 416.984 Institutions or facilities approved by the Secretary.

(a) ***Approved institutions or facilities.*** An institution or facility that furnishes medically recognized treatment for drug addiction or alcoholism, in conformity with applicable Federal and State laws and regulations, may be approved by the Secretary for the purpose of these provisions.

(b) ***Treatment facilities deemed to be approved by the Secretary.*** —(1) ***Conversion cases.*** If an individual, medically determined to be a drug addict or alcoholic in accordance with § 416.981, is converted to the Federal program from a State program on the basis of the criteria outlined in § 416.901(b)(2) and as a condition of eligibility for aid under such State plan he was required to undergo treatment for drug addiction or alcoholism at an institution or facility accepted by the State for such purpose, such institution or facility will be deemed to be approved by the Secretary for such individuals.

(2) *Other cases.* Any institution or facility utilized by a State vocational rehabilitation agency for treatment of drug addicts or alcoholics in connection with their rehabilitation programs under the Rehabilitation Act of 1973, or any institution or facility utilized or licensed by any other appropriate State agency will be deemed to be approved by the Secretary for treatment of medically determined drug addicts or alcoholics. Utilization of appropriate treatment facilities other than those utilized by the State Vocational Rehabilitation agency means the referral of an individual by any State agency empowered to make such referrals to any institution or facility for treatment of drug addiction or alcoholism.

§ 416.985 Availability of treatment.

Whether treatment is available to a particular individual shall depend on the existence of an obtainable treatment vacancy in an approved institution or facility (see § 416.984) and the condition and circumstances of the individual, the treatment required, and the location of the treatment institution or facility, or the services or resources provided by the institution or facility. In determining the availability of treatment, consideration will also be given to the individual's general health, including his mobility and capacity to comprehend the essential specifications of appropriate treatment and the availability and cost of public and private transportation. The individual is not expected to pay for the treatment provided.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

[Docket No. 75F–0059]

PART 121—FOOD ADDITIVES

Food Additives Permitted in Food for Human Consumption; Chemical for Controlling Microorganisms in Cane-Sugar and Beet-Sugar Mills

Correction

In FR Doc. 75–28547, appearing at page 49573, in the issue for Thursday, October 23, 1975, the following correction should be made: On page 49574, the chemical name in the third entry under § 121.1155(b)(3)(i) should read: "Sodium dimethyldithiocarbamate".

SUBCHAPTER D—DRUGS FOR HUMAN USE

PART 436—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

PART 442—CEPHA ANTIBIOTIC DRUGS

Sterile Cephradine; Cephradine for Injection

The Commissioner of Food and Drugs has evaluated data submitted in accordance with regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act, regarding approval of the sterile antibiotic drug product cephradine for injection.

The Commissioner concludes that data supplied by the manufacturer about this antibiotic drug are adequate to establish its safety and efficacy when used as directed in the labeling and that the regulations should be amended to provide for its certification, effective November 6, 1975.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner (21 CFR 2.120), Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

1. Part 436 is amended:

a. In § 436.31 by adding new paragraphs (a)(5) and (b)(13) and (14), to read as follows:

§ 436.31 Equipment and diluents for use in biological testing.

• • • • • •

(a) • • •

(5) *Pyrogen-free sodium carbonate.* Heat anhydrous sodium carbonate for not less than 4 hours at 170° C.

(b) • • •

(13) Diluent 13 (pyrogen-free sodium carbonate solution). Dissolve 25.6 grams of anhydrous pyrogen-free sodium carbonate (prepared as described in paragraph (a)(5) of this section) in 1,000 milliliters pyrogen-free, distilled water (diluent 1). Pyrogen-free sodium carbonate solution meets the requirements for the absence of pyrogens as described in § 436.32(a)(3) when 1.0 milliliter per kilogram is administered as described in § 436.32(a)(2).

(14) Diluent 14 (0.07M sterile sodium carbonate solution). Dissolve 7.3 grams of sodium carbonate in distilled water to make 1,000 milliliters. Sterilize in an autoclave at 121° C for 20 minutes.

b. In § 436.32 by adding a new paragraph (g), to read as follows:

§ 436.32 Pyrogen test.

• • • • • •

(g) *Method 7.* Proceed as directed in paragraph (a) of this section, except dilute sample with sodium carbonate solution (diluent 13).

c. In § 436.33(b) by alphabetically inserting two new items in the table, as follows:

§ 436.33 Safety test.

• • • • • •

(b) • • •

V 40 215 NOV 6 75 N XUM

Antibiotic drug	Diluent (diluent number as listed in sec. 436.31)	Test dose: Concentration in units or milligrams of activity per milliliter	Test dose: Volume in milliliters to be administered to each mouse	Route of administration as described in par. (c) of this section
• • •	•	•	•	•
Cephradine for injection	1	23	0.5	Intravenous.
Cephradine, sterile	14	23	.5	Do.
• • •	•	•	•	•

• • • • • •

2. Part 442 is amended by adding §§ 442.40a and 442.240 to Subparts A and C, respectively, as follows:

§ 442.40a Sterile cephradine.

(a) *Requirements for certification*—(1) *Standards of identity, strength, quality, and purity.* Cephradine is 7-[D-2 - amino - 2 - (1,4 - cylohexadien - 1-yl) acetamido] - 3 - methyl - 8- oxo - 5-thia - 1 - azabicyclo[4.2.0]oct - 2 - ene-2-carboxylic acid. It is so purified and dried that:

(i) Its potency is not less than 900 and not more than 1,050 micrograms of cephradine per milligram on an anhydrous basis.

(ii) It is sterile.

(iii) It is nonpyrogenic.

(iv) It passes the safety test.

(v) Its moisture content is not more than 6.0 percent.

(vi) Its pH in an aqueous solution containing 10 milligrams per milliliter is not less than 3.5 and not more than 6.0.

(vii) Its cephalexin content is not more than 5 percent on an anhydrous basis.

(viii) It passes the identity test.

(ix) It is crystalline.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 432.5 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 431.1 of this chapter, each such request shall contain:

(i) Results of tests and assays on the batch for potency, sterility, pyrogens, safety, moisture, pH, cephalexin content, identity, and crystallinity.

(ii) Samples required:

(A) For all tests except sterility: 10 packages, each containing approximately 500 milligrams.

(B) For sterility testing: 1 package containing approximately 6 grams of a composite sample.

(b) *Tests and methods of assay*—(1) *Potency.* Proceed as directed in § 442.40 (b) (1) of this chapter.

(2) *Sterility.* Proceed as directed in § 436.20 of this chapter, using the method described in paragraph (e) (1) of that section.

(3) *Pyrogens.* Proceed as directed in § 436.32(g) of this chapter, using a solution containing 80 milligrams of cephradine per milliliter.

(4) *Safety.* Proceed as directed in § 436.33 of this chapter.

(5) *Moisture.* Proceed as directed in § 436.201 o this chapter.

(6) *pH.* Proceed as directed in § 436.202 of this chapter, using an aqueous solution containing 10 milligrams per milliliter.

(7) *Cephalexin content.* Proceed as directed in § 442.40(b) (5).

(8) *Identity.* Proceed as directed in § 436.211 of this chapter, using the 1 percent potassium bromide disc prepared as described in paragraph (b) (1) of that section.

(9) *Crystallinity.* Proceed as directed in § 436.203(a) of this chapter.

§ 442.240 Cephradine for injection.

(a) *Requirements for certification*—(1) *Standards of identity, strength, quality, and purity.* Cephradine for injection is a dry mixture of cephradine and one or more suitable and harmless solubilizing and buffering agents. Its potency is satisfactory if it contains not less than 90 percent and not more than 115 percent of the number of milligrams of cephradine that it is represented to contain. It is sterile. It is nonpyrogenic. It passes the safety test. Its loss on drying is not more than 5.0 percent. Its pH in an aqueous solution containing 10 milligrams per milliliter is not less than 8.0 and not more than 9.6. The cephradine used conforms to the standards prescribed by § 442.40a(a) (1).

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 432.5 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 431.1 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(A) The sterile cephradine used in making the batch for potency, moisture, pH, cephalexin content, identity, and crystallinity.

(B) The batch for potency, sterility, pyrogens, safety, loss on drying, and pH.

(ii) Samples required:

(A) The cephradine used in making the batch: 10 packages, each containing approximately 500 milligrams.

(B) The batch:

(1) For all tests except sterility: A minimum of 10 immediate containers.

(2) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filling operation.

(b) *Tests and methods of assay*—(1) *Potency.* Use either of the following methods; however, the results obtained from the microbiological agar diffusion assay shall be conclusive.

(i) *Microbiological agar diffusion assay.* Proceed as directed in § 436.105 of this chapter, preparing the sample for assay as follows: Reconstitute the sample as directed in the labeling for intramuscular use. Using a suitable hypodermic needle and syringe, remove all of the withdrawable contents if it is represented as a single dose container; or if the labeling specifies the amount of potency in a given volume of the resultant preparation, remove an accurately measured representative portion from each container. Further dilute an aliquot of this solution with solution 1 to the reference concentration of 10.0 micrograms of cephradine per milliliter (estimated).

(ii) *Hydroxylamine colorimetric assay.* Proceed as directed in § 442.40(b) (1) (ii), preparing the sample as follows: Reconstitute the sample as directed in the labeling for intramuscular use. Using a suitable hypodermic needle and syringe, remove all of the withdrawable contents if it is represented as a single dose container; or if the labeling specifies the amount of potency in a given volume of the resultant preparation, remove an accurately measured representative portion from each container. Further dilute an aliquot of this solution with distilled water to 1 milligram of cephradine per milliliter (estimated)

(2) *Sterility.* Proceed as directed in § 436.20 of this chapter, using the method described in paragraph (e) (1) of that section.

(3) *Pyrogens.* Proceed as directed in § 436.32(b) of this chapter, using a solution containing 80 milligrams of cephradine per milliliter.

(4) *Safety.* Proceed as directed in § 436.33 of this chapter.

(5) *Loss on drying.* Proceed as directed in § 436.200(b) of this chapter.

(6) *pH.* Proceed as directed in § 436.202 of this chapter, using an aqueous solution containing 10 milligrams per milliliter.

Since the conditions prerequisite to providing for certification of the subject antibiotic drug have been complied with and since the matter is noncontroversial in nature, notice and public procedure and delayed effective date are not prerequisites to this promulgation.

Effective date. This regulation shall be effective November 6, 1975.

(Sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357).)

Dated: October 31, 1975.

MARY A. MCENIRY,
Assistant to the Director for Regulatory Affairs, Bureau of Drugs.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-744]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

● **Purpose. The purpose of this notice is to list those communities wherein the sale of flood insurance is authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128).** ●

Insurance policies can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state (addresses are published at 39 FR 26186–93). A list of servicing companies is also available from the Federal Insurance Administration (FIA), HUD, 451 Seventh Street, SW., Washington, D.C. 20410.

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program. Accordingly, for communities listed under this Part no such restriction exists, although insurance, if required, must be purchased.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The date that appears in the fourth column of the table is provided in order to designate the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. These dates serve notice only for the purposes of granting relief, and not for the application of sanctions, within the meaning of 5 U.S.C. 551. The entry reads as follows:

§ 1914.4 List of Eligible Communities.

Acting Federal Insurance Administrator.

[FR Doc.75-29755 Filed 11-5-75;8:45 am]

[Docket No. FI-745]

PART 1915—IDENTIFICATION OF SPECIAL HAZARD AREAS

List of Communities With Special Hazard Areas

● Purpose. The purpose of this notice is the identification of communities with areas of special flood or mudslide or erosion hazards in accordance with Part 1915 of Title 24 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001–4128). The identification of such areas is to provide guidance so that communities may adopt appropriate flood plain management measures to minimize damage caused by flood losses and to guide future construction, where practicable, away from locations which are threatened by flood hazards. ●

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply to loans by a Federally regulated, insured, supervised or approved bank prior to January 1, 1976, to finance the acquisition of a previously occupied residential dwelling.

The effective date of identification shall be on or before December 8, 1975, or the date which appears in this notice, whichever is later.

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin 30 days after the date of publication in the FEDERAL REGISTER or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under Section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin 30 days after publication in the FEDERAL REGISTER or the effective date of the Flood Hazard Boundary Map, whichever is later.

Where several dates appear in the column set forth below marked Effective Date of Identification, the first date is the date of initial identification, and all other dates represent modification by additions or deletions to identified areas with special hazards.

Accordingly, § 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

§ 1915.3 List of communities with special hazard areas.

[Docket No. FI-776]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the County of Mobile, Alabama

On January 8, 1972, in 37 FR 281, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the County of Mobile, Alabama, as an eligible community and included Map No. H 015008 28, which indicates that the subdivision known as Rabbit Creek Estates, Mobile County, Alabama, as recorded in Map Book 25, Page 88, in the office of the Judge of the Probate Court of Mobile County, Alabama, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that Lots 1–6 and 10–15 of the above mentioned subdivision are within Zone C, and Lots 7–9 are within Zone B, and are not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the rate map. Accordingly, effective December 15, 1970, Map No. H 015008 28 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: October 15, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[Docket No. FI-775]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Arvada, Colorado

On July 13, 1972, in 37 FR 13715, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the City of Arvada, Colorado, as an eligible community and included Map No. H 085072 04, which indicates that Lot 4, Oak Subdivision, Arvada, Colorado, as recorded in Book 30, Page 33, in the office of the Clerk and Recorder of Jefferson County, Colorado, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is within Zone B, and is not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the rate map. Accordingly, effective May 1, 1971, Map No. H 085072 04 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: October 15, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Cedar Rapids, Iowa

On August 12, 1974, in 39 FR 28888, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the City of Cedar Rapids, Iowa, as an eligible community and included Map No. H 190187 01 which indicates that Lots 328 through 369, Northbrook Unit VII, Cedar Rapids, Iowa, as recorded in Volume 19, page 80 in the office of the Recorder of Linn County, Iowa, are in their entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is not within the Special Flood Hazard Area. Accordingly, effective August 2, 1974, Map No. H 190187 01 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: October 21, 1975.

RICHARD KRIMM,
Acting Federal Insurance Administrator.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Borough of Chatham, New Jersey

On May 24, 1973, in 38 FR 13646, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the Borough of Chatham, New Jersey, as an eligible community and included Map No. H 340338 02, which indicates that Lot 3/7, Block 148, Borough of Chatham, New Jersey, as recorded in Deed Book 2325, Page 341, in the office of the Clerk of Morris County, New Jersey, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is not within the Special Flood Hazard Area. Accordingly, effective June 1, 1973, Map No. H 340338 02 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: October 21, 1975.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Grove City, Ohio

On May 17, 1974, in 39 FR 17523, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the City of Grove City, Ohio, as an eligible community and included Map No. H 390173 04 which indicates that a part of Brook Park Section 2, Grove City, Ohio, as recorded in Plat Book 50, Page 4 in the Office of the Recorder of Franklin County, Ohio, is within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that Lots 1 through 18, and 29 of the above property are not within the Special Flood Hazard Area. Accordingly, effective May 17, 1974, Map No. H 390173 04 is hereby corrected to reflect these lots are not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: October 22, 1975.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Village of Groveport, Ohio

On June 13, 1974, in 39 FR 2695, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the Village of Groveport, Ohio, as an eligible community and included Map No. H 390174 02 which indicates that a portion of Hamilton Downs Section 1, Groveport, Ohio, as recorded in Plat Book 50, Pages 15 and 16 in the office of the Recorder of Franklin County, Ohio, is within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that Lots 1 through 109, and Reserves B and C of the above property are not within the Special Flood Hazard Area. Accordingly, effective May 31, 1974, Map No. H 390174 02 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: October 20, 1975.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Fairfax County, Virginia

On January 8, 1972, in 37 FR 281, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included Fairfax County, Virginia, as an eligible community and included Map No. E 515525 21 which indicates that Lot 48, Section One, Chalet Woods Subdivision being 14830 Cranoke Street, Centreville, Virginia, as recorded in Deed Book 2906, Page 307 in the office of the Clerk of the Court of Fairfax County, Virginia, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is within Zone C, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective June 17, 1970, Map No. H 515525 21 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Chesterfield County, Virginia

On January 28, 1975, in 40 F.R. 4134, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included Chesterfield County, Virginia, as an eligible community and included Map No. H 510035 70 which indicates that Lot 35, Block A, Section 3, Kendale Acres, Chesterfield County, Virginia, as recorded in Plat Book 22, Pages 13 through 15 in the office of the Clerk of Chesterfield County, Virginia, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the structure on the above property is not within the Special Flood Hazard Area. Accordingly, effective January 10, 1975, Map No. H 510035 70 is hereby corrected to reflect that the structure on the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Fairfax County, Virginia

On January 8, 1972, in 37 FR 281, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included Fairfax County, Virginia, as an eligible community and included Map No. H 515525 04 which indicates that Lot 3 of a Subdivision of a Portion of the Property of Louise R. Hartley, being 935 Swinks Mill Road, McLean, Virginia, as recorded in Book 4249, Page 644 in the office of the Clerk of the Court of Fairfax County, Virginia, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the structure on the above property is within Zone B, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective June 17, 1970, Map No. H 515525 04 is hereby corrected to reflect that the structure on the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: October 22, 1975.

[T.D. 7389]

PART 11—TEMPORARY INCOME TAX REGULATIONS UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

Temporary Regulations Relating to Disclosure Statements Regarding Individual Retirement Accounts, Individual Retirement Annuities, and Endowment Contracts

This document contains temporary income tax regulations (26 CFR Part 11) under section 407(l) of the Internal Revenue Code of 1954 as added by section 2002 of the Employee Retirement Income Security Act of 1974 (Pub. L. 93–406, 88 Stat. 958), hereinafter referred to as the "Act", in order to provide rules for the issuance of disclosure statements to individuals for whom an individual retirement account, an individual retirement annuity, or an endowment contract described in section 408(b) of the Code is established pursuant to section 408(l) of the Code. These temporary regulations are to remain in force and effect until superseded by permanent regulations.

Section 408(l) of the Code requires, in part, that the trustee of an individual retirement account and the issuer of an endowment contract described in section 408(b) or an individual retirement annuity make a report regarding such account, contract, or annuity to the individuals for whom the account, contract, or annuity is, or is to be, maintained with respect to contributions, distributions, and such other matters as set forth in regulations. The time and manner of furnishing such reports is also left to regulatory prescription.

The temporary regulations provide that a disclosure statement must be furnished to the "benefited individual" for whom such account, contract, or annuity is established. Furthermore, a copy of the instrument which establishes such account, contract, or annuity must accompany the disclosure statement.

A disclosure statement must be furnished to the benefited individual not later than the seventh day preceding the date on which the account, contract, or annuity is established. However, if the account, contract, or annuity permits the benefited individual to revoke the account, contract, or annuity within at least seven days, then the disclosure statement may be furnished on the date of establishment. A special disclosure statement is required to be furnished no later than the 30th day after the date an amendment to the account, contract, or annuity becomes effective or is adopted (whichever is later). If an account, contract, or annuity has already been established, purchased, or amended before November 30, 1975, a disclosure statement must be furnished not later than December 31, 1975.

The contents of the disclosure statement required under the temporary regulations involve three different categories. All information must be set forth in non-technical language. First, the regulations require concise explanations of the statutory requirements of the account, contract, or annuity, and of the statutory limitations and restrictions on the retirement savings deduction.

The second category consists of statements describing, among other things, the statutory prohibitions against engaging in prohibited transactions, borrowing on or pledging as security for a loan the account, contract, or annuity, making distributions before age 59½, and making certain accumulations.

The third category requires a financial disclosure, in accordance with the description set forth in the temporary regulations, for the first five taxable years during which contributions are to be made, and for the years during which the benefited individual attains ages 60, 65 and 70.

The disclosure statement required to be issued in relation to an amendment of an account, contract, or annuity need only contain those matters which are affected by such amendment.

ADOPTION OF REGULATIONS

In order to prescribe temporary income tax regulations pursuant to section 408(l) of the Internal Revenue Code of 1954, as added by section 2002 of the Employee Retirement Income Security Act

V 40 215
NOV 6 75
XUM

of 1974 (Pub. L. 93-406, 88 Stat. 958), relating to disclosure statements to an individual for whom is established an individual retirement account, individual retirement annuity, or endowment contract described in section 408 (b), the following regulations are hereby adopted:

§ 11.408(i)-1 Disclosure statements regarding individual retirement accounts, individual retirement annuities, and endowment contracts described in section 408(b).

(a) *Requirement of disclosure statement.* Under the authority contained in section 408(i), a disclosure statement shall be furnished in accordance with the provisions of this section by the trustee of an individual retirement account or the issuer of an individual retirement annuity or of an endowment contract described in section 408(b) to the individual (hereinafter referred to as the "benefited individual") for whom the account, contract, or annuity is established. Such disclosure statement shall be accompanied by a copy of the instrument which establishes the account, contract, or annuity.

(b) *Time for furnishing disclosure statement*—(1) *General rule.* Except as provided in paragraph (b)(2) of this section, a disclosure statement required by this section shall (except in the case of a disclosure statement relating to an amendment) be furnished to the benefited individual not later than the seventh day preceding the date on which the individual retirement account, individual retirement annuity, or endowment contract is established on his behalf. Such disclosure statement may be furnished on the date of establishment if the benefited individual is permitted to revoke the account, annuity or contract within at least seven days of such establishment date. A disclosure statement relating to an amendment described in paragraph (d) of this section shall be furnished to the benefited individual not later than the 30th day following the later of the date on which the amendment becomes effective or the date on which it is adopted.

(2) *Accounts, annuities, or contracts established or amended before November 30, 1975.* In the case of an account, annuity, or contract described in paragraph (a) of this section which is established, purchased, or amended before November 30, 1975, the disclosure statement required by this section with respect to such establishment, purchase, or amendment shall be furnished to the benefited individual not later than December 31, 1975.

(c) *Contents of disclosure statement.* Except as provided in paragraph (d) of this section, the disclosure statement required by this section shall set forth in non-technical language the following matters:

(1) Concise explanations of—

(i) The statutory requirements with respect to the account, annuity or contract (as the case may be) as prescribed in section 408(a) (relating to an individual retirement account) and section 408(b) (relating to an individual retirement annuity and an endowment contract).

(ii) The limitations and restrictions on the deduction for retirement savings under section 219.

(2) Statements to the effect that—

(i) If the benefited individual or his beneficiary engages in a prohibited transaction described in section 4975(c) with respect to an individual retirement account, the account will lose its exemption from tax by reason of section 408(e)(2)(A), and the owner of the account must include in gross income the fair market value of the account.

(ii) If the owner of an individual retirement annuity or endowment contract described in section 408(b) borrows any money under or by use of such annuity or contract, then, under section 408(e)(3), such annuity or contract loses its section 408(b) classification and the owner must include in gross income the fair market value of the annuity or endowment contract.

(iii) If a benefited individual pledges an individual retirement account as security for a loan, then, under section 408(e)(4), the portion so pledged is treated as distributed to such individual.

(iv) An additional tax of 10 percent is imposed by section 408(f) on certain distributions made before the benefited individual has attained age 5½.

(v) Section 2039(c) (relating to exemption from estate tax of annuities under certain trusts and plans) is not applicable to an individual retirement account, individual retirement annuity, or endowment contract described in section 408(b).

(vi) Section 402(e) (relating to tax on lump sum distributions) is not applicable to distributions from an individual retirement account, an individual retirement annuity, or an endowment contract described in section 408(b).

(vii) An excise tax is imposed under section 4973 on excess contributions.

(viii) An excise tax may be imposed on the payee under section 4974, relating to certain accumulations.

(ix) Further information can be obtained from any district office of the Internal Revenue Service.

(x) (If applicable) the benefited individual is entitled to revoke the account, annuity or contract within at least seven days of the date of establishment.

(3) The financial disclosure required by paragraph (e) of this section.

(d) *Disclosure statements regarding amendments.* In the case of an amendment to the terms of an account, annuity, or contract described in paragraph (a) of this section, the disclosure statement required by this section need not repeat material contained in the statement furnished pursuant to paragraph (c) of this section, but it must set forth in non-technical language those matters described in paragraph (c) of this section which are affected by such amendment.

(e) *Financial disclosure.* With respect to an account, contract, or annuity described in paragraph (a) of this section, the disclosure statement must set forth unless prohibited by State or Federal law or regulation in effect on November 1, 1975—

(1) In cases where either an amount is guaranteed over a period of time (such as in the case of a non-participating insurance or annuity contract), or a projection of growth of the value of the account, contract, or annuity can reasonably be made (such as in the case of a participating insurance or annuity contract, or a typical savings account), the amount of money that would be available to the benefited individual if the purchaser (i) were to make level annual contributions of an assumed amount, and (ii) were to withdraw such account, contract, or annuity at the end of each of the first 5 years during which contributions are to be made, and at the end of each of the years in which the purchaser attains the ages of 60, 65 and 70.

(2) In all cases not subject to paragraph (e)(1) of this section (such as in the case of a mutual fund), a description (in non-technical language) with respect to the benefited individual's interest in the account, annuity, or contract, of:

(i) Each type of charge which may be made against a contribution made by or on behalf of such individual,

(ii) The method for computing and allocating annual earnings, and

(iii) Each charge (other than those described in complying with paragraphs (e)(2)(i) and (ii) of this section) which may be applied to such interest in determining the net amount of money available to the benefited individual.

(f) *Penalty for failure to furnish disclosure statement.* The provisions of section 6693, relating to failure to provide reports on individual retirement accounts or annuities, shall apply to any trustee or issuer who fails to deliver a disclosure statement in accordance with this section.

Because of the need for immediate guidance with respect to the provisions contained in this Treasury decision, it is found impracticable to issue it with notice and public procedure thereon under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(This Treasury decision is issued under the authority contained in sections 408 (i) and 7805 of the Internal Revenue Code of 1954 (88 Stat. 964, 68A Stat. 917; 26 U.S.C. 408(i) and 7805.)

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

Approved: November 3, 1975.

CHARLES M. WALKER,
Assistant Secretary of the Treasury.

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 74-195]

PART 110—ANCHORAGE REGULATIONS

Special Anchorage Areas, Henderson Harbor, N.Y.

This amendment to the anchorage Regulations relocates special anchorage Area B in Henderson Harbor, New York, 300 feet to the north of its present position. The size of the anchorage area would remain the same.

The relocation is necessary in order to allow unobstructed access to Graham Creek. The present location of the anchorage area places the southwest corner of the area in the middle of the Graham Creek channel.

The relocation of the anchorage will clear the channel and increase vessels safety, therefore notice and public procedure are contrary to the public interest and the amendment will become effective in less than thirty days.

In consideration of the foregoing, Part 110 of Title 33 of the Code of Federal Regulations is amended as follows:

§ 110.87 [Amended]

In § 110.87(b), by striking the figure "700 feet" and inserting the figure "1000 feet" in place thereof.

(Sec. 1.28 Stat. 647, as amended (33 U.S.C. 258); Sec. 6(g)(1)(c), 80 Stat. 937 (49 U.S.C. 1655(g)(1)(c); 49 CFR 1.46(c)(8); 5 U.S.C. 552(b)(3)(B)).

Effective date. This amendment is effective December 8, 1975.

Dated: October 31, 1975.

D. J. RILEY,
Captain, U.S. Coast Guard, Acting Chief, Office of Marine Environment and Systems.

[FR Doc.75-29851 Filed 11-5-75;8:45 am]

[CGD 74-300]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Coney Island Creek, N.Y.

This amendment changes the regulations for the City of New York highway bridge at Harway (Cropsey) Avenue across Coney Island Creek to delete the requirement that the draw be restored to operable condition within 6 months after notification by the Commandant to do so. This amendment was circulated as a public notice dated February 5, 1975 by the Commander, Third Coast Guard District and was published in the FEDERAL REGISTER as a notice of proposed rule making (CGD 74-300) on January 29, 1975 (40 FR 4317). One reply was received which had no objection to the proposed change.

Also, editorial changes in § 117.190(f) are made for purposes of clarification.

Accordingly, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising § 117.190(f) to read as follows:

§ 117.190 Navigable waters in the State of New York and their tributaries; bridges where constant attendance of draw tenders is not required.

* * * * * *

(f) * * *

(1) The draws of the following bridges need not open for the passage of vessels and the provisions of paragraphs (b) through (e) of this section shall not apply to these bridges.

(i) Arm of Eastchester Bay, City of New York highway bridge between Rodman Neck and City Island.

(ii) Bronx River, City of New York highway bridge at Westchester Avenue.

(iii) Bronx River, Penn Central railroad bridge north of Westchester Avenue.

(iv) Flushing Creek; Whitestone Parkway Bridge and the City of New York highway and rapid transit bridge at Roosevelt Avenue.

(v) Coney Island Creek; City of New York highway bridges at Harway (Cropsey) Avenue and at Stillwell Avenue and New York City Transit Authority bridge near Stillwell Avenue.

(vi) Richmond Creek; city of New York highway bridge at Richmond Avenue, Staten Island.

(vii) Peekskill (Annsville) Creek, Penn Central railroad bridge near Peekskill, New York.

(viii) Hudson River; State of New York highway (Troy-Menands) bridge between Albany and Rensselaer Counties.

(2) Wappinger Creek; Penn Central Railroad bridge at New Hamburg. The draw shall open on signal from 11:30 a.m. to 7:30 p.m. from May 15 through October 15. At all other times the draw shall open on signal if at least 12 hours notice is given to the Chief Train Dispatcher, Penn Central Railroad Company, New York, N.Y.

(3) Lake Champlain; Vermont Department of Highways bridge across entrance to Missisquoi Bay, between Alburg Tongue and Hog Island, at East Alburg, Vt. The draw shall open on signal if at least 24 hours notice is given.

(4) Missisquoi Bay, Lake Champlain, Vt.; Central Vermont Railway drawbridge. From June 1 through September 30 from 7 a.m. to 11 p.m. the draw shall open on signal. At all other times the draw shall open on signal if at least 24 hours notice is given to Central Vermont Railway, Inc., St. Albans, Vt. 05478.

(5) Tonawanda Creek; Penn Central Railroad Company bridge between Tonawanda and North Tonawanda. From December 16 through March 31, the draw shall open on signal if at least 12 hours notice is given. From April 1 through December 15, the draw shall open on signal and shall be left in the fully open position whenever a drawtender is not in attendance.

(6) Tonawanda Inner Harbor (Little River); Penn Central Railroad Company bridge between Island Street, North Tonawanda, and Tonawanda Island. The draw shall open on signal if at least 24 hours notice is given.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05-1(c)(4)).

Effective date. This revision shall be come effective on December 8, 1975.

Dated: October 30, 1975.

D. J. RILEY,
Captain, U.S. Coast Guard, Acting Chief, Office of Marine Environment and Systems.

[FR Doc.75-29862 Filed 11-5-75;8:45 am]

[CGD 75-087]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Coosaw River, S.C.

This amendment changes the regulations for the Seaboard Coast Line Railroad swing span across the Coosaw River (Whale Branch) near Coosaw, S.C., to require that the draw open on signal from 6 a.m. to 8 p.m., Monday through Friday, if at least 24 hours notice is given. At all other times the draw may remain closed to the passage of vessels. This amendment was circulated as a public notice dated May 9, 1975, by the Commander, Seventh Coast Guard District, and was published in the FEDERAL REGISTER as a notice of proposed rule making (CGD 75-087) on May 5, 1975, (40 FR 19484). Ten responses were received. Two had no objection to the proposal. Eight objected in general terms to the proposal, however, in view of the limited requests for passages from vessels (21 openings from January 1974 through June 1975), the Coast Guard feels that the regulations as proposed will provide for the reasonable needs of navigation. If navigation increases on this stretch of this waterway, these regulations may be amended.

Accordingly, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising paragraph (h) (8) of § 117.245 to read as follows:

§ 117.245 Navigable waters discharging into the Atlantic Ocean south of and including Chesapeake Bay and into the Gulf of Mexico, except the Mississippi River and its tributaries and outlets; bridges where constant attendance of draw tenders is not required.

* * * * * *

(h) * * *

(8) *Coosaw River (Whale Branch).* The draw of the Seaboard Coast Line Railroad bridge, mile 5.8, and the draw of the U.S. Highway 21 bridge, mile 7.0, shall open on signal from 6 a.m. to 8 p.m., Monday through Friday, if at least 24

V 40 215 NOV 6 75 XUM

hours notice is given. At all other times, the draw need not open for the passage of vessels.

* * * * * *

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05-1(c)(4)).

Effective date. This revision shall become effective on December 8, 1975.

Dated: October 31, 1975.

D. J. RILEY,
Captain, U.S. Coast Guard, Acting Chief, Office of Marine Environment and Systems.

[FR Doc.75-29863 Filed 11-5-75;8:45 am]

Title 45—Public Welfare

SUBTITLE A—DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 46—PROTECTION OF HUMAN SUBJECTS

Fetuses, Pregnant Women, In Vitro Fertilization

On August 8, 1975, final regulations were published in the FEDERAL REGISTER (40 FR 33526) concerning research, development, and related activities involving fetuses, pregnant women, and human *in vitro* fertilization.

Section 46.207 thereof provides in pertinent part that: "No pregnant woman may be involved as a subject in an activity covered by this subpart unless: (1) The purpose of the activity is to meet the health needs of the mother and the fetus will be placed at risk only to the minimum extent necessary to meet such needs. . . ." This is consistent with Recommendation No. 2 of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research (40 FR 33547). Section 46.206, however, states that: "No activity to which this subpart is applicable may be undertaken unless: . . . . (2) Except where the purpose of the activity is to meet the health needs of the particular fetus, the risk to the fetus is minimal. . . ." Since § 46.206 sets forth general limitations applicable to the entire subpart, it unintentionally confines the scope of the aforequoted portion of § 46.207 to research involving minimal risk to the fetus despite the clear aim of § 46.207 to permit research involving greater than minimal risk to the fetus where necessary to meet the health needs of the mother. The amendment set forth below is intended to correct this error.

In view of the limited purpose of the amendment, the Department finds that good cause exists for dispensing with a notice of proposed rulemaking.

Accordingly, section 46.206(a) of Subpart B of Part 46 of Title 45 is amended to read as follows:

§ 46.206 General limitations.

(a) * * *

(2) Except where the purpose of the activity is to meet the health needs of the mother or the particular fetus, the risk to the fetus is minimal and, in all cases, is the least possible risk for achieving the objectives of the activity.

Dated: October 9, 1975.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: October 31, 1975.

DAVID MATHEWS,
Secretary.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER C—ACCOUNTS, RECORDS AND REPORTS

[No. 36137]

CLASSIFICATION OF CARRIERS
Revision of Rules

Decided October 6, 1975.
Service Date November 5, 1975.

Upon investigation and consideration of views, arguments and representations of the parties, certain revised accounting and reporting regulations concerning classification of carriers, governing railroads, electric railways, motor carriers of property, motor carriers of passengers, inland and coastal waterway carriers and freight forwarders, are adopted to be effective January 1, 1976.

Harry J. Breithaupt, Jr. and *Hollis G. Duensing* for Association of American Railroads (AAR);

Paul Angeloff for Chattahoochee Industrial Railroad;

Lawrence R. Temple for Scholastic Transit Co.;

Thomas R. Fugee for National Accounting and Finance Council of the American Trucking Associations, Inc. (ATA);

H. R. Hill for H. R. Hill Trucking; Association;

Norman R. Benke for Consolidated Freightways;

Thomas Keene for Keene's Transfer, Inc.;

K. H. Lemnah for Montpelier and Barre Railroad Company; and

C. L. Packard for Georgia Highway Express, Inc.

REPORT OF THE COMMISSION

By Notice of Proposed Rulemaking dated April 22, 1975, served May 20, 1975, and published in the FEDERAL REGISTER on May 23, 1975 (40 FR 22557), the Commission made public that it had under consideration certain revisions to the uniform system of accounts and reports for the following modes:

Railroad Companies
Electric Railways
Motor Carriers of Passengers
Motor Carriers of Property
Inland and Coastal Waterway Carriers
Freight Forwarders.

All interested parties were given the opportunity to submit their views and comments in writing by June 23, 1975.

BACKGROUND

An extended lag affects the classification of carriers under current accounting and reporting rules. In some instances, this lag extends as long as three years after carriers qualify for reclassification.

The Commission believes the revisions described in the appendices hereto will eliminate undue delays in reclassification and minimize system implementation problems. The revisions will also provide stability and active carrier participation in the classification process.

REPRESENTATIONS

The public notification of the proposed rulemaking in the FEDERAL REGISTER provided that any person desiring to participate could do so by filing, within a prescribed time, written statements of facts, views or arguments. Comments received from the ten respondents are summarized below:

The Association of American Railroads (AAR) unequivocally supported the increase in the minimum dollar classification guidelines and the upward reclassification of carriers based on a single year's revenues. However, the AAR opposed elimination of the one year transition period between the base year and effective date of classification. It also opposed the filing of the carrier classification form by carriers not subject to reclassification.

The Chattahoochee Industrial Railroad supported the increase in the minimum dollar classificataion guidelines and proposed the adoption of an inflation clause in the accounting and reporting rules. This clause would provide for automatic revision of the minimum dollar classification guidelines in the event of inflationary increases. It also proposed more uniform time constraints in the reclassification process and contends that upward and downward reclassification should be effective immediately after attainment of a new classification.

The National Accounting and Finance Committee of the American Trucking Associations, (ATA), objected to the provisions requiring all carriers to file the carrier classification form. It requested an exemption for carriers not subject to reclassification.

Scholastic Transit Company unequivocally supported the proposal.

Keene's Transfer, Inc. requested an increase in the Class III minimum dollar classification.

Consolidated Freightways submitted comments similar to ATA's.

The California Trucking Association unequivocally supported the proposal and urged the Commission to limit exceptions.

H. R. Hill Trucking requested an increase in the minimum dollar classification guidelines for Class III motor carriers of property. It also suggested the establishment of separate accounting and reporting requirements for contract motor carriers.

Georgia Highway Express submitted comments similar to ATA's.

DISCUSSION AND CONCLUSIONS

The following discussion is arranged according to subject matters raised by the respondents.

Carrier Classification Form. The respondents generally agreed that the carrier classification form will be useful and appropriate but objected to the applicability of the form to all carriers. The Association of American Railroads objected to the use of the form. The respondents believe the form should only be applicable to carriers subject to reclassification. They presented statistics indicating the vast majority of carriers will not be subject to reclassification. They also indicated that revenue forecasting, as required by the classification form, by carriers not subject to reclassification will be a costly and burdensome task. Similar comments were made regarding the additional paperwork, filing and storage requirements.

We have reviewed the respondents' arguments. The revisions were not intended to create additional costs or burdensome paperwork, filing and storage requirements. Therefore, the proposed regulations will be modified to require only carriers subject to reclassification to file the form. The form will be distributed at the end of the third calendar quarter each year and carriers anticipating reclassification will complete and return the form along with the Quarterly Financial Report for the third calendar quarter. All carriers subject to reclassification, based on actual annual gross carrier operating revenues, will adopt the new accounting and reporting rules of the appropriate date including carriers who failed to file the classification form.

Elimination of One-Year Transition Period for Class I and Class II's. Only the AAR objected to the elimination of the one-year transition period on upward reclassification from Class II to Class I. The other respondents did not comment on this aspect of the revision. The AAR stated the revision fails to recognize the greater accounting and reporting burden imposed on Class I railroads. It believes the proposed two-month transition period, (November 1 to December 31), is not sufficient for data processing and other recordkeeping changes. It also stated retention of the one-year transition period would eliminate the need for the carrier classification form.

We believe that the proposed two-month period is sufficient for all system changes. Under the present accounting rules, Class II railroads are allowed to maintain the same accounts as Class I railroads, however, certain operating accounts must be condensed for Class II report purposes. Similar provisions are included in the accounting rules for electric railroads and inland and coastal waterway carriers. We do not believe the expansion of the accounting system for certain operating accounts will impose an undue hardship on railroads. Carrier management should be able to forcast short-term revenue trends and plan for upcoming reclassification before the issuance of the carrier classification form. Carriers can, therefore, plan necessary system changes.

We believe that a one-year transition period is only warranted in cases where carriers move from a classification not subject to the prescribed uniform system of accounts (USOA) to a classification subject to the USOA.

Increase in Railroad Minimum Dollar Classification. The railroad respondents unanimously supported the increase in the minimum dollar classification guidelines. They believe the increase is reasonable recognition of inflationary trends in the national economy and railroad freight rates. The Chattahoochee Industrial Railroad requested the Commission to consider insertion of an inflation clause which would increase the minimum dollar classification guidelines in the event of future inflationary increases. They stated the last increase was in 1965 and under current trends, the present increase could be nullified within a few years.

We do not accept the proposed "inflation clause" because of the variances in indices measuring inflationary increases. The Commission will continue to assess the effect of inflation on the classification guidelines. When economic and other conditions dictate, the minimum dollar classification guidelines for all modes will be increased accordingly.

Uniform Time Constraints. The Chattahoochee Industrial Railroad proposed uniform time period constraints for railroad reclassifications. The revised effective date for upward reclassifications from Class II to Class I is the year immediately following qualification. Downward reclassification is not effective until the year following the third consecutive year a carrier fails to meet the minimum revenue qualification. Chattahoochee Industrial Railroad stated the three year delay in downward reclassification is unfair and places an unnecessary accounting and reporting burden on carriers for three years.

As previously mentioned, Class I and II railroads maintain similar accounts although Class II railroads condense certain operating accounts for report purposes. The Commission does not view this difference as an accounting and reporting burden. Frequent shifting between Class I and Class II status will distort the continuity of statistical data. The three year delay in downward reclassification will prevent reclassification in cases of unusual or temporary decreases in revenues. Carriers may file for exceptions in circumstances where revenues will evidently remain below the minimum dollar classification guidelines and the delay in reclassification will impose an undue hardship.

Limited Exceptions. The California Trucking Association expressed overall support for the proposal. While it recognized the need for an exception clause, it urged limitation of exceptions to prevent the establishment of "loopholes" for carrier inconvenience.

We incorporated an exception clause into the classification rules to provide relief in justifiable circumstances where undue hardships are imposed on carriers. We will continue to carefully scrutinize all requests for exceptions.

Class III Motor Carriers of Property Revisions. Keene's Transfer Inc. and H. R. Hill Trucking proposed an increase to the Class III minimum dollar classification guideline. In addition, H. R. Hill Trucking requested the establishment of separate accounting and reporting rules for contract motor carriers.

We are aware of the effects of inflation on the minimum dollar classification guidelines. Adjustments to these guidelines will be made when inflationary increases materially distort the classification of carriers.

In our opinion, there is no justification at this time for the establishment of separate accounting and reporting rules for contract motor carriers. Accounting and reporting rules for specialized carriers will be established only when carriers, the Commission and the public will benefit from such action.

FINDINGS

We find that the revisions to the Commission's accounting and reporting regulations concerning the applicability of the carrier classification form, reflected in the appendices hereto, should be approved and adopted effective January 1, 1976.

We further find this decision is not a major Federal Action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

An appropriate order will be entered.

ORDER

At a General Session of the Interstate Commerce Commission held at its office in Washington, D.C., on the *6th* day of *October*, 1975.

Consideration having been given to the matters involved in this proceeding, and the said Commission, on the date hereof, having made and filed a report herein containing its findings and conclusions, which report is hereby made a part hereof:

It is ordered, That Parts 1201, 1202, 1206, 1207, 1209, 1210, 1240 and 1249 of Title 49 of the Code of Federal Regulations be, and they are hereby revised as set forth below.

It is further ordered, That the prescribed amendments shall be effective for the classification year beginning January 1, 1976, and based on calendar year 1975 operating revenues.

And it is further ordered, That, service of this order be made on all affected carriers; and to the Governor of every State and to the Public Utilities Commissions or Boards of each State having jurisdiction over transportation; and that notice of this order shall be given to the general public by depositing a copy in the office of the Secretary, Interstate Commerce Commission, Washington, D.C., and by filing a copy with the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

(49 U.S.C. 12, 20, 304, 913, 1012)

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

PART 1201—RAILROAD COMPANIES

General Instructions

The text of instruction 1–1 "Classification of Carriers" is revised to read:

1–1 Classification of Carriers. (a) For purposes of the accounting and reporting regulations, carriers are grouped into the following two classes:

Class I. Carriers having annual carrier operating revenues of $10 million or more.

Class II. Carriers having annual carrier operating revenues of less than $10 million.

(b) (1) The class to which any carrier belongs shall be determined by annual carrier operating revenue. If at the end of any calendar year such annual carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. Class II carriers shall adopt Class I classification effective as of January 1 of the following year.

(2) If at the end of any calendar year a Class I carrier's annual operating revenue is less than $10 million, and has been for three consecutive years, the carrier shall adopt the accounting and reporting requirements for Class II carriers. Such adoption shall be effective as of January 1 of the following year.

(3) Carriers shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Newly organized carriers shall be classified on the basis of their annual carrier operating revenues for the latest period of such operation. If actual data are not available, new carriers shall be classified on the basis of their carrier operating revenue known and estimated for a year.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred.

(6) If unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. This request shall be in writing specifying the conditions justifying an exception.

(c) Class I carriers shall keep all of the accounts of this system of accounts which are applicable to their operations. Class II carriers shall keep all of the system of accounts which are applicable to their operations, except that their accounts for operating expenses may be kept under the accounts of the respective condensed groupings provided for herein.

(d) In applying the classification grouping to any switching or terminal company which is operated as a joint facility of owning or tenant railways the sum of the annual carrier operating revenues, the joint facility rent income, and the totals of the joint facility credit accounts in operating expenses, shall be used in determining its class.

PART 1202—ELECTRIC RAILWAYS

The text of instruction 00–1 "Classification of Carriers" is revised to read:

00–1 Classification of carriers.

(a) For purposes of the accounting and reporting regulations, carriers are grouped into the following three classes:

Class I. Carriers having annual carrier operating revenues of $1 million or more.

Class II. Carriers having annual carrier operating revenues of $250,000 but less than $1 million.

Class III. Carriers having annual carrier operating revenues of less than $250,000.

(b) (1) The class to which any carrier belongs shall be determined by annual carrier operating revenue. If at the end of any calendar year such annual carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. Adoption of the higher classification shall be effective as of January 1 of the following year.

(2) If at the end of any calendar year a carrier's annual operating revenue is less than the minimum of the class in which the carrier is classified, and has been for three consecutive years, the carrier shall adopt the accounting and reporting requirements of the lower class in which it falls. Such adoption shall be effective as of January 1 of the following year.

(3) Carriers shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Newly organized carriers shall be classified on the basis of their annual carrier operating revenues for the latest period of operation. If actual data are not available, new carriers shall be classified on the basis of their carrier operating revenue known and estimated for a year.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred.

(6) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. This request shall be in writing specifying the conditions justifying an exception.

(c) Both Class I and Class II carriers shall keep the accounts prescribed herein, except that a condensed grouping of primary operating expense accounts is provided for the use of Class II carriers. Class II carriers desiring to do so may maintain the primary accounts prescribed for Class I carriers but must be prepared to combine the accounts for the purpose of making entries in reports filed with the Commission.

PART 1206—COMMON AND CONTRACT MOTOR CARRIERS OF PASSENGERS

Instructions

The text of instruction 2–1 "Classification of Carriers" is revised to read:

2–1 Classification of carriers.

(a) For purposes of the accounting and reporting regulations, carriers are grouped into the following three classes:

Class I. Carriers having annual carrier operating revenues (including interstate and intrastate) of $1 million or more.

Class II. Carriers having annual carrier operating revenues (including interstate and intrastate) of $200,000 but less than $1 million.

Class III. Carriers having annual carrier operating revenues (including interstate and intrastate) of less than $200,000.

(b) (1) The class to which any carrier belongs shall be determined by annual gross carrier operating revenue. If at the end of any calendar year such annual gross carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. For Class III carriers adoption of Class II classification shall be effective as of January 1 of the following year. For Class II carriers adoption of a higher classification shall be effective as of January 1 of the second succeeding year after the carrier meets the minimum revenue limit for Class I.

(2) If at the end of any calendar year a carrier's operating revenue is less than the minimum of the class in which the carrier is classified, and has been for three consecutive years, the carrier shall adopt the accounting and reporting requirements of the lower class in which the current year revenue falls. Adoption of the lower class shall be effective as of January 1 of the following year.

(3) Carriers shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Any carrier which begins new operations (obtains operating authority not previously held) or extends its existing authority (obtains additional operating rights) shall be classified in accordance with a reasonable estimate of its annual carrier operating revenues.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred.

(6) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. This request shall be in writing specifying the conditions justifying an exception.

(c) Only Class I carriers shall keep all the accounts prescribed in this part, where applicable. Class II and Class III are not required to keep the accounts prescribed in this part.

PART 1207—CLASS I AND CLASS II COMMON AND CONTRACT MOTOR CARRIERS OF PROPERTY

CLASS I AND CLASS II MOTOR CARRIERS INSTRUCTION

1. The text of instruction 1 "Classification of Carriers" is revised to read:

1. Classification of carriers.

(a) For purposes of accounting and reporting regulations, except those regulations pertaining to accounting and reporting for revenue and expense items, common and contract carriers of property subject to the Interstate Commerce Act are grouped into the following three classes:

Class I. Carriers having annual carrier operating revenues (including interstate and intrastate) of $3 million or more.

Class II. Carriers having annual carrier operating revenues (including interstate and intrastate) of $500,000 but less than $3 million.

Class III. Carriers having annual carrier operating revenues (including interstate and intrastate) of less than $500,000.

(b) (1) The class to which any carrier belongs shall be determined by annual carrier operating revenue. If at the end of any calendar year such annual carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. For Class II carriers adoption of Class I classification shall be effective as of January 1 of the following year. For Class III carriers adoption of a higher classification shall be effective as of January 1 of the second succeeding year.

(2) If at the end of any calendar year a carrier's annual carrier operating revenue is less than the minimum of the class in which the carrier is classified, and has been for three consecutive years, the carrier shall adopt the accounting and reporting requirements of the lower class in which the current year revenue falls. Adoption of the lower class shall be effective as of January 1 of the following year.

(3) Carriers shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Any carrier which begins new operations (obtains operating authority not previously held) or extends its existing authority (obtains additional operating rights) shall be classified in accordance with a reasonable estimate of its annual carrier operating revenues.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the combination occurred.

(6) In unusual circumstances, such as partial liquidation, curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. This request shall be in writing specifying the conditions justifying an exception.

(c) Special provisions for carriers with revenues from general and special commodities and from household goods operations.

(1) Separate matrices of revenue and expenses are provided for carriers subject to Instructions 27 and 28A and for carriers subject to Instruction 28B for accounting and reporting purposes. For purposes of accounting and reporting, the revenues of common and contract motor carriers of property, shall be categorized as follows:

Instruction 27 and 28A (general and other special commodity).

Instruction 28B (household goods).

Each category of revenue is then classified in accordance with the dollar revenue limits prescribed in paragraph (a). When a carrier has both household goods and general and other special commodity revenue, each category shall be classified (I, II or III) to determine the accounting and reporting regulations which pertain to that category.

(2) If a carrier grouped as Class I or Class II carrier in accordance with paragraph (a) has operations in both categories in paragraph (c) (1) above, and one of the categories is classified as Class III, such revenues and expenses shall be accounted and reported in accordance with the regulations pertaining to the Class I or Class II category.

(3) If a carrier grouped as Class II in accordance with paragraph (a) has operations in both categories and both categories are grouped as Class III in accordance with paragraph (c) (1), such revenues and expenses shall be accounted and reported in accordance with the regulations pertaining to the category with the larger annual carrier operating revenues.

(d) Any carrier, at its option, may adopt the accounting requirements of a higher class than the one in which it falls. Notice of such action shall be promptly filed with the Commission. However, for reporting purposes the carrier shall comply with the reporting requirements of the class applicable to its annual carrier operating revenue.

2. The text of instruction 27 "Distribution of expenses to activities: general commodity carriers" is amended to read:

27. Distribution of expenses to activities: general commodity carriers.

All Class I and Class II common carriers which derive 75 percent or more of their revenues from the intercity transportation of general commodities will be classified as Instruction 27 carriers in the year immediately following the year in which the carriers meet this minimum revenue qualification. They shall distribute expenses to the following activities (see definition 2):

. . . . . .

PART 1209—INLAND AND COASTAL WATERWAYS CARRIERS

Introduction

The text of paragraph (ii) "Classification of Carriers" is revised to read:

(ii) *Classification of carriers.* (a) For purposes of the accounting and reporting regulations, carriers are grouped into the following three classes:

Class A. Carriers having annual carrier operating revenues of $500,000 or more.

Class B. Carriers having annual carrier operating revenues of $100,000 but less than $500,000.

Class C. Carriers having annual carrier operating revenues of less than $100,000.

(b) (1) The class to which any carrier belongs shall be determined by annual carrier operating revenue. If at the end of any calendar year such annual carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. For Class B carriers adoption of Class A classification shall be effective as of January 1 of the following year. For Class C carriers adoption of a higher classification shall be effective as of January 1 of the second succeeding year.

(2) If at the end of any calendar year a carrier's annual carrier operating revenue is less than the minimum of the class in which the carrier is classified, and has been for three consecutive years, the carrier shall adopt the accounting requirements of the lower class in which the current year revenue falls. Such adoption shall be effective as of January 1 of the following year.

(3) Carriers shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Any carrier which begins new operations (obtains operating authority not previously held) or extends its existing authority (obtains additional operating rights) shall be classified in accordance with a reasonable estimate of its annual carrier operating revenues.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the

V 40 215 NOV 6 75 XUM

combined revenue for the year when the combination occurred.

(6) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. Such request shall be in writing specifying the conditions justifying an exception.

(c) Class A companies shall keep all of the accounts of this system of accounts which are applicable to their operations. Class B companies shall keep all of the accounts of this system of accounts which are applicable to their operations, except that their accounts for operating revenues and operating expenses may be kept under the accounts of the condensed classification provided herein.

PART 1210—FREIGHT FORWARDERS

LIST OF INSTRUCTIONS AND ACCOUNTS

1. Line Item "0–1 Introduction" is amended to read: 0–1 Classification of Carriers.

2. Line Item "0–2 Applicability of the Regulations" is deleted.

INSTRUCTIONS

3. The title and text of instruction "0–1 Introduction" is revised to read: 0–1 Classification of Carriers.

(a) For purposes of the accounting and reporting regulations, freight forwarders are grouped into the following two classes:

Class A. Freight forwarders having annual operating revenues of $100,000 or more.

Class B. Freight forwarders having annual operating revenues of less than $100,000.

The term "operating revenues" refers to the amounts includible in accounts 501, 521, 522, and 523.

(b) (1) The class to which any freight forwarder belongs shall be determined by annual operating revenue. If at the end of any calendar year such annual operating revenue is greater than the maximum for the class in which the freight forwarder is classified, the freight forwarder shall adopt the accounting and reporting requirements of the higher class in which it falls. For Class B freight forwarders adoption of Class A classification shall be effective as of January 1 of the second succeeding year.

(2) If at the end of any calendar year a Class A freight forwarder's annual operating revenue is less than $100,000, and has been for three consecutive years, the freight forwarder shall adopt the accounting and reporting requirements applicable to a Class B. Such adoption shall be effective as of January 1 of the following year.

(3) Freight forwarders shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Any freight forwarder which begins new operations (obtains operating authority not previously held) or extends its existing authority (obtains additional operating rights) shall be classified in accordance with a reasonable estimate of its annual operating revenues.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving freight forwarder shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred.

(6) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the freight forwarder, the freight forwarder may request the Commission for an exception to the regulations. Such request shall be in writing specifying the conditions justifying an exception.

(c) Under Part IV of the Interstate Commerce Act the observance of the rules and regulations stated in this system of accounts becomes obligatory upon persons having direct charge of the accounts of the freight forwarders concerned, and such persons will be held responsible for their proper application.

Subsection (d) of section 421 of Part IV of the Interstate Commerce Act provides that:

"(d) Any freight forwarder, or any officer, agent, employee, or representative thereof, who shall willfully fail or refuse to make a report to the Commission as required under this part, or to make specific and full, true, and correct answer to any question within thirty days from the time it is lawfully required by the Commission so to do, or to keep accounts, records, and memoranda in the form and manner prescribed by the Commission, or shall knowingly and willfully falsify, destroy, mutilate, or alter any such report, account, record, or memorandum, or shall knowingly and willfully file with the Commission any false report, account, records, or memorandum, or shall knowingly and willfully neglect or fail to make full, true, and correct entries in such accounts, records, or memoranda of all facts and transactions appertaining to the business of the freight forwarder, or shall knowingly and willfully keep any accounts, records, or memoranda contrary to the rules, regulations, or orders of the Commission with respect thereto, shall be subject for each offense to a fine of not more than $5,000. As used in this subsection the word 'keep' shall be construed to mean make, prepare, or compile, as well as retain."

(d) Class A companies shall keep all of the accounts of this system of accounts which are applicable to their operations. No uniform system of accounts is prepared for Class B companies.

0–2 [Deleted]

4. The title and text of Instruction 0–2 "Applicability of the regulations" is deleted.

PART 1240—CLASSES OF CARRIERS

The text of §§ 1240.1, 1240.2, 1240.3, 1240.4, 1240.5 and 1240.6 are revised to read as follows:

Subpart A—Railroads

§ 1240.1 Classification of rail carriers.

(a) For the purpose of annual, other periodical and special reports, commencing with reports for the year, quarter or month beginning January 1, 1975, and thereafter until further ordered, operating carriers by railroad subject to the provisions of Part I of the Interstate Commerce Act shall be, and they are hereby, grouped into the following classes:

Class I. Carriers having annual carrier operating revenues of $10 million or more.

Class II. Carriers having annual carrier operating revenues of less than $10 million.

(b) (1) The class to which any carrier belongs shall be determined by annual carrier operating revenue. If at the end of any calendar year such annual carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. Class II carriers shall adopt Class I classification effective as of January 1 of the following year.

(2) If at the end of any calendar year a Class I carrier's annual operating revenue is less than $10 million, and has been for three consecutive years, the carrier shall adopt the accounting and reporting requirements for Class II carriers. Such adoption shall be effective as of January 1 of the following year.

(3) Carriers shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Newly organized carriers shall be classified on the basis of their annual carrier operating revenues for the latest period of operation. If actual data are not available, new carriers shall be classified in the basis of their carrier operating revenue known and estimated for a year.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred.

(c) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. This request shall be in writing specifying the conditions justifying an exception.

(d) In applying the classification grouping to any switching or terminal company which is operated as a joint facility of owning or tenant railways the sum of the annual carrier operating revenues, the joint facility rent income, and the totals of the joint facility credit accounts in operating expenses, shall be used in determining its class.

(Sec. 12, 24 Stat. 383, as amended; 49 U.S.C. 12. Interprets or Applies Sec. 20, 24 Stat. 386, as amended; 49 U.S.C. 20)

Subpart B—Carrier by Water

§ 1240.2 Classification of carriers by water.

(a) For the purpose of annual, other periodical and special reports, commencing with reports for the year, quarter or month beginning January 1, 1975, carriers by water subject to the provisions of the Interstate Commerce Act shall be, and they are hereby, grouped into the following classes:

Class A. Carriers having annual carrier operating revenues of $500,000 or more.

Class B. Carriers having annual carrier operating revenues of $100,000 but less than $500,000.

Class C. Carriers having annual carrier operating revenues of less than $100,000.

(b) (1) The class to which any carrier belongs shall be determined by annual carrier operating revenue. If at the end of any calendar year such annual carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. For Class B carriers adoption of Class A classification shall be effective as of January 1 of the following year. For Class C carriers adoption of a higher classification shall be effective as of January 1 of the second succeeding year.

(2) If at the end of any calendar year a carrier's annual carrier operating revenue is less than the minimum of the class in which the carrier is classified, and has been for three consecutive years, the carrier shall adopt the accounting requirements of the lower class in which the current year revenue falls. Such adoption shall be effective as of January 1 of the following year.

(3) Carrier shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Any carrier which begins new operations (obtains operating authority not previously held) or extends its existing authority (obtains additional operating rights) shall be classified in accordance with a reasonable estimate of its annual gross carrier operating revenues.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred.

(c) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. Such request shall be in writing specifying the conditions justifying an exception.

(Sec. 12, 24 Stat. 383, as amended, 54 Stat. 933; 49 U.S.C. 12, 904. Interprets or Applies Sec. 20, 23 Stat. 386, as amended, 54 Stat. 944; 49 U.S.C. 20, 913)

Subpart C—Carriers by Electric Railway

§ 1240.3 Classification of carriers by electric railway.

(a) For the purpose of annual, other periodical and special reports commencing with the year, quarter or month beginning January 1, 1975, carriers by electric railway subject to the provisions of the Interstate Commerce Act shall be, and they are, grouped into the following classes:

Class I. Carriers having annual carrier operating revenues of $1 million or more.

Class II. Carriers having annual carrier operating revenues of $250000 but less than $1 million.

Class III. Carriers having annual carrier operating revenues of $250,000 but $250,000.

(b) (1) The class to which any carrier belongs shall be determined by annual carrier operating revenue. If at the end of any calendar year such annual carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. Adoption of the higher classification shall be effective as of January 1 of the following year.

(2) If at the end of any calendar year a carrier's annual carrier operating revenue is less than the minimum of the class in which the carrier is classified, and has been for three consecutive years, the carrier shall adopt the accounting and reporting requirements of the lower class in which it falls. Such adoption shall be effective as of January 1 of the following year.

(3) Carriers shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Newly organized carriers shall be classified on the basis of their annual carrier operating revenues for the latest period of such operation. If actual data are not available, new carriers shall be classified on the basis of their carrier operating revenue known and estimated for a year.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred.

(c) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. This request shall be in writing specifying the conditions justifying an exception.

(Sec. 12, 24 Stat. 383, as amended; 49 U.S.C. 12. Interprets or Applies Sec. 20, 24 Stat. 386, as amended; 49 U.S.C. 20)

Subpart D—Motor Carriers

§ 1240.4 Classification of motor carriers of passengers.

(a) For purposes of the accounting and reporting regulations, commencing with the year beginning January 1, 1975, common and contract carriers of passengers subject to the Interstate Commerce Act are grouped into the following classes:

Class I. Carriers having annual carrier operating revenues (including interstate and intrastate) of $1 million or more.

Class II. Carriers having annual carrier operating revenues (including interstate and intrastate) of less than $300,000.

(b) (1) The class to which any carrier belongs shall be determined by annual carrier operating revenue. If at the end of any calendar year or of 13 4-week periods, such annual carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. For Class III carriers adoption of Class II classification shall be effective as of January 1 of the following year. For Class II carriers adoption of a higher classification shall be effective as of January 1 of the second succeeding year after the carrier meets the minimum revenue limit for Class I.

(2) If at the end of any calendar year, or accounting year of 13 4-week periods, a carrier's annual operating revenue is less than the minimum of the class in which the carrier is classified, and has been for three consecutive years, the carrier shall adopt the accounting and reporting requirements of the lower class in which the current year revenue falls. Adoption of the lower class shall be effective as of January 1 of the following year.

(3) Carriers shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Any carrier which begins new operations (obtains operating authority not previously held) or extends its existing authority (obtains additional operating rights) shall be classified in accordance with a reasonable estimate of its annual gross carrier operating revenues.

Any carrier which begins new operations is required to furnish the above estimate, including intrastate, anticipated interstate and local cartage revenues, to the Bureau of Accounts, Section of Reports, prior to the issuance of a certificate or permit.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the

V 40 215 NOV 6 75 XUM

next calendar year on the basis of the combined revenue for the year when the combination occurred.

(c) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. This request shall be in writing specifying conditions justifying an exception.

(Secs 204, 220, 49 Stat. 546, as amended, 563, as amended 49 U.S.C. 304, 320)

§ 1240.5 Classification of motor carriers of property.

(a) For purposes of accounting and reporting regulations, commencing with the year beginning January 1, 1975, common and contract carriers of property subject to the Interstate Commerce Act are grouped into the following three classes:

Class I. Carriers having annual carrier operating revenues of $3 million or more.

Class II. Carriers having annual carrier operating revenues of $500,000 but less than $3 million.

Class III. Carriers having annual carrier operating revenues of less than $500,000.

(b) (1) The class to which any carrier belongs shall be determined by annual carrier operating revenue. If at the end of any calendar year, or accounting year of 13 4-week periods, such annual carrier operating revenue is greater than the maximum for the class in which the carrier is classified, the carrier shall adopt the accounting and reporting requirements of the higher class in which it falls. For Class II carriers adoption of Class I classification shall be effective as of January 1 of the following year. For Class III carriers adoption of a higher classification shall be effective as of January 1 of second succeeding year.

(2) If at the end of any calendar year, or accounting year of 13 4-week periods a carrier's annual carrier operating revenue is less than the minimum of the class in which the carrier is classified, and has been for three consecutive years, the carrier shall adopt the accounting and reporting requirements of the lower class in which the current year revenue falls. Adoption of the lower class shall be effective as of January 1 of the following year.

(3) Carriers shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Any carrier which begins new operations (obtains operating authority not previously held) or extends its existing authority (obtains additional operating rights) shall be classified in accordance with a reasonable estimate of its annual gross carrier operating revenues.

Any carrier which begins new operations is required to furnish the above estimate, including intrastate, anticipated interstate and local cartage revenues, to the Bureau of Accounts, Section of Reports, prior to the issuance of a certificate or permit.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred.

(c) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the carrier, the carrier may request the Commission for an exception to the regulations. This request shall be in writing specifying the conditions justifying an exception.

(d) Special Provisions for Carriers with Household Goods Operations.

(1) For purposes of accounting and reporting revenues and expenses, the revenues of common and contract motor carriers of property, that have household goods operations, are categorized as follows:

Instruction 28B (household goods).

Instruction 27 and 28A (general commodity and other).

Each category of revenue is then classified in accordance with the dollar revenue limits prescribed in paragraph (a) of this section and shall be classified in accordance with paragraph (b) of this section. When a carrier has both household goods and general commodity and other revenue, each category shall be classified (I, II, or III) to determine the accounting and reporting regulations which pertain to that category.

(2) If a carrier grouped as Class I or Class II carrier in accordance with paragraph (a) of this section has operations in both categories in paragraph (c) (1) of this section, and one of the categories is classified as Class III, such revenues and expenses shall be accounted and reported in accordance with the regulations pertaining to the Class I or Class II category.

(3) If a carrier grouped as Class II in accordance with paragraph (a) of this section has operations in both categories and both categories are grouped as Class III in accordance with paragraph (c) (1) of this section, such revenues and expenses shall be accounted and reported in accordance with the regulations pertaining to the category with the larger annual gross carrier operating revenues.

(Secs. 204, 220, 49 Stat. 546, as amended 563, as amended: 49 U.S.C. 304, 320)

Subpart E—Freight Forwarders

§ 1240.6 Classification for freight forwarders.

(a) For the purpose of annual, other periodical and special reports, commencing with the year, quarter or month beginning January 1, 1975, freight forwarders subject to the provision of Part IV of the Interstate Commerce Act, shall be, and they hereby are, grouped into the following classes:

Class A. Freight forwarders having annual operating revenues of $100,000 or more.

Class B. Freight forwarders having annual operating revenues of less than $100,000.

(b) (1) The class to which any freight forwarder belongs shall be determined by annual operating revenue. If at the end of any calendar year such annual operating revenue is greater than the maximum for the class in which the freight forwarder is classified, the freight forwarder shall adopt the accounting and reporting requirements of the higher class in which it falls. For Class B freight forwarders adoption of Class A classification shall be effective as of January 1 of the second succeeding year.

(2) If at the end of any calendar year a Class A freight forwarder's gross operating revenue is less than $100,000, and has been for three consecutive years, the freight forwarder shall adopt the accounting and reporting requirements applicable to a Class B. Such adoption shall be effective as of January 1 of the following year.

(3) Freight forwarders shall notify the Commission of any change in classification by completing and returning the Carrier Classification Form with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

(4) Any freight forwarder which begins new operations (obtains operating authority not previously held) or extends its existing authority (obtains additional operating rights) shall be classified in accordance with a reasonable estimate of its annual gross operating revenues.

(5) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving freight forwarder shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred.

(c) In unusual circumstances, such as partial liquidation, and curtailment or elimination of contracted services, where the classification regulations will unduly burden the freight forwarder, the freight forwarder may request the Commission for an exception to the regulations. Such request shall be in writing specifying the conditions justifying an exception.

(d) Any freight forwarder, at its option, may adopt the accounting requirements of a higher class than the one in which it falls. Notice of such action shall be promptly filed with the Commission. However, for reporting purposes the freight forwarder shall comply with the reporting requirements of the class applicable to its annual gross operating revenue.

(e) Under part IV of the Interstate Commerce Act the observance of the rules and regulations stated in this system of accounts becomes obligatory upon persons having direct charge of the accounts of the freight forwarders concerned, and such persons will be held responsible for their proper application.

(Secs. 403, 412, 56 Stat. 285, 294, 49 U.S.C. 1003, 1012)

PART 1249—REPORTS OF MOTOR CARRIERS

The text of § 1249.15 is revised to read as follows:

§ 1249.15 Quarterly report of freight loss and damage claims.

Commencing with reports for the quarter beginning January 1, 1976, and for subsequent quarters thereafter, until further ordered, all common and contract carriers of property having annual operating revenues (including interstate and intrastate) of $1 million, or more, from property motor carrier operations, shall compile and file quarterly reports in accordance with Motor Carrier Quarterly Report of Freight Loss and Damage Claims, Form QL&D. Carriers shall be exempt from filing such quarterly reports commencing with the year immediately following the third consecutive year in which a carrier fails to meet the minimum revenue qualification. Such quarterly reports (which need not include data relating to claims filed for loss or damage to shipments transported in armored-truck service, as described in Classification of Motor Carriers of Property, 2 M.C.C. 703, at page 712) shall be filed in duplicate in the office of the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C., 20423, within 40 days after the close of each quarter.

CARRIER CLASSIFICATION FORM

This form is to be completed and returned by carriers subject to reclassification. This form will serve as notification to the Commission of the effective date of the new classification and should be returned to the Commission with the Quarterly Financial Report for the third calendar quarter, if appropriate, or by October 31.

A. Provide data on respondent carrier in blanks below:

Name of Company_____

	Date	Gross Carrier Operating Revenue	Classification Adopted by Carrier
1. Current year,	19___,	$_____	Class _____
2. Previous year,	19___,	$_____	Class _____
3. Next previous year,	19___,	$_____	Class _____

B. On the basis of the information in Part A above and the applicable carrier classification rules in 49 CFR, 1240, answer the questions by checking the appropriate box:

	Yes	No
1. Does the respondent carrier qualify for reclassification to a *higher* class?	☐	☐
2. Does the respondent carrier qualify for reclassification to a *lower* class?	☐	☐

IF YOUR ANSWER TO EITHER QUESTION IS "YES" COMPLETE THE REMAINDER OF THIS FORM AND SEND TO THE COMMISSION

C. Based on the information in Parts A and B above and the applicable carrier classification rules in 49 CFR, 1240, check the appropriate box relevant to your new classification:

1. *Carrier's New Classification*	*Check one box only*
Class I or Class A	☐
Class II or Class B	☐
Class III or Class C	☐

Certification

Based on the information provided in this form I will adopt the accounting and reporting requirements for Class _____ carriers effective January 1, 19___, in accordance with the provisions of 49 CFR 12___.

Signature of Affiant _____

[N.B. Motor carriers of property subject to two classifications of operating accounts (such as household goods carriers having general commodity and other operations) shall complete one form for each operation subject to change in class, in addition to the one applicable to the total operation.]

CARRIERS NOT SUBJECT TO RECLASSIFICATION ARE EXEMPT FROM FILING THIS FORM

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[43 CFR Parts 23, 3040]

[30 CFR Parts 211, 216]

COAL MINING OPERATING REGULATIONS

Extension of Comment Period

On Friday, September 5, 1975, the Department of the Interior published a Notice of Proposed Rulemaking in the FEDERAL REGISTER which would revise 30 CFR Part 211 and 43 CFR Part 23 and promulgate a new subpart 3041 of 43 CFR (40 FR 41122).

The Notice of Proposed Rulemaking invited interested parties to submit written comments, suggestions or objections to the Director, Bureau of Land Management and/or Director, United States Geological Survey, on or before November 4, 1975.

A draft environmental impact statement pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 was prepared in connection with these proposed regulations. A notice of the availability of said statement was published on October 7, 1975 (40 FR 46315), and a period of 45 days from the date of such notice was set for the receipt of written comments on the draft statement.

In response to several requests for additional time within which to comment upon the proposed regulations, the period for submitting comments, suggestions or objections with respect thereto is hereby extended from November 4, 1975, to and including Friday, November 21, 1975.

Written comments should be addressed to Director, United States Geological Survey, National Center, Reston, Virginia 22092, and/or Director, Bureau of Land Management, (730), Department of the Interior, 18th and C Streets, NW., Washington, D.C. 20240.

Dated: November 3, 1975.

JACK W. CARLSON,
Assistant Secretary of the Interior.

[7 CFR Part 981]

[Docket No. AO-214-A5]

ALMONDS GROWN IN CALIFORNIA

Notice of Hearing on Proposed Amendment of the Marketing Agreement and Order

Correction

In FR Doc. 75-29028, appearing at page 50289, in the issue for Wednesday, October 29, 1975, the following corrections should be made on page 50291:

1. In the first column, insert the line "Proposed by Superior Farming Co.:" above item 19.

2. In the first column, insert the line "Proposed by Valley Almond Growers Cooperative:" above item 20.

3. In the third column, insert the line "Proposed by the Fruit and Vegetable Division, Agricultural Marketing Service:" above item 23.

[7 CFR Part 984]

WALNUTS GROWN IN CALIFORNIA, OREGON, AND WASHINGTON

Proposed Marketing Percentages for the 1975-76 Marketing Year

Notice is hereby given of a proposal to establish free and surplus marketing percentages and withholding factors for the 1975-76 marketing year as follows: California—66⅔ percent, 33⅓ percent, and 50 percent, respectively; and Oregon-Washington—83⅓ percent, 16⅔ percent, and 20 percent, respectively. The 1975-76 marketing year began on August 1, 1974. The proposed percentages would be established in accordance with the provisions of the marketing agreement, as amended, and Order No. 984, as amended (7 CFR Part 984), regulating the handling of walnuts grown in California, Oregon, and Washington. The amended agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The proposed percentages were recommended by the Walnut Marketing Board pursuant to § 984.48 of the marketing agreement and order program. The Board's recommendation is based on estimates for the current marketing year of supply, and inshell and shelled trade demands adjusted for handler carryover. In recognition of marketing and production differences, the order specifies that the surplus percentage for Oregon-Washington be one-half that for California.

The total 1975-76 supply subject to regulation is estimated at 168.7 million pounds kernelweight. Inshell and shelled trade demands adjusted for handler carryover are estimated at 34.1 and 79 million pounds kernelweight, or a total trade demand of 113.1 million pounds kernelweight.

The proposed regulation would meet the trade demand by establishing the supply of merchantable walnuts available to the domestic inshell and shelled markets at maximum quantities that can be expected to be utilized, while also providing an ample carryover into the 1976-77 marketing year. The surplus is primarily for export.

Consideration will be given to any written data, views, or arguments pertaining to the proposal which are received by the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than November 21, 1975. All written submissions made pursuant to this notice should be in quadruplicate and will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposal is as follows:

§ 984.222 Free and surplus percentages and withholding factors for walnuts during the 1975-76 marketing year.

The free and surplus percentages, and withholding factors during the marketing year beginning August 1, 1975, shall be as follows:

	California	Oregon-Washington
Free percentages	66⅔	83⅓
Surplus percentages	33⅓	16⅔
Withholding factors	50	20

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular-A-107.

Dated: October 31, 1975.

CHARLES R. BRADER,
Deputy Director,
Fruit and Vegetable Division.

Animal and Plant Health Inspection Service

[9 CFR Part 113]

VIRUSES, SERUMS, TOXINS, AND ANALOGOUS PRODUCTS

Proposed Test Procedures

● Purpose: To revise the test procedures for testing live vaccines for purity. ●

Notice is hereby given in accordance with the provisions contained in section 553 of Title 5, United States Code, that it is proposed to amend certain of the regulations relating to viruses, serums, toxins, and analogous products in Part 113 of Title 9, Code of Federal Regulations issued pursuant to the provisions of the Virus-Serum-Toxin Act of March 4, 1913 (21 U.S.C. 151-158).

Bacterial or fungicidal contamination of live virus vaccines is detected by using the test procedures prescribed in § 113.27. The authorized retests using only ten samples creates a doubt as to the accuracy of the results obtained. This doubt is eliminated for all practical purposes when twenty samples are used as provided for in these amendments.

The tests for bacterial contamination prescribed in § 113.26 for use in testing for bacteria in products other than live virus vaccines calls for incubation for 14 days. The test in § 113.27 calls for incubation for only 7 days. Experience has shown that some bacterial contamination is not determined until the second week of incubation. These amendments increase the incubation period to 14 days in § 113.27 to conform to the requirements in § 113.26.

These amendments change the requirement of the diluent to be used in the test from "sterile distilled water" to "sterile purified water." This change permits the use of water which has been purified by means other than distillation.

§ 113.27 is amended by revising paragraphs (a)(3)(ii), (a)(4), (a)(7)(i) and (ii), (c)(1), (d)(2), (d)(2)(i), (ii) and (vii), and adding a new paragraph d)(2)(viii) to read:

§ 113.27 Detection of viable bacteria and fungi in live vaccines.

* * * * *

(a) * * *

(3) * * *

(ii) Desiccated vaccine shall be rehydrated as recommended on the label with the accompanying diluent or with sterile purified water.

(4) To test for bacteria, 0.2 ml of vaccine from each final container sample shall be placed into a corresponding individual vessel containing a minimum of 120 ml of Soybean Casein Digest Medium. Additional medium shall be used if the determination made as required in § 113.25(d) indicates the need for a greater dilution of the biological product. Incubation shall be at 30° to 35° C for 14 days.

* * * * *

(7) * * *

(i) If growth is found in two or three test vessels of the initial test, one retest to rule out faulty technique may be conducted using 20 unopened final container samples.

(ii) If no growth is found in 9 or 10 of the test vessels in the initial test or 19 or 20 of the test vessels in the retest, the serial or subserial meets the requirements of the test.

* * * * *

(c) * * *

(1) To test for bacteria, 0.2 ml of the sample of Master Seed Virus shall be placed in 10 individual vessels each containing a minimum of 120 ml of Soybean Casein Digest Medium. Incubation shall be at 30° to 35° C for 14 days.

* * * * *

(d) * * *

(2) Test procedures in this paragraph shall be followed.

(i) Ten final container samples of completed product from each serial and each subserial shall be tested using the medium prescribed in paragraph (d)(1) of this section.

(ii) Immediately prior to starting the test, frozen liquid vaccine shall be thawed, and lyophilized vaccine shall be rehydrated to the quantity recommended on the label using the accompanying sterile diluent or sterile purified water. Product recommended for mass vaccination shall be rehydrated at the rate of 30 ml sterile purified water per 1000 doses.

* * * * *

(vii) If the average count at either incubation condition for a serial or subserial exceeds one colony per dose for vaccines recommended for poultry or 10 colonies per dose for vaccines recommended for other animals, one retest to rule out faulty technique may be conducted using 20 unopened final containers.

(viii) If the average count at either incubation condition of the final test for a serial or subserial exceeds one colony per dose for vaccines recommended for poultry or 10 colonies per dose for vaccines recommended for other animals, the serial or subserial is unsatisfactory.

Interested parties are invited to submit written data, views, or arguments regarding the proposed regulations to Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Services, U.S. Department of Agriculture, Room 828-A, Federal Building, Hyattsville, Maryland 20782. All comments received on or before December 8, 1975, will be considered.

All written submissions made pursuant to this notice will be made available for public inspection at the above address, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Done at Washington, D.C., this 3rd day of November, 1975.

PIERRE A. CHALOUX,
Acting Deputy Administrator,
Veterinary Services, Animal
and Plant Health Inspection
Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 285]

ATLANTIC TUNA FISHERIES

Notice of Proposed Rule Making

Notice is hereby given that the Secretary of Commerce (the Secretary), pursuant to section 6(c) of the Atlantic Tunas Convention Act of 1975, Pub. L. 94-70, 16 USC 971-971h, (the Act) which authorizes the Secretary to promulgate regulations to implement the recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT), proposes to delete existing Subpart A—"General," to add a new Subpart A—"General," to add a new Subpart C—"Yellowfin Tuna," and to add a new Subpart D—"Restrictions on Tuna Imports" to 50 CFR Part 285. The authority of the Secretary under the Act has been delegated to the Director, National Marine Fisheries Service (the Director).

Existing subpart A contains general provisions that were meant to apply to all subsequent subparts. Subpart A was initially promulgated on August 13, 1975, pursuant to Section 6(d) of the Act which provided authority to promulgate regulations with respect to Atlantic bluefin tuna within 30 days of the Act's enactment (See 40 FR 33978). Because the statutory authority for existing Subpart A applies only to Atlantic bluefin tuna, Subpart A must be repromulgated if it is to apply to tuna other than Atlantic bluefin tuna to be regulated pursuant to the Act and these regulations. In addition, because of the proposed new Subparts C and D, certain changes must be made to existing Subpart A.

In § 285.1 *Definitions* the following additional terms, among others, are proposed: Cargo vessel, Fishing voyage, Regional Director, Regulatory Area, Tuna, Round tuna and Yellowfin tuna. No changes are proposed for §§ 285.2, 285.4, 285.5 and 285.7. A landing prohibition is added to § 285.3. Section 285.6 *Civil procedures* is expanded to provide for the expeditious disposition of seized tuna because of its perishable nature. Finally, § 285.8 is added to clarify the relationship of these regulations to those State laws which are similar in subject matter. Section 9 of the Act provides for regulations to be effective within the territorial sea of the United States (generally the area over which the States have jurisdiction pursuant to the Submerged Lands Act, 43 U.S.C. 1301-1343), provided that the Secretary first determines that:

a. Within a reasonable period of time after promulgation of these regulations States have not adopted measures which implement the Commission's recommendations; or

b. If a State adopts regulations they are:

(1) Less restrictive; or

(2) Not effectively enforced.

There is also provision for a State to request a hearing on the record to consider these issues. (These provisions are proposed to be implemented by § 285.8.) Consequently, it is necessary to initially define the regulatory area for yellowfin tuna to exclude the territorial sea of the United States. In the event the Director makes a finding that the laws and regulations of a State(s), or the absence thereof, do not meet the criteria of section 9 of the Act, and publishes notice thereof pursuant to § 285.8 of the proposed regulations, the regulatory area

V 40 215 NOV 6 75 XUM

for yellowfin tuna will automatically include the territorial sea or any part thereof as appropriate. Section 285.8 of the proposed regulations will allow States 30 days from the date of promulgation of these regulations to adopt appropriate measures.

In this regard it should be noted that on August 13, 1975, regulations pertaining to Atlantic Bluefin Tuna were promulgated (40 FR 33978) which initially defined "regulatory area" to include the territorial sea. As noted in the preamble to those regulations, this definition was based on the language set forth in the House and Senate Reports which recognized the emergency nature of the action (See 40 FR 33979). In that instance States were afforded the opportunity to adopt similar measures within 30 days of the date of promulgation, and if adopted the Federal regulations would not have continued in effect in waters over which the States have jurisdiction. No State adopted such measures within the prescribed period of time. Consequently the regulations pertaining to Atlantic Bluefin Tuna remain in effect within the territorial sea of the United States.

Although the Director is not proposing, at this time, to amend Subpart B—"Atlantic bluefin tuna," Subpart B is set forth so that a fair assessment can be made of those proposed provisions of Part 285 which may relate to it.

Subpart C contains those regulations which pertain exclusively to yellowfin tuna (*Thunnus albacares*). These regulations are designed to implement the recommendations of the International Convention for the Conservation of Atlantic Tunas, the text of which are as follows:

APPENDIX 2 TO ANNEX 6

RECOMMENDATION

The Council:

Referring to Item 13 of the Proceedings of the Second Regular Meeting of the Commission, held in Madrid in 1971, authorizing the Council to recommend to the Contracting States to take regulatory measures regarding yellowfin.

Recommends that the Contracting States take the necessary measures to prohibit any taking and landing of yellowfin tuna weighing less than 3.2 kg.

Notwithstanding the above regulation, the Contracting States may grant tolerances to boats which have incidentally captured yellowfin weighing less than 3.2 kg., with the condition that this incidental catch should not exceed 15 percent of the number of fish per landing of the total yellowfin catch of said boats.

Subsequent to these recommendations becoming effective, several nations expressed great difficulty in the practical application of the recommended tolerance measured solely on the number of fish. As a result of this difficulty, it was resolved that a tolerance measured by weight of fish would be acceptable provided that such tolerance is equivalent to the tolerance measured by the number of fish.

The United States has chosen to use a tolerance measured by weight of fish. The equivalent tolerance by weight has been determined to be 3 percent. Consequently, the allowable incidental catch set forth in § 285.22 is expressed as 3 percent by weight.

Section 285.20 authorizes the taking of yellowfin tuna that weigh 7 pounds round weight (3.2 kg.) or more. The open and closed seasons are set forth in § 285.21. Provision is made for incidental catch in § 285.22. In § 285.23 recordkeeping requirements similar to those required for vessels that fish for yellowfin tuna in the Pacific Ocean are provided.

Section 285.24 requires that fishing vessels entering or departing the regulatory area through the Panama Canal must advise the Regional Director, Southwest Region, and be subject to inspection.

Subpart D contains regulations concerning the importation of Atlantic tunas from any country in any form. In § 285.30 references to the Act are made concerning the requirement for such importation regulations.

Section 285.31 lists yellowfin tuna and Atlantic bluefin tuna as the species regulated pursuant to the Act. Section 285.32 notes that yellowfin tuna, Atlantic bluefin tuna, skipjack, albacore, bigeye, Atlantic bonita, and billfishes are presently under investigation by the Commission. Section 285.33 authorizes the Director to conduct inquiries and investigations concerning the effectiveness of the Commission's recommendations as they relate to actions by other member countries. Section 285.34 requires the publication of the findings resulting from investigations carried out under § 285.33. Section 285.35 sets forth the standards of proof required for the importation of tuna. The removal of import restrictions is provided for in § 285.36.

Hearings will be held to solicit comments from the public on proposed subparts, A, C, and D. In order to provide maximum participation by interested persons, two hearings have been scheduled. A public hearing will be held on the West coast since yellowfin tuna taken in the Atlantic is taken by vessels which are either based in California or have representation in California. A public hearing will also be held on the East Coast since commercial and recreational, interests in Atlantic bluefin tuna are located there and these interests may be affected by proposed subparts A and D.

As previously noted on August 13, 1975, the Director, pursuant to section 6(d) of the Act, published in the FEDERAL REGISTER (40 FR 33978) emergency conservation measures designed to implement recommendations approved by the Commission pertaining to Atlantic Bluefin Tuna. These regulations will not be the subject of the scheduled hearings; only the proposed new subparts A, C, and D will be addressed.

On the West coast, interested persons will be afforded an opportunity to comment on the proposed regulations at a public hearing scheduled to be held in the United Portuguese Club, 2818 Addison Street, San Diego, California, beginning at 9:30 a.m., November 25, 1975. Any person who intends to testify at this hearing is requested to furnish in writing, prior to the hearing, his name and the name of the organization he represents, if any, to the Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California, 90731. Any interested person may submit in writing to the Regional Director, Southwest Region on or before December 4, 1975 any relevant data, views or arguments.

On the East coast, interested persons will be afforded an opportunity to comment on the proposed regulations at a public hearing to be held in Room E226, J. F. K. Federal Building, Cambridge Street, Boston, Massachusetts, beginning at 10 a.m., November 25, 1975. Any person who intends to testify at this hearing is requested to furnish in writing, prior to the hearing his name and the name of the organization he represents, if any, to the Regional Director at Gloucester, Massachusetts. Any interested person may submit in writing to the Regional Director, Northeast Region on or before December 4, 1975, any relevant data, views or arguments.

As a result of the preparation of an environmental assessment of the impact of these proposed regulations on the environment, pursuant to the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 et seq., it has been determined that this proposed action does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of NEPA and therefore does not require the preparation of a detailed environmental impact statement under section 4332(2)(c) of NEPA.

In accordance with Executive Order No. 11821 dated November 27, 1974, it is hereby certified that the inflationary impact of this action on the Nation has been carefully evaluated; no substantial impact on the Nation is anticipated.

Issued at Washington, D.C., and dated November 3, 1975.

JACK W. GEHRINGER,
Deputy Director.

In consideration of the foregoing, it is proposed to amend (with the exception of Subpart B—"Atlantic Bluefin Tuna" which is set forth only to facilitate an adequate analysis) 50 CFR Part 285 by deleting existing Subpart A—"General" and by adding in lieu thereof, a new Subpart A—"General," by adding a new Subpart C—"Yellowfin tuna" and by adding a new Subpart D—"Restrictions on Tuna Imports," as follows:

PART 285—ATLANTIC TUNAS

Subpart A—General

Sec.
285.1 Definitions.
285.2 Basis and purpose.
285.3 Prohibitions.
285.4 Civil penalties.
285.5 Enforcement.
285.6 Civil procedures.
285.7 Persons and vessels exempt.
285.8 Relationship to other laws and regulations.

Subpart B—Atlantic Bluefin Tuna (Thunnus thynnus thynnus)

Sec.
285.10 Authorized fishing.
285.11 Open and closed seasons.
285.12 Quotas.
285.13 Incidental catch.
285.14 Reporting requirements.
285.15 Presumptions.

Subpart C—Yellowfin Tuna (Thunnus albacares)

285.20 Authorized fishing.
285.21 Open and closed seasons.
285.22 Incidental catch.
285.23 Recordkeeping.
285.24 Reporting requirements.

Subpart D—Restrictions on Tuna Imports

285.30 Basis and purpose.
285.31 Species subject to regulation.
285.32 Species under investigation by the Commission.
285.33 Investigation authorized.
285.34 Publication of findings.
285.35 Proof of admissibility.
285.36 Removal of import restrictions.

AUTHORITY: Atlantic Tunas Convention Act of 1975, Pub. L. 94–70, 16 U.S.C. 971–971h.

Subpart A—General

§ 285.1 Definitions.

In addition to the meaning ascribed by the Act, if any, the following terms shall mean:

"The Act" means Atlantic Tunas Convention Act of 1975, Pub. L. 94–70.

"Albacore" means the species of fish scientifically known as *Thunnus alalunga*.

"Angling" means the taking or the attempted taking of fish with a hand held rod and reel designed and manufactured for the purpose of sport.

"Atlantic bluefin tuna" means the species of fish scientifically known as *Thunnus thynnus thynnus*.

"Atlantic bonito" means the species of fish scientifically known as *Sarda chiliensis*.

"Cargo vessel" means any fishing vessels used for transporting fish or fish products.

"Closed season" means (a) for the purposes of Atlantic bluefin tuna the time during which a regulated species may not be lawfully taken within the regulatory area, except in limited quantities as an incident to fishing for species of fish other than Atlantic bluefin tuna with which Atlantic bluefin tuna may be mingled; (b) for purposes of yellowfin tuna, the time during which yellowfin tuna may not be lawfully taken within the regulatory area.

"Commercial activity" means all activities, other than fishing, of industry and trade, including but not limited to, the buying and selling of a regulated species and activities conducted for the purpose of facilitating such buying and selling.

"Commission" means the International Commission for the Conservation of Atlantic Tunas established pursuant to Article III of the Convention.

"Convention" means the International Convention for the Conservation of Atlantic Tunas, signed at Rio de Janeiro May 14, 1966, 20 U.S.T. 2887, including any amendments or protocols which are or become effective for the United States.

"Council" means the Council established within the International Commission for the Conservation of Atlantic Tunas pursuant to Article V of the Convention.

"Dealer" means any person (as hereinafter defined) who engages in a commercial activity with respect to a regulated species or parts thereof.

"Director" means the Director of the National Marine Fisheries Service.

"Fishing" means the catching, taking, or fishing for, or the attempted catching, taking, or fishing for, any species of fish covered by the Convention, or any activities in support thereof.

"Fishing vessel" includes all watercraft, except purse seine skiffs, which are used, used in support of, or outfitted for, catching, taking, processing or transporting fish.

"Fishing voyage" means the period between the date a fishing vessel departs from any port to carry out fishing operations and the date such vessel unloads any of its catch or the date such vessel returns to any port for the express purpose of receiving an inspection by a designated agent of the National Marine Fisheries Service.

"Open season" means the time during which a regulated species may be lawfully taken within the regulatory area in accordance with established quotas or other limitations.

"Person" includes any individual, partnership, corporation, or association subject to the jurisdiction of the United States.

"Purse seining" means the taking or the attempted taking of fish by means of an encircling net and associated gear used in commercial fishing operations.

"Quota" means the amount of fish measured either by number or weight, that may be retained.

"Regional Director" means:

(a) For purposes of Atlantic bluefin tuna—the Regional Director, Northeast Region, National Marine Fisheries Service, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930.

(b) For purposes of yellowfin tuna—the Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

"Regulatory area" means:

(a) For the purposes of Atlantic bluefin tuna—all waters of the Atlantic Ocean including adjacent seas;

(b) For the purposes of yellowfin tuna—all waters of the Atlantic Ocean including adjacent seas except the waters over which States have jurisdiction unless the Director has determined otherwise in accordance with § 285.8.

"Round weight" means the weight of a fish prior to gilling, gutting, and beheading.

"Secretary" includes the Secretary of Commerce or his designee.

"State" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico and the territories and possessions of the United States.

"Tuna" means Atlantic bluefin, yellowfin, skipjack, albacore or Atlantic bonito.

"Yellowfin tuna" means the species of fish scientifically known as *Thunnus albacares*.

§ 285.2 Basis and purpose.

(a) At a Tuna Symposium convened in Dakar, Senegal December 12–17, 1960, the Commission for Technical Cooperation in Africa South of the Sahara suggested the need to develop international procedures for the conservation of Atlantic tunas. The idea gained support and culminated in the convening of a Conference of Plenipotentiaries on the Conservation of Atlantic Tunas in Rio de Janeiro, Brazil, during May 2–14, 1966. The Conference prepared the International Convention for the Conservation of Atlantic Tunas, which entered into force March 21, 1969, after ratification by Canada, Japan, France, Ghana, South Africa, Spain, and the United States. Ratifications have been deposited by Brazil, Cuba, Ivory Coast, Korea, Morocco, Portugal and Senegal since the Convention entered into force.

(b) The International Commission for the Conservation of Atlantic Tunas (ICCAT) has been established under the authority of the Convention. The Commission is responsible for the study of the populations of tuna and tuna-like fishes in the Atlantic Ocean and is empowered to recommend proposals for joint action by member governments aimed at maintaining these stocks at levels which will permit the maximum sustainable catch. The Commission structure also includes a Council which serves as an executive body between biennial meetings of the Commission.

(c) The First Regular Meeting of the Commission held in Rome, December 1–6, 1969, and the First Regular Meeting of the Council in Madrid, November 16–20, 1970, centered on organizational questions. Priority was given to the collection of basic data by the Secretariat from member countries on tuna fisheries and to the organization of a Standing Committee on Research and Statistics (SCRS). The Committee, composed of scientists from member countries, is responsible for coordinating and reviewing data collection and stock assessment work on tuna and tuna-like species in the Atlantic.

(d) At the second biennial meeting of the Commission held in Madrid December 2–7, 1971, the SCRS reviewed the somewhat limited data available and warned that regulatory measures may be needed in the future (1) to control the taking of Atlantic bluefin and yellowfin tuna below a certain size and (2) to reduce fishing intensity on yellowfin tuna.

(e) At the Second Regular Meeting of the ICCAT Council in Madrid November 29–December 5, 1972. The Council recommended a ban on taking and landing yellowfin tuna weighing less than 3.2 kilograms but provided for an incidental catch allowance for yellowfin tuna weighing less than 3.2 kilograms of 15 percent

V 40 215 NOV 6 75 XUM

of all yellowfin onboard. The Council held its Third Regular Meeting in Madrid November 20–26, 1974, at which time it adopted two regulatory measures for Atlantic bluefin tuna which included a 6.4 kilogram minimum size and a limit on fishing mortality of Atlantic bluefin tuna to recent levels for a period of one year. The Council's recommendations were formally approved by a majority of the Commission members in February 1975.

(f) On August 5, 1975, the President signed into law the Atlantic Tuna Convention Act of 1975, which under certain conditions authorizes the Secretary to implement the Commission's recommendations. The Secretary's authority under the Act has been delegated to the Director.

(g) The regulations in this part are designed to implement the provisions of the Act and the Commission's recommendations for conservation.

§ 285.3 Prohibitions.

(a) It shall be unlawful—

(1) For any person in charge of a fishing vessel or any fishing vessel subject to the jurisdiction of the United States to engage in fishing or to land any tuna in violation of these regulations; or

(2) For any person to land, transship, ship, transport, purchase, sell, offer for sale, import, export, or have in custody, possession, or control any fish which he knows, or should have known, were taken or retained contrary to these regulations, without regard to the citizenship of the person or fishing vessel which took the fish.

(b) It shall be unlawful for a dealer or master or any person in charge of any fishing vessel subject to the jurisdiction of the United States to fail to make, keep, or furnish any catch returns, statistical records, or other reports required by these regulations to be made, kept, or furnished by such dealer, master or person.

(c) It shall be unlawful for a dealer or master or any person in charge of any fishing vessel subject to the jurisdiction of the United States to refuse to permit any person authorized to enforce the provisions of these regulations, to enter the premises of said dealer or to board such vessel in order to inspect its catch, equipment, books, documents, records, or other articles or question the persons onboard in accordance with the provisions of these regulations, or to obstruct such officials in the execution of such duties.

(d) It shall be unlawful for any person to import from any country any fish in any form of those species subject to regulation pursuant to a recommendation of the Commission, or any fish in any form not under regulation but under investigation by the Commission, during the period such fish have been denied entry in accordance with the provisions of these regulations.

§ 285.4 Civil penalties.

Any person who—

(a) Violates any provision of § 285.3 (a) of this Part shall be assessed a civil penalty of not more than $25,000 and for any subsequent violation of said section shall be assessed a civil penalty of not more than $50,000;

(b) Violates any provision of § 285.3 (b) or (c) of this Part shall be assessed a penalty of not more than $1,000 and for any subsequent violation of said subsection shall be assessed a civil penalty of not more than $5,000; or

(c) Violates any provision of § 285.3 (d) of this Part shall be assessed a civil penalty of not more than $100,000.

§ 285.5 Enforcement.

(a) These regulations and the provisions of the Act shall be enforced jointly by the Secretary, the Secretary of the department in which the Coast Guard is operating, and the United States Customs Service.

(b) Enforcement Agents of the National Marine Fisheries Service shall enforce these regulations and the provisions of the Act on behalf of the Secretary and may take any actions authorized by the Act and these regulations with respect to enforcement. The Secretary may utilize, by agreement, the personnel, services, and facilities of any other Federal Agency for the purposes of enforcing this Act. Pursuant to the limitations of section 6 of the Act, the Secretary may also designate personnel of a State to enforce these regulations and the provisions of the Act.

§ 285.6 Civil procedures.

(a) The method for assessment of civil penalties for violation of these regulations or the Act shall be in accordance with the rules and procedures set forth in 50 CFR Part 218.

(b) In view of the perishable nature of tuna when not processed otherwise than by chilling or freezing, any person authorized to enforce the regulations in this part may cause to be sold, and any person may purchase, for not less than its reasonable market value such quantities of perishable tunas as may be seized and forfeited pursuant to the Act or any regulations promulgated thereunder.

(c) The proceeds of any sale made pursuant to paragraph (b) of this section after deducting the reasonable costs of the sale, if any, shall be remitted by the purchaser to the Regional Director for deposit and retention in the Suspense Account of the National Marine Fisheries Service (Account No. 14X6875(17) pending judgment of the court or other disposition of the case.

(d) If a duly constituted official acting under authority and in behalf of a State of the United States seizes any tuna taken in the regulatory area under the applicable laws or regulations of such government, such tuna may be forfeited and sold or otherwise disposed of pursuant to such laws or regulations. Any tuna so seized by an official of a State shall not be seized by an officer or employee of the Federal Government unless it is voluntarily turned over to him to be processed again under applicable Federal laws or regulations.

§ 285.7 Persons and vessels exempt.

Nothing contained in this Part shall apply to any person or vessel authorized by the Commission, the Director or any State, upon approval by the Director, to engage in fishing for research purposes.

§ 285.8 Relationship to other laws and regulations.

(a) Pursuant to subsection 9(d) of the Act, with respect to any State whose waters border on the convention area:

(1) These regulations shall apply therein if the Director determines that any such State:

(i) Within 30 days after the promulgation of these regulations, has not enacted laws or promulgated regulations which implement the recommendations of the Commission within its waters; or

(ii) Has enacted such laws or promulgated such regulations, but such laws or regulations:

(A) Are less restrictive than the regulations promulgated pursuant to this Act to implement such recommendations of the Commission, or

(B) Are not being effectively enforced;

(b) To insure that the purposes of this section are carried out, the Director shall undertake a continuing review of the relevant laws and regulations of all States to which the Act and these regulations apply or may apply and the extent to which such laws and regulations are enforced.

(c) Pursuant to subsection 9(d)(2) of the Act a State may request a hearing on the record within 30 days after promulgation of these regulations.

Subpart B—Atlantic Bluefin Tuna (Thunnus thynnus thynnus)

§ 285.10 Authorized fishing.

Fishing for Atlantic bluefin tuna that weigh between 14 pounds round weight (6.4 kg.) and 115 pounds round weight (52.3 kg.) or in excess of 300 pounds round weight (136.4 kg.) by persons or fishing vessels subject to the jurisdiction of the United States is authorized in the regulatory area only during open season. Fishing for Atlantic bluefin tuna that weigh less than 14 pounds round weight or in excess of 115 pounds round weight but less than 300 pounds round weight by persons or fishing vessels subject to the jurisdiction of the United States is not authorized at any time in the regulatory area. However, Atlantic bluefin tuna that weigh less than 14 pounds or in excess of 115 pounds round weight but less than 300 pounds round weight may be incidentally taken in the course of fishing in the regulatory area by persons or fishing vessels subject to the jurisdiction of the United States only in the manner and in the numbers or weights, as the case may be, as set forth in § 285.13.

§ 285.11 Open and closed seasons.

(a) The Director shall announce in the FEDERAL REGISTER the opening and the closing of the seasons or areas for the taking of Atlantic bluefin tuna. In determining whether a season or area shall be opened and when a season or area shall be closed for the calendar year 1975, the Director will take into consideration the number or tons, as the case may be, of Atlantic bluefin tuna taken during the period from 1 January 1975 to the date these regulations are promulgated.

§ 285.12 Quotas.

The quotas, by method of fishing, for Atlantic bluefin tuna in the regulatory area during the open season are as follows:

(a) Purse seining:

(1) The total annual quota for Atlantic bluefin tuna that weigh between 14 pounds (6.4 kg.) round weight and 115 pounds (52.3 kg.) round weight is 1,100 short tons (997 metric tons).

(2) The total annual quota for Atlantic bluefin tuna that weigh in excess of 300 pounds (136.4 kg.) round weight is 200 short tons (132 metric tons).

(b) Fishing by other than purse seining:

(1) The total annual quota of Atlantic bluefin tuna which weigh in excess of 300 pounds round weight is 2,250 tuna of which no more than 200 tuna shall be taken south of a line extending from the entrance to Chatham Harbor, Massachusetts, east into the Atlantic Ocean.

(2) The daily bag limit per person for persons who angle for Atlantic bluefin tuna which weigh between 14 pounds round weight and 115 pounds round weight is four Atlantic bluefin tuna.

When the quota for a particular weight of Atlantic bluefin tuna has been reached, the Director shall, in accordance with § 285.11 close the season for Atlantic bluefin tuna of that weight.

§ 285.13 Incidental catch.

(a) Purse seine vessels fishing for Atlantic bluefin tuna weighing more than 14 pounds round weight but less than 115 pounds round weight, may, in addition, incidentally take on any one trip Atlantic bluefin tuna outside said weight limits provided, however, that the number of such tuna taken shall not exceed either 15 percent of the total number of Atlantic bluefin tuna taken which do not exceed said limits or 4 percent by weight of the total weight of Atlantic bluefin tuna taken which do not exceed said limits.

(b) Persons angling for Atlantic bluefin tuna, which weigh between 14 pounds round weight and 115 pounds round weight, may include in the daily bag limit one Atlantic bluefin tuna less than 14 pounds round weight and one Atlantic bluefin tuna greater than 115 pounds round weight but less than 300 pounds round weight.

(c) Persons or fishing vessels subject to the jurisdiction of the United States fishing for species of fish other than Atlantic bluefin tuna may, in addition, incidentally take on any one trip, or in the case of traps within any 30 day period, Atlantic bluefin tuna of any weight provided that said tuna do not exceed, by weight, 2% of the total weight of the fish taken.

(d) All Atlantic bluefin tuna taken incidentally shall be included in the quotas set forth in § 285.12.

§ 285.14 Reporting requirements.

(a) Reports and records required by this section when required to be forwarded to the National Marine Fisheries Service, should be forwarded to:

Director, Northeast Region
National Marine Fisheries Service
14 Elm Street, Federal Building
Gloucester, Massachusetts 01930

The tags referred to in (b) and (c) of this section may be obtained by writing to the same address.

(b) Any person or master or operator of any fishing vessel subject to the jurisdiction of the United States that takes an Atlantic bluefin tuna in excess of 300 pounds round weight shall affix through the fleshy part of the keel on the peduncle, an individually numbered tag furnished by the National Marine Fisheries Service. The person, master or operator shall complete the numbered card furnished with the tag and mail the card to the National Marine Fisheries Service within 72 hours of landing.

(c) It shall be the responsibility of any dealer who purchases or otherwise obtains an Atlantic bluefin tuna that weighs in excess of 300 pounds round weight to affix, unless there is already affixed upon the tail, through the fleshy part of the keel on the peduncle, an individually numbered tag furnished by the National Marine Fisheries Service. The dealer shall complete the numbered card furnished with the tag and mail the card to the National Marine Fisheries Service within 72 hours of receipt of such tuna. An affixed tag whether attached by a dealer, person or master or operator of a fishing vessel must remain in place until such tuna is being processed, packed for export or otherwise disposed of, at which time the dealer shall remove a 3–6 inch section of the tail (caudal peduncle) containing the tag, notify the National Marine Fisheries Service and retain the tail piece with tag for collection by a representative from the National Marine Fisheries Service.

(d) With respect to Atlantic bluefin tuna that weigh less than 300 pounds round weight, dealers shall maintain and forward to the National Marine Fisheries Service, within 72 hours of engaging in a commercial activity involving such Atlantic bluefin tuna, a complete record of such activity including the numbers, and disposition (names, adresses and where applicable country of origin) of such Atlantic bluefin tuna.

§ 285.15 Presumptions.

For purposes of this Part 285, there shall be a rebuttable presumption that Atlantic bluefin tuna which are of the following lengths when measured in a straight line from the tip of the nose to the fork of the tail weigh the amount noted in association with the length:

27 inches (68 cm.)—14 pounds (6.4 kg.).
56 inches (142 cm.)—115 pounds (52.3 kg.).
75 inches (191 cm.)—300 pounds (136.4 kg.).

For any Atlantic bluefin tuna which is less than or in excess of the lengths set-forth herein, there shall be a rebuttable presumption that such Atlantic bluefin tuna correspondingly weighs less than or in excess of, as the case may be, the appropriate associated weights.

Subpart C—Yellowfish Tuna (Thunnus Albacares)

§ 285.20 Authorized fishing.

Fishing for yellowfin tuna that weigh 7 pounds round weight (3.2 kg.) or more by persons or fishing vessels subject to the jurisdiction of the United States is authorized in the regulatory area during the open season. Except as provided in § 285.22, fishing in the regulatory area for yellowfin tuna that weigh less than 7 pounds round weight by persons or fishing vessels subject to the jurisdiction of the United States is not authorized.

§ 285.21 Open and closed seasons.

The open season for yellowfin tuna fishing shall begin annually at 0001 hours on the first day of January and terminate at 2400 hours on the last day of December, unless announced to the contrary by notice in the FEDERAL REGISTER.

§ 285.22 Incidental catch.

Persons or fishing vessels subject to the jurisdiction of the United States may take yellowfin tuna that weigh less than 7 pounds round weight as an incident to fishing in the regulatory area for yellowfin tuna that weigh 7 pounds round weight or more, provided, however, that no such persons or fishing vessels may land or transship such yellowfin tuna (weighing less than 7 pounds round weight) taken during any one fishing voyage as exceed 3 percent by weight of the total weight of yellowfin tuna taken in said fishing voyage that weigh 7 pounds round weight or more.

§ 285.23 Recordkeeping.

(a) Any person in charge of a fishing vessel, or any master or other person in charge of a fishing vessel subject to the jurisdiction of the United States or any person as may be authorized in writing to serve as the agent of such person or master, shall:

(1) Keep an accurate log of all operations conducted from the vessel, entering therein for each day the date, noon position (stated in latitude and longitude or in relation to known physical features), and the tonnage of tuna aboard by species. The record and bridge log shall be sufficient to comply with this paragraph, provided however, that the items of information specified herein are fully and accurately entered in such log.

(2) Furnish on a form obtainable from the Regional Director, following the sale or delivery of a catch of tuna made by such vessel, a report, certified to be correct as to facts within the knowledge of the reporting individual, giving the name and official number of the fishing vessel, the dates of beginning and ending of the fishing voyage, the port of depar-

V 40 215 NOV 6 75 XUM

ture, and a listing separately by species of the round weight quantities (pounds or short tons) of tuna sold or delievered. At the option of the vessel master or other person in charge, a copy of the fish ticket, weighout slip, settlement sheet, or similar record issued by the dealer or his agent may, however, be used for reporting purposes in lieu of the form obtainable from the Regional Director, if such alternate record is similarly certified and contains all items of information required by this paragraph. In addition, any vessel landing its catch in California may satisfy the requirements of this paragraph by submitting an official copy of the California fish ticket. Such sale and delivery reports shall be delivered or mailed to the Regional Director within 72 hours after weighout has been completed.

(b) Any person authorized to carry out enforcement activities under the Act or these regulations shall have power, without warrant or other process, to inspect, at any reasonable time, log books, catch reports, statistical records, or other reports as required by the regulations in this part to be made, kept or furnished.

§ 285.24 Reporting requirements.

(a) Any person in charge of a fishing vessel or any Master or other person in charge of a fishing vessel, subject to the jurisdiction of the United States, except vessels proceeding directly to Puerto Rico or to any other U.S. Port for unloading, shall report to the Regional Director not less than 48 hours prior to entering the regulatory area via the Panama Canal. In addition, any person in charge of a fishing vessel or any Master or other person in charge of a vessel, subject to the jurisdiction of the United States except a vessel without yellowfin tuna aboard, shall notify the Regional Director not less than 48 hours prior to leaving the regulatory area via the Panama Canal. Each report shall include the name of the reporting vessel, the tonnage of yellowfin tuna aboard, and whether the yellowfin tuna were caught in Pacific or Atlantic waters.

(b) All such fishing vessels entering or leaving the regulatory area via the Panama Canal shall be subject to inspection. Official seals will be affixed to wells containing yellowfin tuna taken within or outside the regulatory area, as appropriate and the same will be noted on the vessel log. The official seals shall be removed only by a designated agent of the National Marine Fisheries Service, upon the arrival at point of sale or delivery.

(c) Any person in charge of a fishing vessel or any Master or other person in charge of a fishing vessel subject to the jurisdiction of the United States, shall notify the Regional Director not less than 48 hours prior to any transfer of yellowfin tuna taken in the regulatory area to another vessel for the purpose of transshipment. Such reports shall include the date and place of unloading, name and destination of the oncarrying vessel, and the tonnage by species of tuna transferred.

(d) The failure to file the reports or to follow the procedures required by this section, the tampering with or the removal of an official seal, or the alteration of a fishing vessel's log by any person or fishing vessel subject to the jurisdiction of the United States shall be a prohibited act within the meaning of § 285.3 of this Part.

Subpart D—Restrictions on Tuna Imports

§ 285.30 Basis and purpose.

(a) The stocks of Atlantic tunas under investigation and regulation by the Commission represent the concern of a number of countries interested in the conservation of such stocks. In order to assure that the achievement of the conservation objectives of the Commission are fulfilled the Act provides for certain restrictions on the importation of Atlantic tunas. Pursuant to Section 6(c) of the Act, the Secretary, with the concurrence of the Secretary of State, is directed to promulgate regulations to prohibit:

(1) The entry into the United States of fish in any form of those species which are subject to regulation pursuant to a recommendation of the Commission and which were taken from the regulatory area in such manner or in such circumstances as would tend to diminish the effectiveness of the conservation recommendations of the Commission; and

(2) The entry into the United States, from any country when vessels of such country are being used in the conduct of fishing operations in the regulatory area in such manner or in such circumstances as would tend to diminish the effectiveness of the conservation recommendations of the Commission, of fish in any form of those species which are subject to regulation pursuant to a recommendation of the Commission and which were taken from the regulatory area;

(3) The entry into the United States, from any country when vessels of such country engage in repeated and flagrant fishery operations in the regulatory area which seriously threaten the achievement of the objectives of the Commission's recommendations, of fish in any form of those species which are under investigation by the Commission and which were taken from the regulatory area.

(b) By letter of _____, the Secretary of State concurred in the promulgation of the regulations in this part. Such regulations are designed to implement the provisions of Section 6(c) of the Act with respect to import controls and to proscribe procedures for the establishment of restrictions on imports of tuna and tuna-like fish whenever such action shall be deemed warranted.

§ 285.31 Species subject to regulation.

The species of tuna currently subject to regulation pursuant to recommendations of the Commission within the meaning of Section 6(c) are yellowfin tuna and Atlantic bluefin tuna.

§ 285.32 Species under investigation by the Commission.

Those species of tuna currently under investigation by the Commission within the meaning of section 6(c) of the Act are yellowfin, Atlantic bluefin, skipjack, albacore, bigeye and Atlantic bonito, and billfishes.

§ 285.33 Investigations authorized.

(a) The Director shall cause to be made, from time to time, such inquiries and investigations as may be necessary to keep himself and other interested persons currently informed regarding the nature and effectiveness of the measures for the implementation of the Commission's recommendations concerning those activities which are being carried out by foreign countries whose vessels engage in fishing within the regulatory area. In making a finding, as to:

(1) Whether or not fish in any form of those species which are subject to regulation by the Commission are being taken from the regulatory area in a manner or under such circumstances as would tend to diminish effectiveness of the conservation recommendations of the Commission; or

(2) Whether or not a country is condoning the use of vessels in the conduct of fishing operations in the regulatory area in such a manner or under such circumstances that would tend to diminish the effectiveness of the conservation recommendations of the Commission; or

(3) Whether or not a country is condoning the use of vessels in repeated and flagrant fishing operations which seriously threaten the objectives of the Commission, the Director shall take into account, among such other considerations as may appear to be pertinent in a particular case, the following factors:

(i) Whether or not the country provides or causes to be provided to the Commission pertinent statistics on a timely basis;

(ii) whether or not the country has in force conservation measures applicable to its own fishermen adequate for the implementation of the Commission's recommendations;

(iii) whether or not the country has in force measures for the control of landings in its ports of species subject to regulations which are taken in the regulatory area by fishermen of other countries contrary to the Commission's conservation recommendations;

(iv) whether or not the country, having put conservation measures into effect, takes reasonable action to enforce such measures;

(v) the number of vessels of the country which conduct fishing operations in the regulatory area;

(vi) the quantity of species subject to regulation taken from the regulatory area by the Country's vessels contrary to the Commission's conservation recommendations and its relationship to (A) the total quantity permitted to be taken by the vessels of all countries participating in the fishery and (B) the quantity of such species sought to be restored to the stocks of fish pursuant to the Commission's conservation recommendations.

(b) Any person who shall have reason to believe that the vessels of any country are being used in the conduct of fishing operations in the regulatory area in such manner or in such circumstances as would tend to diminish the effectiveness of the conservation recommendations of the Commission or that other acts within the purview of the import control provisions of section 6(c) of the Act, are occurring or are likely to occur, may communicate his belief to the Director. Every such communication shall contain or be accompanied by a full statement of the reasons for the belief, including a detailed description of such specific acts or events as may indicate a need for instituting an investigation as authorized in this part.

(c) Upon receipt by the Director of any communication submitted pursuant to paragraph (b) of this section and found to comply with the requirements of that paragraph, the Director promptly shall cause such investigation to be made as appears to be warranted by the circumstances of the case. In conducting such investigations the Director or his designated representative shall consider any representations offered by foreign interests, importers, brokers, domestic producers, or other interested persons. Unless good cause to the contrary shall exist, every such investigation shall be completed within 60 days following receipt of the communication.

§ 285.34 Publication of findings.

If it shall be determined on the basis of § 285.33 that species of fish subject to regulation or under investigation by the Commission, as the case may be, are ineligible for entry into the United States pursuant to the provisions of section 6 (c) of the Act, the Director, with the approval of the Secretary of the Commerce and with the concurrence of the Secretary of State, shall publish a finding to that effect in the FEDERAL REGISTER. Effective upon the date of publication of such finding in the FEDERAL REGISTER every shipment of fish in any form of the species found to be ineligible shall be denied entry unless it shall be established by satisfactory proof pursuant to § 285.35 that a particular shipment of such fish is not ineligible for entry: *Provided*, That entry shall not be denied and no such proof shall be required for any such shipment which, on the date such publication, was in transit to the United States on board a vessel operating as a common carrier.

§ 285.35 Proof of admissibility.

(a) For the purposes of § 285.33 of this part and section 6(c) of the Act a shipment of fish in any form of the species under regulation or under investigation by the Commission offered for entry, directly or indirectly, from a country named in a finding published under § 285.34 shall be deemed to be eligible for entry if the shipment is accompanied by a certificate of eligibility certifying as may be appropriate, that the fish in the shipment:

(1) Are not of the species specified in the published finding;

(2) Are of the species named in the published finding but were not taken in the regulatory area; or

(3) Are of the species named in the published finding but are products of an American fishery lawfully taken in conformity with applicable conservation laws and regulations and landed in the country named in the published finding solely for transhipment. The certificate shall be attached to the invoice and be in the following form:

CERTIFICATE OF ELIGIBILITY

I, _____ an authorized officer of the Government of _____, certify that the shipment of tuna accompanied by this certificate, consisting of _____ of _____ (Quality) (Species) in _____ (Number and kind of packages or containers bearing the following marks and numbers)

☐ (a) Contains no tuna of the species prohibited entry into the United States by virtue of a finding of ineligibility published under regulations issued pursuant to section 6(c) of the Atlantic Tunas Convention Act of 1975. (A certificate of authentication executed by a consular officer or a consular agent of the United States must be attached.)

☐ (b) Contains tuna of the species prohibited entry into the United States by virtue of a finding of ineligibility published under regulations issued pursuant to section 6(c) of the Atlantic Tunas Convention Act of 1975, but that such tuna were caught in the waters of _____ (Identify area or areas in which tuna were taken) by vessels subject to the jurisdiction of _____ (A certificate of authentication executed by a consular officer or consular agent of the United States must be attached.)

☐ (c) Contains tuna of the species prohibited entry into the United States by virtue of a finding of ineligibility published under regulations issued pursuant to section 6(c) of the Atlantic Tunas Convention Act of 1975, but that such tuna, as shown in the attached declaration, were taken in strict conformity with applicable conservation laws and regulations in a fishing enterprise conducted under the American flag by vessels of the United States, are products of an American fishery within the meaning of Schedule 1, Part 15A, Tariff Schedules of the United States, were landed in a foreign country solely for transshipment without change in condition and are eligible for free entry under such Schedule and 19 CFR 10.78–10.79. (Where an entry is to be made pursuant to this paragraph, this certificate must be executed by a consular officer or consular agent of the United States and the declaration(s) required by 19 CFR 10.79 and must be attached.)

_____
Signature

_____

Address

(b) If the tuna are offered for entry under paragraph (a) or (b) of the Certificate of Eligibility, the certificate must be executed by a duly authorized official of the country named in the published finding and the certificate must be authenticated with respect to the signature and official position of the person executing the same by a consular officer or consular agent of the United States. Such certificate of authentication shall be attached to the Certificate of Eligibility and be substantially in the following form:

_____
_____
_____ ss:
_____
_____

I, _____;
(Name of the consular officer or consular agent)
_____ of the United
(Title)
States of America at _____,
(Place)
duly commissioned and qualified, do hereby certify that _____, whose
(Name of foreign official)
true signature and official seal are, respectively subscribed and affixed to the annexed certificate, was, on the ____ day of _____, 19__, the date thereof,
(Title of foreign official)
duly commissioned and qualified, to whose official acts faith and credit are due.

In witness whereof I have hereunto set my hand and affixed the seal of the _____ this _____ 19__, _____
Signature

_____
(Name and full title of officer)

(c) If the tuna are offered for entry under paragraph (c) of the Certificate of Eligibility, the certificate must be executed by a consular officer of consular agent of the United States and be accompanied by the declaration(s) required by 19 CFR 10.79. The "Declaration of Master and Two Members of Crew on Entry of Products of American Fisheries", required by 19 CFR 10.79 must contain a further statement as follows: "We further declare that the said tuna were caught by us in full compliance with Part 285, Title 50, Code of the *Federal Regulations*, and such other conservation laws and regulations as were applicable at the time the fishing operation was in progress.

§ 285.36 Removal of import restrictions.

Upon a determination by the Director that the conditions no longer exist which warranted the imposition of import restrictions in the finding published pursuant to § 285.34 the Director, with the approval of the Secretary and the concurrence of the Secretary of State, shall publish a finding to such effect in the FEDERAL REGISTER. Effective upon the date of publication of such finding, the prior existing import restrictions against the country designated therein shall terminate: *Provided*, that for a period of 1 year from such date of publication every shipment of fish in any form that was subject to the finding published pursuant to § 285.34 shall continue to be denied entry unless the shipment is accompanied by a certification executed by an authorized official of the country of export and authenticated by a consular

V 40 215 NOV 6 75 XUM

officer or consular agent of the United States, certifying that no portion of the shipment is comprised of fish taken prior to or during the import restriction.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 103]

VOCATIONAL EDUCATION CURRICULUM

Additional Criteria

Pursuant to the authority contained in Section 191 of Part I of the Vocational Education Act of 1963, as amended, 20 U.S.C. 1391, notice is hereby given that the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, proposes to amend Part 103 of Title 45 of the Code of Federal Regulations by revising Appendix C to read as set forth below. The proposed Appendix C would contain additional criteria for selection of applications under the program of support for Vocational Education Curriculum projects for fiscal year 1976.

(a) *Program purpose.* Section 191 of Part I of the Vocational Education Act of 1963, as amended, 20 U.S.C. 1391, provides for federally administered grants or contracts for programs and projects for the development of curriculums for new and changing occupations, and for coordination of improvements in, and dissemination of, existing curriculum materials. The purposes of these projects are to: (1) Promote the development and dissemination of vocational education curriculum materials for use in teaching occupational subjects, including curriculums for new and changing occupational fields, and including those in public service; (2) Develop standards for curriculum development in all occupational fields; (3) Coordinate efforts of the States in the preparation of curriculum materials and also in the preparation of current lists of curriculum materials available in all occupational fields; (4) Survey curriculum materials produced by other agencies of Government, including the Department of Defense; (5) Evaluate vocational-technical education curriculum materials and their uses; and (6) Train personnel in curriculum development.

(b) *Other program information.* The projects are conducted under grants or contracts awarded by the Commissioner of Education, in accordance with the provisions of Part I of the Act and with the applicable Federal regulations (45 CFR Part 103). Eligible applicants include local educational agencies, State boards for vocational education, and public and private agencies, institutions or organizations. Under departmental policy profit making applicants are eligible only for a contract.

(c) *Regulations and criteria.* Regulations for vocational education discretionary programs were published in the FEDERAL REGISTER on August 15, 1974, 39 FR 29361. Regulations published in the FEDERAL REGISTER on November 6, 1973, 38 FR 30654, relate to general fiscal and administrative provisions for all Office of Education programs. These general regulations contain general criteria for the review of applications under Office of Education project type programs (45 CFR 100a.26) and are applicable to the programs under Part I of the Act.

In addition to the criteria for review of applications already published in the FEDERAL REGISTER, as described above, it is proposed that the additional criteria set forth in proposed Appendix C to the regulations in 45 CFR Part 103 will be applicable in connection with the review of applications for grants to be awarded in fiscal year 1976.

(d) *Written comments.* Interested persons are invited to submit written comments, suggestions, or objections regarding such proposed additional criteria to the Division of Research and Demonstration, U.S. Office of Education, 7th and D Streets, SW., Room 5042, ROB #3, Washington, D.C. 20202, on or before December 8, 1975. Comments received shall be available for public inspection at the above office, Monday through Friday between the hours of 8:30 a.m. and 4 p.m. All relevant materials received on or before December 8, 1975, will be considered.

It is hereby certified that the economic and inflationary impacts of this proposed amendment have been evaluated in accordance with OMB Circular A-107.

(Catalog of Federal Domestic Assistance Program Number 13.496; Vocational Education—Curriculum)

Dated: September 1, 1975.

T. H. BELL,
U.S. Commissioner of Education.

Approved: October 30, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

APPENDIX C—VOCATIONAL EDUCATION CURRICULUM

FISCAL YEAR 1976

The Office of Education contemplates supporting six project grants for six curriculum coordination centers in fiscal year 1976 from funds available for the Vocational Education Curriculum program. Four of these awards will be open to competition. Two will be noncompeting continuations of grants made in fiscal year 1975 to the California State Department of Education and to Mississippi State University.

Two of the four competing awards will be funded with a two-year multi-year approval on a non-competing annual basis. The other two of these four awards will be funded with a three-year multi-year approval on a non-competing basis. The awards will be made to begin January 1, 1976.

The applicants will submit their project goals and activities for the multi-year period. Multi-year approval is intended to offer the project a reasonable degree of stability over time and to facilitate long range planning. Approval of a multi-year project shall not commit the Office of Education to provide financial assistance from appropriations not currently available; and second and third year funding is contingent on satisfactory performance.

(a) *Awarded applicants' obligations.* One of the three-year awards will provide leadership to curriculum coordination in the Northeast area including Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Puerto Rico, Rhode Island, Vermont, Virgin Islands. The other three-year award will provide leadership for the Northwest area including Alaska, Colorado, Idaho, Montana, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming.

One of the two-year awards will provide leadership to curriculum coordination for the East-Central area including Delaware, District of Columbia, Illinois, Indiana, Maryland, Michigan, Minnesota, Ohio, Pennsylvania, Virginia, West Virginia, Wisconsin. The other two-year award will provide leadership for the Midwest area including Arkansas, Iowa, Kansas, Louisiana, Missouri, Nebraska, New Mexico, Oklahoma, Texas.

Each awardee will be the facilitator in enabling these States to:

(1) Improve their own curriculum services and capabilities;

(2) Share information and plans regarding curriculum materials and needs in order to reduce duplication of efforts;

(3) Plan for cooperation in development, testing, evaluation, dissemination, reproduction and implementation of materials; and

(4) Develop and maintain intra-State liaison activities that will stimulate cooperative relationships at State and local levels.

In addition each awardee will become a member of the National Network Council for Curriculum Coordination in vocational and technical education; and as a member each awardee will:

(1) Conduct coordination, dissemination and diffusion activities in order to improve the acceptance of new curriculum products and to assess their impact;

(2) Establish and maintain a system for determining curriculum needs in vocational and technical education and for recommending priorities for State and national emphasis;

(3) Share information regarding materials and studies available and under development; and

(4) Provide curriculum services which will encourage the adaptation, demonstration and adoption of effective curricula and curriculum development practices in vocational and technical education.

The Office of Education will entertain requests for these grants to support:

(1) Communication and coordination activities with the States, the Network, and the U.S. Office of Education.

(2) Travel costs and per diem for the Center personnel to attend two meetings of the National Network Council for Curriculum Coordination. One of these meetings will be held in Washington, D.C.

(3) Travel costs and per diem, excluding honoraria, for State representatives to attend meetings sponsored by the center. Each of the six centers will hold a consortium meeting with their State representatives concurrently at a central U.S. location.

(b) *Application review criteria.* The criteria to be utilized in reviewing applications are listed below. These criteria are consistent with section 100a.26, Review of Applications, in the Office of Education's General Provisions for Programs, published in the

FEDERAL REGISTER in 38 FR 30654 on November 6, 1973. Segments or a segment of the application must address each criterion. Each criterion is weighted to show the maximum score that can be given to each specific criterion. Each criterion and the maximum points possible are as follows:

Criteria:	Score
(a) *Need and problems.*—The application should clearly define the need for the project within the specified consortium of States and should indicate responsiveness to problems rather than symptoms	20
(b) *Objectives.*—The objectives should be clearly stated, capable of being attained by the proposed procedures, and capable of being measured	10
(c) *Plan.*—The management plan should show functions to be performed and services to be provided; and the procedures for accomplishing each are delineated	20
(d) *Results.*—The proposed outcomes should be identified and described in terms of potential impact at National, State and local levels, Part I program purposes, and cost effectiveness and efficiency	20
(e) *Institutional capability.*—Application should clearly set forth current curriculum strengths and the capability of the applicant to immediately initiate and maintain liaison functions with consortium States	15
(f) *Personnel.*—The qualifications and experience of key staff should be appropriate for the requirements of the project; specific responsibilities should be identified for each of the key staff; and at least one key staff person should devote a minimum of 50 percent of his/her time to the project	10
(g) *Budget.*—The estimated cost should be reasonable in relation to anticipated results and the geographic area, scope, and duration of the project	5

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 75-WE-24]

FEDERAL AIRWAY

Proposed Extension

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would extend V-293 from Bryce Canyon, Utah, to Grand Canyon, Ariz., via the Page, Ariz., VOR to be established at Lat. 36°55'41" N., Long. 111°27'00" W.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Western Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 9009. All communications received on or before December 8, 1975, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, 800 Independence Avenue, SW., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would extend VOR Federal Airway No. 293 from Bryce Canyon, Utah, to Grand Canyon, Ariz., via the INT of Bryce Canyon 120°T (105°M) and the Page, Ariz., 340°T (325°M) radials and Page, Ariz.

The proposed extension of V-293 would provide continuous controlled airspace, charted radials, distance and minimum en route altitudes from Bryce Canyon, Utah, to Grand Canyon, Ariz., via Page, Ariz., for scheduled air carrier aircraft operating into Page on a regular basis. The indirect airway between Bryce Canyon and Page would permit better VOR reception and lower MEA than a direct route over higher terrain.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348 (a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655 (c)).

Issued in Washington, D.C., on October 31, 1975.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 453-1]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Proposed Revision to Idaho Implementation Plan

Pursuant to Section 110 of the Clean Air Act, as amended, the Governor of Idaho on July 28, 1975, submitted to the Administrator of the Environmental Protection Agency (EPA) a proposed revision to the Idaho Air Quality Implementation Plan. The proposed revision is a consent order for Beker Industries Corporation (formerly known as the Agricultural Products Corporation) which was adopted by the Idaho Board of Environmental and Community Services (now the Board of Health and Welfare) on October 24, 1973, after proper notice and public hearing.

The consent order replaces Regulation R—"Regulation for Control of Sulfur Oxides Emissions from Sulfuric Acid Plants" as the emission limiting regulation applying to the Beker Industries facility located in Caribou County, Idaho. The consent order contains provisions applicable to the "existing" sulfuric acid plant and the "new" sulfuric acid plant which commenced operation on March 28, 1974. Since this order was adopted by Idaho on October 24, 1973, certain of the provisions in the order dealing with start up of the new sulfuric acid plant are no longer applicable and have not been included in the following summary. The major provisions of the consent order are summarized as follows:

1. In the event the tail gas absorption unit on the new sulfuric acid plant should emit more than 6 lbs. sulfur dioxide (SO_2) per ton of 100 percent sulfuric acid produced, the Department of Environmental and Community Services (now the Department of Health and Welfare) shall have the authority to determine whether or not the new sulfuric acid plant should be immediately shut down and repaired.

2. The combined allowable SO_2 emissions from the existing and new sulfuric acid plants shall not exceed 27,000 lbs. of SO_2 per any consecutive 24-hour period. In the event ambient air SO_2 violations occur, this emission limit will be lowered.

3. Monitoring data from the continuous SO_2 recorder shall be submitted to the Department within seven days of initial start up of the new source and every seven days thereafter, or as often as required by the Department.

4. There shall be no increase in existing plant emissions after the new sulfuric acid plant is in operation. The maximum rate for existing sources is as follows:

a. Phosphate rock dryer—51.2 lbs. of particulate/hour.

b. North calciner—47.8 lbs. of particulate/hour.

c. South calciner—46.3 lbs. of particulate/hour.

d. Present sulfuric acid plant—27 lbs. SO_2/ton 100 percent sulfuric acid produced and 28 lbs. sulfur oxides/ton of 100 percent sulfuric acid produced.

5. Beker Industries shall operate two Hi-Vol filters and one continuous ambient SO_2 monitor at sites approved by the Department.

6. No process or individual source within the entire plant complex shall be operated in violation of any local, state or federal air pollution regulation or standard and nothing herein shall be construed to excuse Beker Industries from compliance with any federal, state, or local regulation or standard which requires or which may require more strict control standards than set out herein.

The Administrator is today proposing to approve the consent order as a revision to the Idaho State Implementation Plan. It should be noted that although the consent order indicates that the order may be amended at any time with the consent of the Department and Beker Industries, any such amendments will not become part of the Implementation Plan until approved by EPA. In addition to proposing to approve the consent order, the Administrator is today pro-

V 40 215 NOV 6 75 XUM

posing to disapprove Regulation R as it applies to the Beker Industries Corporation because it does not meet the requirements of 40 CFR 51.13 in that the control strategy contained in the regulation is not adequate for the attainment and maintenance of SO_2 national ambient air quality standards. The proposed disapproval is shown below. The Administrator also proposed disapproval of Regulation R as it applies to The J. R. Simplot Company in Pocatello, Idaho and proposed a federal regulation to apply to that facility on August 23, 1975 (40 FR 36385). Since Regulation R applies to only Beker Industries Corporation and The J. R. Simplot Company, should EPA approve the submitted consent order for Beker Industries and promulgate the proposed federal regulation for The J. R. Simplot Company, Regulation R would be disapproved in its entirety as part of the State Implementation Plan. Further, should EPA promulgate the proposed federal regulation for The J. R. Simplot Company and approve the consent order for Beker Industries as an Implementation Plan revision, the compliance schedule for sulfuric acid plants promulgated by EPA on August 23, 1973 (38 FR 22741) in 40 CFR 52.677(d) (3) and (4) would be revoked. The proposed revocation is also shown below.

All interested persons are invited to comment on the proposed revision to the Idaho State Implementation Plan. Comments should be addressed to the Regional Administrator, Region X, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Attention: K. Higley. Copies of the proposed revision and any comments received will be available for public inspection at the following addresses:

State of Idaho, Department of Health and Welfare, Statehouse, Boise, Idaho 83720
Environmental Protection Agency, Idaho Operations Office, 422 W. Washington Street, Boise, Idaho 83720
Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101
Environmental Protection Agency, Freedom of Information Center, 401 M Street SW., Washington, D.C. 20460

Relevant comments received on or before December 8, 1975, will be considered.

This notice is issued under the authority of Section 110 of the Clean Air Act, as amended (42 U.S.C. 1857c-5.)

Dated: October 28, 1975.

CLIFFORD SMITH, Jr.,
Regional Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40 of the Code of Federal Regulations as follows:

Subpart N—Idaho

1. Section 52.670 is amended by revising paragraph (c) (2) to read as follows:

§ 52.670 Identification of plan.

* * * * * *

(c) Supplementary information was submitted on:

* * * * * *

(2) March 2, May 5 and June 9, 1972; February 15, July 23 and October 16, 1973; July 1, 1974 (Idaho Indirect Source Regulation and compliance schedules); and January 10 (Regulation C), January 24 (Regulation A) and July 28 (Consent Order) 1975.

2. Section 52.675(c) is added as follows:

§ 52.675 Control strategy: Sulfur oxides—Eastern Idaho Intrastate Region.

* * * * *

(c) Regulation R of the Rules and Regulations for the Control of Air Pollution in Idaho, which is part of the sulfur dioxide (SO_2) control strategy, is disapproved as it relates to the Beker Industries Corporation facility located in Caribou County, Idaho, in the Eastern Idaho Intrastate Air Quality Control Region, since it is inconsistent with the requirements of § 51.13 of this chapter. These requirements are not met by Regulation R in that the SO_2 control strategy contained therein is not adequate for the attainment and maintenance of SO_2 national ambient air quality standards (IIAAQS). Further, the Regulation, as it applies to Beker Industries Corporation, has been superseded by a Consent Order issued by the Idaho Board of Environmental and Community Services, dated October 24, 1973.

3. Section 52.677 is amended by revoking subparagraphs (3) and (4) of paragraph (d) as follows:

§ 52.677 Compliance schedules.

* * * * *

(d) * * *

PROPOSALS FOR INCREASED PRICING FLEXIBILITY

Notice of Change in Hearing Dates

In its notice of proposed rulemaking and public hearing issued October 7, 1975 (40 FR 49372, October 22, 1975) the FEA stated that the public hearing in the matter of proposals for increased pricing flexibility would be held beginning at 9:30 a.m., on November 11, to be continued, if necessary, on November 12, 1975, in Room 2105, 2000 M Street, NW., Washington, D.C.

Due to scheduling problems, the hearing date has been changed to November 12, with the hearings to be continued, if necessary, on November 13, 1975. There is no change in the location or in the time the hearings will begin.

Issued in Washington, D.C., October 31, 1975.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Parts 239, 240, 249]

[Release Nos. 33-5627, 34-11733; File No. S7-593]

ENVIRONMENTAL AND SOCIAL DISCLOSURE

Notice of Commission Conclusions and Rulemaking Proposals

PRELIMINARY STATEMENT AND SUMMARY

The Securities and Exchange Commission today announced its conclusions and proposals for further rulemaking action in the proceeding announced in Securities Act Release No. 5569 (February 11, 1975) concerning possible disclosure in registration statements, reports and other documents filed with the Commission or required to be furnished to investors pursuant to the Securities Act of 1933 and the Securities Exchange Act of 1934 of environmental and other matters of social concern, including equal employment matters.

The Commission has concluded that, although it is generally not authorized to consider the promotion of social goals unrelated to the objectives of the federal securities laws, it is authorized and required by the National Environmental Policy Act of 1969 (NEPA) to consider the promotion of environmental protection as a factor in exercising its rulemaking authority under the Securities Act of 1933 and the Securities Exchange Act of 1934. In this regard, NEPA and the promotion of environmental protection which it explicitly mandates all agencies to effect are unique insofar as the Commission's disclosure requirements are concerned.

The Commission has broad discretion with regard to the promulgation of disclosure requirements under the federal securities laws, limited only by the requirement that it determine that such disclosures are necessary to discharge its statutory responsibilities or are necessary or appropriate in the public interest or for the protection of investors. In exercising this discretion, we have recognized that certain types of information are often of importance to investors generally and thus may appropriately be made the subject of specific disclosure requirements applicable to all registrants. On the other hand, certain types of information which are of importance only in certain instances have generally not been made the subject of specific disclosure requirements.

No showing has been made in this proceeding, particularly in light of the more than 100 areas of social information identified by persons responding to our request for comments, that disclosure of information describing corporate social practices should be specifically required of all registrants. This is not to say, however, that, in specific cases, some information of this type might not be required in order to make the statements in a filing not misleading or to make the filing otherwise complete with respect to information investors appropriately might need to make informed investment or voting decisions. The Commission's rules already require, in addition to specific disclosures, the disclosure of any other material information. Indeed, at a prior stage in its consideration of environmental and social disclosure, the Commission alerted registrants to this fact. Securities Act Release No. 5170 (July 19, 1971). And, in those particular instances in which disclosures are required thereunder, the law provides remedies for noncompliance. In appropriate cases, the Commission may commence an enforcement action, and investors who believe that they have been, or are being, injured by non-disclosure of specific information have judicial remedies available to them. As the Supreme Court has recognized, these remedies constitute a necessary supplement to the Commission's own enforcement activities.

Accordingly, in light of the apparent interest among some investors and the Commission's obligation to consider promotion of environmental protection among other factors in exercising its disclosure authority, we have today proposed for comment rules which would make available to interested investors information regarding the extent to which corporations have failed to satisfy environmental standards under federal law. We have also concluded that specific disclosure requirements regarding corporate equal employment and other practices are not appropriate at this time.

Below is a topical outline of the matters considered by the Commission in this release:

I. Background.
II. The Commission's Disclosure Authority and Responsibilities Under the Federal Securities Laws.
A. The Commission's disclosure authority.
B. The Commission's discretion to exercise its disclosure authority.
C. The scope of judicial review.
III. The National Environmental Policy Act.
A. Structure of the Act.
B. The effect of the Act on the Commission's disclosure authority.
C. Environmental disclosure alternatives.
IV. Investor Interest In, and Use of, Social Disclosure.
A. The extent of investor interest.
B. The nature of investor interest.
C. The use of social information by investors.
D. Avenues available to interested investors to affect corporate social practices.
V. Disclosure of Information Relevant to Equal Employment Opportunity and Other Matters of Social Concern.
VI. Rulemaking Proposals.
A. General purpose.
B. Synopsis of proposals.
C. Operation of proposals.

I. BACKGROUND

This proceeding, the most recent aspect of the Commission's consideration of environmental and social disclosure, was conducted pursuant to an order of the District Court for the District of Columbia in "Natural Resources Defense Council, Inc. v. Securities and Exchange Commission," 389 F. Supp. 689 (D.D.C., 1974). Plaintiffs in that case had sought review of the promulgation by the Commission of the environmental disclosure rules announced in Securities Act Release No. 5386 (April 20, 1973) and the related denial of plaintiffs' petition[1] for rules requiring registrants to file with the Commission information concerning both the environmental consequences of their activities, and statistics and legal proceedings regarding their equal employment practices.

The court held that the Commission had failed to satisfy the procedural requirements of the Administrative Procedure Act (APA), 5 U.S.C. 551, *et seq.*, in its informal rulemaking proceeding in three respects:

(1) By failing to state in Securities Act Release No. 5235 (February 16, 1972), announcing the Commission's proposed environmental disclosure rules, that those rules were intended fully to discharge the Commission's obligations under NEPA;

(2) By failing to state in Release No. 5386 (which adopted, with certain modifications, the disclosure rules proposed for comment in Release No. 5235), in sufficient detail to permit judicial review,

(a) The Commission's view of its obligation under the federal securities acts and NEPA,

(b) The alternatives which it considered in its rulemaking action, and

(c) Its reasons for rejecting substantial alternatives; and

(3) By failing to state the reasons for its denial of the equal employment portion of plaintiffs' petition.

The court ordered the Commission to undertake "rulemaking action to bring the Commission's corporate disclosure regulations into full compliance with the letter and spirit of NEPA,"[2] and to reconsider the Commission's denial of the equal employment portion of the petition.[3] The court also suggested that the Commission resolve what it characterized as two "overriding factual issues": (1) The extent of interest among "ethical investors" in the disclosure by corporations of the environmental impact of corporate activities and of their equal employment opportunity practices and (2) the avenues open to such investors to eliminate corporate practices inimical to the environment and equal employment opportunity.[4]

Although the Commission disagreed with the ruling of the district court, on February 11, 1975, in Securities Act Release No. 5569,[5] the Commission announced the present phase of this public proceeding pursuant to the court's order. In accord with the Commission's normal practice, the release was published in the "SEC Docket"[6] and distributed to persons on the Commission's mailing list for releases issued under the Securities Act and the Securities Exchange Act. Such distribution includes all registrants under the Securities Act and all reporting companies under the Securities Exchange Act. In addition, to insure the fullest possible notice to interested persons, the Commission provided 500 copies of the release to the Natural Resources Defense Council for distribution. The Commission itself mailed copies of the release, together with letters inviting comment, to various interested governmental agencies,[7] to persons who had responded to two earlier releases requesting comment on certain matters of social significance,[8] and to persons who commented on the environmental disclosure rules proposed in Securities Act Release No. 5235, *supra*. The Commission also announced in Securities Act Release No. 5577 (April 4, 1975),[9] that it would make available a reasonable number of copies of Release No. 5569, upon request, to any other group or organization whose membership might be interested in commenting thereon.

Public hearings commenced on April 14, 1975, and continued on 19 days through May 14. Fifty-four oral presentations and 353 written comments were received. Because many of the written comments arrived after the May 14 deadline specified in Release No. 5569, the staff informally held the proceeding open and accepted comments through the end of May. A number of comments received thereafter have been placed in the public file. The entire file, which includes documents in excess of 10,000 pages, is divided into letters of comment, transcripts of testimony received at the hearing, and exhibits presented in the course of testimony. These documents are, and have been, available for public inspection at

[1] S.E.C. File No. 4-179.

[2] 389 F. Supp. at 693. In its unreported order accompanying the opinion, the court provided that the rules promulgated in Release No. 5386 would "remain in effect pending further rulemaking action by the SEC."

[3] The Court's original order, dated December 9, 1974, directed the Commission to "take further rulemaking action" within 120 days. That order has been modified so that the Commission is now required, on or before October 14, 1975, to determine and publicly announce its conclusions respecting the proceeding announced in Securities Act Release No. 5569 (February 11, 1975), and the disclosure rules proposed as a result of that proceeding.

the Commission's Public Reference Section, 1100 L Street, NW., Washington, D.C.[10]

II. THE COMMISSION'S DISCLOSURE AUTHORITY AND RESPONSIBILITIES UNDER THE FEDERAL SECURITIES LAWS

A. The Commission's disclosure authority. The provisions of the Securities Act of 1933 [11] and the Securities Exchange Act of 1934 [12] are the starting point for any analysis of the Commission's authority or obligation to require specific disclosures. Those Acts confer upon the Commission broad discretion to determine what matters, in addition to those specifically enumerated in the Acts, are appropriate for disclosure. That broad discretion is limited, as set forth immediately below, by the requirement that the Commission determine disclosure of such matters is either necessary to discharge the Commission's obligations under the Acts or is necessary or appropriate in the public interest or for the protection of investors. In addition, Congress desired that disclosure be fair as well as full.

The Commission's general rulemaking authority is contained in Section 19(a) of the Securities Act and Section 23(a) of the Securities Exchange Act, which authorize the Commission to promulgate such rules "as may be necessary to carry out the provisions of this title," and "as may be necessary or appropriate to implement the provisions of this title for which [it is] responsible or for the execution of the functions vested in [it] by this title . . .," respectively. Certain sections of those Acts also confer specific and independent grants of rulemaking authority.

Thus, Sections 7 and 10(c) of the Securities Act prescribe certain types of information to be disclosed in registration statements and prospectuses, respectively, and authorize the Commission to require disclosure therein of such other information "as [is] necessary or appropriate in the public interest or for the protection of investors." Similarly, under Section 12(b) of the Securities Exchange Act, the Commission may require, in applications for the registration of securities, such information respecting the issuer's organization, financial structure, nature of business and financial statements as it deems "necessary or appropriate in the public interest or for the protection of investors." Section 13(a) under that Act requires each issuer of a security registered under Section 12 to keep current the information in its application or registration statement and to file annual and quarterly reports in accordance with rules prescribed by the Commission "as necessary or appropriate for the proper protection of investors and to insure fair dealing in the security." Pursuant to Section 15(d) of the Securities Exchange Act, such reports are also required of certain companies which have filed registration statements under the Securities Act. Section 14(a) of the Securities Exchange Act prohibits the solicitation of proxies in contravention of such rules as the Commission prescribes "as necessary or appropriate in the public interest or for the protection of investors."

The requirement that disclosure be fair as well as full arises from the preamble to the Securities Act of 1933 which sets forth the purpose of that Act:

[t]o provide full and fair disclosure of the character of securities sold in interstate and foreign commerce. . . .

Of the various purposes of the Securities Exchange Act, as set forth in its preamble and in Section 2 of the Act, the Congressional aim "to require appropriate reports" is of direct concern here.[13] The Senate Report on proposed legislation ultimately embodied in the Securities Exchange Act points out that information required under the Securities Act relates only to the time of issuance, whereas

[r]eports under this bill will provide adequate information reasonably up to date as long as the security is traded in on an exchange.[14]

An additional objective of the Act, not referred to in the preamble or in Section 2, but underlying Section 14(a), is the promotion of fair opportunity for corporate suffrage.

The Acts and the relevant legislative history also suggest that a prime expectation of the Congress was that the Commission's disclosure authority would be ued to require the dissemination of information which is or may be economically significant. The Securities Act of 1933 was enacted in response to the flotation during the post-World War I decade of $25 billion of securities which proved worthless.[15] The significance of the enumerated disclosure items in Schedule A to that Act is essentially economic in nature. As the House Report which preceded the Securities Act states:

The type of information required to be disclosed is of a character comparable to that demanded by competent bankers from their borrowers, and has been worked out in the light of these and other requirements.[16]

Similarly, the items prescribed in Section 12(b) of the Securities Exchange Act for inclusion in registration statements filed thereunder are essentially of economic significance,[17] as are the specific references in Section 13(b) to the form of, and the methodology underlying, annual and quarterly reports. As the Senate Report explained:

The bill provides that . . . a condition of such registration shall be the furnishing of complete information relative to the *financial condition* of the issuer, which information shall be kept up to date by adequate periodic reports.[18]

That economic were the primary concern of the Congress in prescribing the Commission's disclosure authority appears also to be the view of the Supreme Court, given its recent emphasis on the economic nature of securities transactions in "United Housing Foundation, Inc. v. Forman," ---- U.S. ----, 95 S. Ct. 2051 (June 16, 1975). The Court rejected the contention that instruments designated as "stock" were necessarily "securities" under the federal securities laws, stating:

Because securities transactions are economic in character Congress intended the application of these statutes to turn on the *economic realities* underlying a transaction. . . .

95 S. Ct. 2059 (emphasis added). And, in considering whether the interests in question constituted an "investment contract" or an "instrument commonly known as a security," the Court stated:

There is no doubt that purchasers in this housing cooperative sought to obtain a decent home at an attractive price. But that type of economic interest characterizes every form of commercial dealing. What distinguishes a security transaction—and what is absent here—is an investment where one parts with his money in the hope of receiving profits from the efforts of others, and not where he purchases a commodity for personal consumption or living quarters for personal use.

Id. at 2063 (footnote omitted).[19]

It is also evident, however, that insofar as the Commission's rulemaking authority under Section 14(a) of the Securities Exchange Act is concerned, the primacy of economic matters, particularly with respect to shareholder proposals, is somewhat less. Section 14(a) provides that proxies may be solicited only in conformity with "such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors." The Congressional purpose in enacting Section 14 has been characterized as "to require fair opportunity for the operation of corporate suffrage." [20]

The Senate Report on Section 14(a) indicates that Congress was concerned that shareholders be informed of the nature of the matters which would be presented at shareholder meetings and on which those soliciting proxies would cast their votes.[21] The House Report, on the other hand, appears to place somewhat greater emphasis on the prevention of injury to stockholder financial interests which could result from unregulated management proxy solicitation.[22]

B. The Commission's discretion to exercise its disclosure authority. As stated above, Congress has conferred on the Commission broad discretion to determine what disclosures, in addition to those specifically enumerated in the Securities Act and the Securities Exchange Act, should be required of all registrants. In administering the various federal securities laws,[23] the Commission was expected to become entirely familiar with the securities markets and to develop an expertise which would enable it to resolve questions such as what disclosure of information regarding securities and issuers is necessary to discharge its responsibilities under the Securities Act and the Securities Exchange Act or is "necessary or appropriate in the public interest or for the protection of investors." [24] The Commission's broad discretion to require disclosure provides necessary latitude to expand or contract disclosure rules in light of changes in the relevant context in which securities issuers conduct their businesses. Statutes, business relationships, supply conditions and a host of other factors which could not be foreseen in 1933 and 1934 may today have a significant impact on the financial condition of companies and the priorities of investors.

If the Commission had not been vested with broad discretion to review continuously and determine the appropriate content of its disclosure requirements, either periodic review and adjustment thereof by Congress would have been necessary or disclosure would have been frozen in the mold dictated by conditions perceived in 1933 and 1934. In the alternative, perhaps, Congress might have prescribed a mechanism to periodically determine the actual interests of investors. But, as discussed *infra*, Section IV(A), there appears to be no feasible, precise method to accomplish such an undertaking, short of an in-depth statistical survey.[25] Furthermore, such a survey, while superficially attractive, would at best produce results that might rapidly become outdated in light of the shifting and fluctuating nature of public opinion and the focus of popular attention from time to time.[26] Finally, some consideration would have to be given to whether interests of which investors are largely unaware might become recognized if disclosure of relevant information were to be required. It is thus apparent that the first of these alternatives would have resulted in the remedial disclosure provisions of the federal securities laws rapidly becoming outmoded, while the second would not have been workable and would have been totally unstable.

Whether particular disclosure requirements are necessary to permit the Commission to discharge its obligations under the Securities Act and the Securities Exchange Act or are necessary or appropriate in the public interest or for the protection of investors involves a balancing of competing factors. As a practical matter, it is impossible to provide every item of information that might be of interest to some investor in making investment and voting decisions. As discussed *infra*, Section V, participants in the proceeding suggested more than 100 topics concerning which they desired disclosure. A disclosure document which incorporated each of these suggestions would consist of excessive and possibly confusing detail, whether provided directly to investors or filed with the Commission for inspection by interested per-

---

[10] The public file in this phase of the proceeding consists of the following subfiles:

S7-551-1: Written comments received in response to Release No. 5569 and certain background information as described in that Release.

S7-551-1A: Witnesses' prepared statements and exhibits submitted at the public hearing.

S7-551-1C: Correspondence in connection with the proceeding other than written comments.

S7-551-1H: Transcripts of the public hearings.

Other Commission public files which contain materials relevant to the issues in this proceeding include:

S7-429: Written comment received in response to Release No. 5235, *supra*, concerning proposed environmental disclosure rules.

4-150: Written comment received in response to Release No. 9822, *supra* note 8, concerning corporate political funds.

4-160: Written comment received in response to Release No. 9908, *supra* note 8, concerning employment practices in the securities industry.

4-179: Natural Resources Defense Council rulemaking petition and materials related to the denial thereof.

[11] 15 U.S.C. 77a *et seq.* The Act appears in the United States Code as 15 U.S.C. Section 77, the sections of the Act being identified by the letters a-bb rather than by the corresponding Arabic numbers.

[12] 15 U.S.C. 78a *et seq.* The Act appears in the United States Code as 15 U.S.C. Section 78, the sections of the Act being identified by the letters a-jj rather than by the corresponding Arabic numbers. Recent amendments to the Securities Exchange Act, adopted this year in Pub. L. 94-29, have not as yet been included in this codification.

[13] The preamble to the Securities Exchange Act makes clear that the major purposes of that Act were [t]o provide for the regulation of securities exchanges and of over-the-counter markets . . . to prevent inequitable and unfair practices on such exchanges and markets, and for other purposes.

Section 2 of that Act states: For the reasons hereinafter enumerated, transactions in securities as commonly conducted upon securities exchanges and over-the-counter markets are affected with a national public interest which makes it necessary . . . to require appropriate reports. . . .

[14] S. Rep. No. 792, 73d Cong., 2d Sess. at 10 (1934). In 1964, the Securities Exchange Act was amended to extend the reporting requirements to certain issuers, the securities of which were not traded on an exchange. Public Law No. 88-467 (Aug. 20, 1964), 78 Stat. 565. See 15 U.S.C. 781(g), 78m(a), 78n.

Such disclosure is, of course, related to the other statutory objectives of controlling speculation and insider trading and of eliminating manipulation. As the House Report made clear:

There cannot be honest markets without honest publicity. Manipulation and dishonest practices of the market place thrive upon mystery and secrecy.

H.R. Rep. No. 1383, 73d Cong., 2d Sess. at 11 (1934).

[15] H.R. Rep. No. 85, 73d Cong., 1st Sess. (1933) at 2.

[16] *Id.* at 4.

[17] The Commission's rulemaking authority under Section 12(b) is limited to information "in respect of" certain enumerated items.

[18] S. Rep. No. 792, *supra* note 14, at 10 (emphasis added).

[19] In "National Association for the Advancement of Colored People v. Federal Power Commission," ---- F. 2d ----, No. 72-1959 (C.A.D.C., February 5, 1975), the Court of Appeals for the District of Columbia observed that in 1971 this Commission had issued a release which called attention to its then-existing disclosure requirements regarding the pendency of civil rights proceedings which could affect a registrant's business activities, and stated:

In thus acting, however, the SEC appears to us merely to have been fulfilling its proper role of seeing that investors are fully informed of circumstances which might bear on the financial prospects of securities-issuing corporations.

Slip Op. at 23-24.

On the other hand, in the action out of which this proceeding arose, Judge Richey stated:

There are many so-called 'ethical investors' in this country who want to invest their assets in firms which are concerned about and acting on environmental problems of the nation. This attitude may be based purely upon a concern for the environment; but it may also proceed from the recognition that awareness of and sensitivity to environmental problems is the mark of intelligent management. Whatever their motive, this Court is not prepared to say that they are not rational investors and that the information they seek is not material information within the meaning of the securities laws.

389 F. Supp. at 700 (*dictum*).

[20] "Securities and Exchange Commission v. Transamerica Corp.," 163 F. 2d 511, 518 (C.A. 3, 1947) *cert. denied*, 332 U.S. 847 (1947). See also, "J. I. Case Co. v. Borak," 377 U.S. 426, 431-32 (1964).

[21] S. Rep. 792, *supra* note 14, at 12:

In order that the stockholder may have adequate knowledge as to the manner in which his interests are being served, it is essential that he be enlightened not only as to the financial condition of the corporation, but also as to the major questions of policy, which are decided at stockholders' meetings.

[22] H.R. Rep. 1383, *supra* note 14, at 13-14:

Fair corporate suffrage is an important right that should attach to every equity security bought on a public exchange. . . . Insiders have at times solicited proxies without fairly informing the stockholders of the purposes for which the proxies are to be used and have used such proxies to take from the stockholders for their own selfish advantage valuable property rights.

[23] The Commission's organic statutes include: Securities Act of 1933, 15 U.S.C. 77a *et seq.* Securities Exchange Act of 1934, 15 U.S.C. 78a *et seq.* Public Utility Holding Company Act of 1935, 15 U.S.C. 79 *et seq.* Trust Indenture Act of 1939, 15 U.S.C. 77aaa *et seq.* Investment Company Act of 1940, 15 U.S.C. 80a-1 *et seq.* Investment Advisers Act of 1940, 15 U.S.C. 80b-1 *et seq.*

[24] The courts have repeatedly recognized broad discretion in the Commission to make determinations whether to take action and the form any action should take, dependent on its expertise in securities matters. See, *e.g.*, "Securities and Exchange Commission v. Chenery Corp.," 332 U.S. 194, 209 (1974):

The Commission's conclusion [regarding a reorganization plan under the Public Utility Holding Company Act] here rests squarely in that area where administrative judgments are entitled to the greatest amount of weight by appellate courts. It is the product of administrative experience, appreciation of the complexities of the problem, realization of the statutory policies, and responsible treatment of the uncontested facts. It is the type of judgment which administrative agencies are best equipped to make and which justifies the use of the administrative process. . . . Whether we agree or disagree with the result reached, it is an allowable judgment which we cannot disturb.

[25] There are approximately 30 million United States investors holding approximately $660 billion in common and preferred stock, exclusive of investment company shares. See notes 48 and 50, *supra*.

[26] If the Commission were required to promulgate rules by plebiscite at the behest of any member of the public, its functions would be purely ministerial, a result clearly not intended by Congress in 1934 or in 1975 when it last reviewed the workings of the Commission and the securities laws.

V 40 215 NOV 6 75 XUM

sons. Thus, certain types of disclosure might be so voluminous as to render disclosure documents as a whole significantly less readable and, thus, less useful to investors generally.[27] In addition, disclosure to serve the needs or desires of limited segments of the investing public, even if otherwise desirable, may be inappropriate, since the cost to registrants, which must ultimately be borne by their shareholders, would be likely to outweigh the resulting benefits to most investors.

The weighing of these factors, among others, is the mechanism by which disclosure is rendered fair as well as full. In administering the disclosure process under the Securities Act and the Securities Exchange Act, the Commission has generally resolved these various competing considerations by requiring disclosure only of such information as the Commission believes is important to the reasonable investor—"material information." 17 CFR 230.405(*l*), 230.408, 240.12b–20, and 240.14a–9(a). This limitation is believed necessary in order to insure meaningful and useful disclosure documents of benefit to most investors without unreasonable costs to registrants and their shareholders.

In arriving at our decision, we are also influenced by our view that the discretion vested in the Commission under the Securities Act and the Securities Exchange Act to require disclosure which is necessary or appropriate "in the public interest" does not generally permit the Commission to require disclosure for the sole purpose of promoting social goals unrelated to those underlying these Acts. Recently, the Court of Appeals for the District of Columbia reaffirmed this principle in a case involving the obligations of the Federal Power Commission with respect to employment discrimination.[28]

The Court stated:

> . . . Congress has not charged the [Federal Power] Commission with advancing *all* public interests, but only the public's interest in having the particular mandates of the Commission carried out, its interest, in other words, in the conservation of natural resources and the enjoyment of cheap and plentiful electricity and natural gas.

Slip Op. at 19 (emphasis in original). Significantly, the Court recognized that many of its previous decisions, as well as those of the Supreme Court, have required agencies to consider the antitrust implications of their actions, but it stated:

> These do not, however, establish that the content of the 'public interest' criterion is generally supplied by other national policies and laws. *Some* such policies and laws are surely relevant, but not simply because they exist. They are relevant because their objectives 'can be related to the objectives of the statute administered by the agency.'
>
> Slip Op. at 19 (emphasis in original.)[29]
>
> [w]ords like 'public interest' and the interest of 'investors or consumers,' though of wide generality, take their meaning and definition from the substantive purposes of the Act.

"Alabama Electric Cooperative, Inc. v. Securities and Exchange Commission," 353 F. 2d 905, 907 (C.A.D.C., 1965). See "City of Lafayette v. Securities and Exchange Commission," 454 F. 2d 941 (C.A.D.C., 1971). See also, "American Sumatra Tobacco Corp. v. Securities and Exchange Commission," 110 F. 2d 117, 121 (C.A.D.C., 1940) (Securities Exchange Act).

Thus, although the Commission's discretion to require disclosure is broad, its exercise of authority is limited to contexts related to the objectives of the federal securities laws. Specifically, insofar as is relevant here, the Commission may require disclosure by registrants under the Securities Act and the Securities Exchange Act if it believes that the information would be necessary or appropriate for the protection of investors or the furtherance of fair, orderly and informed securities markets or for fair opportunity for corporate suffrage. Although disclosure requirements may have some indirect effect on corporate conduct, the Commission may not require disclosure solely for this purpose.

C. The scope of judicial review. As discussed above, the scope of the Commission's discretion to determine what disclosure is appropriate to fulfill its responsibilities under the federal securities laws is extremely broad. Correspondingly, the scope of judicial review of a Commission decision regarding whether to require disclosure of a particular type of information must be limited.[30] If this were not the case, the court, rather than the Commission, would generally be responsible for making the difficult judgments regarding what information is necesary for the Commission to discharge its responsibilities under the Securities Act and the Securities Exchange Act or is necessary or appropriate in the public interest or for the protection of investors. Courts, however, are ill-equipped to make such determinations because the problems presented cannot "be resolved by 'judicial application of canons of statutory construction.'" "Hahn v. Gottlieb," 430 F. 2d 1243, 1249 (C.A. 1, 1970). This is an area "where laws are so broadly drawn that agencies have large discretion,"[31] and "there is no law [for courts] to apply."[32] In short, the proper content of disclosure requirements, or whether that content should be effected by rulemaking or *ad hoc* adjudicatory actions, are judgments "based upon public policy, . . . judgment[s] which Congress has indicated [are] type for the Commisison to make." "Securities and Exchange Commission v. Chenery Corp.," 332 U.S. 194, 209 (1947).

Finally, the substitution of judicial for Commission discretion in disclosure rulemaking would distort the Commission's overall administration of the disclosure process by permitting persons so inclined to utilize judicial review under the Administrative Procedure Act to vindicate their own value preferences, a prospect rejected by the Supreme Court in analogous, but somewhat different, contexts involving environmental consequences of agency decisionmaking in "Sierra Club v. Morton," 405 U.S. 727, 740 (1972) and "Citizens to Preserve Overton Park, Inc. v. Volpe," 401 U.S. 402, 416 (1971).

III. The National Environmental Policy Act

A. Structure of the Act. NEPA is unique in that Congress, in this single enactment, supplemented the mandate of all federal agencies to include consideration of environmental values within agency responsibility. In determining what action to take as a result of the proceeding announced in Release No. 5569, the Commission must determine what effect NEPA has on the principles discussed above which govern its disclosure authority. The pertinent provisions of NEPA are contained in Sections 101 through 105 of that Act, 42 U.S.C. 4331 through 4335.

Section 101(a) sets forth the "continuing policy" of the federal government "to use all practicable means and measures" to protect environmental values. Section 101(b) states that the substantive "responsibility" of the federal government is "to use all practicable means, consistent with other essential considerations of national policy, to improve and coordinate Federal plans, functions, programs and resources to the end that the Nation may" achieve certain environmental goals.

Section 102 specifies methods to be followed. Section 102(1) authorizes and directs that "to the fullest extent possible . . . the policies, regulations and public laws of the United States shall be interpreted and administered in accordance with the policies set forth in [the Act]." Section 102(2) directs that "all agencies of the Federal Government" shall, "to the fullest extent possible," follow certain procedures in conducting their activities. For example, Section 102(2)(C) requires the preparation of

[27] For example, certain persons submitted for staff examination environmental impact statements prepared in connection with corporate projects in which there was federal involvement. These documents appeared to contain a wealth of environmentally significant information, and typically consisted of several volumes containing many thousands of pages. If comparable material were to be added to registration statements, it would dwarf the disclosure which the Commission presently requires.

[28] "National Association for the Advancement of Colored People v. Federal Power Commission," —— F. 2d —— (C.A.D.C., No. 72–1959, February 5, 1975).

[29] In this vein, in cases arising under the Public Utility Holding Company Act of 1935, the courts repeatedly have held that

[30] To the extent that a Commission decision on a disclosure issue is reviewable at all, review is limited to whether the decision was procedurally in conformity with the Administrative Procedure Act and whether the decision was arbitrary, capricious, or otherwise abusive of the Commission's broad discretion in this area. 5 U.S.C. 706.

[31] "Administrative Procedure Act: Legislative History," S. Doc. No. 248, 79th Cong., 2d Sess., at 275 (Report of the House Committee on the Judiciary) (1946).

[32] *Id.* at 212 (Senate Judiciary Committee Report).

environmental impact statements in connection with "major Federal actions significantly affecting the quality of the human environment."

The courts have described the difference between the mandates of Section 101 and 102 in terms of the degree of discretion permitted. Since Section 102 requires that its provisions should be carried out "to the fullest extent possible," strict adherence thereto is required. More flexibility is considered implicit, however, in the mandate of Section 101 "to use all practicable means."[33]

To date, the case law under NEPA has primarily involved the need for, the procedures regarding, and the adequacy of, environmental impact statements required by Section 102(2)(C) in connection with "major Federal actions significantly affecting the quality of the human environment." Thus, NEPA's import remains unclear where, as here, there is no major federal action significantly affecting the environment, and any environmental impact would only be indirect.[34] As was aptly put in "City of New York v. United States," 337 F. Supp. 150, 159 (E.D.N.Y., 1972), NEPA is

> a relatively new statute so broad, yet opaque, that it will take even longer than usual fully to comprehend its import.

B. The effect of the Act on the Commission's disclosure authority. NEPA's effect on the Commission's authority to require disclosure appears to turn on the meaning of Section 102(1), which requires the Commission "to the fullest extent possible" to interpret and administer the federal securities laws "in accordance with the policies set forth in [NEPA]."

One possible view is that the phrase "public interest," as it appears in certain of the statutory provisions which establish the Commission's authority to require disclosure by registrants, must be interpreted broadly with respect to environmental matters, notwithstanding its established meaning, discussed *supra*, Section II(B). The argument continues that, since the "policies" of NEPA are in effect the protection of the environment, the Commission is authorized to require comprehensive disclosure by registrants of the environmental effects of their business activities in order to promote the protection of the environment, regardless of whether such disclosure is necessary to permit the Commission to discharge its responsibilities under the Securities Act and the Securities Exchange Act or is necessary or appropriate for the protection of investors. Further, since Section 102(1) encompasses the "administration" of federal laws, as well as their interpretation, the Commission is required to exercise such authority "to the fullest extent possible," as well.

We believe that a more reasonable interpretation is that Section 102(1) was intended to permit and require agencies such as this Commission to consider environmental values in the performance of the functions authorized under their organic statutes.[35] First, in "Calvert Cliffs' Coordinating Committee v. Atomic Energy Commission," *supra*, the court explained:

> Section 101 sets forth the Act's basic substantive policy: that the federal government 'use all practicable means and measures' to protect environmental values. Congress did not establish environmental protection as an exclusive goal; rather, it desired a reordering of priorities, so that environmental costs and benefits will assume their proper place along with other considerations.
>
> . . . . . .
>
> Thus the general substantive policy of the Act is a flexible one. It leaves room for a responsible exercise of discretion and may not require particular substantive results in particular problematic instances.
>
> . . . . . .
>
> Perhaps the greatest importance of NEPA is to require the Atomic Energy Commission and other agencies to *consider* environmental issues just as they consider other matters within their mandates. This compulsion is most plainly stated in Section 102.

449 F. 2d at 1112 (emphasis in original).

Second, it seems extremely unlikely that Congress could have intended, without specific consideration of the consequences, indiscriminately to propel federal agencies into substantive environmental programs which might have only the most superficial connection with their activities under their organic statutes. The Conference Report on NEPA explains that

> the language in section 102 is intended to assure that all agencies of the Federal Government shall comply with the directives set out in said section 'to the fullest extent possible' *under their statutory authorizations* and that no agency shall utilize an *excessively* narrow construction of its existing statutory authorizations to avoid compliance.[36]

And, during House debates on NEPA, Representative Aspinal described the intended effect of Section 102:

> Section 102 tells the agencies to follow to the fullest extent possible *under their existing authority* the procedures required to make their operations consistent with the environmental policy established in this Act.[37]

Thus, in "Gage v. Atomic Energy Commission," 479 F. 2d 1214, 1220 n. 19 (C.A.D.C., 1973), the court stated:

> NEPA does not mandate action which goes beyond the agency's organic jurisdiction.[38]

See "Kitchen v. Federal Communications Commission," 464 F. 2d 801, 802 (C.A.D.C., 1972).[39] See also the pronouncement of Section 105 that

> [t]he policies and goals set forth in [the Act] are supplementary to those set forth in existing authorizations of Federal agencies.

The Conference Report on NEPA explains:

> The effect of this section, which is a slightly revised version of section 103 of the Senate bill, is to give recognition to the fact that the bill does not repeal existing law. This section does not, however, obviate the requirement that the Federal agencies conduct their activities in accordance with the provisions of this bill unless to do so would clearly violate their *existing* statutory authorizations.[40]

Third, the broadest interpretation of Section 102(1) would result in disclosures which are the equivalent of comprehensive environmental impact statements by most large corporations, despite the Congressional intent reflected in Section 102(2)(C) that the preparation of such statements be required only of federal agencies, and then only those contemplating major federal action.

This raises a question having broader implications. NEPA is addressed primarily, if not wholly, to activities of the federal government which have an im-

[33] "Calvert Cliffs' Coordinating Committee v. Atomic Energy Commission," 449 F. 2d 1109, 1112 (C.A.D.C., 1971).

[34] Some clarification will undoubtedly result when "Gifford-Hill & Co., Inc. v. Federal Trade Commission," 389 F. Supp. 167 (D.D.C., 1974), is resolved on appeal (C.A.D.C., No. 74–2024) or if the Supreme Court grants certiorari in "Scenic Rivers Association of Oklahoma v. Lynn," —— F. 2d ——, Nos. 74–1520 and 74–1750 (C.A. 10, July 30, 1975) and considers the merits of that case.

[35] We reject the proposition, advanced in this proceeding, that Section 102(2)(F) of NEPA, which directs agencies to make information publicly available which is "useful in restoring, maintaining, and enhancing the quality of the environment," requires or permits the Commission to collect such information from issuers of securities for the sole purpose of making it available to the public and other agencies. The legislative history of NEPA makes it clear that the provisions of that Section relate to information developed in the course of agency activities undertaken within organic authority. It does not, in the Commission's view, authorize the collection of corporate information unrelated to investor protection solely for the purpose of dissemination. See *e.g.*, 115 Cong. Rec. 40420 (December 20, 1969).

[36] H.R. Rep. No. 91–765, 91st Cong., 1st Sess. at 10 (1969) (emphasis added). The analysis of conference committee changes to S. 1075 (the bill which ultimately became NEPA) was inserted in the Congressional Record during Senate debate. It states that section 102 was designed to assure *consideration* of environmental matters by all agencies in their planning and decision making—especially those agencies who now have little or no legislative authority to take environmental considerations into account.

115 Cong. Rec. 40418 (December 20, 1969) (emphasis added).

[37] 115 Cong. Rec. 40926 (December 22, 1969) (emphasis added).

[38] In "Gage," the question involved was whether the Atomic Energy Commission has authority to preclude acquisition of land by regulatees in contemplation of power plant construction but prior to obtaining a construction permit from that agency.

[39] It is suggested in "Calvert Cliffs' coordinating Committee v. Atomic Energy Commission," 464 F. 2d 1109, 1112 (C.A.D.C., 1971), that a major impetus for the language of Section 102(1) was the holding in "State of New Hampshire v. Atomic Energy Commission," 406 F. 2d 170 (C.A. 1, 1969), that consideration by the Atomic Energy Commission of the nonradiological impact of power plants which it might license was outside the scope of its authority to consider public "health and safety." Significantly, only consideration of environmental values within the scope of that Commission's traditional licensing function was involved there.

[40] H.R. Rep. No. 91–765, *supra note* 36, at 10 (emphasis added).

V 40 215 NOV 6 75 XUM

pact on the environment—as is recognized in the case law.[42] Other statutes, federal and state, seek to control the environmental impact of purely private activities. It is, of course, true that federal and private activities may interact to such a degree as to bring the private activities within the scope of NEPA, as where a federal agency licenses a private corporation to engage in an activity which directly affects the environment. But something more is sought here. The Commission, of course, does nothing which directly affects the environment, nor does it license or authorize anyone else to do so. It is, however, contended that the Commission's disclosure scheme, which applies to almost all private corporations in which there are a significant number of investors, must be utilized as a weapon to influence, if not control, most of the activities in the private sector which have an impact on the environment. Nowhere in NEPA is there any suggestion of an intention to create such a wide ranging environmental control over the private sector. Such a major purpose would hardly have gone wholly unmentioned. This does not mean that NEPA has no effect on the Commission's responsibilities, but it does mean that the purpose of the disclosure scheme administered by the Commission has not been basically changed by NEPA.

Accordingly, we believe that NEPA authorizes and requires the Commission to consider the promotion of environmental protection "along with other considerations"[43] in determining whether to require affirmative disclosures by registrants under the Securities Act and the Securities Exchange Act, and, although NEPA does not require any specific disclosures, as such, we have been required to explain the alternatives which we considered in meeting our obligations under NEPA and the reasons why we have rejected substantial alternatives, in sufficient detail to permit judicial review.[44]

C. Environmental disclosure alternatives. We have concluded, as discussed *infra* Section IV, that there is a degree of interest among some investors in corporate environmental practices. The basis for this interest is claimed to be primarily economic in nature: it is argued that non-compliance with environmental laws may result in extensive costs or liabilities; that the ability to avoid environmental problems provides a good measure of management's overall quality; and that corporate environmental responsibility will, in the long run, determine the public relations and regulatory framework in which a company operates. It also is claimed that such investors would use relevant environmental information primarily in voting rather than in investment decisions.

The major alternatives proposed in the proceeding by which the Commission could protect the interests of these investors are to require: (1) comprehensive disclosure of the environmental effects of corporate activities, (2) disclosure of corporate noncompliance with applicable environmental standards, (3) disclosure of all pending environmental litigation, (4) disclosure of general corporate environmental policy, and (5) disclosure of all capital expenditures and expenses for environmental purposes.

We reject the first of these, proposed by the Natural Resources Defense Council, for a number of reasons. First, the interest among investors that may exist appears to be primarily in whether corporations are acting in an environmentally unacceptable manner, rather than in whether, and to what extent, corporations have gone beyond what is expected of them in this area. Second, unless existing environmental standards may be used as a reference point, both the costs to registrants and the administrative burdens involved in the proposed disclosure would be excessive. There appears to be no established, uniform method by which the environmental effects of corporate practices may be comprehensively described. Nor does there appear to be scientific agreement as to the harmfulness to the environment of many activities. It appears, therefore, that the proposed disclosures would be extremely voluminous, subjective and costly to all concerned. They also would not lend themselves to comparisons of different companies, which is of great importance to investors since investment decisions essentially involve a choice between competing investment alternatives.

Moreover, there appears to be virtually no direct investor interest in voluminous information of this type. Proponents, apparently conceding this, suggest that the disclosures be contained in documents which are filed with the Commission but which are not furnished directly to investors. They claim that analysts will study the materials and report their conclusions to investors in some meaningful, understandable form. This would merely substitute the opinions of such analysts, however, for the standards established by and pursuant to federal environmental legislation. And although diversity of viewpoint may be generally desirable, we have concluded that the additional costs and burdens necessary to achieve such diversity in this area greatly outweigh resulting benefits to investors and to the environment, discused *infra*, Section IV(D).[45]

The second alternative, however, seems to hold more promise. Pursuant to federal environmental statutes, most corporations are presently required to monitor and file quantitive reports, which are publicly available, regarding many aspects of their activities which affect the environment. In addition, the types of activities subject to such requirements continue to expand.[46]

Certain types of non-compliance with applicable environmental requirements may be material within the meaning of the Commission's existing rules. 17 CFR 230.405(*1*), 230.408, 240.12b–20, and 240.14a–9(a). Disclosure of such information is already required.[46] But while the disclosure of non-material information is generally not required for reasons discussed *supra*, Section II(B), adding the promotion of environmental protection to the other factors considered by the Commission in the administration of the disclosure process causes a different balance to be struck here.

Accordingly, we have today proposed for comment amendments to certain registration forms under the Securities Act and certain registration and reporting forms and rules 14a–3 and 14c–3 under the Securities Exchange Act which would, where applicable, require a registrant to provide as an exhibit to certain documents filed with the Commission a list of the registrant's most recently filed environmental compliance reports which indicate that the registrant has failed to satisfy, at any time within the previous twelve months, environmental standards established pursuant to a federal statute. In addition, the proposed amendments would, except for purposes of Forms 10 and 12 under the Exchange Act, require the registrant to undertake promptly to provide to investors copies of the reports listed, upon written request and the payment of a specified reasonable fee. Under the proposed amendments, investors who are interested in such information should be able to obtain it in connection with making investment or voting decisions.

The third alternative, disclosure of all pending environmental litigation, has been rejected. The existing environmental disclosure requirements, adopted in Securities Act Release No. 5386, (April 20, 1973), call for disclosure with respect to certain administrative and judicial proceedings arising under federal, state, or local provisions regulating the discharge of materials into the environment or otherwise relating to the protection of the environment. All environmental proceedings initiated by a government authority are treated as being material and are already required to be disclosed. Those proceedings which are similar in nature, however, may be grouped and described generically. Nongovernmental civil actions primarily for damages must be disclosed only if the amounts involved, individually or in the aggregate, exclusive or interest and costs, exceed 10% of the current assets of the registrant and its subsidiaries on a consolidated basis.

In Securities Act Release No. 5386 (April 20, 1973) these requirements, which go beyond those applicable to legal proceedings regarding nonenvironmental matters, were adopted pursuant to NEPA. In our view, expanding these requirements further to include all nongovernmental proceedings would not provide meaningful information to investors. Nor are we convinced that it would contribute significantly to the protection of the environment. There appears to be no method by which to screen out nongovernmental actions which are substantially without merit or to ascertain whether any damages sought have been substantially inflated. Thus, we have concluded that additional requirements are unwarranted.

We have also rejected the fourth and fifth alternatives. A requirement that registrants disclose their environmental policy would result in subjective disclosures largely incapable of vertification and highly susceptible to public-relations presentations. Similarly, we do not believe that capital expenditures and expenses for environmental purposes generally serve as a meaningful index of corporate environmental practices. To the extent they are material, they are already required to be disclosed, although some changes in our requirements have been proposed to ensure uniformity. In any event, they are a function of a number of factors, including the extent to which the corporation's activities have significant effects on the environment or have in the past been subjected to environmental controls. Moreover, we believe that the disclosures which we have proposed today would provide more meaningful and complete information in this regard. We will, however, continue to reevaluate the need for further disclosure requirements from time to time as our experience with disclosure in this area increases.

IV. Investor Interest In and Use of Social Disclosure

As discussed *supra*, Section I, two of the issues with which Judge Richey indicated concern are the extent of investor interest is disclosure by corporations of the environmental impact of their activities and of their equal employment practices, and the avenues open to interested investors to eliminate corporate practices inimical to the environment and equal employment opportunity. We have serious reservations as to whether Commission rulemaking can be premised upon an attempt to quantify investor interest, but we have attempted to comply with the spirit of the court's suggestion.[47]

A. The Extent of Investor Interest. Taking the representations of the participants in the proceeding at face value, the least subjective indications of investor interest in social information are the stated views of the approximately 100 participants identifying themselves as investors who consider social information important. These persons constitute, however, an insignificant percentage of the estimated 30 million U.S. shareholders.[48] Furthermore, although many did not identify their investment portfolios, the holdings of those who did[49] constitute approximately ⅔ of 1% of the estimated aggregate value of the common and preferred stock and corporate bonds held in this country at the end of 1974.[50]

A second indication of the extent to which social concerns enter into the investment decisions of presumably small, individual investors may be found in the experience of the mutual funds which have been formed with specific social objectives. In 1971, four such funds were created: Dreyfus Third Century Fund, Pax World Fund, First Spectrum Fund, and Social Dimensions Fund. Of these, Dreyfus and Pax have assets of approximately $18 million and $.6 million, respectively.[51] First Spectrum, which reported net assets of $13,840 on June 30, 1974, and described itself as "inactive," was deregistered on September 24, 1974 (Investment Company Act Release No. 8517). Social Dimensions Fund filed a registration statement with the Commission in 1971, but that statement never became effective. Although the Fund has not been deregistered, it is currently reporting no assets. Significantly, the total assets of these funds represent an insignificant portion of the estimated total value of open-end investment company shares held in this countrv at the end of 1974, approximately $35 billion.[52]

Unfortunately there was no broad participation by financial institutions in the proceeding. There are indirect indications, however, that the social policies of corporations are considered as "investment issues" by some institutional investors. The policy statements of committees of the Investment Company Institute[53] and the American Bankers

---

[42] See "Movement Against Destruction v. Volpe," 361 F. Supp. 1360, 1383 (D. Md., 1973) ("Despite the breadth of the NEPA, its application is only to the decisionmaking processes of the Federal government."); "Carolina Action v. Simon," 389 F. Supp. 1244 (M.D.N.C., 1975), *affirmed*, —— F. 2d ——, No. 75–1253 (C.A. 4, June 25, 1975) (NEPA is inapplicable to federal disbursements of general revenue sharing funds despite environmental impact of state use of such funds); "Civic Improvement Committee v. Volpe," 459 F. 2d 957, 958 (C.A. 4, 1972) ("Despite the breadth of the NEPA we think there are doubtless local projects that may be destructive of environmental assets that are not within the ambit of protection of the Act."); "United States v. Stoeco Homes, Inc.," 498 F. 2d 597, 607 (C.A. 3, 1974) (NEPA does not apply to state or private activities).

[43] "Calvert Cliffs' Coordinating Committee v. Atomic Energy Commission," 449 F. 2d 1109, 1112 (C.A.D.C., 1971).

[44] "Natural Resources Defense Council, Inc. v. Securities and Exchange Commission," 389 F. Supp. 689, 701 (D.D.C., 1974). There is a recognized distinction, however, between the requirement that a "concise general statement . . . of basis and purpose" accompany rules adopted by an agency, 5 U.S.C. 553(c), and the requirement that "a brief statement of reasons" accompany the denial of a petition for rulemaking, 5 U.S.C. 555(e). The latter is, with minor exceptions, unreviewable. See "Administrative Procedure Act; Legislative History," *supra* note 32 at 201 (Senate Judiciary Committee Report).

[45] The Commission could presumably attempt to develop its own environmental guidelines and standards in order to eliminate these difficulties. As difficult as it is to accept this type of reasoning, it follows from the excessively broad and overly-literal approach urged upon us and the district court by the Natural Resources Defense Council. Of course, the costs involved in any such undertaking would be prohibitive. Moreover, in light of the Congressional delegation of responsibility in this area to the Environmental Protection Agency and the Council on Environmental Quality, any such effort on our part would be duplicative and of questionable propriety.

[46] The history of the Federal Water Pollution Control Act, 33 U.S.C. 1251, *et seq.*, provides an example of this process of expansion. The initial enactment, the Water Pollution Control Act of 1948, 62 Stat. 1155, has undergone significant enlargement through aemndments in 1956 (the Water Pollution Control Act Amendment of 1956, 70 Stat. 498), 1965 (the Water Quality Act of 1965, 79 Stat. 903), 1970 (the Water Quality Improvement Act of 1970, 84 Stat. 91) and, most comprehensively, in 1972 (the Federal Water Pollution Control Act Amendments of 1972, 86 Stat. 816).

[46] Rule 405 (*1*) under the Securities Act of 1933 provides: The term 'material,' when used to qualify a requirement for the furnishing of information as to any subject, limits the information required to those matters as to which an average prudent investor ought reasonably to be informed before purchasing the security registered.

Rule 408 provides: In addition to the information expressly required to be included in a registration statement, there shall be added such further material information, if any, as may be necessary to make the required statements, in the light of the circumstances under which they are made, not misleading.

Rule 12b–20 under the Securities Exchange Act of 1934 is worded substantially the same as Rule 408 above.

Rule 14a–9(a) provides: No solicitation subject to this regulation shall be made by means of any proxy statement, form of proxy, notice of meeting or other communication, written or oral, containing any statement which, at the time and in the light of the circumstances under which it is made, is false or misleading with respect to any material fact, or which omits to state any material fact necessary in order to make the statements therein not false or misleading or necessary to correct any statement in any earlier communication with respect to the solicitation of a proxy for the same meeting or subject matter which has become false or misleading.

[47] The Commission has provided, for the court's convenience, a copy of certain analyses of the proceeding prepared by the staff to assist us in reviewing the various submissions. We point out, however, that the actual submissions received in the proceeding, and not these staff analyses, form the basis of the Commission's conclusion described herein.

[48] See testimony of the National Investor Relations Institute, May 13, 1975, Transcript at 2454.

[49] The holdings represented investments of approximately seven foundations, 22 religious institutions, 11 educational institutions, two mutual funds, five environmental groups, 37 individual investors, and one state, Minnesota, which holds primarily short-term notes.

[50] See Division of Research and Statistics, Federal Reserve System, "Flow of Funds, Assets and Liabilities Outstanding 1974," (May, 1975). Based upon that study, at year end 1974 approximately $660 billion in common and preferred stock (exclusive of open-end investment company shares) and approximately $290 billion in corporate bonds were held in the United States.

[51] Both participated in the proceeding.

[52] "Flow of Funds, Assets and Liabilities," *supra* note 50.

V 40 215 NOV 6 75 XUM

Association, Trust Division,"[54] as well as the written comment of the Financial Analysts Federation,[55] are to this effect. Of similar import are the responses of banks and mutual funds to the survey reported in the "Ford Report," and an even greater degree of interest was expressed in the responses of religious and educational institutions.[56] In addition, at least six organizations have been formed to provide social information to a wide range of institutional investors.[57]

As discussed below, most participants in the proceeding who expressed interest as investors in social disclosure stated that they would use such information in determining how to vote their proxies or otherwise to act to influence management policies, rather than to make investment decisions. In this regard, we note that certain social shareholder proposals that appear to have social implications have received an average of from 2 to 3% of the vote in recent years and that corporations have apparently not received a significant number of social inquiries from their shareholders. We also note that 76% of the large corporations which responded to a survey published by the Committee for Economic Development indicated that they had undertaken some type of social audit.[58]

Finally, while the social views expressed by public interest groups and religious institutions might be indicative of the views of some portion of their membership, and while national social policies, as reflected in federal or uniform state legislation, might also be indicative of the views of United States citizens, whether these views are or would be reflected in decisions to purchase, hold, or sell securities is highly speculative and a conclusory leap we are not prepared to make on the basis of this proceeding.

While the proceeding was given considerable publicity,[59] no one was required to respond and the number who did so was relatively small, considering the fact that investors number in the millions. Presumably only those with a strong interest took the trouble to respond, although there are probably many more with some interest. On the other hand, many, presumably, had little or no interest in these particular matters. This does not appear to be a matter which could be resolved by any feasible statistical survey. Investors, like other Americans, have a great variety of interests and concerns, which are held with varying degrees of intensity and in accordance with a variety of personal priorities. Moreover, the results of any such survey might rapidly become outdated in light of the shifting and fluctuating nature of public opinion and the focus of popular attention from time to time.

Although there appears to be a degree of interest among some investors in matters of social concern, any conclusions we might draw from the proceeding would be largely based upon inferences, previously discussed. The reliability of these inferences as indicative of actual investor interest in social matters is uncertain. For example, the motivations underlying policy statements and limited financial support for social research organizations are not always clear. It is also apparent that shareholder support for social proposals is in part a result of the specific wording involved. Finally, a number of participants in this proceeding have cautioned the Commission against measuring the extent of investor interest without giving some weight to the possibility that once social information becomes available, investors will realize its importance and become interested. That is, of course, no less speculative than any of the foregoing.

The Commission's experience over the years in proposing and framing disclosure requirements has not led it to question the basic decision of the Congress that, insofar as investing is concerned, the primary interest of investors is economic. After all, the principal, if not the only, reason why people invest their money in securities is to obtain a return. A variety of other motives are probably present in the investment decisions of numerous investors but the only common thread is the hope for a satisfactory return, and it is to this that a disclosure scheme intended to be useful to all must be primarily addressed.

B. The Nature of Investor Interest. Those investor-participants who supported social disclosure were virtually unanimous in stating that, contrary, to implications in Release No. 5569, environmental, equal employment, or other social information is in fact economically significant. These persons suggested a variety of rationales, including: (1) noncompliance with environmental, equal employment, and similar laws could lead to extensive corporate costs or liabilities; (2) the ability to avoid such problems provides an index to management's overall quality; and (3) in the long run, corporate social responsibility determines the public relations and regulatory framework in which a company operates.[60] Relatively few investor-participants expressed on noneconomic grounds.

To the extent that other indications suggest the basis of investor interest in social disclosure, they seem of similar import. The policy statements of committees of the Investment Company Institute and the American Bankers Association, Trust Division, and the comment of the Financial Analysts Federation, are grounded in these concerns.[61] The results of the survey reported in the "Ford Report" reflect similar concerns on the part of banks, insurance companies and mutual funds.[62] And although some religious and educational institutions may have noneconomic concerns as well, serious questions exist as to whether other institutions which act essentially in a fiduciary capacity may attempt to promote particular social views without specific authorization from the beneficiaries whom they serve. Further, it seems probable that corporate interest in social responsibility is primarily grounded in long-term economic well being.

C. The use of social information by investors. The majority of those investor-participants who explained the use to which they might put social information indicated that such information might play a role in voting on shareholder proposals. A lesser number indicated that such data would be taken into account in determining what securities to purchase, hold or sell. Many of the religious institutions stated that such information would be used in deciding whether to commence correspondence or negotiations with management to persuade it to change some policy.

Some of the other indications of investor interest referred to above suggest that social disclosures would be used both for investment and voting purposes.[63] Of some import, however, is the fact that Investor Responsibility Research Center, apparently one of the more established social research organizations, devotes a substantial amount of its efforts to analysis of shareholder proposals. In addition, the views of public interest groups and religious institutions and national social policies seem more likely to be reflected generally in voting decisions since any economic consequences are only indirect.

At this time, therefore, it appears that those investors who are interested in social disclosure would use the information more in making voting rather than investment decisions.

D. Avenues available to interested investors to affect corporate social practices. Participants in the proceeding suggested a variety of course through which shareholders may influence corporate social behavior, including shareholder proposals, political action, discussions with management, refusals to purchase securities, and publicity. It was pointed out, however, that the effectiveness of discussions with management often depends on the number of shares owned, and that refusals to purchase are generally ineffective without publicity and support of a significant number of investors. The effectiveness of such tactics appears to depend on the particular circumstances involved and does not readily lend itself to generalization.

Many participants in the proceeding suggested, however, that environmental disclosures would have no impact on corporate behavior because existing environmental statutes already provide a sufficient incentive to avoid environmental injury, because companies are already required to monitor many aspects of their environmental practices and to file public compliance reports with various state and federal environmental agencies, and because instances of significant environmental degradation already are widely publicized. Certain participants even suggested that Commission disclosure requirements would detract from the goal of environmental protection by requiring firms to divert resources from environmental protection to environmental disclosure.

Nonetheless, it appears that disclosure to investors of information reflecting corporate compliance with existing environmental standards might have some indirect effect on corporate practices to the benefit of the environment. It seems clear that investors do not at present have ready access to objective information concerning the environmental practices of corporations. And although the relevant compliance reports are reasonably accessible to inhabitants of the localities most directly affected by such practices, there is presently no single governmental source to which an investor can look for the environmental reports filed by a company.

Given the fact that there is a degree of interest among some investors in information regarding corporate environmental practices, we conclude that the availability of such information may result in some investor or shareholder action. Participants in the proceeding pointed out that the submission of and voting on socially-oriented shareholder proposals has often caused a corporation to alter its behavior even though the proposals are defeated by a wide margin. Many participants also believe that disclosure requirements would serve to focus management attention on environmental issues and result in clearer recognition of the future costs and legal problems associated with environmental degradation.[64] Further, the Wheat Report, a comprehensive study of the disclosure process administered by the Commission, states in this regard:

> Although basically intended to inform, the disclosure provisions of the early Acts were expected to accomplish more. Their principal architects were disciples of Justice Brandeis who, in 1913, made the famous observation in "Other People's Money" that: "Publicity is justly commended as a remedy for social and industrial diseases. Sunlight is said to be the best of disinfectants. . . ."
>
> The fact that there is a significant degree of truth in such observations is attested by all who have worked with the disclosure provisions of the '33 and '34 Acts. The registration process has sometimes been referred to as a housecleaning: one of its most valuable consequences is the elimination of conflicts of interest and questionable business practices which, exposed to public view, have what Justice Frankfurter once termed "a shrinking quality."[65]

Having thus attempted fully to meet the expressed concerns of Judge Richey in these regards, we proceed to reconsideration of our previous denial of the equal employment portion of the petition of the Natural Resources Defense Council.

V. Disclosure of Information Relevant to Equal Employment Opportunity and Other Matters of Social Concern

By petition dated June 7, 1971, the Natural Resources Defense Council and the Project on Corporate Responsibility requested the Commission to modify its forms for the registration of securities under the Securities Exchange Act to require: (1) That certain registrants disclose "a breakdown, in conformity with Consolidated Employer Information Reports EEO–1, showing the figures and percentages of minority or female employment in each of [nine specified job categories]";[66] and (2) that all registrants disclose information concerning any proceedings in any court or before any agency challenging compliance by registrant or any subsidiary with the federal Equal Employment Opportunity Act or raising questions as to registrants compliance with Executive Order 11246 relating to discriminatory hiring practices by employers contracting with the federal government."[67]

It was also proposed that registrants subject to the second requirement disclose the EEO–1 statistics bearing on the legal proceedings in question.

On December 22, 1971, after evaluating the proposals contained in the rulemaking petition, the Commission informed the petitioners that it had declined to take the action requested in their petition. The notification of that decision stated:

> Shortly after your petition was filed, the Commission issued, on July 19, 1971, Securities Act Release No. 5170 concerning material disclosure of environmental and civil rights matters. For your information, enclosed is a copy of that release. Since that time, the Commission and its staff have been continually reviewing the types of disclosure being made as a result thereof. Before determining whether to amend the disclosure requirements contained in the various forms filed with the Commission, the Commission believes that it should evaluate the results of the guidelines for a longer period of time. On the basis of that review, the Commission will actively consider amendments to the forms in the near future.[68]

Pursuant to Judge Richey's order, described *supra*, Section I, we have reconsidered the equal employment portion of the petition. In its release announcing the proceeding, the Commission also invited comment on two "Possible Additional Disclosure Requirements" which were substantially similar to those proposed by petitioners, as well as on "any other matters of social concern to members of the investing public."[69]

At the outset, it should be noted that the Commission's present disclosure requirements call for disclosure of certain equal employment matters. Rules adopted pursuant to the Securities Act and the Securities Exchange Act provide generally that in addition to the information expressly required to be included in registration statements and in reports, further material information, if any, must be included as may be necessary to make the required statements, in the light of the circumstances under which they are made, not misleading." In Securities Act Release No. 5170 (July 19, 1971), the Commission publicly announced that existing requirements for describing registrant's business in filings under the securities laws require disclosure of material legal proceedings

[55] Letter dated May 13, 1975 from Theodore R. Dilley, President of Financial Analysts Federation, to George A. Fitzsimmons, Secretary, Securities and Exchange Commission; File S7–551–1 at 3173.

[56] B. Longstreth & H. Rosenbloom, "Corporate Social Responsibility and the Institutional Investor—A Report to the Ford Foundation" (1973) [hereinafter the "Ford Report"]. Many participants in the proceeding cited the result of the Ford Foundation survey as evidence that there was substantial interest in obtaining and using social information among institutional investors.

J. Simon, C. Powers & J. Gunneman, "The Ethical Investor, Universities and Corporate Responsibility" (1972), was also relied on by disclosure proponents as evidence of investor interest. It should be noted, however, that that work reports primarily the opinions of its authors and is not based on any survey or study of investors.

V 40 215 NOV 6 75 XUM

related to civil rights, any material sanctions imposed for violation of the nondiscrimination rules of any federal agency, and certain other material matters relating to equal employment.

The petition states that the disclosure proposals therein "are designated to reflect increased investor concern that corporate and other investor-owned business should be conducted in a socially responsible manner."[71] In the proceeding, as discussed *supra*, Section IV, those investor-participants who supported social disclosure were virtually unanimous in stating that such information is economically significant. They argue that non-compliance with environmental, equal employment, or similar laws could lead to extensive corporate costs and liabilities; that the ability to avoid such problems provides an index to management's overall quality; and that in the long run, corporate social responsibility determines the public relations and regulatory framework within which a company operates. Relatively few investor-participants expressed interest on noneconomic grounds. To the extent that other indications suggest the basis of investor interest, they seem of similar import. These considerations, however valid, do not persuade us that disclosure requirements regarding such matters should be judged by a different standard than is applied to other matters of economic concern to investors.

In the instant proceeding, over 100 different "social matters" were submitted in which "ethical" investors were said to be interested.[72] As against this bewildering array of special causes, it has been suggested that investors are at least entitled to information regarding matters which embody fundamental national social principles as reflected in federal legislation or court decisions. We believe that persuasive arguments can be made, however, substantial amount of federal legislation to some extent embodies fundamental national social principles and, accordingly, many topics of social concern would remain. Thus, there is no distinguishing feature which would justify the singling out of equal employment from among the myriad of other social matters in which investors may be interested in the absence of a specific mandate comparable to that of NEPA. Disclosure of comparable non-material information regarding each of these would in the aggregate make disclosure documents wholly unmanageable and would significantly increase the costs to all involved without, in our view, corresponding benefits to investors generally.

In particular, we do not believe that any of the suggestions advanced as to disclosure concerning non-material equal employment proceedings would provide a useful reliable method by which to screen out actions which are without merit or to ascertain whether any damages sought have been substantially inflated. In any event, we believe that our present materiality standards regarding legal proceedings provide adequate information to meet the needs of investors generally in this regard.

It has been suggested, however, that the existence of imbalance in employment statistics, such as would be revealed in Forms EEO–1 filed by registrants, itself constitutes some evidence of unlawful discrimniation and is thus economically material. The significance of this information in some cases does not persuade us that all registrants should be required to disclose employment statistics, particularly since their meaningful interpretation is dependent upon sophisticated analysis and other information such as the makeup of the available labor pools and existing hiring and promotion practices.[73]

The petition expressed a concern that corporations might mislead stockholders and others by making public statements in regard to "minority group or female employment practices, without [revealing a] numerical or percentage breakdown by job categories."[74] We are not persuaded that the possibility of such misleading statements by a few justifies a broad requirement for detailed disclosure by all. To the extent that there are employment conditions that are materially adverse to the business of the registrant, disclosure would be called for under present requirements.[75] In specific cases, the failure to make appropriate disclosures could be actionable by the Commission, depending upon the appropriate exercise of the Commission's prosecutorial discretion. In addition, if petitioners, or others, believe that in a particular instance these requirements are being violated, they may seek equitable relief or damages in court. Private civil actions based upon violations of the federal securities laws are a "necessary supplement" to the Commission's own enforcement actions, "J. I. Case Co. v. Boark," 377 U.S. 426, 432 (1964).

In view of the foregoing, the Commission has determined to deny again that portion of the petition which proposes that certain forms prescribed by the Commission be modified to require disclosure of certain specific equal employment information. We have also considered, and determined not to adopt, other equal employment disclosure alternatives brought to our attention in this proceeding and have determined not

[71] Petition at 2–3.

[72] These include: advertising practices; all advertising costs; "false" advertising; contract disputes; patent disputes; compliance with antitrust laws; limitations on competition; concentration in an industry; consumer protection activities and consumer affairs posture; any activities likely to lead to litigation; all litigation (issues, disposition); all litigation but for that settled or dismissed without conformance of corporate activities to the substance of the complaint; degree of compliance with applicable regulations; all government hearings; all agency actions; a textual summary of agency actions; charitable contributions; company activities undertaken without a goal of profit maximization; community activities; commitment to the "human community"; corporate external relations; "good things a company has done"; financial practices; energy conservation; distribution of resources; investment practices; marketing practices; pricing practices; expenditures in the land grant college system; receipt of federal subsidies; corporate practices that are damaging to "intereats of other investors," the "overall economy," or to "property"; biographical information, including race and sex, regarding directors; interlocking directorates; the existence of a corporate environmental department; control within a corporation; the role of the board of directors; all subsidiaries; all benefits received by directors; "commerciogenic" malnutrition; food production; in-house nutritional research; registrant's impact on the world food crisis; contractual commitments to purchase crops; a division-by-division breakdown of the number of employees in agri-business companies; foreign investments; nature of operations in South Africa; U.S.-Soviet trade; marketing efforts of drug companies outside the U.S.; employment practices in foreign facilities; registrant's participation in the "flight of companies making hazardous goods to foreign countries"; registrant's participation in the Arab boycott; exports; products made in foreign countries; foreign military goods contracts; foreign beneficial ownership; purchases from, and sales to, communist countries; activities which would be illegal in the U.S. but which are conducted abroad; registrant's impact on unemployment; compliance with the Fair Labor Standards, the Occupational Safety and Health, and the National Labor Relations Acts; health hazards in plants; health standards; effects on the unionized work force of company policies and technology; employee relations other than wages, hours, and working conditions; the psychological work environment; pension and health protection; management opportunities for women and minorities; the costs of giving "preferential treatment" to blacks and females; safety records; employee training and education; employee benefits, relations and satisfactions; discrimination against persons less than six feet tall; lobbying efforts; political influence; political contributions; all products by brand name; all product lines; product-by-product financial statements; product purity (recalls, reasons for corrective action); toxic substances produced; product reliability; customer complaints; tobacco products manufactured; alcoholic beverages produced; gambling equipment manufactured; strip mining; defense contracts and military goods produced; nuclear energy production; banking operations; with respect to agricultural machinery companies, manpower displacement research; tax loophole savings; tax law compliance; all state and federal t x returns; all tax disputes; beneficial ownership; racial justice; prospective legislation; and the willingness to disclose corporate information to shareholders.

[73] Substantial questions have been raised in the proceeding regarding the propriety of the Commission's requiring disclosure of Forms EEO–1 filed by registrants with the Equal Employment Opportunity Commission. Officers and employees of that Commission are specifically prohibited by statute from making any information obtained under its statutory authority public prior to the institution of a proceeding involving such information. 42 U.S.C. 2000e–8(e). In addition, it is claimed that disclosure of this information would reveal trade secrets or otherwise confidential commercial or financial information. In light of our views, generally, we have not found it necessary to consider these issues.

[74] Petition at 4.

[75] See Rule 408 under the Securities Act, 17 CFR 230.408 and Rules 12b–20 and 14a–9(a) under the Securities Exchange Act, 17 CFR 240.12b–20 and 240.14a–9(a).

to propose at this time specific disclosure requirements regarding the other areas of social concern. We will, of course, continue to reevaluate the need for such requirements from time to time.

VI. Rulemaking Proposals

The amendments today proposed relate to certain registration forms under the Securities Act of 1933 ("Securities Act") and certain registration and reporting forms and rules 14a–3 and 14c–3 under the Securities Exchange Act of 1934 ("Exchange Act") relating to the disclosure of environmental matters. Their explanation follows.

A. General purpose. If adopted, the proposed amendments would, where applicable, require a registrant to provide as an exhibit to certain documents filed with the Commission a list of the registrant's most recently filed environmental compliance reports which indicate that the registrant has not met, at any time within the previous twelve months, any applicable environmental standard established pursuant to a federal statute. In addition, the proposed amendments would, except for purposes of Forms 10 and 12 under the Exchange Act, require the registrant to undertake to provide promptly copies of the reports listed, upon written request and the payment of a reasonable fee for furnishing such reports.

In addition, amendments are proposed to the description of business items contained in certain registration and reporting forms which would require disclosure, if applicable, of material estimated capital expenditures for environmental control facilities for at least the remaining portion of the registrant's current fiscal year and its succeeding fiscal year and such further periods as the registrant may deem material.

This release contains a brief synopsis of the proposals to assist in a better understanding of their provisions. However, attention is directed to the proposals themselves for a more complete understanding.

B. Synopsis of proposals. Proposed Amendment of Instructions As to Exhibits of Forms S–1, S–2, S–7, and S–9 Under the Securities Act and Forms 10, 10–K, 12, and 12–K Under the Exchange Act.

The Commission has concluded that information regarding the effects a company's operations have on the environment may be important to some investors if the information can be made available in a manageable form without substantial costs which outweigh the benefits to investors. The Commission therefore proposes to amend the Instructions as to Exhibits of the various registration and reporting forms to include an additional instruction (referred to for purposes of this release as Instruction A) which would require the disclosure of certain environmental compliance information. The Commission is publishing Instruction A as a model, rather than publish each specific instruction, since the substance of the Instruction should provide an adequate basis for comment from interested persons.

Instruction A requires a list of the registrant's most recently filed environmental compliance reports which indicate that the registrant has not met, at any time within the previous 12 months, any applicable environmental standard established pursuant to any Federal statute. Authority to enforce certain federal statutes relating to the protection of the environment is delegated to State or local regulatory agencies. Reports filed with State or local agencies pursuant to such federal authority are included in the scope of Instruction A. Also, Instruction A contemplates the disclosure of the most recent periodic compliance report whether filed on an annual basis, quarterly basis, or otherwise; and any special compliance report.

In order to make the information presented more meaningful, Instruction A requires disclosure as to each report listed indicating the general nature of he standard exceeded (*e.g.*, air quality or water quality), the date of the report, and the name and address of the agency where the report was filed. In addition, other information necessary to sufficiently identify the report to enable an interested person to inspect or acquire such report from the respective agency is required. Such information would include any special file or reference numbers used by a particular agency, if known to the registrant.

Proposed Amendments to Rules 14a–3 and 14c–3 Under the Exchange Act

In view of the Commission's opinion that the information contained in the reports required to be listed by instruction A may be important to some investors, it believes that such reports should be made reasonably available. The proposed amendments to Rules 14a–3 and 14c–3 would require that there be included in management's proxy statement, information statement, or in the annual report to stockholders, an undertaking which indicates that the issuer has filed with the Commission as an exhibit to its annual report on Form 10–K or 12–K the information required by Instruction A and also states that the issuer will provide promptly copies of the reports listed pursuant to the Instruction to each person solicited or furnished an information statement upon written request and the payment of a reasonable fee. A note to the proposed amendments to Rules 14a–3 and 14c–3 indicates that the issuer shall also provide promptly copies of the reports listed to any beneficial owner of its securities upon written request and the payment of a reasonable fee.

Proposed Undertaking to Forms S–1, S–2, S–7 and S–9 Under the Securities Act

The Commission also proposes to amend Forms S–1, S–2, S–7 and S–9 to include an additional undertaking (referred to for purposes of this release as Undertaking B) which would be required in the registration statement if the registrant is required to furnish the exhibit called for by Instruction A.

Undertaking B would, in language essentially the same as that in the proposed amendment to Rules 14a–3 and 14c–3, obligate the registrant to furnish promptly copies of those environmental compliance reports listed pursuant to Instruction A upon written request and the payment of a reasonable fee. The undertaking also provides that the obligation to furnish copies is applicable to all requests received not later than 40 days after the effective date of the registration statement.

Proposed Amendment to Forms S–1, S–2, S–7 and S–9 Under the Securities Act and Forms 10, 10–K, 12 and 12–K Under the Exchange Act to Require a Statement of the Nature and Availability of the Reports Listed Pursuant to Instruction A

In order to bring to the attention of investors the information made available by the proposed amendments, the Commission proposes to adopt Instruction C which would require a statement in the various registration forms and reports specified above indicating that the registrant has filed as an exhibit with the Commission the information required by Instruction A.

The statement required by Instruction C as proposed for Forms S–1, S–2, S–7, and S–9 would also indicate that the registrant will provide promptly copies of those environmental compliance reports listed pursuant to Instruction A to any interested person upon written request received not later than 40 days after the effective date of the registration statement and the payment of a reasonable fee. A statement regarding the availability of the reports listed pursuant to the Instruction for Forms 10–K and 12–K is not necessary since adequate notice will be provided by the statement called for by the proposed amendments to Rules 14a–3 and 14c–3.

Proposed Amendment to Forms S–1, S–2, S–7, and S–9 Under the Securities Act and Forms 10 and 10–K, Under the Exchange Act to Require Disclosure Relating to the Material Effects of Environmental Compliance

The proposed amendment to the appropriate Items and Instructions relating to environmental information is designed to provide more meaningful disclosure with respect to the material effects of compliance with Federal, state or local environmental standards on the registrant's business and to make such disclosure more uniform among registrants. Specifically, the proposed amendment (referred to for purposes of this release as Item D) would require as part of the description of the registrant's business disclosure as to material estimated capital expenditures for environmental control facilities for at least the remainder of the registrant's current fiscal year and its succeeding fiscal year and such further periods as the registrant may deem material.

V 40 215 NOV 6 75 XUM

It should be noted that the description of business in Form S–2 does not currently require disclosure of the effect of environmental compliance on the business conducted but is proposed to be amended to include such information. The Commission is only publishing Item D as a model since the language of the amendment will be identical in each form or report.

C. *Operation of proposals.* The Commission is mindful of the cost to registrants and others of its proposals and it recognizes its responsibilities to weigh with care the costs and benefits which result from its rules. Accordingly, the Commission specifically invites comments on the cost to registrants and others of the proposals published in this release, if adopted.

Pursuant to Section 23(a)(2) of the Exchange Act, the Commission has considered the impact that these proposals would have on competition and is not aware, at this time, of any burden that such rules, if adopted, would impose on competition not necessary or appropriate in furtherance of the purposes of that Act. However, the Commission specifically invites comment as to the competitive impact of these proposals, if adopted.

The Commission hereby proposes for comment (1) proposed amendments to Forms S–1 (17 CFR 239.11), S–2 (17 CFR 239.12), S–7 (17 CFR 239.26), and S–9 (17 CFR 239.22) pursuant to Sections 7, 10 and 19(a) of the Securities Act and (2) proposed amendments to Rules 14a–3 (17 CFR 240.14a–3) and 14c–3 (17 CFR 240.14c–3) and Forms 10 (17 CFR 249.210), 10–K (17 CFR 249.310), 12 (17 CFR 249.212) and 12–K (17 CFR 249.312) pursuant to Sections 12, 13, 14, 15(d) and 23(a) of the Exchange Act.

All interested persons are invited to submit their views and comments on the foregoing proposals, in writing to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549 on or before January 12, 1976. Such communications should refer to File No. S7–593 and will be available for public inspection. The text of the proposed amendments to rules, forms and reports is set forth below.

(Secs. 7, 10, 19(a), 48 Stat. 78, 81, 85; secs. 12, 13, 14, 15(d), 23(a), 48 Stat. 892, 894, 895, 901; secs. 205, 209, 48 Stat. 906, 908; secs. 203(a), 49 Stat. 704; secs. 1, 8, 49 Stat. 1375, 1379; secs. 201, 202, 68 Stat. 685, 686; secs. 3–6, 78 Stat. 565–574; secs. 1–3, 82 Stat. 454, 455; sec. 28(c), 84 Stat. 1435; secs. 1–5, 84 Stat. 1497 (15 U.S.C. 77g, 77k, 77s(a), 78*l*, 78m, 78n, 78o(d), 78w(a)))

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

OCTOBER 14, 1975.

It is proposed to amend 17 CFR Chapter II as follows:

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

By adding Instruction "A", Undertaking "B", Instruction "C" and Item "D" as to Exhibits in §§ 239.11, 12, 22 and 26 as follows:

§ 239.11 Form S–1, registration statement under the Securities Act of 1933.

Instruction "A" as to Exhibits.—A list of the registrant's most recently filed environmental compliance reports which indicate that the registrant has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g., air quality or water quality*); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Undertaking "B".—The following undertaking shall be included in the registration statement if the registrant is required to furnish the list called for by Instruction A of Instructions As To Exhibits:

The undersigned registrant hereby undertakes upon written request received not later than 40 days after the effective date of the registration statement to provide promptly copies of those environmental reports listed as an exhibit pursuant to Instructions A of Instructions As To Exhibits, upon the payment of a reasonable fee which shall be limited to the registrant's reasonable expense in furnishing such reports.

Instruction "C".—If the registrant has filed an exhibit to the registration statement pursuant to Instruction A, a statement shall be provided in the prospectus indicating that the registrant has filed as an exhibit to the registration statement a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute. The statement shall also indicate that the registrant will provide promptly copies of the reports listed to any interested person, upon written request, received not later than 40 days after the effective date of the registration statement and the payment of a reasonable fee which is limited to the registrant's reasonable expense in furnishing such reports.

Item "D".—Appropriate disclosure shall also be made as to the material effects that compliance with Federal, State and local provisions which have been enacted or adopted regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment, may have upon the capital expenditures, earnings and competitive position of the registrant and its subsidiaries. Registrant shall disclose any material estimated capital expenditures for environmental control facilities for the remainder of its current fiscal year and its succeeding fiscal year; and such further periods as the registrant may deem material.

§ 239.12 Form S–2, for shares of certain corporations in the development stage.

Instruction "A" as to exhibits.—A list of the registrants most recently filed environmental compliance reports which indicate that the registrant has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g.*, air quality or water quality); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Undertaking "B".—The following undertaking shall be included in the registration statement if the registrant is required to furnish the list called for by Instruction A of Instructions As To Exhibits:

The undersigned registrant hereby undertakes upon written request received not later than 40 days after the effective date of the registration statement to provide promptly copies of those environmental reports listed as an exhibit pursuant to Instruction A of Instructions As To Exhibits, upon the payment of a reasonable fee which shall be limited to the registrant's reasonable expense in furnishing such reports.

Instruction "C".—If the registrant has filed an exhibit to the registration statement pursuant to Instruction A, a statement shall be provided in the prospectus indicating that the registrant has filed as an exhibit to the registration statement a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g.*, air quality or water quality); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Undertaking "B".—The following undertaking shall be included in the registration statement if the registrant is required to furnish the list called for by Instruction A of Instructions As To Exhibits:

The undersigned registrant hereby undertakes upon written request received not later than 40 days after the effective date of the registration statement to provide promptly copies of those environmental reports listed as an exhibit pursuant to Instruction A of Instructions As To Exhibits, upon the payment of a reasonable fee which shall be limited to the registrant's reasonable expense in furnishing such reports.

Item "D".—Appropriate disclosure shall also be made as to the material effects that compliance with Federal, State and local provisions which have been enacted or adopted regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment, may have upon the capital expenditures, earnings and competitive position of the registrant and its subsidiaries. Registrant shall disclose any material estimated capital expenditures for environmental control facilities for the remainder of its current fiscal year and its succeeding fiscal year; and such further periods as the registrant may deem material.

§ 239.22 Form S–9, for the registration of certain debt securities.

Instruction "A" as to exhibits.—A list of the registrant's most recently filed environmental compliance reports which indicate that the registrant has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g.*, air quality or water quality); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Undertaking "B".—The following undertaking shall be included in the registration statement if the registrant is required to furnish the list called for by Instruction A of Instructions As To Exhibits:

The undersigned registrant hereby undertakes upon written request received not later than 40 days after the effective date of the registration statement to provide promptly copies of those environmental reports listed as an exhibit pursuant to Instruction A of Instructions As To Exhibits, upon the payment of a reasonable fee which shall be limited to the registrant's reasonable expense in furnishing such reports.

Instruction "C".—If the registrant has filed an exhibit to the registration statement pursuant to Instruction A, a statement shall be provided in the prospectus indicating that the registrant has filed as an exhibit to the registration statement a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g.*, air quality or water quality); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Undertaking "B".—The following undertaking shall be included in the registration statement if the registrant is required to furnish the list called for by Instruction A of Instructions As To Exhibits:

The undersigned registrant hereby undertakes upon written request received not later than 40 days after the effective date of the registration statement to provide promptly copies of those environmental reports listed as an exhibit pursuant to Instruction A of Instructions As To Exhibits, upon the payment of a reasonable fee which shall be limited to the registrant's reasonable expense in furnishing such reports.

Instruction "C".—If the registrant has filed an exhibit to the registration statement pursuant to Instruction A, a statement shall be provided in the prospectus indicating that the registrant has filed as an exhibit to the registration statement a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g.*, air quality or water quality); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Item "D".—Appropriate disclosure shall also be made as to the material effects that compliance with Federal, State and local provisions which have been enacted or adopted regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment, may have upon the capital expenditures, earnings and competitive position of the registrant and its subsidiaries. Registrant shall disclose any material estimated capital expenditures for environmental control facilities for the remainder of its current fiscal year and its succeeding fiscal year; and such further periods as the registrant may deem material.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. By redesignating paragraph (b)(9) of § 240.14a–3 as (b)(9)(i) and adding paragraph (b)(9)(ii) as follows:

§ 240.14a–3 Information to be furnished to security holders.

* * * * * * *

(b) * * *

(9)(i) * * *

(ii) If applicable, Management's proxy statement, or the report, shall contain an undertaking in bold face or otherwise reasonably prominent type stating that the issuer has filed with the Commission as an exhibit to its current annual report on Form 10–K or 12–K a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any environmental standard established pursuant to any Federal statute; and also stating that the issuer will provide promptly, upon written request, copies of the reports so listed to each person solicited upon the payment of a reasonable fee which shall be limited to the issuer's reasonable expenses in furnishing such reports. Such undertaking shall indicate the name and address of the person to whom such a written request is to be directed.

NOTE.—Pursuant to the undertaking required by the above subparagraph, the issuer shall furnish promptly copies of the reports listed to a beneficial owner of its securities upon receipt of written request and payment of the specified fee from such person. Each request must set forth a good-faith representation that, as of the record date for the annual meeting of the issuer's security holders, the person making the request was a beneficial owner of securities entitled to vote at such meeting.

2. By redesignating paragraph (a)(9) of § 240.14c–3 as (a)(9)(i) and adding paragraph (a)(9)(ii) as follows:

§ 240.14c–3 Annual Report to be furnished security holders.

(a) * * *

(9)(i) * * *

(ii) If applicable, the information statement, or the report, shall contain an undertaking in bold face or otherwise reasonably prominent type stating that the issuer has filed with the Commission as an exhibit to its current annual report on Form 10–K or 12–K a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any environmental standard established pursuant to any Federal statute and also stating that the issuer will provide promptly, upon written request, copies of the reports listed to each person furnished an information statement upon the payment of a reasonable fee which shall be limited to the issuer's reasonable expenses in furnishing such reports. Such undertaking shall indicate the name and address of the person to whom such a written request is to be directed.

NOTE.—Pursuant to the undertaking required by the above subparagraph, the issuer shall furnish promptly copies of the reports listed to a beneficial owner of its securities upon receipt of written request and payment of the specified fee from such person. Each request must set forth a good-faith representation that, as of the record date for the annual meeting of the issuer's security holders, the person making the request was a beneficial owner of securities entitled to vote at such meeting.

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

1. By adding Instruction "A", Instruction "C" and Item "D" as to Exhibits in § 249.210 as follows:

§ 249.210 Form 10, general form for registration of securities pursuant to Section 12(b) or (g) of the Securities Exchange Act of 1934.

Instruction "C".—If the registrant has the registrant's most recently filed environmental compliance reports which indicate that the registrant has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g.*, air quality or water quality); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Instruction "C".—If the registrant has filed an exhibit to this report pursuant to Instruction A, a statement shall be provided in the report indicating that the registrant has filed as an exhibit to the report a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute.

Item "D".—Appropriate disclosure shall also be made as to the material effects that compliance with Federal, State and local provisions which have been enacted or adopted regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment, may have upon the capital expenditures, earnings and competitive position of the registrant and its subsidiaries. Registrant shall disclose any material estimated capital expenditures for environmental control facilities for the remainder of its current fiscal year and its succeeding fiscal year; and such further periods as the registrant may deem material.

2. By adding Instruction "A" and Instruction "C" as to Exhibits in § 249.212 as follows:

§ 249.212 Form 12, for issuers which file reports with certain other federal agencies.

Instruction "A" as to Exhibits.—A list of the registrant's most recently filed environ-

V 40 N 215 NOV 6 75 XUM

mental compliance reports which indicate that the registrant has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g.*, air quality or water quality); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Instruction "C".—If the registrant has filed an exhibit to this report pursuant to Instruction A, a statement shall be provided in the report indicating that the registrant has filed as an exhibit to the report a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute.

3. By adding Instruction "A", Instruction "C" and Item "D" as to Exhibits in § 249.310 as follows:

§ 249.310 Form 10–K, annual report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Instruction "A" as to Exhibits.—A list of the registrant's most recently filed environmental compliance reports which indicate that the registrant has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g.*, air quality or water quality); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Instruction "C".—If the registrant has filed an exhibit to this report pursuant to Instruction A, a statement shall be provided in the report indicating that the registrant has filed as an exhibit to the report a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute.

Item "D".—Appropriate disclosure shall also be made as to the material effects that compliance with Federal, State and local provisions which have been enacted or adopted regulating the discharge of material into the environment, or otherwise relating to the protection of the environment, may have upon the capital expenditures, earnings and competitive position of the registrant and its subsidiaries. Registrant shall disclose any material estimated capital expenditures for environmental control facilities for the remainder of its current fiscal year and its succeeding fiscal year; and such further periods as the registrant may deem material.

4. By adding Instruction "A" and Instruction "C" as to Exhibits in § 249.312 as follows:

§ 249.312 Form 12–K, annual report for issuers which file reports with certain other federal agencies.

Instruction "A" as to Exhibits.—A list of the registrant's most recently filed environmental compliance reports which indicate that the registrant has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute and setting forth as to each such report (1) the general nature of the environmental standard involved (*e.g.*, air quality or water quality); (2) the identity and address of the person with whom the report was filed; (3) the date of the report; and (4) any other information necessary to sufficiently identify the report to enable an interested party to inspect or acquire the report from the recipient agency.

Instruction "C".—If the registrant has filed an exhibit to this report pursuant to Instruction A, a statement shall be provided in the report indicating that the registrant has filed as an exhibit to the report a list of the issuer's most recently filed environmental compliance reports which indicate that the issuer has not met, at any time within the past 12 months, any applicable environmental standard established pursuant to any Federal statute.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 113]

NONDISCRIMINATION IN FINANCIAL ASSISTANCE PROGRAMS

Proposed Inclusion of a Prohibition Against Discrimination in Credit by Recipient Creditors by Reason of Marital Status

Notice is hereby given that the Small Business Administration proposes to amend its nondiscrimination requirements in 13 CFR Part 113. Interested parties may on or before December 8, 1975, submit written comments, suggestions or objections regarding the proposed amendment. Please send comments to the Compliance Division, Room 326, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

This amendment prohibits discrimination based on marital status by recipients of Federal financial assistance. Such discrimination is contrary to Federal Law and policy.

Accordingly, Part 113 of Chapter I of Title 13 CFR is hereby amended by:

§ 113.1 [Amended]

1. Amending § 113.1(a) by inserting on line 16 after the word "sex" the words "marital status."

2. Adding § 113.3(d)

§ 113.3 Discrimination prohibited.

* * * * *

(d) With regard to all recipients offering credit, such as Small Business Investment Companies and Community Development Companies, to discriminate against debtors on the basis of race, color, religion, sex, marital status or national origin.

§ 113.3–1 [Amended]

3. Amending § 113.3–1(a) by inserting on lines 3, 10, and 13 after the word "sex" the words "marital status."

§ 113.5 [Amended]

4. Amending § 113.5(d)(2) by inserting on line 8 after the word "sex" the words "marital status."

Dated: October 16, 1975.

THOMAS S. KLEPPE,
Administrator.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

[Public Notice CM–5/121]

OVERSEAS SCHOOLS ADVISORY COUNCIL

Notice of Meeting

The Overseas Schools Advisory Council, Department of State, will hold its annual meeting on Wednesday, December 10, 1975, 9:30 a.m. in Conference Room 1206, Department of State building, Washington, D.C.

Agenda items scheduled for discussion are as follows:

I. Welcome and Introduction of Members.

II. Greetings from Department of State.

III. Report of Action of Executive Committee Meeting of May 13, 1975.

IV. Progress Report of Council's 1974/1975 "Fair Share" Program and 1975/1976 "Fair Share" Presentation.

V. Status of Local Fund-Raising Efforts by the Overseas Schools.

VI. Report of /I/D/E/A/'s Activities.

VII. Future Council Activities.

A. Recommendations of Study Group, Giving Consideration to Suggestions from Overseas Schools, Office of Overseas Schools of Department of State and /I/D/E/A/.

B. Discussion of Letter to Be Sent to Schools Regarding Next Phase of Council's Activities.

C. Scope of Information and Assistance to Be Provided to U.S. Corporate and Foundation Community and to Schools.

Since the meeting will be conducted in a secure building and space is limited, members of the public desiring to attend the meeting should call Ms. Judy Knott, Office of Overseas Schools, Department of State, Washington, D.C., Area Code 703–235–9601, to arrange attendance.

Dated: October 28, 1975.

ERNEST N. MANNINO,
Executive Secretary,
Overseas Schools Advisory Council.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

IDAHO

Small Tract Classification

1. Pursuant to Section 7 of the Taylor Grazing Act of June 28, 1934, as amended (43 U.S.C. 315(f)) the lands described below are hereby opened and classified for lease or sale under the provisions of the Small Tract Act of June 1, 1938 (52 Stat. 609, 43 U.S.C. 682a), as amended:

BOISE MERIDIAN, IDAHO

T. 48 N., R. 3 E.,
Sec. 10, A tract of land described as follows:
Beginning at a point located 1360 feet south 51°30' east of the section corner common to sections 3, 4, 9 and 10, T. 48 N., R. 3 E., Boise Meridian, which is Corner No. 1, thence south 10° east, 865 feet to Corner No. 2; thence south 56°30' east, 90 feet to Corner No. 3; thence north, 450 feet to Corner No. 4; thence east, 270 feet to Corner No. 5 on line 3–4 of the Rolling Stone Lode, Mineral Survey 3423; thence north 40° west, 740 feet along line 3–4 of the Rolling Stone Lode, Mineral Survey 3423 to Corner No. 6; thence south 30° west, 110 feet to Corner No. 1, the point of beginning.
The area described contains approximately 4.60 acres, more or less.

2. Classification of the above described lands by this order segregates them from all appropriations, including locations under the mining laws, but not from leasing under the mineral leasing laws.

3. There is one preference right applicant for the designated tract. The preference right applicant will be offered the tract by direct lease or sale at the appraised value.

WM. L. MATHEWS,
State Director.

NATIONAL ADVISORY BOARD FOR WILD FREE-ROAMING HORSES AND BURROS

Notice of Meeting

OCTOBER 29, 1975.

Notice is hereby given that the National Advisory Board for Wild Free-Roaming Horses and Burros will hold a meeting on December 5 and 6, 1975, at the Naval Weapons Center, China Lake, California. The agenda includes:

Friday, December 5—(1) The ecological impact of wild horses on the public lands; (2) the ecological impact of wild burros on the public lands; (3) burros on and adjacent to the Naval Weapons Center; (4) presentations by conservation, wild horse and burro, livestock, and wildlife organizations; (5) burro research; (6) wild horses in the Challis EIS; (7) agency reports; (8) public comment; and (9) Advisory Board discussion and recommendations.

Saturday, December 6—An aerial and ground tour of lands administered by the Naval Weapons Center, National Park Service, and the Bureau of Land Management. The tour will leave the Naval Weapons Center at 8 a.m. Individuals desiring to participate in the field trip other than official participants will arrange for their own transportation and lunch.

The meeting will be open to the public. Time has been set aside beginning at 3:30 p.m., September 5, for brief statements by members of the public. Those persons wishing to make an oral statement must inform the Director (330), Bureau of Land Managmeent, in writing prior to the meeting of the Board. One written copy of all oral statements identifying the author is desired to provide a record for the minutes. Any interested person may file a written statement with the Board for its consideration. Written statements may be submitted at the meeting or mailed to the Director (330), Bureau of Land Management, Washington, D.C. 20240.

Additional details can be obtained by contacting the Office of Public Affairs, Bureau of Land Management, Federal Building, 2800 Cottage Way, Sacramento, California 95825.

Minutes of the meeting will be available for public inspection 60 days after the meeting at the Office of the Director (330), Bureau of Land Management, Interior Building, Washington, D.C. 20240.

GEORGE L. TURCOTT,
Associate Director.

SALEM DISTRICT MULTIPLE USE ADVISORY BOARD

Meeting

Notice is here by given that the Salem District Multiple Use Advisory Board will meet on December 11, 1975, commencing at 9 a.m., in the Pringle Park Community Building, Winter and Oak Streets, Salem, Oregon. The Agenda for the meeting includes election of a chairman and vice-chairman; reports on the proposed Crabtree Lake Research National Area, proposed Valley of the Giants Natural Area, Walter Horning Tree Seed Orchard programs, timber reinventory, allowable cut determinations, and environmental impacts on resource programs. Other discussions will concern District organization and advisory board functions and procedures.

The meeting will be open to the public. It will be held in a room accommodating 60 people. In addition to discussion of agenda topics by board members, there will be time for brief statements on agenda topics by nonmembers. Persons wishing to make oral statements should so advise the Salem District Manager prior to the meeting. Written statements for consideration by the board should be sent to the District Manager, Bureau of Land Management, P.O. Box 3227, Salem, Oregon 97302.

B. T. VLADIMIROFF,
Salem District Manager.

ROGUE RIVER, OREGON

Amended Recreational Use Controls

OCTOBER 30, 1975.

Notice of the establishment of recreational use controls relating to commercial operations on the Rogue River Wild Area was published in the FEDERAL REGISTER, December 3, 1974 (39 FR 41869).

The purpose of this document is to provide notice of an amendment to that section of the use controls which established a maximum permitted camping party size of 20 people, so far as the Federal Government is involved. The amendment will permit an increase of maximum camping party size from 20 to 24 people under Federal regulations.

The section entitled "Seasonal Restrictions" is amended by revising the first paragraph as follows:

SEASONAL RESTRICTIONS

Summer season. (From the Friday preceding Memorial Day through Labor Day) not more than three camping parties will launch per day: Two parties not exceeding 24 people each, and one party not exceeding ten people, including guides. The maximum camping party size is 24.

This amendment has no effect whatever on regulations of the Oregon State Marine Board.

This notice shall become effective on November 6, 1975.

E. J. PETERSEN,
Acting BLM State Director.

FRANK J. KOPECKY,
Acting USFS Regional Forester.

OUTER CONTINENTAL SHELF OFF SOUTHERN CALIFORNIA

Oil and Gas Lease Sale No. 35

DECEMBER 11, 1975.

1. *Authority.* This notice is published pursuant to the Outer Continental Shelf Lands Act (43 U.S.C. 1331–1343) and the regulations issued thereunder (43 CFR Part 3300).

2. *Bid Filing.* Sealed bids will be received by the Manager, Pacific Outer Continental Shelf Office, Bureau of Land Management, 300 North Los Angeles Street, Los Angeles, California 90012, either in person or by mail until 9:30 a.m., p.s.t., December 11, 1975, for the oil and gas lease sale described in paragraph 13 herein, in areas of the Outer Continental Shelf adjacent to the State of California. Bids delivered in person to the Manager will be received at his office at the aforementioned address through 4 p.m., p.s.t., on December 10, 1975, or at the Regency West Room of the Hyatt Regency Hotel, 711 S. Hope Street, Los Angeles, California 90012, between the hours of 8 a.m., p.s.t., and 9:30 a.m., p.s.t., on December 11, 1975. Bids may not be modified or withdrawn unless written modification or withdrawal is received by the Manager prior to 9:30 a.m., p.s.t., on December 11, 1975. All bids must be submitted and will be considered in accordance with applicable regulations, including 43 CFR 3300, 3300.1, 3302.1, 3302.3, 3302.4, 3302.5 and 3305. Particular attention is directed to the publication in the FEDERAL REGISTER Vol. 40, No. 191, page 45171, dated October 1, 1975, entitled *Qualified Joint Bidders* which amended 43 CFR 3302.3. Persons who are on a list of restricted joint bidders published in the FEDERAL REGISTER pursuant to that regulation or whose status is determined to be restricted prior to the date of the sale will be disqualified from bidding jointly with others on the list.

3. A separate bid in a sealed envelope must be submitted for each tract. The envelope should be labeled "Sealed Bid for Oil and Gas Lease (Insert number of tract), not to be opened until 10 a.m., p.s.t., December 11, 1975." A suggested bid form is shown in paragraph 15. Bidders must submit with each bid one-fifth of the cash bonus in cash or by cashier's check, bank draft, certified check, or money order, payable to the order of the Bureau of Land Management. Oil payment, overriding royalty, logarithmic or sliding scale bids may not be submitted. No bid for less than a full tract as listed in paragraph 18 will be considered. Bidders are warned against violation of section 1860 in Title 18 U.S.C. prohibiting unlawful combination or intimidation of bidders.

4. Bids submitted on all tracts to be offered at this sale must be on a cash bonus bid basis with a fixed royalty of 16⅔ percent, except for tracts 35–254, 35–261, and 35–262 which must be on a cash bonus bid basis with a fixed royalty of 33⅓ percent. Leases which may be issued will provide for a yearly rental or minimum royalty of $3 per acre or fraction thereof. Companies submitting joint bids must express on the bid form the proportionate interest of each company participating in that joint bid in a percent to a maximum of five decimal places, as well as submit a sworn statement that the bid is not disqualified under 43 CFR 3302.3–4(c).

5. Each bidder must have submitted by 9:30 a.m., p.s.t., December 11, 1975, the certification required by 41 CFR 60–1.7(b) and Executive Order No. 11246 of September 34, 1965, as amended by Executive Order No. 11375, on the Compliance Report Certification Form, 1140–8 (November 1973) and the Affirmative Action Representation Form, Form 1140–7 (December 1971).

6. Tracts being offered for lease may be located on the following official leasing maps:

Outer Continental Shelf, California, Channel Island Area Leasing Maps, 6A, 6B, 6C, 6D, and 6E, a set of 5. These maps may be purchased for $5 per set.

7. All maps and forms referred to above and copies of the lease form referred to in paragraph 12 of this notice without the modifications and stipulations set out in that paragraph may be obtained from the Manager, Pacific Outer Continental Shelf Office, at the above address.

8. *Bid opening.* Bids will be opened on December 11, 1975, beginning at 10 a.m., p.s.t., in the Regency West Room, Hyatt Regency Hotel at the above address. The opening of bids is for the sole purpose of publicly announcing and recording bids received and no bids will be accepted or rejected at that time. If the Department is prohibited for any reason from opening any bid before midnight, December 11, 1975, that bid will be returned unopened to the bidder as soon thereafter as possible.

9. Any cash, checks, drafts or money orders submitted with the bids may be deposited in a suspense account in the Treasury during the period the bids are being considered. Such a deposit does not constitute and shall not be construed as acceptance of any bids on behalf of the United States.

10. *Acceptance or rejection of bids.* No bid for any tract will be accepted and no lease for any tract will be awarded to any bidder unless:

(1) The bidder has complied with all requirements of this notice and applicable regulations;

(2) His bid is the highest valid cash bonus bid; and

(3) The amount of the bid has been determined to be adequate by the United States.

No bid will be considered for acceptance unless it offers a cash bonus in the amount of $25 or more per acre or fraction thereof. The United States reserves the right to reject any bid submitted, including, but not by way of limitation, the right to reject any bid for inadequacy even though the cash bonus bid is in the amount of $25 or more per acre or fraction thereof.

11. The successful bidders for tracts in this sale will be required to execute copies of the lease specified below, pay the balance of the cash bonus bid together with the first year's annual rental and satisfy the bonding requirements set forth in 43 CFR 3304.1 within the time frame provided in 43 CFR 3302.5.

12. *Lease terms and stipulations.* Leases issued as a result of this sale will be on Form 3300–1 (February 1971), as modified in accordance with this paragraph, and will contain one or more of the following stipulations and will exclude the following language from section 3(a)(1), paragraph 3, sentence 2 of Form 3300–1, "* * * and gas used for purposes of production from and operations upon the leased area or unavoidably lost * * *."

Stipulation No. 1. (To apply to all leases resulting from this lease sale).

(a) If the Supervisor, having reason to believe that a site, structure, or object of historical or archeological significance, hereinafter referred to as "cultural resource" may exist in the lease area, shall, within one year from the effective date of this lease, give the lessee written notice that the lessor is invoking the provisions of this stipulation, the lessee shall immediately upon receipt of such notice comply with the following requirements:

Prior to any drilling activity or the construction or placement of any structure for exploration or development on the lease, including, but not limited to, well drilling and pipeline and platform placement, hereinafter referred to as "operation", the lessee shall conduct geophysical surveys to determine the potential existence of any cultural resource that may be affected by such operation. If such geophysical surveys show anomalies that suggest the potential existence of a cultural resource that may be adversely affected by any lease operation, the lessee shall:

(1) relocate the site of such operation so as not to adversely affect the anomaly identified; or (2) establish, to the satisfaction of the Supervisor, on the basis of an archeological survey conducted by a qualified marine archeological surveyor using such survey equipment and techniques as deemed necessary by said marine archeological surveyor, either that such operation will not adversely affect the anomaly identified or that the potential cultural resource suggested by the occurrence of the anomaly does not exist.

All data obtained in the course of any geophysical or archeological surveys conducted pursuant to the provisions hereof shall be submitted to the Supervisor with any application by the lessee for drilling or other activity. After consideration of such data, the Supervisor will prepare a report on his determination regarding the existence of and need for protection of any potential cultural resource, and shall forward such report to the Manager, Pacific OCS Office, Bureau of Land Management, for his review and recommendations. Upon consideration of the recommendations, if any, of the Manager, Pacific OCS Office, the Supervisor will prepare a final report, a copy of which shall be supplied to the lessee. Should the Supervisor determine in his report, contrary to the contentions of the lessee, that the existence of a cultural resource which may be adversely affected by such operation is sufficiently established to warrant protection, the lessee shall take no action that may result in an adverse effect on such cultural resource until the Supervisor has given directions as to its disposition.*

The lessee agrees that, if any site, structure, or object of historical or archeological significance, hereinafter referred to as "cultural resource", should be discovered during the conduct of any operations on the leased area, he shall report immediately such findings to the Supervisor, and make every reasonable effort to preserve and protect the cultural resource from damage until the Supervisor has given directions as to its disposition.

(b) Structures for drilling or production, including pipelines, shall be kept to the minimum necessary for proper exploration, development and production and to the greatest extent consistent therewith, shall be placed so as not to interfere with other significant uses of the Outer Continental Shelf, including commercial fishing. To this end, no structure for drilling or production, including pipelines, may be placed on the Outer Continental Shelf until the Supervisor has found that the structure is necessary for the proper exploration, development, and production of the leased area and that no reasonable alternative placement would cause less interference with other significant uses of the Outer Continental Shelf including commercial fishing. The lessee's exploratory and development plans, filed under 30 CFR 250.34, shall identify the anticipated placement and grouping of necessary structures, including pipelines, showing how such placement and grouping will have the minimum practicable effect on the other significant uses of the Outer Continental Shelf, including commercial fishing.

*Adversely affected sites which may be eligible for inclusion on the *National Register of Historic Places will be handled according* to procedures outlined in 36 CFR Part 800 (1974).

Stipulation No. 2. (To apply to all leases resulting from this lease sale.)

The lessee shall have the pollution containment and removal equipment available as required by OCS Order No. 7 of June 1, 1971, as may be amended. Prior to drilling, the lessee shall demonstrate to the satisfaction of the Area Supervisor, U.S. Geological Survey, that said oil spill containment and removal equipment is adequate and deployable in sufficient time to prevent to the maximum extent possible using the best available technology and all reasonable care, spill damage to Areas of Special Biological Significance (ASBS), marine life refuges and/or ecological reserves which occur in closest proximity to the planned production area(s). In the event of a significant oil spill as defined by OCS Order No. 7, or an oil spill of any size or quantity which cannot be immediately controlled, the operator shall immediately notify the Supervisor and deploy the appropriate equipment to the site of the oil spill, unless, because of weather and attendant safety of personnel the Supervisor shall modify this requirement.

Stipulation No. 3. (To apply to all leases resulting from this lease sale.)

(a) Should any new areas of special biological significance be discovered within two (2) years of the lease sale or as a result of BLM Baseline Studies, whichever terminates first, the lease block(s) or portion(s) thereof containing these areas and appropriate buffer zones shall be explored and developed using the best available technology and all reasonable care, to prevent, to the maximum extent possible, detrimental impact upon such areas. The term "best available technology" as used in this paragraph means technology the use of which by the lessee is practical and economically feasible, as determined by the Supervisor.

(b) If within the above specified time limit, the Supervisor has reason to believe that such a site of special biological significance may exist in the lease area, (see 3a) he shall give the lessee written notice that the lessor is invoking the provisions of this stipulation, the lessee shall immediately upon receipt of such notice comply with the following requirements: prior to any drilling activity or the construction or placement of any structure for exploration or development on lease areas including, but not limited to, well drilling and pipeline and platform placement, hereinafter referred to as "operation", the lessee shall conduct site specific surveys, as approved by the Supervisor, to determine the potential existence of any unique biological resource that may be adversely affected by any lease operation. If such surveys show anomalies that suggest the potential existence of a unique biological resource that may be adversely affected by any lease operation, the lessee shall:

(1) relocate the site of such operation so as not to adversely affect the anomaly identified; or (2) establish, to the satisfaction of the Supervisor, on the basis of the site-specific survey, either that such operation will not adversely affect the anomaly identified or that the potential biological resource suggested by the occurrence of the anomaly does not exist.

All data obtained in the course of any biological surveys conducted pursuant to the provisions hereof shall be submitted to the Supervisor with any application by the lessee for drilling or other activity, with a copy to the Manager, Pacific OCS Office. The Supervisor will prepare a final report, a copy of which shall be supplied to the lessee. Should the Supervisor determine in his report, contrary to the contentions of the lessee, that the existence of a biological resource which may be adversely affected by such operations is sufficiently established to warrant protection, the lessee shall take no action that may result in an adverse effect on such resource until the Supervisor has given the lessee directions with respect to its disposition.

(c) The lessee agrees that, if any site, strucure, or object of biological significance should be discovered during the conduct of any operations on the leased area, he shall report immediately such findings to the Supervisor, and make every reasonable effort to preserve and protect the resource from damage until the Supervisor has given the lessee directions with respect to its disposition.

Stipulation No. 4. (In order to indemnify and save harmless the United States, the following stipulation will apply to leases resulting from this lease sale in tract numbers 35–21, 35–25 thru 35–60 in the Santa Rosa-Cortes North area, tract numbers 35–61 thru 35–171 in the Santa Rosa-Cortes South Area, and tract numbers 35–179, 35–185, 35–196 and 35–203 in the Santa Barbara-Santa Catalina area).

Whether or not compensation for such damage or injury might be due under a theory of strict or absolute liability or otherwise, the lessee assumes all risks of damage or injury to persons or property, which occurs in, on, or above the Outer Continental Shelf, to any person or persons or to any property of any person or persons who are agents, employees or invitees of the lessee, its agents, independent contractors or subcontractors doing business with the lessee in connection with any activities being performed by the lessee in, on, or above the Outer Continental Shelf, if such injury or damage to such person or property occurs by reason of the activities of any agency of the U.S. government, its contractors or subcontractors, or any of their officers, agents or employees, being conducted as a part of, or in connection with, the programs and activities of the Space and Missile Test Center (SAMTEC), the Pacific Missile Test Center (PMTC), or other appropriate military agency.

The lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault, of the United States, its contractors or subcontractors, or any of their officers, agents, or employees. The lessee further agrees to indemnify and save harmless the United States against all claims for loss, damage, or injury sustained by the lessee, and to indemnify and save harmless the United States against, all claims for loss, damage, or injury sustained by the agents, employees, or invitees of the lessee, its agents or any independent contractors or subcontractors doing business with the lessee of the aforementioned military installations and agencies, whether the same be caused in whole or in part by the negligence or fault of the United States, its contractors, or subcontractors, or any of their officers, agents, or employees and whether such claims might be sustained under theories of strict or absolute liability or otherwise.

Stipulation No. 5. (The following stipulation will apply to all leases resulting from this lease sale in tract numbers 35–21, 35–25 thru 35–60 in the Santa Rosa Cortes North area, tract numbers 35–61 thru 35–171 in the Santa Rosa-Cortes South area and tract numbers 35–179, 35–185, 35–196, and 35–203 in the Santa Barbara-Santa Catalina area).

V 40 215 NOV 6 75 XUM

(a) The lessee agrees that when operating or causing to be operating on its behalf boat or aircraft traffic into individual designated warning areas, the lessee shall coordinate and comply with instructions from the Commander of the appropriate onshore military installation i.e., the Space and Missile Test Center (SAMTEC), the Pacific Missile Test Center (PMTC), or other appropriate military agency, when utilizing an individual designated warning area *prior to commencing such traffic*. Such coordination and instruction will provide for positive control of boats and aircraft operating into the warning areas at all times.

(b) The lessee, recognizing that mineral explorations and exploitation and recovery operations on the leased areas of submerged lands can impede tactical military operations, hereby recognizes *and agrees* that the United States reserves and has the right to temporarily suspend operations of the lessee under this lease in the interests of national security requirements. Such temporary suspension of operations, including the evacuation of personnel, and appropriate sheltering of personnel not evacuated, (an appropriate shelter shall mean the protection of all lessee personnel for the entire duration of any Department of Defense activity from flying or falling objects or substances) will come into effect upon the order of the Commander, Space and Missile Test Center (SAMTEC) or his authorized designee, the Pacific Missile Test Center (PMTC), or higher authority, that national security interests necessitate such action. It is understood that any temporary suspension of operations ordered by said official may not exceed seventy-two hours, however, any suspension may be extended by order of the Secretary of Defense. During such periods equipment may remain in place.

(c) The lessee agrees to control his own electromagnetic emissions and those of his agents, employees, invitees, independent contractors or subcontractors emanating from individual designated defense warning areas in accordance with requirements specified by the Commander of the appropriate onshore military installation i.e., the Space and Missile Test Center (SAMTEC), and the Pacific Missile Test Center (PMTC), or other appropriate military agency, to the degree necessary to prevent damage to, or unacceptable interference with, Department of Defense flight, testing or operational activities conducted within individual designated warning areas. Necessary monitoring, control, and coordination with the lessee, his agents, employees, invitees, independent contractors or subcontractors, will be effected by the Commander of the appropriate onshore military installation conducting operations in the particular warning area: Provided, however, that control of such electromagnetic emissions shall permit at least one continuous channel of communication between a lessee, its agents, employees, invitees, independent contractors or subcontractors and onshore facilities.

Stipulation No. 6. (Portions of Tanner Bank and Cortes Bank are considered to be unique biological areas. To protect them the following stipulations shall apply to all leases resulting from this lease sale in tracts numbered 35–104, 35–105, 35–114, 35–115, 35–156, 35–157, 35–159, and 35–160 in the Santa Rosa-Cortes South area).

The Lessee Agrees:

(a) Operations in the zone up to 5 miles from the 80 meter isobath around these unique biological areas are restricted as follows: (1) Drill cuttings and drilling muds must be disposed of by barging the materials a minimum of ten miles from any 80 meter isobath surrounding areas of special biological significance. Disposal sites must be approved by the Area Supervisor USGS and must have been coordinated with BLM and Fish and Wildlife representatives. (2) Formation waters must be analyzed for salinity, heavy metals and hydrocarbons. Toxicity tests must be performed. A decision, based upon these analyses and upon the volume of discharge, shall then be made by the Area Supervisor USGS as to whether the formation waters should be re-injected or discharged into the sea. If there is any question regarding the effect of the formation water upon local marine life, the formation water shall be re-injected. The Area Supervisor may also elect to discharge the formation water, but require the use of diffusers.

(b) No garbage, untreated sewage, or other solid waste shall be disposed from platforms, vessels (workboats, crew-boats, supply boats, pipe-laying vessels) involved with exploration and development operations within the area on each bank bounded by a line five miles from the 80 meter isobath around these unique biological areas.

(c) No drilling permits will be issued by the Supervisor until he has found that the lessee's exploration and development plan, filed under 30 CFR 250.34 is adequate. As a part of the development plan a monitoring program must be included. The monitoring program will be designed to assess the effects of oil and gas exploration and development operations on the viability of these areas. The program will be designed, performed and financed by BLM, with the aid of qualified, independent scientists when necessary. The monitoring team will be available at the time OCS operations in the area begin. The team will submit its findings on a regular basis, or immediately in the case of imminent danger. If OCS operations are shown to be adversely affecting the unique areas, the lessee shall immediately cease or modify his operations to halt or mitigate such adverse effect.

Stipulation No. 7. (The following stipulation will apply to all leases resulting from this lease sale in tract numbers 35–243 thru 35–297 in the San Pedro Bay area.)

The lessee agrees that in order to control any oil spilled as a result of lease operations from entering Anaheim and Newport Bays, the best available technology to control such oil shall be used and shall be available on all fixed or mobile structures located on the lease or similar safeguards shall be available as approved by the supervisor.

Stipulation No. 8. (The following stipulation shall apply to leases resulting from this lease sale on tract numbers 35–21, and 35–25 thru 35–28 in the Santa Rosa-Cortes North Area.)

The lessee agrees that in order to control any oil spilled as a result of lease operations from entering on San Miguel, Santa Rosa and Santa Cruz islands, the best available technology to control such oil shall be used and shall be available on all fixed or mobile structures located on the lease or similar safeguards shall be available as approved by the supervisor.

Stipulation No. 9. (The following stipulation shall apply to leases resulting from this lease sale on tract numbers 35–180, 35–181, 35–182, 35–185, 35–186, 35–187, 35–188, 35–196, 35–197, 35–203, and 35–204 in the Santa Barbara-Catalina Area.)

The lessee agrees that in order to control any oil spilled as a result of lease operations from entering on Santa Barbara island, the best available technology to control such oil shall be used and shall be available on all fixed or mobile structures located on the lease or similar safeguards shall be available as approved by the supervisor.

Stipulation No. 10. (This stipulation will apply to all leases resulting from this lease sale in tract numbers 35–243 thru 35–297 in the San Pedro Bay area.)

In the approval of exploration and development plans, including the installation of platforms, the Supervisor shall require the lessee to camouflage all structures by appropriate painting.

Tract Description

13. The tracts offered for bid are as follows:

NOTE: There is a hiatus in the numbers of the tracts listed. Some of the tracts identified in the final EIS are not included in this notice.

14. Some of the tracts may fall in prohibited dumping areas and in Fairways, precautionary zones, traffic separation schemes or in areas where application is pending for a shipping safety fairway. For the location of those areas and operational restrictions which will or might be imposed, the District Engineer, U.S. Army Engineer District, Los Angeles, Corps of Engineers should be consulted.

Suggested Bid Form

15. It is suggested that bidders submit their bids in the following form:

V 40 N 215 NOV 6 75 XUM

OIL AND GAS BID

The following bid is submitted for an oil and gas lease on the land of the Outer Continental Shelf specified below:

Tract No:	Total amount bid	Amount per acre	Amount of cash bonus submitted with bid

Proportionate Interest of Company Submitting Bid

Qualification File No. _____ _____ % _____
Company

Address

Signature
(Please type signer's name under signature)

NOTE: In the case of joint bids, each joint bidder must execute the following statement before a notary public:

I hereby certify that _____ (entity submitting bid) is not disqualified from joint bidding under 43 CFR 3302.3-4(c).

Signature

Sworn to and subscribed before me this _____ day of _____ 19__.

Notary Public

State of _____

(County) of _____

16. *Withdrawal of Tracts.* The United States reserves the right to withdraw any tract from this sale prior to the issuance of a written acceptance of a bid for that tract.

CURT BERKLUND,
Director,
Bureau of Land Management.

Approved: November 3, 1975.

Fish and Wildlife Service

UNIVERSITY OF CALIFORNIA, DEPARTMENT OF BIOLOGY

Notice of Receipt of Amendments to Marine Mammal Permit

A permit authorizing capture and tagging of sea otters was issued to the University of California, Department of Biology, Los Angeles, California, on June 23, 1975, pursuant to the Marine Mammal Protection Act of 1972. A notice containing the application for the permit was published in the FEDERAL REGISTER on April 7, 1975 (40 FR 15410–11) soliciting public comments for a period of 30 days. A notice of the issuance of the permit was published on July 3, 1975 (40 FR 28110–11).

Thomas R. Laughlin, M.A., of the University of California, Department of Biology, has submitted a request for significant amendments to the permit. Published herewith is a copy of the terms of the permit, and the request for amendments. This request is being considered pursuant to § 13.23 of Fish and Wildlife regulations, Title 50 Code of Federal Regulations (see 39 FR 1162).

9. TYPE OF PERMIT
MARINE MAMMAL

10. LOCATION WHERE AUTHORIZED ACTIVITY MAY BE CONDUCTED
Pacific coastal waters between Marina and Big Sur, California

11. CONDITIONS AND AUTHORIZATIONS

A. GENERAL CONDITIONS SET OUT IN SUBPART D OF 50 CFR 13, AND SPECIFIC CONDITIONS CONTAINED IN FEDERAL REGULATIONS CITED IN BLOCK #2 ABOVE, ARE HEREBY MADE A PART OF THIS PERMIT. ALL ACTIVITIES AUTHORIZED HEREIN MUST BE CARRIED OUT IN ACCORD WITH AND FOR THE PURPOSES DESCRIBED IN THE APPLICATION SUBMITTED. CONTINUED VALIDITY, OR RENEWAL, OF THIS PERMIT IS SUBJECT TO COMPLETE AND TIMELY COMPLIANCE WITH ALL APPLICABLE CONDITIONS, INCLUDING THE FILING OF ALL REQUIRED INFORMATION AND REPORTS.

B. THE VALIDITY OF THIS PERMIT IS ALSO CONDITIONED UPON STRICT OBSERVANCE OF ALL APPLICABLE FOREIGN, STATE, LOCAL OR OTHER FEDERAL LAW.

C. VALID FOR USE BY PERMITTEE NAMED ABOVE and any person designated in writing.

D. Authorized to capture and tag no more than 10 sea otters, to attach telemetry equipment to no more than 3 of these 10 sea otters, and release them all at the capture site. The project is to be conducted in conjunction with personnel of the Sea Otter & Walrus Project, 4454 Business Park Boulevard, Anchorage, Alaska 99503 telephone 907-265-3261.

E. Authorized to possess carcasses of sea otters killed accidentally or found dead. They will be delivered to the California Game & Fish Department to be used for scientific purposes. A receipt will be obtained and retained for each.

F. No more than two (2) mortalities shall be permitted to occur in the course of this research. Should such mortality occur, research activities shall be terminated pending determination by the Director on the continuance of the research.

G. Person(s) engaged in authorized activity must have permit or copy in possession.

H. The U.S. Fish and Wildlife Service office shall be notified seven days before commencing the authorized activity. The death of any of the sea otters shall be reported within 24 hours to the next office. Address - Special Agent in Charge; U.S. Fish and Wildlife Service; 2800 Cottage Way, Rm. E-1924; Sacramento, California 95825; telephone 916-484-4748.

I. Maintain records as required by 50 CFR 12.46.

☒ ADDITIONAL CONDITIONS AND AUTHORIZATIONS ON REVERSE ALSO APPLY

12. REPORTING REQUIREMENTS
A report as required in 16 USC 1374 of the activities conducted hereunder shall be made to the Director (FWS/LE), U.S. Fish & Wildlife Service POB 19183, Wash., D.C. 20036 within 60 days of the end of the study or permit expiration.

ISSUED BY /s/ Lynn E. Frazier
TITLE Chief, Division of Law Enforcement
DATE JUN 23 1975

DEPARTMENT OF BIOLOGY
Los Angeles, Calif., October 3, 1975.

DIRECTOR, FISH AND WILDLIFE SERVICE,
DEPARTMENT OF THE INTERIOR,
Washington, D.C.

DEAR SIRS: This is a request for amendment to permit number FWS/LE PRT 9-20-c issued to the Department of Biology, University of California, Los Angeles, for the capture and tagging of sea otters (*Enhydra lutris*) in California. The permit issued authorized the capture and tagging of ten sea otters, to attach telemetry equipment to no more than three of these ten sea otters, and to release them all at the capture site. We request the amendment to allow a maximum total of 30 more animals to be captured and that a minimum of 12 more animals to be radio tagged. This would increase the total number allowed under the permit from ten to 40 animals and allow radio transmitters on 15 rather than three animals. The permit should also allow capture of animals from San Louis Obisbo, Monterey, and Santa Cruz counties.

We feel that the permit amendment is justified for the following reasons. Our study has been very successful to this point. We have been able to determine, with a great amount of certainty, the 24-hour activity cycle of the animals fixed with radio collars. These studies also elucidate the nocturnal feeding strategies of sea otters. We have shown that sea otters do feed at night and have been able to quantitatively compare the amount of time spent feeding at night versus the day. Concomitantly, we have been able to monitor home range and intraspecies foraging patterns. The radio tag collars do not appear to have any detrimental effect on the sea otters, although we have not been able to closely inspect any of these animals. Sea otter number 24 lost its radio collar after four days and has been resighted numerous times since then and no cuts or abrasions were seen on the neck.

The flipper-tagging technique has also been quite effective. Each flipper tag is individually color coded allowing for precise identification of individual sea otters in the field (tag numbers are usually too difficult to discern). Such identification has allowed an observer to follow a single sea otter through a behavioral interaction (i.e., play, copulation, etc.). This technique has also facilitated documentation of site preference and movements of individual sea otters.

We feel that our methods and techniques have been very effective. There have not been any deaths or injuries caused as a result of our work and the sea otters do not appear to be severely affected by the tagging and capture operations. Every sea otter captured and tagged under this permit has been resighted for at least 18 days post capture and some for as many as 55 days. Most of the resightings have occurred in the area of capture. Thus, the technique does not have adverse effects on the sea otters and does not force them from preferred areas.

Unfortunately the results so far obtained are too scanty. More animals must be captured in order to sufficiently elucidate sea otter behavior. We have tagged nine sea otters; all but one have been males. Radio tags were placed on one male and one female. Obviously this is a very small sample size. More females (and males) must be sampled as well as more animals from each age class in order to obtain a good representation of the types of behavior patterns being investigated in this study. It is for this reason that we initially requested to tag 40 animals and radio tag 15. The work of Dr. Siniff in Alaska and ours in California indicate that radio telemetry is a viable tool in elucidating sea otter biology and that such a technique is not injurious to the animals.

Thank you very much for your time and consideration in this matter. If you require any data to support statements put forth in this request, please feel free to ask.

Sincerely,

THOMAS R. LOUGHLIN, M.A.

In keeping with the spirit of the Marine Mammal Protection Act of 1972, this Notice is being published to allow public comment on the request for amendments. Interested persons may comment on these amendments by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before December 8, 1975, will be considered.

Dated: October 31, 1975.

LOREN K. PARCHER,
Acting Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Notice of Designation Number A268]

TEXAS

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Donley County, Texas, as a result of a tornado May 28, 1975; excessive rainfall and hailstorms

V 40 215 NOV 6 75 XUM

May 28 and June 16, 21 and 23, 1975; flooding May 28 and June 23, 1975; and windstorms June 16, 18, 19 and 25, 1975.

Therefore, the Secretary has designated this area as eligible for Emergency loans, pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Dolph Briscoe that such designation be made.

Applications for Emergency loans must be received by this Department no later than December 29, 1975, for physical losses and July 29, 1976, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 3rd day of November, 1975.

FRANK W. NAYLOR, JR.,
Acting Administrator,
Farmers Home Administration.

[FR Doc.75-29897 Filed 11-5-75;8:45 am]

[Notice of Designation Number A116]

WISCONSIN

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Wisconsin counties as a result of drought June 1 through July 31, 1974:

Burnett Washburn

Therefore, the Secretary has designated these areas as eligible for Emergency loans, pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Patrick J. Lucey that such designation be made.

Applications for Emergency loans must be received by this Department no later than December 8, 1975, for physical losses and July 9, 1976, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated areas makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 3rd day of November 1975.

FRANK W. NAYLOR, JR.,
Acting Administrator,
Farmers Home Administration.

Forest Service

MARBLE SKI AREA, INC.

Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement about the Marble Ski Area, Inc. proposed use of the White River National Forest. The Forest Service report number is USDA–FS–R2–FES (Adm) FS–73–58.

The environmental statement concerns a proposal not to issue a special use permit pursuant to the application of the Marble Ski Area, Inc., to expand their existing facilities onto 600 acres of the White River National Forest within Gunnison County, Colorado.

The draft environmental statement was transmitted to CEQ on April 5, 1973.

This final environmental statement was transmitted to CEQ on October 31, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, So. Agriculture Bldg., Room 3230, 12th St. & Independence Ave., SW., Washington, D.C. 20250.
USDA, Forest Service, 11177 West 8th Avenue, P.O. Box 25127, Denver, Colorado 80225.
USDA, Forest Service, White River National Forest, Old Federal Building, P.O. Box 948, Glenwood Springs, Colorado 81601.

A limited number of single copies are available upon request to Thomas C. Evans, Forest Supervisor, USDA Forest Service, White River National Forest, Old Federal Building, P.O. Box 948, Glenwood Springs, Colorado 81601.

Copies of the environmental statement have been sent to various Federal, state, and local agencies as outlined in the CEQ guidelines.

CLAYTON B. PIERCE,
Director, Multiple Use and Environmental Quality Coordination.

OCTOBER 31, 1975.

MEDICINE BOW NATIONAL FOREST GRAZING ADVISORY BOARD

Notice of Meeting

The Medicine Bow National Forest Grazing Advisory Board will meet at 10 a.m., December 2, 1975, at the Supervisor's Office, 605 Skyline Drive, Laramie, Wyoming 82070.

The following topics are planned for discussion:

1. Land Planning on the Medicine Bow National Forest.
2. The allocation of available grazing capacity.
3. Follow-up on an outline for coordinated range allotment plans.
4. Discussion of changes in the Range Management section of the Forest Service Manual.

Additional items may be discussed if time allows.

The meeting will be open to the public. Persons who wish to attend, should notify Medicine Bow National Forest at 605 Skyline Drive, Laramie, Wyoming 82070, phone 745–7308 area code 307. Written statements may be filed with the committee before or after the meeting.

ALAN R. DUHNKRACK,
Forest Supervisor.

OCTOBER 21, 1975.

WINEMA NATIONAL FOREST GRAZING ADVISORY BOARD

Notice of Meeting

The Winema National Forest Grazing Advisory Board will meet at 1 p.m. on December 9, 1975, second floor, Post Office Building, 7th and Walnut, Klamath Falls, Oregon 97601. The purpose of this meeting is 1975 grazing report, problems, budgeting, review of proposed manual amendment, 10-year program, and other items as needed.

The meeting will be open to the public. Persons who wish to attend should notify Robert S. Snoich, Post Office Building. 882–7761. Written statements may be filed with the committee before or after the meeting.

The committee has established the following rules for public participation: Public members may speak up at any time.

ROBERT J. CHADWICK,
Forest Supervisor.

Soil Conservation Service

CASSVILLE FLOOD PREVENTION RESOURCE CONSERVATION AND DEVELOPMENT (RC&D) MEASURE

Availability of Negative Declaration

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; part 1500.6(e) of the Council on Environmental Quality Guidelines (38 FR 20550) August 1, 1973; and part 650.8(b)(3) of the Soil Conservation Service Guidelines (39 FR 19651) June 3, 1974; the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Cassville Flood Prevention Resource Conservation and Development Measure, Barry County, Missouri.

The environmental assessment of this federal action indicates that the measure will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with the measure. As a result of these findings, Mr. J. Vernon Martin, State Conservationist, Soil Conservation Service, USDA, P.O. Box 459, Terrace Level, Parkade Plaza, Columbia, Missouri 65201, has determined that the preparation and review of an environmental impact statement is not needed for this measure.

The measure concerns a plan for watershed protection and flood prevention. The planned works of improvement include conservation land treatment supplemented by two single purpose floodwater retarding structures.

The environmental assessment file is available for inspection during regular working hours at the following location:

Soil Conservation Service, USDA, Terrace Level, Parkade Plaza, 601 Business Loop 70 West, Columbia, Missouri 65201.

The negative declaration is available for single copy requests at the above location.

No administrative action on implementation of the proposal will be taken until November 21, 1975.

(Catalog of Federal Domestic Assistance Program No. 10.901, National Archives References Services.)

Date: October 29, 1975.

VICTOR H. BARRY, JR.,
Deputy Administrator for Field Services Soil Conservation Service.

[FR Doc.75-29819 Filed 11-5-75;8:45 am]

LOWER SAN SABA RIVER (MIDDLE COLORADO) WATERSHED PROJECT

Availability of Negative Declaration

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; part 1500.6(e) of the Council on Environmental Quality Guidelines (38 FR 20550) August 1, 1973; and part 650.8(b)(3) of the Soil Conservation Service Guidelines (39 FR 19651) June 3, 1974; the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Lower San Saba River (Middle Colorado) Watershed Project, McCulloch and San Saba Counties, Texas.

The environmental assessment of this federal action indicates that the project will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with the project. As a result of these fidings, Mr. Edward E. Thomas, State Conservationist, Soil Conservation Service, USDA, First National Bank Building, Temple, Texas 76501, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for watershed protection from flood prevention. The remaining planned works of improvement as described in the negative declaration include conservation land treatment supplemented by one single purpose floodwater retarding structure.

The environmental assessment file is available for inspection during regular working hours at the following location:

Soil Conservation Service, USDA, First National Bank Building, Temple, Texas 76501.

Requests for the negative declaration should be sent to the above address.

No administrative action on implementation of the proposal will be taken until November 21, 1975.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services.)

Dated: October 28, 1975.

JOSEPH W. HAAS,
Deputy Administrator for Water Resources, Soil Conservation Service.

CHEMICAL/BIOLOGICAL INFORMATION-HANDLING REVIEW COMMITTEE

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Chemical/Biological Information-Handling Review Committee, Division of Research Resources, 8 p.m. to 10:30 p.m., December 10, 1975, at the Commodore Hotel, 109 E. 42nd Street, New York City, N.Y., and 9 a.m. to adjournment, December 11, 1975, in Room 205, Basic Sciences Building, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York City, N.Y. This meeting will be open to the public from 9 p.m. to 10:30 p.m. on December 10 for a discussion of the Chemical/Biological Information-Handling Program plans, and for the entire meeting on December 11 for a presentation by the Mount Sinai staff on scientific applications of the PROPHET System. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552(b)(5) and 552(b)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 8 p.m. to 9 p.m., December 10, for the review of research prospectuses submitted by organizations seeking access to PROPHET System services. The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on these individual research prospectuses which contain information of a proprietary or confidential nature, including research protocols and other technical information on the subject of applications of computers to research in pharmacology and personal information concerning individuals associated with the prospectuses.

Mr. James Augustine, Chief, Office of Science and Health Reports, Division of Research Resources, Bldg. 31, Rm. 5B–39, Bethesda, Maryland 20014, telephone Area Code 301, 496–5545, will provide summaries of meetings and rosters of committee members.

Dr. William F. Raub, Program Director, Chemical/Biological Information-Handling Program, Division of Research Resources, Bldg. 31, Rm. 6A–04, Bethesda, Maryland 20014, telephone Area Code 301, 496–4903, will furnish substantive program information.

Office of Education

GRADUATE AND UNDERGRADUATE INTERNATIONAL STUDIES PROGRAMS

Notice of Closing Date for Receipt of Initial Applications

Notice is hereby given that pursuant to the authority contained in section 601(a) of Title VI of the National Defense Education Act of 1958, as amended (20 U.S.C. 511(a)), applications are being accepted from institutions of higher education for initial grants under the Graduate and Undergraduate International Studies Programs. (A separate Notice of Closing Date will be published for applications for continuation grants.)

Applications for initial grants must be received by the U.S. Office of Education Application Control Center on or before December 15, 1975.

A. *Applications sent by mail.*

An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue, SW., Washington, D.C. 20202, Attention: 13.435. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than December 10, 1975, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail room in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered applications.*

An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8 a.m. and 4 p.m. Washington, D.C. time, except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4 p.m. on the closing date.

C. *Program information and forms.*

Information and application forms may be obtained from the Language and Area Centers Program, Bureau of Postsecondary Education, U.S. Office of Education, Room 3671, 7th and D Streets, SW., Washington, D.C. 20202.

D. *Applicable regulations.*

The regulations applicable to this program include the Office of Education General Provisions Regulations (45 CFR Part 100a) and the criteria relating to the graduate and undergraduate international studies programs, published in this volume of the FEDERAL REGISTER.

(Catalog of Federal Domestic Assistance Number 13.435; Higher Education—Language and Area Centers Program)

Dated: September 6, 1975.

T. H. BELL,
U.S. Commissioner of Education.

GRADUATE AND UNDERGRADUATE INTERNATIONAL STUDIES PROGRAMS

Notice of Proposed Criteria for Funding of Applications

Pursuant to the authority contained in section 601(a) of the National Defense Education Act of 1958, as amended, (20 U.S.C. 511(a)), notice is hereby given that the Commissioner of Education with the approval of the Secretary of Health, Education and Welfare, proposes to establish funding criteria set forth below to evaluate applications submitted by institutions of higher education for grants for graduate and undergraduate international studies programs.

Section 601(a) authorizes the Commissioner to make grants to institutions of higher education to establish, equip and operate graduate and undergraduate programs in international studies and the international aspects of professional and other fields of study.

The criteria read as follows:

In addition to evaluation on the basis of criteria found in the Office of Education General Provisions at 45 CFR 100a.26(b) (38 FR 30654, 30664, November 6, 1973) the Commissioner will further evaluate applications for Federal support to graduate and undergraduate international studies programs in accordance with the following criteria.

1. *Graduate Programs.* (a) The international nature, contemporary relevance, and interdisciplinary and comparative dimensions of the program;

(b) The extent to which provision is made for evaluation of the effect of the program on the students receiving training, the campus, the community, local teachers, and neighboring institutions of higher education;

(c) The institution's capability to provide foreign language study as a part of each student's international studies experience;

(d) The commitment of the institution toward the establishment and operation of the programs as evidenced by the thoroughness of preparation of the program, maximum use of available resources including institutional financial support, and the overall quality of the program;

(e) The probability that a clearly improved educational experience will be available at the institution for prospective students within two years and that the program will be continued after Federal support is withdrawn.

(20 U.S.C. 511(a)).

2. *Undergraduate Programs.* (a) The extent to which provisions are made for evaluation of the effect of the program on students receiving training, the campus, the community, local teachers, and neighboring institutions of higher education.

(b) The commitment of the institution toward the establishment and operation of the program as evidenced by the thoroughness of preparation of the program, maximum use of available resources including institutional financial support and the overall quality of the program.

(c) The institution's capability to provide foreign language study as a part of each student's international studies experience.

(d) The probability that a clearly improved educational experience will be available at the institution for prospective students within two years and that the program will be continued after Federal support is withdrawn.

(20 U.S.C. 511(a)).

Interested persons are invited to submitted written comments, suggestions, or objections regarding the proposed funding criteria to the Language and Area Centers Program, Bureau of Postsecondary Education, U.S. Office of Education, 7th and D Streets, SW., Room 3671, Regional Office Building Three, Washington, D.C. 20202. Comments received in response to this notice will be available for public inspection at the above office on Mondays through Fridays between 8:30 a.m. and 4:30 p.m.

All relevant material must be received on or before December 8, 1975.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A-107.

(Catalog of Federal Domestic Assistance Program: 13.435 Foreign Language and Area Studies—Centers)

Dated: September 10, 1975.

DUANE J. MATTHEIS,
Acting U.S. Commissioner of Education.

Approved: October 30, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

VOCATIONAL EDUCATION CURRICULUM

Notice of Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in Section 191 of Part I of the Vocational Education Act of 1963, as amended, 20 U.S.C. 1391, applications are being accepted for four vocational education grant awards for the fiscal year 1976.

Applications must be received by the U.S. Office of Education Application Control Center on or before December 10, 1975.

A. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Washington, D.C. 20202; Attention: 13.496. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than December 5, 1975, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered applications.* An application to be hand delivered must be delivered to the Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th & D Streets, SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8 a.m. and 4 p.m. Washington, D.C. time except Saturday, Sunday, or Federal holiday. Applications will not be accepted after 4 p.m. on the closing date.

C. *Program information and forms.* Information and application forms may be obtained from the Division of Research and Demonstration, Bureau of Occupational and Adult Education, Office of Education, Room 5034, 7th & D Streets, SW., Washington, D.C. 20202.

D. *Applicable regulations.* The regulations applicable to this program include the Office of Education General Provisions Regulations (45 CFR 100a) published in the FEDERAL REGISTER on November 6, 1973 at 38 FR 30654 and the Vocational Education Regulations, Parts C, D, and I (45 CFR Part 103) published in the FEDERAL REGISTER on August 15, 1974 at 39 FR 29361, and the criteria for fiscal year 1976 published simultaneously herewith.

Social Security Administration

SUPPLEMENTAL SECURITY INCOME STUDY GROUP

Meeting

Notice is hereby given pursuant to Pub. L. 92-463, that the SSI Study Group has cancelled the meeting scheduled for December 18 and 19, 1975 and scheduled a meeting for November 24 and 25 from 9 a.m. to 5 p.m. in Room G-10-A East Building, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland. The meeting is open to the public.

Further information on the Study Group may be obtained from Nelson Sabatini, Executive Secretary of the Study Group, Room 960 Altmeyer Building, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (301) 594-2330. Members of the public planning to attend should send written notice of intent to the Executive Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

AIR TRAFFIC CONTROL TOWER

Notice of Commissioning

Notice is hereby given that on November 4, 1975, the Airport Traffic Control Tower at the Williamson County Airport, Marion, Illinois, will be commissioned as an FAA facility. This information will be reflected in the FAA Organization Statement the next time it is issued. Communications to the tower should be as follows:

Federal Aviation Administration, Airport Traffic Control Tower, Fourth Floor, Williamson County Airport, Marion, Illinois 62959.

It has been determined that good cause exists for publication of this notice in less than 30 days prior to the commissioning date.

(Section 313(a), 72 Stat. 752; 49 U.S.C. 1354) and Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c))

Issued in Des Plaines, Illinois, on October 29, 1975.

JOHN M. CYROCKI,
Director, Great Lakes Region.

[FR Doc.75-29800 Filed 11-5-75;8:45 am]

AIR TRAFFIC PROCEDURES ADVISORY COMMITTEE

Notice of Establishment

Notice is hereby given of the establishment of the Air Traffic Procedures Advisory Committee. The Federal Aviation Administration is the sponsor of the committee, and the membership includes representatives from the Federal Aviation Administration, U.S. Army, U.S. Navy, U.S. Air Force, Aircraft Owners and Pilots Association, Air Line Pilots Association, Allied Pilots Association, Air Transport Association of America, Air Traffic Control Association, National Air Carriers Association; National Air Transportation Associations, Inc., National Business Aircraft Association, National Pilots Association, and Professional Air Traffic Controllers Organization. The committee will review present air traffic control procedures and practices and make recommendations to the Federal Aviation Administration for the standardization, clarification, and upgrading of terminology and procedures.

The Secretary of Transportation has determined that the formation and use of the Air Traffic Procedures Advisory Committee are necessary in the public interest in connection with the performance of duties imposed on the Federal Aviation Administration by law. Meetings of the committee will be open to the public.

Issued in Washington, D.C. on October 31, 1975.

RAYMOND G. BELANGER,
Director, Air Traffic Service.

FIELD OFFICE

Notice of Relocation

Notice is hereby given that effective November 1, 1975, the Air Transportation Security Field Office (ATSFO) at Tucson International Airport, Tucson, Arizona, will be relocated to the Sky Harbor International Airport, Phoenix, Arizona. Normal ATSFO services to airports throughout Arizona will continue unchanged.

[Section 313(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a)).]

Issued in Los Angeles, California on October 22, 1975.

ROBERT H. STANTON,
Director, Western Region.

Coast Guard

[CGD 75-209]

SOUTHERN PACIFIC TRANSPORTATION CO.

Notice of Public Hearing Concerning Proposed Bridge Alteration

Notice is hereby given that a public hearing regarding the Southern Pacific Transportation Company bridge across the Gulf Intracoastal Waterway, 58.9 miles west of Harvey Lock, at Houma, Louisiana, will be held on Wednesday, 10 December 1975, at 10 a.m. at the Municipal Auditorium, 880 Verret Street, Houma, Louisiana. This hearing is being held under the authority of Section 3 of the Act of June 21, 1940 (Truman-Hobbs Act).

The existing bridge, which has a swing span, provides approximately 86 feet of horizontal clearance, measured normal

V 40 215
NOV 6 75
XUM

to the channel axis, in each of the two draws. A number of complaints has been received alleging that the bridge is unreasonably obstructive to navigation. The purpose of the hearing, is to determine whether alteration is needed, and if so, what alteration is required having due regard for the necessity of free, easy and unobstructed navigation upon the waterway. The needs of rail traffic will also be considered.

Public comments, views, and data are required for ascertaining whether the bridge unreasonably obstructs navigation, whether vessels have unreasonable difficulty in passing through the bridge, the changes necessary to render navigation through or under the bridge reasonably free and unobstructed, the character and amount of commerce affected, whether the commerce affected is sufficient to justify alteration of the bridge, and the impact of the alteration, if made, upon the quality of the human environment.

Any person who wishes to appear and be heard at this public hearing may do so. Persons planning to appear and be heard are requested to notify the Commander, Eighth Coast Guard District, Customhouse, New Orleans, Louisiana 70130, any time prior to the hearing indicating the amount of time required. Depending upon the number of scheduled statements, it may be necessary to limit the amount of time allocated to each person. Limitations of time allocated, if required, will be announced at the beginning of the hearing. Written statements and exhibits may be submitted in place of, or in addition to oral statements, and will be made a part of the record of the hearing. Such written statements and exhibits may be delivered at the hearing or mailed in advance to the Commander, Eighth Coast Guard District.

(54 Stat. 498, 33 U.S.C. 513; Sec. 4(f), 80 Stat. 934, as amended, 49 U.S.C. 1653(f); Sec. 6(g)(3), 80 Stat. 937, 49 U.S.C. 1655(g)(3); 33 CFR 116.20; 49 CFR 1.46(c)(6)).

Dated: October 29, 1975.

D. J. RILEY,
Captain, U.S. Coast Guard, Acting Chief, Office of Marine Environment and Systems.

CIVIL AERONAUTICS BOARD

[Order 75-10-135; Dockets 20421, *et al*, 19314, 27286, 21471, 24265]

OKLAHOMA-DENVER-SOUTHEAST POINTS INVESTIGATION

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 31st day of October, 1975.

In the matter of petition of the Denver parties for an investigation of the need for new, improved, and additional air service at Denver, Colorado; petition of the Oklahoma parties for air service to Atlanta; applications of Braniff Airways, Inc. for amendment of its certificate of public convenience and necessity.

By Order 68-10-168, October 30, 1968, the Board instituted the *Oklahoma-Southeast Points Investigation* to determine whether new or improved service is required between the two largest cities in Oklahoma (Oklahoma City and Tulsa), on the one hand, and the major southeastern cities of Atlanta, Tampa, and Miami, on the other. The order provided that any authority granted would be in the form of separate Oklahoma City-Tulsa-Atlanta and Oklahoma City-Tulsa-Tampa-Miami segments, subject to a pretrial restriction against new turnaround authority between Oklahoma City and Tulsa and between Tampa and Miami.

There were subsequently filed a number of petitions for reconsideration seeking both expansion and limitation of the issues.[1] Those seeking expansion proposed the inclusion in the proceeding of issues of service to Denver, Kansas City, Memphis, Huntsville, Orlando and Kennedy Space Center;[2] the redesignation of Miami on the new segment in issue as the hyphenated point Miami-Fort Lauderdale, and of Tampa as Tampa-St. Petersburg-Clearwater; and the relaxation of the separate-segment restriction of Order 68-10-168 to allow consideration of a single segment Oklahoma City-Tulsa-Atlanta-Tampa-Miami. In the opposite direction, United Air Lines requested the imposition of a pretrial restriction precluding new single-plane service between Atlanta, Tampa, and Miami, on the one hand, and Denver, Salt Lake City, Portland, and Seattle, on the other.

Answers supporting and opposing the various petitions for reconsideration were filed by numerous parties, including the Bureau of Operating Rights.[3] Applications conforming to the scope of the investigation as established in Order 68-10-168, or as sought to be expanded by the petitions for reconsideration, were filed by a number of carriers and civic parties, and were moved for consolidation into the investigation.[4]

By Order 69-3-69, March 19, 1969, action was deferred on the various petitions and motions then pending in the proceeding until further order of the Board, in order to await completion of the *Southern Tier Nonstop Service Investigation*, Docket 18357, and the *Southern Airways Route Realignment Investigation*, Docket 18610, which were then in an advanced procedural stage.[5] Board decisions in both of these investigations were issued in the latter part of 1969; in both, however, judicial challenges led to remanded proceedings which were not concluded for several years thereafter.[6] At the present time, however, no other investigations are underway which bear on the scope of the present proceeding.

Apart from the present proceeding, the applications moved for consolidation herein, and the various pending petitions and motions, there are presently pending before the Board the following matters germane to a consideration of the aforesaid petitions and motions: (1) a renewed petition[7] by the Denver parties[8] in Docket 19314 for an expedited hearing on Denver-Memphis/Atlanta/Miami service; (2) a motion by the Tulsa parties[9] for an expedited hearing on Braniff's application in Docket 21471 for unrestricted Denver-Tulsa authority; (3) an application by Braniff in Docket 24265 under Subpart N of the Board's Rules of Practice for Denver-Tampa/Miami nonstop authority; (4) an application by Continental in Docket 27124 under Subpart N for unrestricted authority in a number of markets, among them Denver-Oklahoma City; (5) a petition by the Oklahoma parties[10] in Docket 27286 for an immediate hearing on Oklahoma City/Tulsa-Atlanta service; and (6) an application by United in Docket 28185 for Denver-Atlanta authority.

Upon consideration of the foregoing, the Board has determined that the *Oklahoma-Southeast Points Investigation* should move forward at this time. We have also determined that the proceeding should be expanded (and renamed) to include consideration of new and improved service between Denver and Atlanta, Tampa, and Miami, direct or by way of Oklahoma City and/or Tulsa, and between Denver and Oklahoma City/Tulsa, subject to the previously imposed pretrial condition against the grant of new turnaround authority between Oklahoma City and Tulsa, and between Tampa and Miami. We will not, however, further expand the proceeding to include issues of service to Kansas City, Memphis, Huntsville, Orlando, or Kennedy Space Center, nor will we modify the separate-segment restriction of Order 68-10-168 so as to permit consideration of a single segment embracing both Atlanta and Tampa/Miami.[11] Finally, no need for a pretrial restriction against single-plane service between the Southeast points at issue and Salt Lake City has been shown; and although there are considerations which would argue for the imposition of such a condition between the Southeast points and Portland and Seattle, we will not impose such a restriction in advance of the hearing, but will await the evidentiary showing made by the parties as to the need or lack of need therefor.

The Denver-Southeast markets are quite large and in apparent need of improved service. Thus, in the Denver-Atlanta market (38,870 passengers annually or 106 per day),[12] no carrier holds effective single-plane authority;[13] the best available service is a daily one-stop round-trip interchange flight via Memphis operated by Braniff and Eastern.[14] While load factors over the Atlanta-Memphis segment of this service averaged 52.6 percent in fiscal 1974, load factors over the Denver-Memphis segment averaged 73.3 percent, and during peak periods (June, July, and August) exceeded 80 percent. The Denver-Miami market is even larger (52,190 passengers or about 143 a day). No carrier holds nonstop authority, the best available service being that provided by Braniff on a one-stop basis via Dallas.[15] The market thus appears to merit consideration of nonstop service. The Denver-Tampa market (25,130 passengers or 69 a day, and similar to Denver-Miami as regards authority and service[16] is somewhat smaller, but because of its location its traffic flows can be combined with those of the Denver-Miami market to support a greater quantum of service in both markets than either could support separately. The substantial Denver-Tulsa market (53,930 passengers or 148 a day), in which Continental is the monopoly unrestricted carrier,[17] receives only a single daily nonstop round trip, and appears ripe for consideration of service improvements. The even larger Denver-Oklahoma City market (60,390 passengers or 165 a day), in which Braniff is the monopoly unrestricted carrier,[18] receives 3½ daily nonstop round trips, and might not otherwise merit priority of hearing; but in view of its close relationship to the other issues in the case, consideration of the need for a second unrestricted carrier can be accorded without unduly expanding the issues.

Considerations of the most efficient use of the Board's hearing resources, as well as the overlapping of issues and parties, dictate that the needs of the Denver-Southeast markets be heard in the same proceeding as those of Oklahoma-Southeast markets, rather than in two separate but simultaneous proceedings.[19] Certain of the applicants for Oklahoma-Southeast authority would undoubtedly cite Denver-Southeast traffic as "beyond-segment" support for their service proposals; while other applicants would be citing the same traffic in support of nonstop Denver-Southeast service. In the particular circumstances here presented, we do not consider it necessary or desirable to determine in advance whether or to what extent the public convenience and necessity would be served by Denver-Southeast traffic moving by way of the Oklahoma points, on the one hand, or directly, on the other. Similar considerations dictate the inclusion of Denver-Oklahoma service issues in a single proceeding rather than hearing them separately. (The same consideration does not apply to the short-haul, well-served Oklahoma City-Tulsa and Tampa-Miami "entry mileage" markets, and thus no new turnaround authority in these markets will be considered.) In contrast, we believe it would be inadvisable to relax the separate-segment restriction of Order 68-10-168 so as to permit consideration of including Atlanta, Tampa, and Miami on the same segment. The Atlanta-Tampa/Miami markets already have multiple-carrier service, and no party suggests that further authorizations are needed in these markets, which are too long to be considered mere entry mileage. Moreover, it would be undesirable to consider routing Denver/Oklahoma-Tampa/Miami traffic over the already highly congested Atlanta gateway, and moreover the circuity involved in such routings is greater than that involved in Denver-Southeast routings via the Oklahoma points.[20] The potential combination of Denver and Oklahoma traffic flows to Atlanta, and separately to Tampa and Miami, together with available beyond-market traffic flows, should suffice to ensure multiple daily service over each of the separate segments in issue, without the necessity for combining them into a single segment.

The same considerations which have persuaded us to include Denver issues in the present proceeding do not, however, support the further expansion of the case to include issues of service to Kansas City, Memphis, Huntsville, Orlando, or Kennedy Space Center. In contrast to the situation of Denver, Kansas City-Southeast and Oklahoma-Southeast traffic could not be combined without substantial circuity; and although Denver-Southeast and Kansas City-Southeast traffic could be so combined, the number of alternative routings thus introduced would greatly and unduly complicate the case. Moreover, the Kansas City-Atlanta market (46,950 passengers) already has two authorized nonstop carriers, although the Kansas City-Tampa/Miami markets (24,960 and 45,170 passengers, respectively) do not. Similarly, the Memphis-Denver (23,270 passengers), Memphis-Oklahoma City (16,690 passengers), Memphis-Atlanta (133,180

---

[1] These petitions for reconsideration are listed and summarized in Appendix A. Appendices A-D filed as part of the original document.

[2] To be served through the Titusville-Cocoa Beach (TI-CO) Airport.

[3] The answers are listed and summarized in Appendix B. The positions of the parties on the various proposed modifications in the scope of the proceeding are tabulated in Appendix C.

[4] These applications are listed and summarized in Appendix D.

[5] The Board noted that the petitions seeking inclusion of Denver, Kansas City, and Memphis raised issues similar to those earlier dealt with by the Board in Orders E-26597, March 29, 1968, and 68-7-6, July 1, 1968, when it denied the petition of the Denver parties in Docket 19314 for an immediate hearing on Denver-Southeast service. In that order, the Board had indicated that a reexamination of the matter might be warranted after final decision in the *Southern Tier* case, *supra*. The Board also noted that Memphis-Florida service was at issue in the *Southern Route Realignment* case, *supra*.

[6] See *Southern Tier Competitive Nonstop Investigation (Houston-Miami Phase)*, Order 73-2-99, February 23, 1973; *Southern Airways, Inc., Route Realignment Investigation (New Route Authority Phase)*, Order 73-2-90, February 23, 1973.

[7] The Denver parties' original petition in this Docket was denied by Orders E-26597 and 68-7-6 (see footnote 5, *supra*). The petition was renewed pursuant to the Board's indication in those orders that a subsequent reexamination might be appropriate.

[8] City and County of Denver, Colorado Public Utilities Commission, and Denver Chamber of Commerce.

[9] City of Tulsa and Metropolitan Tulsa Chamber of Commerce.

[10] Cities of Oklahoma City and Tulsa, Trustees of Oklahoma City Airport Trust, Tulsa Airport Authority, and Oklahoma City and Metropolitan Tulsa Chambers of Commerce.

[11] The proposal by Delta and National to redesignate Miami on the new segments at issue as Miami-Fort Lauderdale, and Tampa as Tampa-St. Petersburg-Clearwater, is supported by a number of parties including the Bureau, and is opposed by none. Since this change will not materially expand the scope of the proceeding, and is in accord with prior Board actions, it will be adopted. All applicants may treat their applications as covering the above hyphenated designations for Miami and Tampa without the necessity for formal amendment. All subsequent references in this order to "Miami" and "Tampa" shall be taken as referring to the hyphenated designations.

[12] All traffic figures set forth herein are for calendar 1974 unless otherwise stated, and are for true O&D passengers as shown in Table 8 of the Board's O&D Survey, 4th Quarter, 1974.

[13] United has highly circuitous single-plane authority via Cleveland, Pittsburgh, or other northeast points. TWA has relatively noncircuitous authority via Kansas City or St. Louis but its certificate precludes single-plane service.

[14] The interchange partners also operate two-stop service via Oklahoma City and Memphis. Termination of the interchange service will be in issue in the event new single-carrier Denver/Oklahoma-Atlanta authority is awarded.

[15] United and TWA have Denver-Miami/Tampa authority similar to their Denver-Atlanta authority (see *supra*, footnote 13). Continental has single-carrier authority in the Denver-Miami (but not the Denver-Tampa) market via the segment junction point Houston, but a combination of restrictions in its certificate precludes single-plane service. The carrier has pending a Subpart N application in Docket 27124 for removal of one of these restrictions, an incidental effect of which would be to authorize Denver-Houston-Miami one-stop service. (This application will be the subject of a separate order.)

[16] Except that Continental has no Tampa authority (see preceding footnote).

[17] Frontier's best Denver-Tulsa authority is two-stop; Braniff's is one-stop via Amarillo, or two-stop via Oklahoma City and one other point. The Tulsa parties have sought a priority hearing on Braniff's application in Docket 21471 for removal of its restriction. In view of our action herein, their motion will be denied insofar as it seeks a separate hearing restricted to Denver-Tulsa issues alone.

[18] Frontier's best Denver-Oklahoma City authority is one-stop; Continental's nonstop authority is subject to a long-haul restriction requiring service to Seattle or Portland. Continental's Subpart N application in Docket 27124 (*supra*, note 15) seeks removal of this restriction. While this application, which covers a number of additional markets, will be the subject of a subsequent order, in view of our inclusion of the Denver-Oklahoma City market in this proceeding, that market will not be separately put in issue in the Subpart N case in the event the latter is set for hearing.

[19] In view of our decision to include the Denver-Miami/Tampa markets in this proceeding, we will dismiss Braniff's Subpart N application in Docket 24265 for nonstop authority in these markets. In view of the many applications for authority in these markets and the interrelationship with the other markets at issue herein, the case would be too complex for processing under the simplified and expedited procedures of Subpart N of our Rules of Practice.

[20] The circuitry of Denver-Southeast routings via Oklahoma City or Tulsa ranges from zero (DEN-TUL-TPA) to 53 miles (DEN-OKC-ATL); that of Denver/Oklahoma-Tampa/Miami routings via Atlanta ranges from 87 miles (DEN-ATL-MIA) to 144 miles (OKC-ATL-TPA).

V 40 215 NOV 6 75 XUM

passengers) and Memphis-Miami (48,350 passengers) all now receive non-stop service,[21] while the Memphis-Tulsa market (9,390 passengers), which does not, is quite small.[22] Inclusion of Memphis in the case, therefore, would promise relatively less public benefit to offset the substantial complication and delay it would introduce into the proceeding. Similar considerations suggest *a fortiori* the inexpediency of including Huntsville, Orlando, or Kennedy Space Center (TI–CO) in the present proceeding.[23] To include all of these cities—and the many others which could subsequently claim inclusion on the same criteria—would transform a moderate-sized, manageable case into a gigantic area proceeding covering a substantial portion of the country. This would not in our judgment be a wise use of the Board's resources at the present time. The foregoing does not, of course, imply that some of the markets excluded from this proceeding may not warrant consideration for improved service in a separate proceeding at an appropriate time.[24]

Finally, we find that no convincing argument has been made for the imposition of a pretrial restriction against single-plane service between the Southeast points at issue and Salt Lake City. No carrier presently has usable authority in these small markets, and there appears to be no reason why ordinary beyond-segment rights should be excluded in advance. If there is in fact a need for such a restriction, it can be shown at the hearing.

The situation as regards Portland and Seattle is somewhat different. In several successive proceedings, either as a result of pretrial restrictions or as a matter of sound discretion, the Board imposed certificate conditions precluding or limiting single-plane service between the Pacific Northwest and some or all of the Southeast points here at issue.[25] Thus, Eastern's St. Louis-Seattle/Portland award in the *Pacific Northwest-Southwest Service Investigation*, 46 C.A.B. 654 (1967), was subject to such a condition; and its subsequent St. Louis–Omaha and Omaha-Seattle/Portland awards in the *Service to Omaha and Des Moines Case*, Order 70–7–24, July 6, 1970, limited it to two - stop Seattle/Portland - Atlanta/Tampa and three-stop Seattle/Portland-Miami service. Similarly, Braniff's Dallas-Tampa/Miami award in the *Southern Tier Competitive Nonstop Investigation*, Order 69–7–135, July 24, 1969, following upon its Seattle/Portland-Dallas award in *Pacific Northwest-Southwest, supra*, was made subject to a single-plane restriction in the Seattle/Portland-Tampa/Miami markets, for reasons explained in the opinion and order on reconsideration, Order 69–9–111, September 18, 1969. Finally, Continental's Houston-Miami award in the remanded *Southern Tier* case, Order 73–2–89, February 23, 1973, was made subject to a Seattle/Portland-Miami single-plane restriction. In view of the foregoing, it may well be that considerations of equity will require a similar Seattle/Portland-Southeast restriction on any award made in this proceeding. We prefer, however, not to impose such a restriction prior to hearing, since the evidentiary record or events occurring prior to final decision may show such a restriction to be either unduly restrictive or altogether unnecessary. Instead, the parties will have the opportunity to submit evidence and arguments at the hearing on the need or lack of need for a single-plane or some other type of restriction in the Seattle/Portland-Southeast markets.

Environmental impact. The Board has determined that this proceeding, as its scope is modified by the present order, is by its very nature not one that will lead to "a major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(c) of the National Environmental Policy Act of 1969 (NEPA). All prospective environmental effects, direct and secondary, would proceed in the first instance from changes in aircraft schedules and levels of service. Our conclusion with regard to the environment is based largely upon our finding that there are unlikely to be environmentally significant changes in such schedules and service levels should improved service be authorized in the Denver-Oklahoma City/Tulsa-Atlanta/Tampa/Miami markets.

As an indication of the potential levels of service which might be expected in these markets if new service authorizations are granted in this proceeding, we note that in 1974 the largest of the markets, Denver-Oklahoma City, generated about 83 true O&D passengers per day in each direction; the other markets in issue ranged downward to less than half that number. These passengers in 1974 traveled on existing single-plane and connecting services; if they were diverted to newly authorized flights, some existing flights might well be canceled or consolidated, some existing one-stop flights might be converted to nonstop, the existing Braniff-Eastern interchange service in the Denver/Oklahoma City-Atlanta markets might be terminated, etc. Thus, new authorizations *per se* would not necessarily result in more flights, although they might do so to some extent. However, new authorizations and improved service would undoubtedly stimulate additional traffic, which would tend to require additional flights. The degree of traffic stimulation cannot be accurately forecast at this time, but it is highly unlikely that stimulation would exceed 100 percent in any market, and doubtless in many cases it would be much less. We note that Braniff in its Subpart N application in Docket 24265 proposed two new daily round-trip flights in the Denver-Tampa/Miami markets.[26] Denver-Miami is among the largest markets involved in the proceeding. Taking all the foregoing into account, we would not expect the grant of new authorizations herein to result at the outset in more than two or at most three additional round-trip flights per day in any market, and these figures may well take inadequate account of the existing flights which would probably be canceled, consolidated, etc.

The limited potential for increased frequencies as a result of these cases must be placed in the context of the large overall level of traffic at the cities involved. It is estimated that during FY 1976, Denver, the nation's 9th largest hub, will experience 202,000 scheduled aircraft operations; Atlanta, the nation's 2nd largest hub, will experience 449,000 operations; Miami, the nation's 11th largest hub, will experience 254,000 operations; and Tampa, the nation's 23rd largest hub, will experience 106,000 operations. Of the medium-sized hub cities involved, Oklahoma City will experience 50,000 operations and Tulsa will experience 44,000 operations.[27] Thus, any increase in service resulting from these investigations will have a relatively modest impact upon total operation levels in the subject markets. It would, therefore, not be reasonable to conclude on the face of the matter that authorizations of new service in the markets at issue in these cases would lead to more than very minor environmental changes.

Accordingly, we are not directing our staff to undertake the preparation of an environmental assessment for these proceedings. Our conclusion herein is not intended to foreclose any party from presenting evidence (subject to the usual evidentiary rules in force in C.A.B. proceedings) or from making arguments with respect to relevant environmental issues. Nor is our conclusion intended to foreclose our consideration of environmental impacts resulting from the contemplated licensing action which, although of a lesser magnitude than those required to trigger the NEPA procedures, might nonetheless be relevant to our decision.

Accordingly, *it is ordered*, That:

1. The proceeding in Docket 20421 instituted by Order 68–10–168, October 30, 1968, be and it hereby is redesignated the *Oklahoma-Denver-Southeast Points Investigation*, and shall be set down for hearing before an Administrative Law Judge of the Board at a time and place hereafter designated, as the orderly administration of the Board's docket shall permit.

2. The issues in said proceeding shall include the following:

(a) Do the public convenience and necessity require the certification of an air carrier or carriers to engage in air transportation between—

(i) Oklahoma City and/or Tulsa, Okla., on the one hand, and (A) Atlanta, Ga., (B) Miami/Fort Lauderdale and/or Tampa/St. Petersburg/Clearwater, Fla., and/or (C) Denver, Colo., on the other, and

(ii) between Denver, Colo., on the one hand, and (A) Atlanta, Ga., and/or (B) Miami/Fort Lauderdale and/or Tampa/St. Petersburg/Clearwater, on the other, directly or by way of Oklahoma City and/or Tulsa, Okla.?

(b) If so, what carrier or carriers should be authorized to perform the needed services, and under what terms, conditions, and limitations?

(c) Does the public interest require the imposition of a condition restricting the service which any newly authorized carrier would otherwise be able to provide between Atlanta, Ga., or Miami/Fort Lauderdale or Tampa/St. Petersburg/Clearwater, Fla., on the one hand, and Seattle-Tacoma, Wash., or Portland, Oreg., on the other?

(d) Does the public interest require the termination of the interchange agreement between Braniff and Eastern in the Denver/Oklahoma City-Atlanta markets?

3. Any authority granted in said proceeding—

(a) Shall be ineligible for subsidy;

(b) Shall (except in the case of a carrier holding on-segment authority subject to a restriction) be in the form of a separate segment or segments comprising all or part of either or both of the following two segments: Denver-Oklahoma City-Tulsa-Atlanta, Denver-Oklahoma City-Tulsa-Tampa-Miami;

(c) Shall not include new turnaround authority (1) between Oklahoma City and Tulsa, or (2) between Miami and Tampa.

4. There are hereby consolidated into said proceeding, to the extent that they conform to the scope of the issues as hereinabove stated, the following applications and petitions or the conforming portions thereof:

American, Docket 20482; Braniff, Docket 20478; Braniff, Docket 21471; Continental, Docket 20480; Delta, Docket 20483; Eastern, Docket 19406*; Frontier, Docket 19226*; National, Docket 20479; Southern, Docket 20485; Trans World Docket 18802*; Trans World, Docket 19657*; Trans World, Docket 20487; United, Docket 28185; Western, Docket 19390*; Denver Parties, Docket 19314*; Oklahoma Parties, Docket 27286.

Amended application or petition marked by an asterisk.

5. Except to the extent granted in paragraph 4 hereof, all pending motions to consolidate applications into the said proceeding be and they hereby are denied.

6. To the extent the applications and petitions listed in paragraph 4 do not conform to the scope of the proceeding, the nonconforming portions thereof be and they hereby are dismissed without prejudice.

7. Additional applications conforming to the scope of the proceeding as amended herein, motions to consolidate, and petitions for reconsideration of the order shall be filed no later than twenty (20) days after the date of service of this order, and answers thereto shall be filed no later than ten (10) days thereafter.

8. Except to the extent granted herein, the motions of the Denver parties in Docket 19314 and the Tulsa parties in Docket 21471 for expedited hearing and similar relief be and they hereby are denied.

9. The Subpart N application of Braniff Airways in Docket 24265 and the application and petition of the Memphis parties in Docket 20484 be and they hereby are dismissed without prejudice.

10. This order shall be served upon all parties to Docket 20421 and the dockets listed in paragraphs 4, 8, and 9 hereof.

11. This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] EDWIN Z. HOLLAND,
Secretary.

CONSUMER PRODUCT SAFETY COMMISSION

ARCHITECTURAL GLASS

Extension of Time for Publishing Proposed Rule or Withdrawing Notice of Proceeding

The purpose of this notice is to extend by 30 days, until November 28, 1975, the period in which the Consumer Product Safety Commission must publish in the FEDERAL REGISTER a proposed consumer product safety standard for architectural glass or a notice withdrawing the notice of proceeding for development of a standard.

A standard development proceeding for architectural glass was commenced under the CPSA by notice in the FEDERAL REGISTER of May 28, 1974 (39 FR 18502), soliciting offers to develop a recommended consumer product safety standard. The Commission subsequently accepted the offer of the Consumer Safety Glazing Committee, and CSGC submitted a recommended standard to the Commission on January 24, 1975. A more detailed discussion of the history of the

---

[21] The Memphis-Miami market, moreover, has been the subject of Board consideration and the award of new authority in the relatively recent past. *Southern Route Realignment Investigation*, Order 73–2–90, February 23, 1973. The large Memphis-Atlanta market receives 12 daily nonstop round trips.

[22] Although the Memphis-Tampa market (22,590 passengers) presently receives no nonstop and little one-stop service, it would be impractical to include this single Memphis market in the case.

[23] Huntsville and Orlando exchange only small volumes of traffic with Denver, Oklahoma City, and Tulsa, the largest of the markets being Denver-Orlando with 12,280 annual passengers or 33 per day. Kennedy Space Center (TI–CO) no longer receives certificated service separate from Orlando since the deletion of Eastern's authority by Order 74–7–35, July 8, 1974.

[24] The Denver-Huntsville and Denver-Orlando markets, which TWA seeks to include in this proceeding, are also involved in the petition of the Denver parties in Docket 27491 for a separate investigation of the service needs of a number of Denver-Southeast markets other than Atlanta, Tampa, and Miami. (This petition will be dealt with by a subsequent order.)

[25] Northwest has long-standing one-stop authority in these markets via the segment junction points Chicago and Minneapolis-St. Paul. United has unusably circuitous authority via Cleveland and other Northeast points (see note 13, *supra*). Eastern, Braniff, and Continental hold authority subject to restrictions described in the text, *supra*. At one time or another most of these carriers have expressed an interest in improving their present restricted authority in the markets.

[26] Actually its schedule proposal in Docket 24265 does not show any increase in Denver-Tampa/Miami single-plane service, but rather substitutes two nonstop flights for one-stops over Dallas. However, the accompanying text states that there would be no reduction in service in the Denver-Dallas and Dallas-Tampa/Miami markets, so in terms of total operations the nonstop flights would in substance be new.

[27] *Terminal Area Forecast*, 1975–1985, Department of Transportation, Federal Aviation Agency, Office of Aviation Economics, Aviation Forecast Division, July 1973 (the forecasts in this study were prepared before the energy crisis in the Fall of 1973 and, therefore, do not reflect its impact on future activity levels). An additional indication of the size of these cities is revealed by the following:

City	Year June 30, 1974	
	Scheduled service enplanements	Scheduled service departures
Denver	5,226,987	96,007
Oklahoma City	731,729	23,752
Tulsa	628,166	20,107
Atlanta	11,978,848	199,928
Miami	5,664,135	102,783
Tampa	2,469,982	48,715

Source: *Airport activity statistics of certificated route air carriers, year ended June 30, 1974; and origin-destination survey of airline passenger traffic, year ended June 30, 1974.*

V 40 215 NOV 6 75 XUM

architectural glass standard development proceeding appears in the FEDERAL REGISTER of July 23, 1975 (40 FR 30862). In that notice, the Commission also extended the period within which it must propose a standard for architectural glass or withdraw the notice of proceeding until October 29, 1975, in order to allow the staff to make changes in the recommended standard that were considered necessary prior to its proposal in the FEDERAL REGISTER as a mandatory standard.

The Commission staff submitted a draft proposed standard to the Commission on October 22, 1975, for its consideration. In order to allow adequate time to properly analyze and evaluate the draft proposed standard, which is a complex and lengthy document, the Commission is extending the period within which it must either publish a proposed consumer product safety standard applicable to architectural glass, or withdraw the notice of proceeding for 30 days, or until November 28, 1975. This period may be further extended by a notice published in the FEDERAL REGISTER showing good cause.

Dated: November 3, 1975.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 452-4]

ENVIRONMENTAL IMPACT STATEMENTS AND OTHER ACTIONS IMPACTING THE ENVIRONMENT

Availability of Comments

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969, and section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of September 1, 1975 and September 15, 1975.

Appendix I contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix II contains the definitions of the classifications of EPA's comments on the draft environmental impact statements as set forth in Appendix I.

Appendix III contains a listing of final environmental impact statements reviewed and commented upon in writing during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix IV contains a listing of final environmental impact statements reviewed but not commented upon by EPA during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, and the source of the EPA review as set forth in Appendix VI.

Appendix V contains a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. The listing includes the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments, and the source for copies of the comments as set forth in Appendix VI.

Appendix VI contains a listing of the names and addresses of the sources of EPA reviews and comments listed in Appendices I, III, IV and V.

Copies of the EPA Manual setting forth the policies and procedures for EPA's review of agency actions may be obtained by writing the Public Information Reference Unit, Environmental Protection Agency, Room 2922, Waterside Mall SW., Washington, D.C. 20460, telephone AC 202/755-2808. Copies of the draft and final environmental impact statements referenced herein are available from the originating Federal department or agency.

Dated: October 21, 1975.

PETER L. COOK,
Acting Director,
Office of Federal Activities.

[1] Pertains to the probable particulate air quality violation with respect to the construction and operation of grain elevators which is a portion of the waterfront development described in the draft environmental impact statement.

APPENDIX II

DEFINITIONS OF CODES FOR THE GENERAL NATURE OF EPA COMMENTS

Environmental impact of the action

LO—Lack of objection.—EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER—Environmental reservations.—EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these impacts.

EU—Environmentally unsatisfactory.—EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilizd may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

Adequacy of the impact statement

Category 1—Adequate.—The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2—Insufficient information.—EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3—Inadequate.—EPA believes that the draft impact statement does not adequately assess the environmental impact of the proposed project or action, or that the statement inadequately analyzes reasonable available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

APPENDIX III. *Final environmental impact statements for which comments were issued between Sept. 1 and 15, 1975*

Identifying No.	Title	General nature of comments	Source for copies of comments
Department of Agriculture:			
F-SCS-F64001-MN..	Chippewa and Long Prairie headwaters, fish and wildlife development, Douglas Grant, Ottertail, and Pope Counties, Minn.	EPA has no objections to the project as proposed.	F
Corps of Engineers:			
F-COE-A35131-FL..	Jacksonville Harbor, maintenance dredging, Jacksonville, Fla.	EPA generally had no objections to the proposed project. However EPA restated a need for a long-range plan for disposal of spoil.	E
F-COE-A39110-MI..	South Haven Harbor, mitigation of shore damage, Michigan.	EPA generally had no objections to the proposed project. However, EPA has requested the Corps to conduct a chemical analysis of the borrow material to determine its acceptability for use as beach nourishment.	F
F-COE-E36001-TN..	West Tennessee tributaries project, flood control, Tennessee.	EPA generally had no objections to the proposed project. EPA suggested that a more thorough evaluation be conducted on the possible effects of the channelization on long-term effect on water quality.	E
F-COE-F36002-OH..	Cooperative beach erosion control project, Lakeview Park, Lorain, Ohio.	EPA generally had no objections to the proposed project.	F
F-COE-F36003-IL..	Beach erosion control, South Boulevard Beach, Evanston, Ill.	EPA generally had no objections to the proposed project. EPA requested special consideration be given to fill material, secondary effects on local residents, and that suitable assurances be made to develop and implement a littoral drift study.	F
F-COE-F36004-IL..	Kent Creek, local protection project, Rockford, Ill.	EPA generally had no objections to the proposed project.	F
Department of Housing and Urban Development:			
F-HUD-E53007-FL..	Sterling Park, Title X, Seminole County, Fla.	....do.....	E
Department of Transportation:			
F-FHW-A41086-CO..	U.S. 40, Steamboat Springs, Routt County, Colo.	....do.....	I
F-FHW-A42030-NB..	U.S. 30, Columbus, Pinito County, Nebr.	EPA expressed environmental reservations with the proposed project due to predicted noise levels which exceed the recommended levels set by FHWA's Policy and Procedure Memorandum 90-2.	H
F-FHW-F10007-WI..	U.S. 10 and WI-114, Winnebago, Calumet, and Outagamie Counties, Wis.	EPA generally had no objections to the proposed project.	F
F-FHW-F10011-CO..	Project F-019-2(14), Durango South, LaPlata County, Colo.	EPA continues to have environmental reservations over the proposed project. EPA feels that there are serious disadvantages to the proposed alternative as it will require channelization of the Animas River thereby encroaching upon the site of 2 radioactive tailings piles. This channelization will reduce the land area of the smelter bench and may have the effect of further limiting or complicating the options for remedying the existing tailings problem. In addition, this project will convert land use adjacent to the tailings to a high use transportation corridor which will bring the general public in much closer proximity to a source of radioactivity than they are currently exposed to. It is recommended that the highway either be located in a manner as to not disturb the smelter bench or be built after the engineering feasibility evaluation and recommendations are completed by ERDA for these tailings piles.	I

FEDERAL POWER COMMISSION

[Docket No. RP75-94]

GREAT LAKES GAS TRANSMISSION CO.

Notice of Tender of Revised Tariff Sheets

OCTOBER 29, 1975.

Take notice that on October 15, 1975, Great Lakes Gas Transmission Company (Great Lakes) tendered for filing Second Substitute Sixteenth Revised Sheet No. 57 and Second Revised Sheet No. 54 to First Revised Volume No. 1, and Third Revised Sheet No. 53–B and First Revised Sheet No. 53–C to Original Volume No. 2 of its FPC Gas Tariff. Great Lakes requests that these tariff sheets be accepted for filing and made effective as of November 14, 1975.

In the transmittal letter accompanying such filing, Great Lakes states that the purpose of the revised tariff sheets is to revise the formula for allocating purchased gas costs between sales and transportation services. According to the Company, the allocation formula proposed herein is based upon "actual experience during a recent Determination Period." Great Lakes states further that such actual experience indicated that there should be a change in the allocation factors between the resale and transportation customers.

Great Lakes requests that the Commission grant "such special permissions and waivers of its Regulations, including but not limited to Sections 154.22 and 154.66 thereof, as it may deem necessary in order that the tendered tariff sheets may become effective November 14, 1975."

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 7, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-29837 Filed 11-5-75;8:45 am]

[Docket No. ER76-173]

LAKE SUPERIOR DISTRICT POWER CO.

Notice of Filing of Wheeling Agreement

OCTOBER 30, 1975.

Take notice that on October 9, 1975, Lake Superior District Power Company (LSDP) tendered for filing an agreement providing for wheeling service to Jump River Electric Cooperative, Inc., Barron Electric Cooperative, Bayfield Electric Cooperative, Inc., and Price Electric Cooperative, Inc. The agreement also provides for the sale by LSDP of certain facilities. The proposed rate schedule will supersede an interim wheeling agreement presently on file as LSDP's Rate Schedule FPC No. 23. LSDP requests that the Commission waive the prior notice requirements so as to permit the proposed rate schedule to become effective as of October 1, 1975.

The filing indicates that copies of the filing were sent to all of the customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 7, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-29836 Filed 11-5-75;8:45 am]

[Docket No. CP76-138]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Application

OCTOBER 30, 1975.

Take notice that on October 21, 1975, Transcontinental Gas Pipe Line Corporation (Transco); Post Office Box 1396; Houston, Texas 77001, filed in Docket No. CP76-138 an application pursuant to Section 7 of the Natural Gas Act, as amended, the Rules and Regulations of the Federal Power Commission issued thereunder and Section 2.79 of the Commission's General Policy and Interpretations for a certificate of public convenience and necessity authorizing Transco to transport approximately 1,500 Mcf of natural gas per day on an interruptible basis for Cannon Mills Company (Cannon), an existing industrial customer of Public Service Company of North Caro-

V 40 215 NOV 6 75 XUM

lina, Inc. (Public Service), a Transco CD–2 customer, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that the gas will be purchased by Cannon from production in the Midland Field, Acadia Parish, Louisiana and delivered to Transco at the inlet side of Transco's metering facilities located at the tailgate of Continental Oil Company's Acadia Gas Processing Plant in Acadia Parish, Louisiana. Transco will deliver the gas to existing points of delivery to Public Service for the account of Cannon. Cannon will pay Transco an initial charge of 22 cents per Mcf delivered to Public Service for Cannon's account, and Transco will retain 3.8 percent of the transportation volumes for compressor fuel and line loss make-up.

The application states that the gas is intended for high-priority process use in Cannon's Kannapolis and Concord, North Carolina plants.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before November 7, 1975, file with the Federal Power Commission; Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75–29838 Filed 11–5–75;8:45 am]

[Docket No. RP75–74 and 74–52 (PGA76–1a)]

TRANSWESTERN PIPELINE CO.

Proposed Changes in FPC Gas Tariff

OCTOBER 29, 1975.

Take notice that Transwestern Pipeline Company (Transwestern) on October 15, 1975, tendered for filing as part of its FPC Gas Tariff, Second Revised Volume No. 1, the following sheets: Second Substitute Original Sheet No. 5, Second Substitute Original Sheet No. 6.

These sheets are issued pursuant to ordering paragraph (G) of FPC Order issued September 30, 1975, in Docket No. RP74–52 (PGA 76–1) in order to reflect in Transwestern's rates on October 1, 1975, without suspension that portion of Transwestern's increased purchased gas cost not in excess of the levels prescribed in Opinion No. 742 for small producers and Opinion No. 699–H for other than small producers.

This filing is made in supplement to Transwestern's Motion filing in Docket No. RP75–74 of September 30, 1975, wherein Transwestern converted the purchased gas cost adjustments filed in Docket No. RP74–52 (PGA 76–1) to the Docket No. RP75–74 basis.

The proposed effective date of the above tariff sheets is October 1, 1975.

Copies of the filing were served upon the company's jurisdictional customers and the interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 6, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Notice of Receipt and Approval of a Proposed Report

The following request for clearance of a proposed report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on October 20, 1975. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt and the action taken by GAO.

CIVIL AERONAUTICS BOARD

Request for clearance of a single time request for data on flight attendants and food expense to assist the CAB in completing its computerized route financial system. Respondents are 35 certificated route air carriers and the burden is estimated to be 30 minutes per response. CAB requested emergency clearance because they wanted responses by October 31, 1975, so that the computerized route financial system could be quickly computed. Clearance was provided by GAO under number B–180226 (S76007) on October 22, 1975.

CARL F. BOGAR,
Assistant Director,
Regulatory Reports Review.

[FR Doc.75–29856 Filed 11–5–75;8:45 am]

REGULATORY REPORTS REVIEW

Notice of Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on October 29, 1975. See 44 U.S.C. 3512(c) & (d). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public of such receipt.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FPC forms are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed forms, comments (in triplicate) must be received on or before November 24, 1975, and should be addressed to Mr. Carl F. Bogar, Assistant Director, Office of Special Programs, United States General Accounting Office, Room 5216, 425 I Street, NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202–376–5425.

FEDERAL POWER COMMISSION

The Federal Power Commission (FPC) requests an extension no change clearance to continue the use of FPC Form No. 12, Power System Statement (Class I and II systems and requested Class IV and V systems). FPC Form No. 12 is filed annually on on before the first of May with the Commission by each Corporation, person, agency, authority or other legal entity or instrumentality, whether public or private, which operates facilities for the generation or transmission or distribution of electric energy, and which is in the classification of Class I and II Systems, or Class IV or V specifically directed. The report and form is prescribed under the Commission's regulations, 18 CFR 141.51. There will be responses for approximately 623 systems and it is estimated that an average of 250 hours will be required annually per response.

The Federal Power Commission (FPC) requests an extension no change clearance to continue the use of FPC Form No. 12–A, Power System Statement (Classes III, IV and V Systems). FPC Form No. 12–A is filed annually on or before the first of May with the Commission by each corporation, person, agency, authority or other legal entity or instrumentality, whether public or private, which operates facilities for the generation or transmission or distribution of electric energy, and which is in the classification of Class III, IV, or V Systems, except wherein these systems have during the year less than 5000 megawatt-hours of "net energy for system" unless specifically directed otherwise. The report and form is prescribed under the Commission's regulations, 18 CFR 141.52. There will be 2121 responses and it is estimated that an average of 25 hours will be required annually per response.

The Federal Power Commission (FPC) requests an extension no change clearance to continue the use of FPC Form No. 12–C, Electric Generating Capacity. Form No. 12–C is designed to collect from the smaller industrial establishments (5,000 kw or less) annual capacity and generation, sales of electric energy, and principal product, such information to be used by FPC regional offices in making forecasts and preparation of other related studies. There will be responses for approximately 570 industrial plants and it is estimated that an average of one hour will be required annually per response.

The Federal Power Commission (FPC) requests an extension no change clearance to continue the use of FPC Form No. 12–D, Power System Statement (Class III systems with less than 5000 Mwh; specified Class IV and V systems). FPC Form No. 12–D is filed annually on or before the first of May with the Commission by each corporation, person, agency, authority or other legal entity or instrumentality, whether public or private, which operates facilities for the generation or transmission or distribution of electric energy, and which is in the classification of Class III, wherein these systems have during the year less than 5000 megawatt-hours of "net energy for systems," or if specifically directed otherwise. The report and form is prescribed under the Commission's regulations, 18 CFR 141.55. There will be responses for 869 systems and it is estimated that an average of 15 hours will be required annually per response.

The Federal Power Commission (FPC) requests an extension no change clearance to continue the use of FPC Form No. 12–F, Power Line and Construction Data. Form No. 12–F collects information on: (a) New lines placed in service, old lines removed from service and changes in existing lines; (b) new lines under construction; and (c) lines proposed for installation in the next six years but not under construction. Form No. 12–F will be filed annually by approximately 554 electric utilities that own or intend to construct electric transmission lines for 69 Kv (designed voltage) or greater in the contiguous U.S. or 22 Kv or greater in the case of Puerto Rico, Virgin Islands, Alaska and Hawaii and it is estimated that an average of 20 hours will be required annually per response.

CARL F. BOGAR,
Assistant Director,
Regulatory Reports Review.

[FR Doc.75–29857 Filed 11–5–75;8:45 am]

REGULATORY REPORTS REVIEW

Notice of Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO on October 30, 1975. See 44 U.S.C. 3512 (c) & (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed ICC form are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed form, comments (in triplicate) must be received on or before November 24, 1975, and should be addressed to Mr. Carl F. Bogar, Assistant Director, Office of Special Programs, United States General Accounting Office, Room 5216, 425 I Street, NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202–376–5425.

INTERSTATE COMMERCE COMMISSION

Request for an extension no change clearance of Quarterly Report Form QL&D, required to be filed by some 1900 motor carriers of property with an average operating revenue of $1 million or more, pursuant to Section 220 of the Interstate Commerce Act. Data are used for economic regulatory purposes. Minor revisions in this quarterly report resulted from the addition of city zone codes following publication of Notice of Change in the FEDERAL REGISTER, 40 FR 27747; 39578. Reporting burden for carriers is estimated to average 36 hours per report. Reports are mandatory and available for use of the public.

CARL F. BOGAR,
Assistant Director,
Regulatory Reports Review.

INTERNATIONAL TRADE COMMISSION

[TA 201–11]

FERRICYANIDE AND FERROCYANIDE BLUE PIGMENTS

Notice of Investigation and Hearing

Investigation instituted. Following receipt of a petition on October 2, 1975, filed by the American Cyanamid Co., Wayne, New Jersey, the United States International Trade Commission on October 30, 1975, instituted an investigation under section 201(b) of the Trade Act of 1974 to determine whether ferricyanide and ferrocyanide blue pigments, provided for in item 473.28 of the Tariff Schedules of the United States, are being imported in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

Public hearing ordered. A public hearing in connection with this investigation will be held in Washington, D.C., at 10 a.m., e.s.t., on Tuesday, January 13, 1976, in the Hearing Room, U.S. International Trade Commission Building, 701 E Street, N.W. Requests for appearances at the hearing should be received in writing by the Secretary of the Commission at his offices in Washington not later than noon, Thursday, January 8, 1976.

Inspection of petition. The petition filed in this case is available for public inspection at the Office of the Secretary, U.S. International Trade Commission, and at the New York City office of the U.S. International Trade Commission located at 6 World Center.

By order of the Commission:

Issued: November 3, 1975.

[SEAL] G. PATRICK HENRY,
Acting Secretary.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[NOTICE 75-88]

SPACE PROCESSING AD HOC ADVISORY SUBCOMMITTEE

Notice of Meeting

The NASA Space Processing Ad Hoc Advisory Subcommittee of the Applications Steering Committee will meet at NASA Headquarters, 600 Independence Avenue, SW., Washington, D.C. on November 20-21, 1975. The meeting will be held in Room 226B of FOB 10B from 8:30 a.m. to 4:30 p.m. on each day.

The subcommittee will review the applications for membership on the Applications Steering Committee, Space Processing Payload Advisory Subcommittee received in response to an Applications Notice announcing this opportunity and recommend individuals for appointment to this subcommittee. In addition, the current status of proposals tentatively selected for the Space Processing Rocket Experiment Project (Announcement of Opportunity OA-74-1) in May, 1975 will be reviewed and a recommendation on their final disposition will be prepared.

Since the subcommittee sessions will be concerned throughout with matters listed in 5 U.S.C. 552(b)(6), as described above, it is hereby determined that the sessions should be closed to the public.

For further information, please contact Dr. James H. Bredt at Area Code 202, 755-3848.

WILLIAM W. SNAVELY,
Assistant Administrator for DOD and Interagency Affairs.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

NATIONAL COUNCIL ON THE ARTS

Notice of Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a meeting of the National Council on the Arts will be held on November 21, 1975 from 9:30 a.m.-1:45 p.m. in the Shoreham Building and from 2:30 p.m.-5 p.m. in the Auditorium of the Department of Labor at 3rd and Constitution Ave., NW. On November 22 and 23 the Council will meet in the Shoreham Building, 1st floor conference room, 806 15th Street NW., Washington, D.C.

A portion of this meeting will be open to the public on November 21 from 2:30 p.m.-5 p.m. and on November 22 from 8:30 a.m.-1:30 p.m. on a space available basis. Accommodations are limited. During the open session on November 21, there will be presentations by the Federal Design Council and the Architecture & Environmental Arts Program. On November 22 the agenda will include: Discussion on Program Guidelines and reports from Assistant Chairman/Management, Research, Evaluation, Literature, Education, Theatre, and Bicentennial Resources Development.

The remaining sessions of this meeting on November 21 from 9:30-1:45 p.m., on November 22 from 1:45 p.m.-6 p.m., and on November 23 from 8:45 a.m.-1 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of June 16, 1975, these sessions, which involve matters exempt from the requirements of public disclosure under the provisions of the Freedom of Information Act (5 U.S.C. 552(b), (4), (5), and (6)) will not be open to the public.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

NATIONAL SCIENCE FOUNDATION

SYSTEM OF RECORDS UNDER THE PRIVACY ACT

Corrections

Notice is hereby given of an amendment to the NSF Systems of Records No. 1 currently entitled, "Applicants for Employment," as published in the FEDERAL REGISTER, Vol. 40, No. 166, Part III, page 38129 on August 26, 1975. The purpose of this amendment is to provide a more descriptive title of the system and to correct an inadvertent error in the description of the category of individuals covered by the system. Accordingly, the following changes and corrections are made to the following characteristics of NSF System No. 1:

1. The "System name" is revised to read as follows: System name. Employment Inquiries and Background Information.

2. The "Categories of individuals covered by the system" is revised to read as follows:

Categories of individuals covered by the system: Individuals inquiring about opportunities for employment at the Foundation who supply resumes, standard form 171's or other background information either on their own or at the request of Foundation personnel. This system covers only information submitted as general background for use in the event vacancies should occur as opposed to formal applications (e.g. SF 171's) with respect to positions for which the Foundation is actively recruiting. In the latter case, applications are filed with the announcement folders and are not a part of this system of records, but the applications may become part of NSF System No. 25 if the applicant does obtain employment with the Foundation.

Dated: October 31, 1975.

H. GUYFORD STEVER,
Director.

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 75-31]

ACCIDENT REPORT; RECOMMENDATION RESPONSE

Notice of Availability and Receipt

Highway Accident Report. Research into effective restraints and human crash tolerances of sideward-sitting occupants of motor vehicles was urged by the National Transportation Safety Board in a report released October 31, 1975. The report, No. NTSB-HAR-75-6, resulted from the Board's investigation of the crash of a multipurpose vehicle, operated by the U.S. Immigration and Naturalization Service, into the rear of a parked tractor-semitrailer truck near El Centro, California, March 8, 1974. The Safety Board determined that the probable cause of the collision was that the multipurpose vehicle left the roadway and collided with a tractor-trailer parked approximately 15 feet off the pavement. The Board was unable to determine why the driver was not controlling the multipurpose vehicle.

The report contains eight safety recommendations, Nos. H-75-23 through 30, directed to five Federal agencies. The Safety Board recommends: That the Federal Highway Administration (1) clarify its rule 49 CFR 392.22(b)(1) for placement of warning devices for parked trucks and buses, and (2) design future motorist aid facilities to meet, wherever possible, the 30-foot-minimum for a clear roadside recovery area (H-75-23 and 24); that the National Highway Traffic Safety Administration (1) set guidelines, based on human factors research, for seat installations made after initial vehicle sale, and (2) study crash forces on sideward-sitting occupants of vehicles and issue standards adequate for their protection (H-75-25 and 26); that the Civil Service Commission require all Federal agencies to adhere to Federal Personnel Manual physical standards for its motor vehicle operators (H-75-27); that the Immigration and Naturalization Service (1) assure the hiring of only medically qualified persons as motor vehicle operators, and (2) consider revising its procedures for transporting aliens in externally secured compartments to assure that help will be available in an emergency to assist in the evacuation of the vehicle (H-75-28 and 29); and that the Department of Justice consider this emergency prisoner-evacuation problem and develop safe evacuation guidelines for all appropriate Federal, State, and local agencies (H-75-30). Recommendations H-75-23 and H-75-27 through 30 are designated "Class I" to indicate the need for urgent action.

Response to Recommendation R-75-22. The Department of Transportation has rejected a recommendation stemming from the Safety Board's investigation of a hazardous materials accident which occurred in the Norfolk and Western Railway yard at Decatur, Illinois, July 19, 1974 (40 FR 27081). DOT's Materials Transportation Bureau replied on October 20, 1975, to this recommendation, which is directed to reporting requirements. MTB notes that from January 1, 1971, to date, more than 29,000 hazardous materials incidents have been reported on Form F-5800.1. MTB states that many of the reports were incomplete in one or more areas, and that followup efforts to secure additional information often proved difficult since "the persons preparing the reports were not in a position to secure the needed information." According to MTB, "The addition of a new reporting element requiring reporters of incidents to 'delineate the danger zone' would call for a subjective evaluation beyond the capabilities and qualifications of those persons now preparing the reports." MTB concludes, "While the Bureau has some modifications of the hazardous materials incident reporting requirements under consideration, one of which addresses Recommendation R-75-22, we do not intend to initiate procedures to adopt in full, or in part, the recommendation at the present time or in the near future. Therefore, pursuant to 49 USC 1906, this response should be considered a refusal to initiate or conduct procedures for adopting Recommendation R-75-22 for the following reasons: (1) The ability of carrier personnel to report the delineation of danger zones is questionable and would call for subjective evaluations resulting in submission of data of questionable value; and (2) While some clarification of the determination of what constitutes an injury may be appropriate, the determination of damages relative to accidents of significance can best be handled by a followup procedure, rather than promulgation of detailed requirements for all incidents which would impose an unreasonable burden upon reporting carriers and cause a proliferation of reports, including resubmitted reports."

The highway accident report is available to the general public; single copies may be obtained without charge. A $4 user-service charge will be made for a copy of the recommendation response letter, in addition to a charge of 10¢ per page for reproduction. All requests must be in writing, identified by the report and/or recommendation number and the date of publication of this notice in the FEDERAL REGISTER. Address inquiries to: Publications Unit, National Transportation Safety Board, Washington, D.C. 20594.

Multiple copies of reports may be purchased from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151.

(Secs. 304(a)(2) and 307 of the Independent Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1906)))

MARGARET L. FISHER,

NUCLEAR REGULATORY COMMISSION

[Docket No. P-560-A]

CENTRAL MAINE POWER CO.

Receipt of Partial Application for Construction Permit and Facility License: Time for Submission of Views on Antitrust Matters

Central Maine Power Company (the applicant), pursuant to section 103 of the Atomic Energy Act of 1954, as amended, has filed one part of an application, which was docketed on August 20, 1975, in connection with their plans to construct and operate a reactor in Searsport, Maine. The portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L.

The remaining portions of the application consisting of an Environmental Report and a Preliminary Safety Analysis Report pursuant to § 2.101 of Part 2, are expected to be filed in April and June 1976, respectively. Upon receipt of the remaining portions of the application dealing with radiological health and safety and environmental matters, separate notices of receipt will be published by the Commission including an appropriate notice of hearing.

The applicant has solicited from other New England utilities non-binding indications of potential interest in the unit. As utilities indicate their interest, additional antitrust information will be submitted for them.

A copy of the partial application is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Local Public Document Room, Office of Town Manager, Union Hall, Reservoir Street, Searsport, Maine 04974. Docket No. P-560-A has been assigned to the application and should be referenced in any correspondence relating to it.

Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Office of Antitrust and Indemnity, Office of Nuclear Reactor Regulation, on or before December 30, 1975.

Dated at Bethesda, Md., this 23rd day of October 1975.

For the Nuclear Regulatory Commission.

KARL KNIEL,
Chief, Light Water Reactors Branch, Division of Reactor Licensing.

[FR Doc.75-29240 Filed 10-29-75;8:45 am]

[Docket No. 50-261]

CAROLINA POWER AND LIGHT CO.

Proposed Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-23 issued to Carolina Power and Light Company (the licensee), for operation of the H. B. Robinson Steam Electric Plant Unit 2, located in Darlington County, Hartsville, South Carolina.

In accordance with the licensee's application dated September 5, 1975, the amendment would relate to the expansion of the spent fuel storage pool. The licensee proposes to install 36 additional storage locations in the present spent fuel, pool, increasing its capacity from 240 fuel assemblies to 276 fuel assemblies.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By December 8, 1975, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and § 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to G. F. Trowbridge, Esquire, Shaw, Pittman, Potts, Trow-

V 40 215 NOV 6 75 XUM

bridge, and Madden, Barr Building, 910 17th Street, NW., Washington, D.C. 20006, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for amendment dated September 5, 1975, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina. The license amendment and the Safety Evaluation, when issued, may be inspected at the above locations and a copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland this 30th day of October 1975.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Reactor Licensing.

[Docket Nos. STN 50-454, STN 50-455]

COMMONWEALTH EDISON CO. (BYRON STATION, UNITS 1 AND 2)

Issuance of Limited Work Authorization

Pursuant to the provisions of 10 CFR 50.10(e) of the Nuclear Regulatory Commission's (Commission) regulations, the Commission has authorized the Commonwealth Edison Company to conduct certain additional site activities in connection with the Byron Station, Units 1 and 2.

The activities that are authorized are within the scope of those authorized by 10 CFR 50.10(e) (3), and include installation of reinforced concrete base mat and external walls below grade and below grade interior walls to the extent necessary for structural integrity of the external walls, including any electrical conduits, ducts, piping or other structural members embedded in the base and walls for the Unit 1 containment building, auxiliary building and fuel handling building, Unit 1 pipe tunnel, Unit 1 and Unit 2 turbine building, circulating water pump house; and grouting and installation of foundation for essential service water cooling towers.

Any activities undertaken pursuant to this authorization are entirely at the risk of the Commonwealth Edison Company and the grant of the authorization has no bearing on the issuance of a construction permit with respect to the requirements of the Atomic Energy Act of 1954, as amended, and rules, regulations, or orders promulgated pursuant thereto.

A Partial Initial Decision on public health and safety issues was issued by the Atomic Safety and Licensing Board in the above captioned proceeding on October 29, 1975. The safety related activities authorized by the Commission are within the scope of 10 CFR 50.10(e) (3). This is in addition to activities previously authorized under 10 CFR 50.10 (e) (1). Notice of this action was published in the FEDERAL REGISTER on December 19, 1974 (39 FR 43768). A copy of (1) the Partial Initial Decision issued October 29, 1975; (2) the applicant's Preliminary Safety Analysis Report and amendments thereto; (3) the applicant's Environmental Report and amendments thereto; (4) the staff's Final Environmental Statement dated July 1974; and (5) the Commission's letters of authorization dated December 13, 1974, and October 30, 1975, are available for public inspection at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C., and in the Byron Public Library, Third and Washington Streets, Byron, Illinois.

Dated at Rockville, Maryland, this 30th day of October, 1975.

[Docket Nos. STN 50-456, STN 50-457]

COMMONWEALTH EDISON CO. (BRAIDWOOD STATION, UNITS 1 AND 2)

Issuance of Limited Work Authorization

Pursuant to the provisions of 10 CFR 50.10(e) of the Nuclear Regulatory Commission's (Commission) regulations, the Commission has authorized the Commonwealth Edison Company to conduct certain additional site activities in connection with the Braidwood Station, Units 1 and 2.

The activities that are authorized are within the scope of those authorized by 10 CFR 50.10(e) (3), and include installation of reinforced concrete base mat and external walls below grade and below grade interior walls to the extent necessary for structural integrity of the external walls, including any electrical conduits, ducts, piping or other structural members embedded in the base and walls for the Unit 1 containment building, auxiliary building and fuel handling building, Unit 1 pipe tunnel, Unit 1 and Unit 2 turbine building, and lake screen house.

Any activities undertaken pursuant to this authorization are entirely at the risk of the Commonwealth Edison Company and the grant of the authorization has no bearing on the issuance of a construction permit with respect to the requirements of the Atomic Energy Act of 1954, as amended, and rules, regulations, or orders promulgated pursuant thereto.

A Partial Initial Decision on public health and safety issues was issued by the Atomic Safty and Licensing Board in the above captioned proceeding on October 29, 1975. The safety relatd activities authorized by the Commission are within the scope of 10 CFR 50.10(e) (3). This is in addition to activities previously authorized under 10 CFR 50.10 (e) (1). Notice of this action was published in the FEDERAL REGISTER on January 20, 1975 (40 FR 3237). A copy of (1) the Partial Initial Decision issued October 20, 1975; (2) the applicant's Preliminary Safety Analysis Report and amendments thereto; (3) the applicant's Environmental Report and amendments thereto; (4) the staff's Final Environmental Statement dated July 1974; and (5) the Commission's letters of authorization dated January 14, 1975, and October 30, 1975, are available for public inspection at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C., and in the Wilmington Township Public Library, 201 South Kankakee Street, Wilmington, Illinois.

[Docket No. 50-321]

GEORGIA POWER CO. AND OGLETHORPE ELECTRIC MEMBERSHIP CORP.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 20 to Facility Operating License No. DPR-57 issued to Georgia Power Company and Oglethorpe Electric Membership Corporation, which revised Technical Specifications for operation of the Edwin I. Hatch Nuclear Plant, Unit 1, located in Appling County, Georgia. The amendment is effective as of its date of issuance.

The amendment modifies the Technical Specifications to revise the high steam flow trip setting associated with the High Pressure Coolant Injection (HPCI) system.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated September 11, 1975, (2) Amendment No. 20 to License No. DPR-57, with Change No. 20 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Appling County Public Library, Parker Street, Baxley, Georgia 31513.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Md., this 21st day of October, 1975.

For the Nuclear Regulatory Commission.

WALTER A. PAULSON,
Acting Chief, Operating Reactors Branch No. 3, Division of Reactor Licensing.

[Docket No. 50-321]

GEORGIA POWER CO. AND OGLETHORPE ELECTRIC MEMBERSHIP CORP.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 21 to Facility Operating License No. DPR-57 issued to Georgia Power Company and Oglethorpe Electric Membership Corporation, which revised Technical Specifications for operation of the Edwin I. Hatch Nuclear Plant Unit 1, located in Appling County, Georgia. The amendment is effective as of its date of issuance.

The amendment will (1) revise the surveillance testing requirements for the personnel air lock to the primary containment and (2) correct a typographical error.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the applications for amendment dated April 29, 1975 and August 13, 1975, (2) Amendment No. 21 to License No. DPR-57, with Change No. 21, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Appling County Public Library, Parker Street, Baxley, Georgia 31513.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 29th day of October, 1975.

[Docket No. STN 50-482]

KANSAS GAS AND ELECTRIC CO. AND KANSAS CITY POWER AND LIGHT CO.

Availability of Final Environmental Statement for the Wolf Creek Generating Station, Unit No. 1

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that the Final Environmental Statement prepared by the Commission's Office of Nuclear Reactor Regulation, related to the proposed Wolf Creek Generating Station Unit 1 to be constructed by Kansas Gas and Electric Company and Kansas City Power and Light Company in Coffey County, Kansas, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C., and in the Office of the County Clerk, Coffey County Courthouse, Burlington, Kansas. The Final Environmental Statement is also being made available at the Budget Division, Department of Administration, 1st Floor—State House, Topeka, Kansas.

The notice of availability of the Draft Environmental Statement for the Wolf Creek Generating Station and requets for comments from interested persons was published in the FEDERAL REGISTER on July 7, 1975 (40 FR 28509). The comments received from Federal, State, and local agencies and interested members of the public have been included as an appendix to the Final Environmental Statement.

Copies of the Final Environmental Statement (Document No. NUREG 75/096) may be purchased from the National Technical Information Service, Springfield, Virginia, 22161, at a cost of $9.25 for printed copies and $2.25 for microfiche.

Dated at Rockville, Maryland, this 31st day of October, 1975.

NIAGARA MOHAWK POWER CORP.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 3 to Facility Operating License No. DPR-63 issued to Niagara Mohawk Power Corporation which revised Technical Specifications for operation of the Nine Mile Point Nuclear Station, Unit 1, located in Oswego County, New York. The amendment is effective as of its date of issuance.

The amendment requires operability and surveillance by hydraulic snubbers required to protect the primary coolant system and all other safety related systems and components.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated September 17, 1975, (2) Amendment No. 3 to License No. DPR-63, with Change No. 3, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Oswego City Library, 120 E. Second Street, Oswego, New York 13126.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

NORTHEAST NUCLEAR ENERGY CO. ET AL.

Issuance of Amendment to Provisional Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 14 to Provisional Operating License No. DPR-21 issued to Connecticut Light and Power Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Northeast Nuclear Energy Company, which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit 1, located in Waterford, Connecticut. The amendment is effective as of its date of issuance.

The amendment incorporates into the Millstone Nuclear Power Station Unit 1 Technical Specifications changes to the Administrative Controls.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated December 3, 1974, (2) Amendment No. 14 to License No. DPR-21, with Change No. 27, and (3) the Commission's related Safety Evaluation. NORTHEAST NUCLEAR ENERGY CO. ET AL.

Issuance of Amendment to Provisional Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 15 to Provisional Operating License No. DPR-21 issued to Northeast Nuclear Energy Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Connecticut Light and Power Company, which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 1, located in Waterford, Connecticut. The amendment is effective as of its date of issuance.

The amendment will allow fuel handling with the availability of a single source of off site power and two sources of emergency on site power.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated September 17, 1975, (2) Amendment No. 15 to License No. DPR-21, with Change No. 28, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385.

NORTHEAST NUCLEAR ENERGY CO. ET AL.

Issuance of Amendment to Provisional Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 13 to Provisional Operating License No. DPR-21 issued to Northeast Nuclear Energy Company, the Hartford Electric Light Company, Western Massachusetts Electric Company, and Connecticut Light and Power Company, which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 1, located in Waterford, Connecticut. The amendment is effective as of its date of issuance.

The amendment will revise the provisions in the Technical Specifications relating to temperature limits for the pressure suppression pool water.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendments to Facility Operating License in connection with this action was published in the FEDERAL REGISTER on September 4, 1975 (40 FR 40880). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

For further details with respect to this action, see the letter from G. Lear to D. C. Switzer dated February 15, 1975, the letter from D. C. Switzer to G. Lear dated March 31, 1975, and the letter from K. R. Goller to D. C. Switzer dated July 16, 1975, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385. PHILADELPHIA ELECTRIC CO. ET AL.

Issuance of Amendments to Facility Operating Licenses

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 13 and 11 to Facility Operating Licenses Nos. DPR-44 and DPR-56, respectively, issued to Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, which revised Technical Specifications for operation of the Peach Bottom Atomic Power Station, Units 2 and 3, located in York County, Pennsylvania. The amendments are effective as of one week following the completion of the modification to the reactor pressure sensing devices.

The amendments modify the Technical Specifications to accommodate a plant modification to replace existing reactor pressure sensing switches with analog loops, each consisting of a pressure transmitter, a pressure indicator and a trip unit.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of these amendments is not required since the amendments do not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendments dated September 19, 1975, (2) Amendments Nos. 13 and 11 to Licenses Nos. DPR-44 and DPR-56, with Changes Nos. 14 and 11, respectively, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Martin Memorial Library, 159 E. Market Street, York, Pennsylvania 17401.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

[License No. 05-16698-01E]

TELEDYNE AQUA TECH

Issuance of Byproduct Material License

Please take notice that the Nuclear Regulatory Commission has, pursuant to Section 32.26 of 10 CFR Part 32, issued License No. 05-16698-01E to Teledyne Aqua Tech, 1730 East Prospect, Fort Collins, Colorado 80521, which authorizes the distribution of Model No. D-1 ionization fire detectors to persons exempt from the requirements for a license pursuant to Section 30.20 of 10 CFR Part 30.

1. The devices are designed to detect incipient fire by responding to the products of combustion produced by thermal decomposition of building materials or contents prior to the appearance of visible smoke, flame, or appreciable heat. The sensitive element of each detector is an ionization chamber in which air flowing into the chamber is made conductive by alpha particles emitted by a radioactive source of americium-241.

2. The byproduct material incorporated in each detector is americium in the oxide form contained in foils manufactured by Nuclear Radiation Developments (Model A-001) or by Radiochemical Centre (Model No. AMM). The nominal activity contained in each unit is 1.0 microcuries and the maximum is 1.3 microcuries.

3. Each exempt unit will have a label identifying the distributor and the byproduct material contained in the unit and recommending that the unit be returned to the manufacturer for repair or disposal.

A copy of the license and license application containing additional information are available for public inspection at the Commission's Public Document Room at 1717 "H" Street, NW., Washington, D.C.

Dated at Bethesda, Maryland, October 30, 1975.

For the Nuclear Regulatory Commission.

NATHAN BASSIN,
Acting Chief, Materials Branch, Division of Fuel Cycle and Materials Safety.

[Docket Nos. 50-259, 50-260]

TENNESSEE VALLEY AUTHORITY

Issuance of Amendments to Facility Operating Licenses

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 15 to Facility Operating License No. DPR-33 and Amendment No. 12 to Facility Operating License No. DPR-52 issued to Tennessee Valley Authority which revised Technical Specifications for operation of the Browns Ferry Nuclear Plant, Units 1 and 2, located in Limestone County, Alabama. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications regarding the surveillance requirements for the diesel generators and their associated boards to make them consistent with the corresponding limiting condition for operation.

The application for these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments is not required since the amendments do not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendments dated October 28, 1975, (2) Amendment No. 15 to License No. DPR-33 and Amendment No. 12 to License No. DPR-52 with Change No. 14, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Athens Public Library, South and Forrest, Athens, Alabama 35611.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 31st day of October, 1975.

For the Nuclear Regulatory Commission.

ROBERT A. PURPLE,
Chief, Operating Reactors Branch No. 1, Division of Reactor Licensing.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on October 31, 1975 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the Agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 19230; 70-5756]

ARKANSAS-MISSOURI POWER CO. AND ASSOCIATED NATURAL GAS CO.

Proposal To Make Unsecured Short-Term Borrowings

OCTOBER 31, 1975.

Notice is hereby given that the Arkansas-Missouri Power Company ("Arkansas-Missouri"), 405 West Park St., Blytheville, Arkansas 72315, a wholly-owned subsidiary of Middle South Utilities, Inc., a registered holding company, and Associated Natural Gas Company ("Associated"), 405 West Park St., Blytheville, Arkansas 72315, a wholly owned subsidiary of Arkansas-Missouri, have filed a joint application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Sections 6 and 7 of the Act and Rule 50(a)(2) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

Arkansas-Missouri proposes to make unsecured short-term borrowings from thirty commercial banks, from time to time during the period commencing on the effective date of this application-declaration and continuing for one year thereafter, in an aggregate amount not to exceed $7,750,000 at any one time outstanding. These borrowings will be in addition to other bank borrowings previously authorized by this Commission (HCAR No. 18990). To effect such borrowings, Arkansas-Missouri proposes to issue and sell to the First National Bank in Little Rock, for the account of the participating banks, unsecured promissory notes payable not more than 270 days from the date of issue and which may be renewed from time to time but to mature not later than one year from the effective date of this application-declaration. The notes will bear interest, payable quarterly and at maturity, on the unpaid principal amount thereof at a rate per annum equal to the commercial loan rate of Chemical Bank, New York, New York, on borrowings having a 90 day maturity by responsible and substantial commercial borrowers, with adjustments to be made effective on the first business day of the month next following the month in which any change in such rate occurs. The notes will be prepayable in whole or in part, at any time without premium or penalty, at the option of Arkansas-Missouri. No compensating balances are required.

Associated proposes to make unsecured short-term borrowings from twenty-two commercial banks in an aggregate amount not to exceed $2,750,000 at any one time outstanding. To effect such borrowings Associated proposes to issue and sell to the First National Bank, Sikeston, Missouri, for the account of participating banks, an unsecured promissory note payable not more than 270 days from the date of issuance. The note will bear interest, payable quarterly and on maturity, on the unpaid principal amount thereof at a rate per annum equal to the commercial loan rate of the Chase Manhattan Bank, New York, New York, from time to time in effect on borrowings having a 90 day maturity by responsible and substantial corporate borrowers, with adjustments to be made effective on the first business day of the month next following the month in which any change in rate occurs. The note will be prepayable in whole or in part, at any time, without premium or penalty, at the option of Associated. No compensating balances are required.

The net proceeds to be received from the issuance and sales of notes by both Arkansas-Missouri and Associated will be used to retire presently outstanding short-term debt ($9,350,000 for Arkansas-Missouri and $2,750,000 for Associated as of September 30, 1975).

The fees and expenses to be incurred in connection with these transactions are estimated at $5,000. The application-declaration states that the sale of notes by Arkansas-Missouri is subject to approval by the Arkansas Public Service Commission. It is stated that no other state or federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than November 25, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant-declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 33-19224]

REFUNDABILITY OF LONG-TERM DEBT AND PREFERRED STOCK

Request for Comments

Request for comments on whether the Commission should permit long-term debt and preferred stock issued by companies subject to the Public Utility Holding Company Act of 1935 ("Act") to contain restrictions on refundability during a period of 10 years rather than five years.

The Commission's Statement of Policy Regarding First Mortgage Bonds and Preferred Stock issued by companies subject to the Act (Holding Company Act Release Nos. 13105 [21 FR 1286] and 13106 [21 FR 1288] February 16, 1956) originally required that such securities be redeemable at the option of the issuer "at any time upon reasonable notice and with reasonable redemption premiums, if any." We have applied the same requirements to all long-term debt. Unrestricted refundability gives effect to the statutory policy, as expressed in Section 1(b)(5), which calls for economy in the raising of capital. Following an extensive re-examination of this redemption policy, we modified our standard to permit issuers subject to the Act to include a refunding limitation which would prohibit, for a period of not more than five years after sale, the refunding of senior securities by the issuance of new senior securities at lower interest or preferred dividend costs (Holding Company Act Release Nos. 16369, May 8, 1969 [23 FR 9553] and 16758, June 22, 1970 [35 FR 10585]. We then stated on page 2 of both releases:

> The Commission wishes to emphasize that it will continuously review the effects of its redemption policies, including specifically the foregoing modification, and based on experience with the modification make such adjustments in these policies as may from time to time be deemed appropriate, including a rescission of the present modification.

[In millions]

Total issues	Long-term debt[1]		Preferred stocks	
	Dollar volume	Number of issues	Dollar volume	Number of issues
June 1974 to January 1975	$1,229	23	$955	33
February to September 1975	2,806	52	1,330	45
Total	4,036	85	2,285	78
Issues with 10-yr clause:				
June 1974 to January 1975	690	14	451	16
February to September 1975	960	18	296	10
Total	1,640	32	747	26
Percent with 10-yr clause to total:				
June 1974 to January 1975	37.4	42.4	47.2	48.5
February to September 1975	34.2	34.6	22.3	22.2
Total	35.5	37.6	32.7	33.3

[1] Issues with a maturity of 10-yr or less not included.

We have been informed that some major institutions have been reluctant or unwilling to purchase senior securities without a 10-year call restriction. Actually no one pretends to know what the cost of money is likely to be six years hence and thereafter. An institutional investor who insists upon a 10-year call restriction does so as a hedge against the mere contingency that the cost of money can decline. Perhaps he is in a position to exact this concession solely because of the keen competition for funds in the capital market. The issuer, for his part, may be willing to forego the privilege of refunding six to ten years hence in order to secure funds that are urgently needed now.

In 1969–1970 there were indications that the issuer could realize savings of about 25 to 30 basis points in current cost of money (Holding Company Act Release Nos. 16211, p. 5 and 16685, p. 5), and we modified our policy in recognition of such claims to savings. One of the questions is whether an extension of the call restriction to ten years would yield discernible and demonstrable savings in cost to the issuer.

It appears appropriate to examine the need or advisability of extending up to ten years the nonrefundability restriction for long-term debt and preferred stock. Accordingly, comments of the registered public utility holding companies, underwriters, institutional investors and any other interested persons should be directed to the following questions, among others:

1. Have issuers or underwriters been advised that institutional investors are unwilling to purchase long-term debt or preferred stock without a 10-year call restriction? Specify which institutions have such a policy and state by whom so advised. State also whether there has been a change in such institutional policy in the current year.

2. Have issuers and underwriters been informed by institutional investors that a lower cost of money would be acceptable for including a 10-year nonrefunding provision? If so, specify the percentage of cost savings.

3. Assume an issue of $25 million and a cost of money of 25% less at the end of the fifth year than the rate at which the issue was first sold. What would be the additional cost to the issuer because of inability to refund during the sixth to the tenth years?

All interested persons are invited to submit their comments in writing to George A. Fitzsimmons, Secretary, Se-

SECURITIES INFORMATION PROCESSORS

Notice of Application for Registration

Notice is hereby given that, pursuant to Section 11A(b)(2) of the Securities Exchange Act of 1934, (the "Act") the Consolidated Tape Association ("CTA") filed an application on October 29, 1975 with the Securities and Exchange Commission (the "Commission") for registration as a securities information processor.

The Commission is required under new Section 11A(b)(3) of the Act to find, before granting registration, that an applicant "is so organized, and has the capacity, to be able to assure the prompt, accurate, and reliable performance of its functions as a securities information processor, . . . and, insofar as it is acting as an exclusive processor, operate fairly and efficiently . . ." Additionally, Section 11A(b)(3) of the Act provides that the Commission shall, upon the filing of an application for registration pursuant to Section 11A(b)(2) of the Act, publish notice of the filing and afford interested persons an opportunity to submit written data, views and arguments concerning such application. A copy of the CTA application is available for public inspection in the Commission's Public Reference Room at 1100 L Street, NW., Washington, D.C. 20549.

All persons interested in submitting written data, views and arguments concerning CTA's application should submit them in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 not later than November 21, 1975. All communications should refer to File No. S7-599 and will be available for public inspection in the Commission's Public Reference Room.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 11780; SR-ASECC-75-1]

AMERICAN STOCK EXCHANGE, INC.

Notice of Filing of Proposed Rule Changes

OCTOBER 31, 1975.

Notice is hereby given that the American Stock Exchange, Inc. (the "Amex"), 86 Trinity Place, New York, New York 10006, has filed, pursuant to Rule19b-4 [17 CFR 240.19b-4] under the Securities Exchange Act of 1934 (the "Act") [15 U.S.C. 78s], as amended by Pub. L. No. 94-29 (June 4, 1975), amendments (the "Amendments") to the rules of the American Stock Exchange Clearing Corporation ("ASECC").

1. *The Amendments.* The Amendments were adopted to enable ASECC to collect, from its members, New York City taxes on the sale and purchase of bonds. New York City imposed the bond transfer tax, effective August 15, 1975. The procedures for collection of the New York City bond transfer tax are identical to the procedures for collection of the New York State stock transfer tax; the Amendments consist of minor changes in ASECC's rules 3, 13 and 16, which relate to the collection of the State stock transfer tax, to expand their scope to include the bond transfer tax.

2. *Solicitation of Comments on the Amendments.* Publication of the Amendments is expected to be made in the FEDERAL REGISTER during the week of November 3, 1975. Interested persons are invited to submit views and comments on the Amendments within two weeks of publication in the FEDERAL REGISTER. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-ASECC-75-1.

Copies of the Amendments and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of the filing will also be available at the principal office of the Amex.

3. *Summary Effectiveness of the Amendments.* The Amendments, which establish collection procedures identical to the ASECC procedures currently in effect for the collection of the New York State stock transfer tax, were adopted under unusual emergency circumstances arising from the sudden promulgation of the New York City bond transfer tax. The regulation imposing the tax requires brokers and dealers to remit the tax through organizations which, like ASECC, clear and settle bond transactions. In addition, other methods of collection would be cumbersome and would place an inappropriate burden on the orderly operation of bond markets.

In view of the emergency nature of the Amendments, their similarity to existing procedures and their importance to the orderly operation of the bond markets, the Division of Market Regulation finds that immediate effectiveness of the Amendments is necessary for the maintenance of fair and orderly markets.

It is therefore ordered, pursuant to Section 19(b)(3)(B) of the Act [15 U.S.C. 78s(b)(3)(B)], that the Amendments relating to the collection of the New York City bond transfer tax, filed with the Commission on September 24, 1975, be put into effect summarily, effective October 31, 1975, until, pursuant to Section 19(b)(2) of the Act [15 U.S.C. 78s(b)(2)], the Commission (or the Division of Market Regulation, pursuant to delegated authority, approves the Amendments or until the Commission institutes proceedings to determine whether the Amendments shall be disapproved.

By the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75-29853 Filed 11-5-75;8:45 am]

[Rel. No. 19232; 70-5750]

NEW ENGLAND ELECTRIC SYSTEM

Proposed Issue and Sale of Short-Term Notes to Banks

OCTOBER 31, 1975.

Notice is hereby given that New England Electric System ("NEES"), 20 Turnpike Road, Westborough, Massachusetts 01581, a registered holding company, has filed an application-declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(a) and 7 of the Act and Rules 42(b)(2) and 50(a)(2) promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, as amended, which is summarized below, for a complete statement of the proposed transaction.

NEES requests that, for the period ending May 31, 1977, it be permitted from time to time to issue or renew notes of a maturity of less than one year evidencing short-term bank borrowings provided that the aggregate principal amount of such notes outstanding at any one time shall not be more than $25,000,000. Upon completion of the next common share issue, the proceeds of which are expected to aggregate $30,000,000, or May 31, 1977, whichever occurs first, the borrowing authority requested hereby will terminate.

The new notes will bear interest at not in excess of the prime interest rate for commercial borrowing of the bank from which the borrowing is made at the date of the issue of such note, will mature not less than one year from the date of issue, and will be prepayable at any time without premium or penalty. NEES will make the borrowings from among the following banks:

Continental Illinois National Bank & Trust Co., Chicago	$5,000,000
The Chase Manhattan Bank, N.A., New York	5,000,000
1st National City Bank, New York	5,000,000
Irving Trust Co., New York	5,000,000
Morgan Guaranty Trust Co., New York	5,000,000
Total	25,000,000

The amounts that NEES may borrow may be increased or decreased during the period, but at no time will the aggregate amount of short-term borrowings from all banks exceed the authorization requested.

NEES will either maintain funds in the banks which represent compensating balances or in lieu thereof will pay fees equivalent to such compensating balance requirements. Assuming a 8% prime rate and a compensating balance of 10% of the line of credit and 10% of any borrowings thereunder, the effective rate of interest to be paid by NEES is approximately 10%.

The proceeds from the sale of notes will be made available to subsidiaries particularly New England Power Company ("NEPCO") through the purchase of additional shares of its common capital stock scheduled for mid-December 1975, in furtherance of its construction program and to make loans to New England Energy Incorporated in furtherance of its exploration for, and development and production of, fuel used in the NEES System.

The application-declaration states that NEES' expenses incident to the proposed issuance of notes will be approximately $5,000 and that no state commission or federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than November 25, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

STATION COMMITTEE ON EDUCATIONAL ALLOWANCES

Notice of Meeting

Notice is hereby given pursuant to Section V, Review Procedure and Hearing Rules, Station Committee on Educational Allowances that on November 13, 1975, at 1 p.m., the Des Moines Regional Office Station Committee on Educational Allowances shall at Room 1021, Federal Building, 210 Walnut Street, Des Moines, Iowa 50309, conduct a hearing to determine whether Veterans Administration benefits to all eligible persons enrolled at Dwyer Aircraft Sales, Box 329, Municipal Airport, Mason City, Iowa 50401, should be discontinued, as provided in 38 C.F.R. 21.4134, because a requirement of law is not being met or a provision of the law has been violated. All interested persons shall be permitted to attend, appear before, or file statements with the committee at that time and place.

Dated: October 30, 1975.

ROBERT L. WINTERS,
Director.

INTERSTATE COMMERCE COMMISSION

[Notice 908]

ASSIGNMENT OF HEARINGS

NOVEMBER 3, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

I & S 9060 Sub 2, Iron or Steel Scrap, Western & Southern Territories, now being assigned December 10, 1975, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC-F-12321, Akers Motor Lines, Inc.—Control—Central Motor Lines, Inc.; F.D. 27900, Akers Motor Lines, Inc.—Securities and MC-F-12557, Transcon Lines-Purchase (Portion)-Central Motor Lines, Inc. and Akers Motor Lines, Incorporated, now assigned December 2, 1975 at Charlotte, North Carolina, will be held in the Sheraton Center, 555 S. McDowell Street.

MC 76036 Sub 6, Canadian Freightways Eastern Limited, now assigned November 12, 1975 at Lansing, Michigan, is cancelled and reassigned for hearing on January 19, 1976 at Lansing, Michigan, (1 week), at the Hilton Hotel, 7601 Saginaw Street.

MC 64932 Sub 549, Rogers Cartage Co., now assigned December 1, 1975, at Chicago, Ill., is canceled and application dismissed.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice No. 88]

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER APPLICATIONS

OCTOBER 31, 1975.

The following applications are governed by Special Rule 1100.247[1] of the Commission's general rules of practice (49 CFR, as amended), published in the FEDERAL REGISTER issue of April 20, 1966, effective May 20, 1966. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d) (3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d) (4) of the special rules, and shall include the certification required therein.

Section 247(f) (as amended, 49 FR 37215) published in the FEDERAL REGISTER issue of August 26, 1975, effective September 15, 1975, further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps (whether modified procedure, oral hearing, or other procedures) will be determined generally in accordance with the Commission's general policy statement concerning motor carrier licensing procedures, published in the FEDERAL REGISTER issue of May 3, 1966. This assignment will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

Evidence respecting how equipment is expected to be returned to an origin point, as well as other data relating to operational feasibility (including the need for dead-head operations), must be presented as part of an applicant's initial evidentiary presentation (either at oral hearing or in its opening verified statement under the modified procedure) with respect to all applications filed on or after December 1, 1973.

If an applicant states in its initial evidentiary presentation that empty or partially empty vehicle movements will result upon a grant of its application, applicant will be expected (1) to specify the extent of such empty operations, by mileages and the number of vehicles, that would be incurred, and (2) to designate where such empty vehicle operations will be conducted.

Each applicant (except as otherwise specifically noted) states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 9269 (Sub-No. 19), filed October 17, 1975. Applicant: BEST WAY MOTOR FREIGHT, INC., 1765 Sixth Avenue South, Seattle, Wash. 98134. Applicant's representative: William J. Dahl (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, and commodities in bulk), serving Yakima, Benton, and Franklin Counties, Wash. as off route points in connection with carrier's authorized regular route operation in Sub No. 15, between Tacoma and Spokane, Wash. over Interstate Highway 90.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash.

No. MC 11722 (Sub-No. 48), filed October 14, 1975. Applicant: BRADER HAULING SERVICE, INC., P.O. Box 655, Zillah, Wash. 98953. Applicant's representative: Charles C. Flower, 303 East D Street, Yakima, Wash. 98901. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Newsprint, in rolls*, from Seattle, Wash., to Sunnyside, Pasco, Kennewick, Richland, Ellensburg, Wenatchee, Walla Walla, and Longview, Wash.; Lewiston, Boise, Sandpoint, Moscow, Emmett, and Twin Falls, Idaho; and Ontario, Astoria, Portland, Albany, Eugene, Medford, Coos Bay, and Salem, Oreg.

NOTE.—Applicant holds contract carrier authority in MC 124658 Subs 2 and 6, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at Yakima, Wash., Portland, Oreg., or Seattle, Wash.

No. MC 22229 (Sub-No. 105), filed October 14, 1975. Applicant: TERMINAL TRANSPORT COMPANY, INC., 248 Chester Avenue, S.E., Atlanta, Ga. 30316. Applicant's representative: Ralph B. Mathews (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving Swainsboro, Ga., as an intermediate point in its regular route between Atlanta and Savannah, Ga.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Atlanta or Savannah, Ga.

No. MC 25798 (Sub-No. 278), filed October 14, 1975. Applicant: CLAY HYDER TRUCKING LINES, INC., Post Office Box 1186, Auburndale, Fla. 33823. Applicant's representative: Tony G. Russell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wine, wine products, brandy and grape juice*, from points in California, to points in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, Missouri, Kansas, Nebraska, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Los Angeles or San Francisco, Calif.

No. MC 28599 (Sub-No. 9), filed October 10, 1975. Applicant: DEVINE & SON TRUCKING CO., a Corporation, P.O. Box 217, 2700 Rice Ave., West Sacramento, Calif. 95691. Applicant's representative: James J. Devine (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sawdust, wood shavings and ground wood*, in bulk, in specialized equipment, fom Reno, Nev., to Rocklin, Calif.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Sacramento or San Francisco, Calif.

No. MC 30561 (Sub-No. 3), filed October 3, 1975. Applicant: JOSEPH RUFFIN, doing business as, RUFFIN'S MOTOR FREIGHT, 34 Elder Avenue, Yeadon, Pa. 19050. Applicant's representative: Henry U. Snavely, 410 Pine Street, Vienna, Va. 22180. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Glass and glassware*, as described in Appendix IX to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from the ports and storage facilities used by Associated Imports, Inc., at or near Baltimore, Md.; Boston, Mass.; Chicago, Ill.; Detroit, Mich.; New York, N.Y.; Philadelphia, Pa.; Savannah, Ga.; Wilmington, Del.; and Portage, Ind.; to those points in the United States on and east of a line beginning at the mouth of the Mississippi River, and extending along the Mississippi River to its junction with the western boundary of Itasca County, Minn., thence northward along the western boundaries of Itasca and Koochiching Counties, Minn., to the International Boundary line between the United States and Canada, under a continuing contract or contracts with Associated Imports, Inc., of Providence, R.I.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Philadelphia, Pa.

No. MC 31237 (Sub-No. 8), filed October 16, 1975. Applicant: DIGNAN TRUCKING, INC., 3210 Hammonds Ferry Rd., P.O. Box 7463, Baltimore, Md. 21227. Applicant's representative: Frank B. Hand, Jr., P.O. Box 187, Berryville, Va. 22611. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, automobiles, commodities in bulk, commodities requiring special equipment) serving the facilities of London Fog Division of Londontown Corporation, located at or near Eldersburg (Carroll County), Md., as an off-route points in connection with applicant's authorized regular-route operations.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 35628 (Sub-No. 378), filed October 14, 1975. Applicant: INTERSTATE MOTOR FREIGHT SYSTEM, 134 Grandville Avenue SW., Grand Rapids, Mich. 49502. Applicant's representative: Michael P. Zell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), serving the plantsite and other facilities of Minnesota Mining and Manufacturing Company located at or near Knoxville, Iowa, as an off-route points in connection with applicant's otherwise authorized operations.

NOTE.—If a hearing is deemed necessary, the applicant requests that the application be consolidated with other similar applications, at St. Paul, Minn., Chicago, Ill., or Washington, D.C.

No. MC 39443 (Sub-No. 23), filed October 9, 1975. Applicant: THOMPSON, INC., 5014 Broadway, Quincy, Ill. 62301. Applicant's representative: Ernest A. Brooks, II, 1301 Ambassador Bldg., St. Louis, Mo. 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Feed, animal or poultry, dry, and dry animal and poultry feed ingredients*, in bulk, from the plantsite of Gooch Feed Mill Corporation, a Subsidiary of Archer Daniels Midland Company, (1) at Baxter, Iowa, to points in Illinois; and (2) at Decatur, Ill., to points in Iowa.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago, Ill.

V 40 215 NOV 6 75 XUM

No. MC 46240 (Sub-No. 17), filed October 17, 1975. Applicant: DIRECT TRANSIT LINES, INC., 200 Colrain Street, SW., P.O. Box 8008, Grand Rapids, Mich. 49508. Applicant's representative: Martin J. Leavitt, 22375 Haggerty Road, P.O. Box 400, Northville, Mich. 48167. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Nonferrous metals*, (A) from points in Illinois (except Chicago), Missouri (except St. Louis), New Jersey, New York, Pennsylvania, and Wisconsin, to Port Huron, Mich.; and (B) from points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Iowa, Kentucky, Louisiana, Massachusetts, Minnesota, Mississippi, Tennessee, and West Virginia, to Port Huron, Mich.; (2) *Copper, brass, bronze, and aluminum articles*, from Port Huron, Mich., to points in the Commercial Zones of Milwaukee, Kenosha, Racine and Waukesha, Wis., points in Erie, Lawrence and Mercer Counties, Pa., and points in Chautauqua, Erie, Genesee, Monroe, Wayne, Cayuga, and Onondaga Counties, N.Y.; and (3) *brass, bronze, copper, aluminum and plastic articles*, from Hartville, Tenn., to points in Ohio, Indiana, Illinois, Wisconsin, Pennsylvania, Kentucky, West Virginia, Missouri, Iowa, New York, New Jersey, Albama, Arkansas, Connecticut, Delaware, Florida, Georgia, Louisiana Massachusetts, Minnesota, and Mississippi, under a continuing contract or contracts with Mueller Brass Company of Port Huron, Mich.

NOTE.—Applicant states that it presently holds authority to transport non-ferrous scrap metals and that the purpose of paragraph (1) is to expand the commodity description from non-ferrous scrap metals to nonferrous metals. Applicant holds common carrier authority in MC 106603 and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Chicago, Ill. or Washington, D.C.

No. MC 51146 (Sub-No. 447), filed October 14, 1975. Applicant: SCHNEIDER TRANSPORT, INC., 2661 South Broadway, P.O. Box 2298, Green Bay, Wis. 54304. Applicant's representative: Neil A. DuJardin (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Printed matter*, from the plant and warehouse facilities of Henry Wurst, Inc. located at or near Apex, N.C., to points in Missouri, Illinois, Indiana, Iowa, Wisconsin, Minnesota, Ohio, Kentucky, West Virginia, Virginia, Maryland, Delaware, Pennsylvania, New Jersey, New York, Rhode Island, Connecticut, Michigan, Vermont, New Hampshire, Maine, Massachusetts, and the District of Columbia.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Chicago, Ill.

No. MC 59680 (Sub-No. 215), filed October 17, 1975. Applicant: STRICKLAND TRANSPORTATION CO., INC., 3011 Gulden Avenue, P.O. Box 5689, Dallas, Tex. 75222. Applicant's representative: Oscar P. Peck (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, and household goods as defined by the Commission in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk and those requiring special equipment), Between St. Louis, Mo. and Amarillo, Tex. in connection carrier's otherwise authorized regular route operations, serving no intermediate points: From St. Louis, Mo. over U.S. Highway 66 (also over U.S. Interstate Highway 44 to junction of U.S. Highway 40, thence over U.S. Interstate Highway 40) to Amarillo, Tex., and return over the same route, alternate route for operating convenience only.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either St. Louis, Mo., Dallas, Tex., or Washington, D.C.

No. MC 61231 (Sub-No. 86), filed October 3, 1975. Applicant: ACE LINES, INC., 4143 East 43rd Street, Des Moines, Iowa 50317. Applicant's representative: William L. Fairbank, 1980 Financial Center, Des Moines, Iowa 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles* (except in bulk), from the plantsite and warehouse facilities of North Star Steel Company at Newport, Minn., to points in Arizona, Arkansas, Colorado, Kentucky, Michigan, Montana, Ohio, Oklahoma, New Mexico, Texas, and Wyoming.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 61440 (Sub-No. 152), filed October 16, 1975. Applicant: LEE WAY MOTOR FREIGHT, INC., 3000 West Reno, P.O. Box 82488, Exchange Branch, Oklahoma City, Okla. 73108. Applicant's representative: Richard H. Champlin (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the plantsite and storage facilities of Continental Carbon Co. located at or near Sheerin, Tex., as an off-route point in connection with carrier's otherwise authorized regular operations.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Oklahoma City, Okla., or Washington, D.C.

No. MC 61592 (Sub-No. 373), filed October 14, 1975. Applicant: JENKINS TRUCK LINE, INC., P.O. Box 697, R.R. No. 3, Jeffersonville, Ind. 47130. Applicant's representative: E. A. DeVine, P.O. Box 737, 101 First Avenue, Moline, Ill. 61265. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Houses, set up*, (1) from Clay Center and Belleville, Kans., to points in Adams, Boone, Buffalo, Butler, Cass, Clay, Colfax, Custer, Dawson Dodge, Douglas, Fillmore, Franklin, Frontier, Furnes, Gage, Gosper, Greeley, Hall, Hamilton, Harlan, Hayes, Hitchcock, Howard, Jefferson, Johnson, Kearney, Lancaster, Lincoln, Logan, McPherson, Merrick, Nance, Nemaha, Nuckolls, Otoe, Pawnee, Phelps, Platte, Polk, Red Willow, Richardson, Saline, Sarpy, Saunders, Seward, Sherman, Thayer, Valley, Washington, Webster, and York Counties, Nebr.; and (2) from Harper, Kans., to points in Alfalfa, Beaver, Cimarron, Ellis, Garfield, Grant, Harper, Kay, Major, Noble, Osage, Pawnee, Texas, Tulsa, Washington, Woods, and Woodward Counties, Okla.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Kansas City, Mo.

No. MC 61592 (Sub-No. 375), filed October 14, 1975. Applicant: JENKINS TRUCK LINE, INC., P.O. Box 697, Jeffersonville, Ind. 46206. Applicant's representative: Donald W. Smith, Suite 2465, One Indiana Square, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Agricultural machinery and implements and attachments* for agricultural machinery and implements; (2) *such merchandise* as is dealt in by lawn and garden stores (except chemicals and commodities in bulk); and (3) *parts* for the items named in (1) and (2) above when moving in mixed shipments with items named in (1) and (2) above, from Memphis, Tenn., to points in the United States (except Alaska Hawaii, Maine, Massachusetts, Vermont, Connecticut, New Hampshire, New York, Rhode Island, New Jersey, Delaware, Maryland, Virginia, and the District of Columbia), restricted to the transportation of traffic originating at the facilities used by International Harvester Company at Memphis, Tenn.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Chicago, Ill. or Washington, D.C.

No. MC 71902 (Sub-No. 83), filed October 15, 1975. Applicant: UNITED TRANSPORTS, INC., 4900 North Santa Fe, Oklahoma City, Okla. 73118. Applicant's representative: Robert E. Joyner, 2008 Clark Tower, 5100 Poplar Avenue, Memphis, Tenn. 38137. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New motor vehicles*, in initial movements, in truckaway service, from the plantsite or facilities of the Chrysler Corporation at or near Belvidere, Ill., to points in Kansas and Missouri.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich. or Washington, D.C.

No. MC 73587 (Sub-No. 141), filed October 16, 1975. Applicant: ELLIOTT BROTHERS TRUCKING COMPANY, INC., P.O. Box 719, Easton, Md. 21601. Applicant's representative: William J. Little, Suite 1110, Ten East Baltimore Street, Baltimore, Md. 21202. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except Classes A and B explosives, other than small arms ammunition, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), Serving the plantsite of London Fog Division, Londontown Corporation at or near Eldersburg, Md., as an off-route point in connection with applicant's present regular route operations between Alexandria, Va., and Philadelphia, Pa.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C., or Baltimore, Md.

No. MC 74321 (Sub-No. 115), filed October 17, 1975. Applicant: B. F. WALKER, INC., P.O. Box 17-B, Denver, Colo. 80217. Applicant's representative: Richard P. Kissinger (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Iron and steel articles*, from the plantsite and storage facilities of National Pipe & Tube Company located in Liberty County, Tex., to points in the United States (except Alaska and Hawaii); and (2) *materials, supplies and equipment* used in the production and distribution of iron and steel articles, from points in the United States (except Alaska and Hawaii), to the plantsite of National Pipe & Tube Company in Liberty County, Tex.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Houston, Tex. or Denver, Colo.

No. MC 75320 (Sub-No. 183), filed October 15, 1975. Applicant: CAMPBELL SIXTY-SIX EXPRESS, INC., Post Office Box 807, Springfield, Mo. 65801. Applicant's representative: John A. Crawford, Post Office Box 22567, Jackson, Miss. 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment): (1) Serving the junction of U.S. Highway 60 and Oklahoma Highway 51 at or near Wagoner, Okla. for purposes of joinder only; and (2) Serving the junction of Arkansas Highway 244 and Arkansas Highway 59 located approximately 3 miles north of Evansville, Ark. for purposes of joinder only.

NOTE.—If a hearing is deemed necessary, applicant request it be held at Jackson, Miss.

No. MC 82492 (Sub-No. 126), filed October 16, 1975. Applicant: MICHIGAN & NEBRASKA TRANSIT CO., INC., P.O. Box 2853, 2109 Olmstead Road, Kalamazoo, Mich. 49003. Applicant's representative: William C. Harris (same address as applicant). No. MC 141225 (Sub-No. 1), filed October 7, 1975. Applicant: BURNS TRANSFER, INC., 2538 North Washington Street, Kokomo, Ind. 46901. Applicant's representative: Edward P. Dechert, 300 North Main Street, Box 269, Kokomo, Ind. 46901. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used household goods*, between points in Indiana, restricted to the transportation of shipments having a prior or subsequent movement in containers, and further restricted to the performance of pick-up and delivery service in conjunction with packing, crating and containerization or unpacking, uncrating and decontainerization of such shipments.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Indianapolis or Fort Wayne, Ind.

No. MC 141259, filed August 12, 1975. Applicant: GARY L. McCALLISTER, doing business as, M–C TRANSPORTATION, Box 1911, Rock Springs, Wyo.

V 40 215 NOV 6 75 N
XUM

82901. Applicant's representative: Gary L. McCallister (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Barite, lime (hydrated) and bentonite (common ground clay)*, in bulk and in sacks, from Battle Mountain, (Lander County), Nev. and Salt Lake City, (Salt Lake County), Utah, to Rock Springs, (Sweetwater County), Wyo. and Casper. (Natrona County), Wyo.; (2) *sand*, in bulk and in sacks, from Houch, (Apache County), Ariz., to Rock Springs, (Sweetwater County), Wyo. and Houch, (Apache County), Ariz., to Vernal, (Dagget County), Utah; and (3) *cement*, in bulk and in sacks, from Devil's Slide, (Morgan County), Utah, to Rock Springs, (Sweetwater County), Wyo.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Rock Springs or Casper, Wyo.

No. MC 141318 (Sub-No. 1), filed September 11, 1975. Applicant: PERNSTEINER TRUCKING, INC., Route #2, Medford, Wis. 54451. Applicant's representative: Harold Pernsteiner (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Doors, sashes, window units, screens, frames and window blinds*, from Medford, Wis., to points in North Dakota, South Dakota, Montana, Minnesota, Wisconsin, Illinois, Indiana, Ohio, Kentucky, Michigan, Nebraska, Pennsylvania, West Virginia, Iowa and Tennessee; and (2) *materials and supplies* used in the manufacture and distribution of the commodities named in (1) above, from points in North Dakota, South Dakota, Montana, Minnesota, Wisconsin, Illinois, Indiana, Ohio, Kentucky, Michigan, Nebraska, Pennsylvania, West Virginia, Iowa and Tennessee, to Medford, Wis., under a continuing contract or contracts with Weather Shield Mfg., Inc.

NOTE.—If a hearing is deemed necessary applicant requests it be held at Minneapolis, Minn.

No. MC 141357 (Sub-No. 2), filed October 17, 1975. Applicant: SHANUS, INC., 232 N. 1st Street, Minneapolis, Minn. 55401. Applicant's representative: Michael J. Priestley, 100 W. Franklin Avenue, Minneapolis, Minn. 55404. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fleshings* (a by-product or residue of hides) from Minneapolis/St. Paul, Minn. and commercial zone, to Sioux City, Iowa and Green Bay, Wis.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Minneapolis or St. Paul, Minn.

No. MC 141397, filed October 8, 1975. Applicant: VINCENT T. CONTE, 643 Harold Street, Mamaroneck, N.Y. 10543. Applicant's representative: Roger H. Sirlin, 211 Mamaroneck Avenue, Mamaroneck, N.Y. 10543. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Furniture*, between points in Westchester and Bronx Counties, N.Y., and points in Fairfield County, Conn., under a continuing contract or contracts with TM's of Stamford, Inc., Roevins of Yonkers, Inc., Roevins of of Larchmont, Inc., and Roevins of Riverdale, Inc.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Mamaroneck, N.Y.

No. MC 141398, filed October 9, 1975. Applicant: J & W MOVING & STORAGE CO., INC., 541 Craft Highway, P.O. Box 2400, Mobile, Ala. 36601. Applicant's representative: Robert G. Gleason, 15 South Grady Way, Evergreen Bldg., #217, Renton, Wash. 98055. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used household goods:* (1) Between Gulfport, Miss., on the one hand, and, on the other, points in Harrison, Jackson, Hancock, Pearl River, Stone, George, Greene, Wayne, Jones, Perry, Forrest, Covington, Lamar, Marion, Jefferson Davis, Walthall, Lawrence, Pike and Lincoln Counties, Miss.; (2) Between Mobile, Ala., on the one hand, and, on the other, points in Baldwin, Clarke, Conecuh, Escambia, Mobile, Monroe, and Washington Counties, Ala.; and (3) Between Mobile, Ala., on the one hand, and, on the other, points in Gulfport, Miss., restricted to the transportation of shipments having a prior or subsequent movement, in containers, beyond the points authorized, and further restricted to the performance of pickup and delivery service in connection with the packing, crating, and containerization or unpacking, uncrating, and decontainerization of such shipments.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Mobile, Ala.

No. MC 141400, filed October 2, 1975. Applicant: FRANK'S TOWING, INC., 953 Central Street, Lowell, Mass. 01852. Applicant's representative: Joseph P. Donahue, Jr., 21 George Street, Lowell, Mass. 01852. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Disabled vehicles*, between points in Massachusetts, New York, New Jersey, Maine, New Hampshire, Vermont, Rhode Island, and Connecticut.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Boston, Mass.

No. MC 141410 (Sub-No. 1), filed October 7, 1975. Applicant: KAZERY'S BLACK ANGUS MEATS AND GROCERIES TRUCKING CO., a corporation, P.O. Box 8780, Jackson, Miss. 39204. Applicant's representative: Morton E. Kiel, Suite 6193–5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Clay and clay products*, from Jackson, Miss., to points in California; and (2) *catalyst*, from Los Angeles, Calif., to Jackson, Miss., under contract with Filtrol Corporation.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif.

No. MC 141418, filed October 8, 1975. Applicant: PAUL SAVAGE, doing business as, PAUL SAVAGE TRUCKING, 152 Crystal St., North Arlington, N.J. 07032. Applicant's representative: George A. Olsen, 69 Tonnele Ave., Jersey City, N.J. 07306. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Metal finishing compounds* (except in bulk), from Kearney, N.J., to points in New Jersey, New York, Connecticut, Rhode Island, Massachusetts, Pennsylvania, Delaware, Maryland, Ohio, Indiana, Illinois, Michigan, Virginia, North Carolina, South Carolina, Georgia and West Virginia and (2) *materials, equipment and supplies* used or useful in the manufacture or sale of the above commodities (except commodities in bulk), from the destination states in (1) above, to Kearny, N.J., under a continuing contractor contracts with Frederick Gumm Chemical Co., Inc., Kearny, N.J.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at New York, N.Y. or Washington, D.C.

No. MC 141419, filed October 14, 1975. Applicant: S & M MATERIALS COMPANY, a corporation, P.O. Box 218, Lumpkin, Ga. 31815. Applicant's representative: Paul M. Daniell, P.O. Box 872, Atlanta, Ga. 30301. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dirt, gravel, sand and crushed stone*, in bulk, in dump vehicles, from points in Russell County, Ala., to points in Georgia.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

PASSENGER APPLICATIONS

No. MC 129969 (Sub-No. 3), filed October 10, 1975. Applicant: LAKELAND BUS LINES, INC., East Blackwell Street, Dover, N.J. 07801. Applicant's representative: Charles J. Williams, 47 Lincoln Park, Newark, N.J. 07102. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Passengers*, between the Port Authority Bus Terminal, at New York, N.Y., and the plantsite of Nabisco, Inc., at East Hanover, N.J., under a contract or continuing contracts with Nabisco, Inc.

NOTE.—Applicant holds common carrier authority in MC 109802 and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at Newark, N.J., or New York, N.Y.

No. MC 141104 (Sub-No. 1), filed October 8, 1975. Applicant: MARTIN'S COACHES LIMITED, a corporation, 1050 9th Avenue, West, Box 534, Owen Sound, Ontario, Canada N4K 1L5. Applicant's representative: William J. Hirsch, Suite 1125, 43 Court Street, Buffalo, N.Y. 14202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special and charter operations, from ports of entry on the International Boundary line between the United States and Canada, to points in the United States including Alaska but excluding Hawaii, and return.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Buffalo, N.Y.

No. MC 141294 (Sub-No. 1), filed September 18, 1975. Applicant: GETTYSBURG TOURS, INC., 302 York Street, Gettysburg, Pa. 17325. Applicant's representative: James D. Campbell, Jr., Six North Third Street, Bergner, Bldg., P.O. Box 840, Harrisburg, Pa. 17108. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, in special operations, in round-trip sightseeing and pleasure tours, beginning and ending at points in the Borough of Gettysburg, Pa., and Highland, Liberty, Freedom, Mount Joy, Mount Pleasant, Hamiltonban, Cumberland, Franklin and Straban Township (Adams County), Pa., and extending to points in Frederick County, Md. bounded and described as follows: Beginning at a point on the Maryland-Pennsylvania State Boundary line and extending southwesterly along Friends Creek Road to intersection Harbaugh Road, thence southeasterly along Harbaugh Road to intersection Eyler Valley Road, thence southwesterly along Eyler Valley Road to intersection Little Owens Creek, thence southeasterly along Little Owens Creek to intersection Old Limeklin Road, thence northeasterly along Old Limeklin Road to intersection Orndorff Road, thence southeasterly along Ordnorff Road to intersection Old Frederick Road, thence southerly along Old Frederick Road to intersection Mumma Ford Road at Maryland Highway 76, thence along Mumma Ford Road to intersection the Monocacy River, thence northeasterly along the Monocacy River to intersection the Maryland-Pennsylvania State Boundary line, and thence westerly along said boundary line to the point of beginning.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Harrisburg or Gettysburg, Pa. or Washington, D.C.

BROKER APPLICATION

No. MC 130344, filed September 30, 1975. Applicant: SUNNY TRAVEL CENTER, 207 First Avenue, Rock Falls, Ill. 61071. Applicant's representative: Sondra Decker (same address as applicant). Authority sought to engage in operation, in interstate or foreign commerce, as a *broker* at Rock Falls, Ill., to sell or offer to sell the transportation of *Individual passengers and groups of passengers*, in charter operations, on tours, by motor carriers, beginning and ending at Rock Falls, Ill., and extending to points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Rock Falls, Sterling, Dixon, Rock Island, or Rockford, Ill.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

PART II:

ENVIRONMENTAL PROTECTION AGENCY

ORE MINING AND DRESSING POINT SOURCE CATEGORY

Interim Effluent Limitations and Guidelines, and Proposed Pretreatment Standards

V 40 215 NOV 6 75 XUM

Title 40—Protection of the Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

[450-2]

PART 440—ORE MINING AND DRESSING POINT SOURCE CATEGORY

Interim Final Rules

Notice is hereby given that effluent limitations and guidelines for existing sources to be achieved by the application of best practicable control technology currently available as set forth in interim final form below are promulgated by the Environmental Protection Agency (EPA). The regulation set forth below establishes Part 440—ore mining and dressing point source category and will be applicable to existing sources for the iron or subcategory (Subpart A), the base and precious metals subcategory (Subpart B), the bauxite subcategory (Subpart C), the ferro-alloy ores subcategory (Subpart D), the uranium, radium and vanadium ore subcategory (Subpart E), the mercury ore subcategory (Subpart F), and the titanium ore subcategory (Subpart G) of the ore mining and dressing point source category pursuant to sections 301, 304 (b) and (c), of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1311, 1314 (b), and (c), 86 Stat. 816 et seq.; Pub. L. 92-500) (the Act). Simultaneously, the Agency is publishing in proposed form effluent limitations and guidelines for existing sources to be achieved by the application of best available technology economically achievable, standards of performance for new point sources and pretreatment standards for existing sources and for new sources.

(a) Legal authority.

(1) Existing point sources.

Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) of the Act.

Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedural innovations, operating methods and other alternatives. The regulation herein sets forth effluent limitations and guidelines, pursuant to sections 301 and 304(b) of the Act, for the iron ore subcategory (Subpart A), the base and precious metals subcategory (Subpart B), the bauxite subcategory (Subpart C), the ferroalloy ores subcategory (Subpart D), the uranium, radium and vanadium ore subcategory (Subpart E), the mercury ore subcategory (Subpart F), and the titanium ore subcategory (Subpart G) of the ore mining and dressing point source category.

Section 304(c) of the Act requires the Administrator to issue to the States and appropriate water pollution control agencies information on the processes, procedures or operating methods which result in the elimination or reduction of the discharge of pollutants to implement standards of performance under section 306 of the Act. The report or "Development Document" referred to below provides, pursuant to section 304(c) of the Act, information on such processes, procedures or operating methods.

(2) New sources.

Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives; including, where practicable, a standard permitting no discharge of pollutants.

Section 306 also requires the Administrator to propose regulations establishing Federal standards of performance for categories of new sources included in a list published pursuant to section 306 of the Act. The regulations proposed herein set forth the standards of performance applicable to new sources for the iron ore subcategory (Subpart A), the base and precious metals subcategory (Subpart B), the bauxite subcategory (Subpart C), the ferroalloy ores subcategory (Subpart D), the uranium, radium and vanadium ore subcategory (Subpart E), the mercury ore subcategory (Subpart F) and the titanium ore subcategory (Subpart G) of the ore mining and dressing source category.

Section 307(b) of the Act requires the establishment of pretreatment standards for pollutants introduced into publicly owned treatment works and 40 CFR Part 128 establishes that the Agency will propose specific pretreatment standards at the time effluent limitations are established for point source discharges.

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for new sources at the same time that standards of performance for new sources are promulgated pursuant to section 306. Proposed regulations in fulfillment of these requirements appear elsewhere in Part II of this issue.

(b) Summary and basis of interim final effluent limitations and guidelines for existing sources, proposed effluent limitations and guidelines for existing sources to be achieved by the application of the best available technology economically achievable, proposed standards of performance for new sources, and proposed pretreatment standards for both new and existing sources.

(1) General methodology.

The effluent limitations and guidelines set forth herein were developed in the following manner. The point source category was first studied for the purpose of determining whether separate limitations are appropriate for different segments within the category. This analysis included a determination of whether differences in raw material used, product produced, manufacturing process employed, age, size, waste water constituents and other factors require development of separate limitations for different segments of the point source category. The raw waste characteristics for each such segment were then identified. This included an analysis of the source, flow and volume of water used in the process employed, the sources of waste and waste waters in the operation and the constituents of all waste water. The constituents of the waste waters which should be subject to effluent limitations were identified.

The control and treatment technologies existing within each segment were identified. This included an identification of each distinct control and treatment technology, including both in-plant and end-of-process technologies, which is existent or capable of being designed for each segment. It also included an identification of, in terms of the amount of constituents and the chemical, physical, and biological characteristics of pollutants, the effluent level resulting from the application of each of the technologies. The problems, limitations and reliability of each treatment and control technology were also identified. In addition, the nonwater quality environmental impact, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise and radiation were identified. The energy requirements of each control and treatment technology were determined as well as the cost of the application of such technologies.

The information, as outlined above, was then evaluated in order to determine what levels of technology constitute the "best practicable control technology currently available." In identifying such technologies, various factors were considered. These included the total cost of application of technology in relation to the effluent reduction benefits to be achieved from such application, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, nonwater quality environmental impact (including energy requirements) and other factors.

The data upon which the above analysis was performed included EPA permit applications, EPA sampling and inspections, consultant reports, and industry submissions.

The Development Document addressed the production of antimony, beryllium and the rare earth metals; the regulations set forth herein do not address the production of these metals. There is currently in the United States only one facility solely producing antimony; one facility solely producing beryllium; and one facility solely producing the rare earth metals. Each of these operations is located in water-short areas with high evaporation rates; consequently, the three facilities are achieving zero discharge from both mine and mill. Because all three facilities are now achieving zero discharge, no benefit to the environment can be shown by establishing effluent limitations. The techniques currently used for pollution control by these facilities may not be applicable to any future operations and information has not been obtained with which other effluent limitations can be established. Therefore limitations for these ore mining and dressing operations are not being set forth at this time.

(2) Summary of conclusions with respect to the iron ore subcategory (Subpart A), the base and precious metals subcategory (Subpart B), the bauxite subcategory (Subpart C), the ferroalloy ores subcategory (Subpart D), the uranium, radium and vanadium ore subcategory (Subpart E), the mercury ore subcategory (Subpart F), and the titanium ore subcategory (Subpart G) of the ore mining and dressing point source category.

(i) Categorization.

For the purpose of studying waste treatment and effluent limitations, the ore mining and dressing point source category was divided into seven subcategories based on the metal ore produced or processed. These seven subcategories were then further divided into a total of twenty two (22) subdivisions primarily based on considerations of type of process and waste water characteristics and treatability as outlined in the Development Document referred to below. Other factors have been recognized as causing differences in the waste discharged, however, it has been determined that these factors do not significantly affect the treatability of the wastes generated within a subcategory. In those situations where there is a difference in the treatability of the wastes generated within a subcategory, the effluent limitations have been set so that all facilities within that subcategory can achieve the limitations with the treatment identified, with a lesser treatment or without treatment. To require a higher level of treatment for those facilities that need little or no treatment to achieve the limitations is not believed to be justified.

The subcategories and subdivisions within the subcategories are as follows:

(1) Subpart A, Iron Ore Subcategory.

The provisions of this subpart are applicable to discharges from (a) mines operated to obtain iron ore regardless of the type of ore or its mode of occurrence (b) mills beneficiating iron ores by physical and chemical separation and mills beneficiating iron ores by only physical (not magnetic) methods; and (c) mills beneficiating iron ores by magnetic and physical separation.

(2) Subpart B, Base and Precious Metals Subcategory.

The provisions of this subpart are applicable to discharges from (a) mines operated to obtain copper bearing ores, lead bearing ores, zinc bearing ores, gold bearing ores or silver bearing ores or any combination of these ores from open-pit or underground operations other than placer deposits; (b) mills which employ the froth-flotation process along or in conjunction with other processes, for the beneficiation of copper ores, lead ores, zinc ores, gold ores or silver ores or any combination of these metals; (c) mines and mills which employ dump, heap, in situ leach or vat-leach processes for the extraction of copper from ores or ore waste materials; (d) mills which extract gold or silver by the cyanidation process alone (e) mills which extract gold or silver by the amalgamation process alone; and (f) mines or mine and mill complexes beneficiating gold ores, silver ores, tin ores or platinum ores by gravity separation methods, (this includes placer or dredge mining or concentrating operations, as well as hydraulic mining operations).

(3) Subpart C, Bauxite Ore Subcategory.

The provisions of this subpart are applicable to discharges from mines producing bauxite and other aluminum ores.

(4) Subpart D, Ferroalloy Ores Subcategory.

The provisions of this subpart are applicable to discharges from (a) mines producing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year; (b) Mines or mills processing less than 5,000 metric tons (5,512 short tons) of ferroalloy ores per year by methods other than ore leaching; (c) Mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by purely physical methods including ore crushing, washing, jigging, heavy-media and gravity separation, and magnetic and electrostatic separation; (d) mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by froth flotation methods, and (e) mills processing ferroalloy ores by leaching techniques (either acid or alkaline) and associated chemical beneficiation techniques. Ferroalloy metals include: chromium, cobalt, columbium, tantalum, manganese, molybdenum, nickel, tungsten and vanadium (recovered alone and not as a by-product of uranium mining and mills).

(5) Subpart E, Uranium, Radium and Vanadium Ores Subcategory.

The provisions of this subpart are applicable to discharges from (a) mines, either open-pit or underground, from which uranium, radium and vanadium ore are produced; and (b) mills using the acid leach, alkaline leach, or combined acid and alkaline leach process for the extraction of uranium, radium and vanadium. Only vanadium by-product production from uranium ores are covered under this subpart.

(6) Subpart F, Mercury Ore Subcategory.

The provisions of this subpart are applicable to discharges from (a) mines, either open-pit or underground, operated for the production of mercury ores; and (b) mills beneficiating mercury ores by gravity separation methods or by froth-flotation methods.

(7) Subpart G, Titanium Ore Subcategory.

The provisions of this subpart are applicable to discharges from (a) mines obtaining titanium ores from lode deposits; (b) mills beneficiating titanium ores by electrostatic methods, magnetic and physical methods, or flotation methods; and (c) mines engaged in the dredge mining of placer deposits of sands containing rutile, ilmenite, leucoxene, monazite, zircon, and other heavy metals, and the milling techniques employed in conjunction with the dredge mining activity (milling techniques employed include the use of wet gravity methods in conjunction with electrostatic or magnetic methods).

(ii) Waste characteristics.

The raw waste characteristics of ore mine drainage and mill process waste water are highly dependent upon the mineralogy of the ore processed and the extraction, beneficiation or concentration technique utilized in the mill, and the reagents used. The major pollutant parameters present in all or some of the waste waters from the ore mining and dressing point source category are suspended solids, solubilized metals, radionuclei, organic and inorganic matter, and reageants used in the milling process. The primary metals present that have been identified as causing significant pollution problems include iron, cadmium, copper, zinc, mercury, lead, molybdenum, arsenic, nickel, aluminum, antimony, chromium and vanadium. The radionuclei include radium 226 and uranium. The primary reagents of interest are cyanide and ammonia; other reagents and organic and inorganic materials present in the waste water may exert an oxygen demand on the receiving water and can be measured by determining the chemical oxygen demand (COD) of the waste water.

Interim final effluent limitations guidelines based upon what is achievable through the application of the best practicable control technology currently available are established to control each of the above pollutants. The determination of which pollutants to limit in each subcategory was based on (1) which pollutants are frequently present in the discharge in concentrations deleterious to aquatic organisms; and (2) which pollutants will be removed or reduced by the technology identified as the best practicable control technology currently available. In those situations where the available data indicates one or more of the pollutants to be limited are normally reduced incidentally with the removal or

V 40 215 NOV 6 75 XUM

reduction of another parameter, limitations for only one parameter are specified.

No limitations have been established for several other waste water constituents including total dissolved solids, sulfates, fluoride, manganese and oil and grease. Total dissolved solids concentrations in some discharges are at levels capable of disrupting an aquatic ecosystem, but economically feasible technology for achieving substantial reductions in dissolved solids levels does not exist at this time. Levels of sulfates, fluoride and manganese observed in discharges from the ore mining and dressing point source category do not appear to warrant concern at this time. Oil and grease resulting from spills and leakage in the mining and mills have been observed in several of the discharges. The identified technologies are not designed specifically for oil and grease removal. Spills of this pollutant are controlled under 40 CFR 112, therefore, limitations for oil and grease have not been established herein.

(iii) Origin of waste water pollutants.

The waste water situation evident in the mining segment of the ore mining and dressing is unlike that encountered in most other industries. Water enters mines via precipitation, ground water infiltration, and runoff where it may become polluted by contact with materials in the ore, overburden material, mine bottom, or exposed in the areas disturbed by the mining operation. Except for dust control and fire protection, water is not used in the actual mining of ore in the United States (with the exception of the hydraulic mining of some placer deposits). Waste water handling and management is a problem that plagues much of the mining industry. Waste water handling and management is required, and is a part of most ore mining methods or systems. This waste water is discharged from the mine as mine drainage. Mine drainage may be polluted and require treatment before it can be discharged to navigable waters. In addition to handling and treating often massive volumes of waste water during active mining operations, ore mine operators are faced with the same burden during idle periods. Mine drainage may continue indefinitely after all mining operations have ceased if proper control technology is not employed to prevent waste water pollution after mine shutdown or closure. It was determined that the quantity of mine water discharged was dependent upon many factors beyond the control of the mine operator and unrelated or only indirectly related to mine production; therefore, raw waste loadings are expressed in terms of concentration (with the exception of pH units) rather than units of production.

Process water use in the milling segment of the ore mining and dressing industry includes ore transport, ore and product wash, dust suppression, grinding and classification, heavy media separation, flotation, and equipment and floor wash. The quantity of mill process water used (and mill process waste water discharged) within a subcategory is based primarily upon the mineralogy of the ore being processed which affects the fineness of grind required to liberate the metal values and the processes required to concentrate the metal values. Because of the variables within a subcategory affecting the quantity of mill process waste water discharged, a relationship between production and discharge could not be developed; therefore raw waste loadings are expressed in terms of concentration (with the exception of pH units) rather than units of production.

In addition to the above, boiler blowdown and non-contact cooling water, such as bearing cooling water, may be discharged.

(iv) Treatment and control technology.

Waste water treatment and control technologies have been studied for each subcategory of the industry to determine what is the best practicable control technology currently available.

Waste water treatment technology discussed in the Development Document identified below provides the basis for the effluent limitations guidelines. This discussion does not preclude the selection of other waste treatment alternatives which provide equivalent or better levels of treatment.

As previously discussed, raw waste loadings from both the mining and milling segments of the ore mining and dressing industry are unrelated, or only indirectly related, to production quantities. Consequently, effluent limitations are expressed in terms of concentration rather than units of production.

The following is an identification of the best practicable control technology currently available for:

SUBPART A—IRON ORE SUBCATEGORY

(1) Mines operated to obtain iron ore.

Best practicable control technology currently available (BPCTCA) for the control of waste water in this subdivision is settling ponds with coagulation-flocculation systems. At selected locations, it may be possible to employ settling ponds alone to meet the effluent limitations specified herein. For acid mine discharge, lime-neutralization will be required.

(2) Mills beneficiating iron ores by physical and chemical separation and mills beneficiating iron ore by only physical (not magnetic) methods.

BPCTCA for the treatment of waste water in this subdivision is the use of tailing ponds with coagulation-flocculation systems.

(3) Mills beneficiating iron ores by magnetic and physical separation.

BPCTCA for the control of waste water from this subdivision is no discharge of waste water.

SUBPART B—BASE AND PRECIOUS METALS SUBCATEGORY

(1) Mines operated to obtain copper bearing ores, lead bearing ores, zinc bearing ores, gold bearing ores, or silver bearing ores or any combination of these ores.

BPCTCA for the control of waste water pollutants from this subdivision is the use of lime precipitation and settling, with pH adjustment prior to discharge if necessary.

(2) Milling operations which employ the froth-flotation process alone or in conjunction with other processes, for the beneficiation of copper ores, lead ores, zinc ores, gold ores, or silver ores or any combination of these ores.

BPCTCA for this subdivision is the use of lime-precipitation methods, tailings impoundments for removal of suspended solids and precipitates, and partial reuse of mill water. If cyanide is present in waste water, alkaline chlorination for cyanide destruction may be required. Adjustment for the pH of the waste water may be required prior to discharge.

(3) Mines and mills which employ dump, heap, insitu leach or vat-leach processes for the extraction of copper from copper ores.

BPCTCA for this subdivision is no discharge of waste water.

(4) Mills which extract gold or silver by the cyanidation process alone.

BPCTCA for this subdivision is no discharge of process waste water.

(5) Mills which extract gold or silver by the amalgamation process alone.

BPCTCA for this subdivision is lime precipitation in conjunction with sedimentation or tailing impoundment, with in-process recycle of the mercury reagent in the amalgamation process. Adjustment of the pH of waste waters prior to discharge may be necessary.

(6) Mines or mine and mill complexes beneficiating gold ores, silver ores, tin ores or platinum ores by gravity separation.

BPCTCA for this subdivision is the use of settling or tailing impoundments for settling of suspended solids. An alternative technology is the pumping of waste water from dredging operations back to a tailing-disposal area for filtration through sands and gravels. At some operations, it may be necessary to add flocculating agents to enhance the settling of suspended solids. pH adjustment prior to discharge may be required.

SUBPART C—BAUXITE SUBCATEGORY

BPCTCA for this subcategory is use of lime precipitation and settling. Adjustment of waste water pH prior to discharge may be required.

SUBPART D—FERROALLOY ORES SUBCATEGORY

(1) Mines producing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year.

BPCTCA for this subdivision is the use of lime precipitation in conjunction with a settling pond or a mechanical clarifloculator for suspended solids removal. pH adjustment prior to discharge may be necessary.

(2) Mines or mills processing less than 5,000 metric tons (5,512 short tons) of ferroalloy ores per year by methods other than ore leaching.

BPCTCA for this subdivision is the use of settling or tailing ponds in conjunction with pH control.

(3) Mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by purely physical methods including ore crushing, washing, jigging, heavy-media and gravity separation, and magnetic and electrostatic separation.

BPCTCA for this subdivision is the use of process-water recycle in conjunction with tailing impoundment, lime precipitation, flocculation, and secondary settling. pH adjustment prior to discharge may be necessary.

(4) Mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by froth flotation methods.

BPCTCA for this subdivision include the use of primary settling or tailing ponds in conjunction with lime precipitation and secondary settling. Flocculation may be necessary at selected locations to meet suspended-solid limitations. pH adjustment prior to discharge may be necessary.

(5) Mills processing ferroalloy ores by leaching techniques (either acid or alkaline) and associated chemical beneficiation techniques.

BPCTCA for this subdivision includes tailing-pond impoundments for primary settling, in conjunction with lime precipitation, flocculation, and secondary settling. Segregation of waste water streams and ammonia stripping may be required. The segregation of highly contaminated leaching, solvent extraction, precipitation, and scrubber waste streams from noncontact cooling water and uncontaminated waste streams is essential to effective removal of metals from the waste water. pH adjustment prior to discharge may be necessary.

SUBPART E—URANIUM, RADIUM, AND VANADIUM ORES SUBCATEGORY

(1) Mines, either open pit or underground, from which uranium, radium and vanadium ores are produced.

BPCTCA for this subdivision is the use of settling ponds in conjunction with lime precipitation, ion exchange (for uranium removal), barium chloride coprecipitation (for radium removal), and secondary settling.

(2) Mills using the acid leach, alkaline leach or combined acid and alkaline leach process for the extraction of uranium, radium and vanadium.

BPCTCA for this subdivision is no discharge of waste water pollutants.

SUBPART F—MERCURY ORE SUBCATEGORY

(1) Mines, either open pit or underground, operated for the production of mercury ores.

BPCTCA is lime precipitation in conjunction with settling impoundments. Adjustment of the pH prior to discharge may be required.

(2) Mills beneficiating mercury ores by gravity-separation methods, or by froth-flotation methods.

BPCTCA is zero discharge by recycle of process water or total impoundment.

SUBPART G—TITANIUM ORE SUBCATEGORY

(1) Mines obtaining titanium ores from lode deposits.

BPCTCA for this subdivision is neutralization in conjunction with the use of a settling pond for suspended solids removal.

(2) Mills beneficiating titanium ores by electrostatic methods, magnetic and physical methods, or flotation methods.

BPCTCA for this subdivision is the use of tailing ponds with lime precipitation and partial recycle of process water. pH adjustment may be required prior to discharge.

(3) Mills engaged in the dredge mining of placer deposits of sands containing rutile, ilmenite, leucoxene, monazite, zircon, and other heavy metals and the milling techniques employed in conjunction with the dredge mining activity.

BPCTCA is settling impoundment with maintenance of a pH of 3.5, secondary settling, and neutralization by lime addition prior to discharge.

The determination that for a number of milling subcategories, BPCTCA was no discharge of waste water pollutants was not intended to prohibit a facility from discharging waste water to an available treatment system which might be present in a combined mine and mill complex. Limitations set forth in the applicable parts of the regulation shall be imposed on the combined discharge.

To preclude a facility from treating only a portion of the mine water in a combined system so that the requirement for recycle of mill process water can be circumvented, or by using a good quality mine water for dilution to avoid both recycle and treatment of mill process water, the following criteria should be applied to a combined treatment system, if the mill is allowed no discharge of pollutants:

(1) A reduction in pollutants attributable to mine water should be shown; (2) all of the mine water should be treated in the combined system; and, (3) the discharge flow should not exceed the flow from the mine less any make-up water used in the mill.

To preclude any possibility that a discharger will obtain excess water for the sole purpose of dilution to circumvent any requirement for treatment, the permit writer should specify in the NPDES permit that dilution in lieu of treatment is not allowed. It is further suggested that the permit writer establish a mass loading discharge limitation in the NPDES permit for each individual facility. For a mine, this mass loading should be calculated using mine waste water volume and allowable concentration of pollutants in the discharge; for a mill, this mass loading should be calculated using mill process water less any recycled water and the allowable concentration of pollutants in the discharge.

The proper management of solid wastes resulting from pollution control systems must be practiced. Pollution control technologies generate many different amounts and types of solid wastes and liquid concentrates through the removal of pollutants. These substances vary greatly in their chemical and physical composition and may be either hazardous or non-hazardous. A variety of techniques may be employed to dispose of these substances depending on the degree of hazard.

If thermal processing (incineration) is the choice for disposal, provisions must be made to insure against entry of hazardous pollutants into the atmosphere. Consideration should also be given to recovery of materials of value in the wastes.

For those waste materials considered to be nonhazardous where land disposal is the choice for disposal, practices similar to proper sanitary landfill technology may be followed. The principles set forth in the EPA's Land Disposal of Solid Wastes Guidelines 40 CFR Part 241 may be used as guidance for acceptable land disposal techniques.

For those waste materials considered to be hazardous, disposal will require special precautions. In order to ensure long-term protection of public health and the environment, special preparation and pretreatment may be required prior to disposal. If land disposal is to be practiced, these sites must not allow movement of pollutants to either ground or surface waters. Sites should be selected that have natural soil and geological conditions to prevent such contamination or, if such conditions do not exist, artificial means (e.g. liners) must be provided to ensure long-term protection of the environment from hazardous materials. Where appropriate, the location of solid hazardous materials disposal sites should be permanently recorded in the appropriate office of the legal jurisdiction in which the site is located.

(v) Cost estimates for control of waste water pollutants.

The costs of compliance with the interim final effluent limitations are not expected to significantly affect prices, production, employment or growth, largely because much of the industry is already in full or near compliance with the limitations. Available information indicates that only two establishments will be endangered by the BPCTCA limitations: a small copper mine already closed for economic reasons and a small tungsten mine.

(vi) Energy requirements and non-water quality environmental impacts.

Energy requirements for compliance with the interim final and proposed effluent limitations and standards are low. The main use of energy is for pumps, mixers and control instruments. Wherever feasible, gravity flow is used in treatment facilities for mine drainage and mill process waste water. Mine dewatering and control of storm water runoff is considered an inherent part of the mining operation.

Inherent in the dressing segment of the ore mining and dressing industry, are major problems with solid waste disposal in the form of tailings. Large areas of tailings are a source of air pollution; where radioactive ores are milled, radioactive substances are found in the tailings disposal area. The amount of additional waste and resultant air pollution and radioactive hazards produced as a result of compliance with the regulations is insignificant relative to that already present, consequently, a minimal impact is expected.

V 40 215 NOV 6 75 XUM

(vii) Economic impact analysis.

The economic impact analysis of the interim final regulations indicates that the economic impact of compliance with the regulation will be minimal. As previously mentioned in paragraph (v) above, only two establishments will be endangered by the BPCTCA limitations.

Executive Order 11821 (November 27, 1974) requires that major proposals for legislation and promulgation of regulations and rules by Agencies of the executive branch be accompanied by a statement certifying that the inflationary impact of the proposal has been evaluated.

OMB Circular A–107 (January 28, 1975) prescribes guidelines for the identification and evaluation of major proposals requiring preparation of inflationary impact certifications. The circular provides that during the interim period prior to final approval by OMB of criteria developed by each Agency, the Administrator is responsible for identifying those regulations which require evaluation and certification. The Administrator has directed that all regulatory actions which are likely to result in capital investment exceeding $100 million or annualized costs in excess of $50 million will require certification.

As the Agency's analysis of the potential economic impacts of these regulations indicates, the capital investment and annualized costs associated with compliance are not estimated to exceed these amounts. However, the Agency has reviewed and analyzed the projected effect on the prices and economics of the industry as summarized above.

The report entitled "Development Document for Proposed Effluent Limitations Guidelines and New Source Performance Standards for the Ore Mining and Dressing Point Source Category" details the analysis undertaken in support of the interim final regulation set forth herein and is available for inspection and copying at the EPA Public Information Reference Unit, Room 2404, Waterside Mall, 401 M St., S.W., Washington, D.C. 20460, at all EPA regional offices, and at State water pollution control offices. A supplementary analysis prepared for EPA of the possible economic effects of the regulations is also available for inspection at these locations. Copies of both of these documents are being sent to persons or institutions affected by the proposed regulation or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 F.R. 21202, August 6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write the EPA, Effluent Guidelines Division, Washington, D.C. 20460, Attention: Distribution Officer, WH552.

When this regulation is promulgated in final rather than interim form, revised copies of the Development Document will be available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Copies of the economic analysis document will be available through the National Technical Information Service, Springfield, VA 22151.

(c) Summary of public participation:

Prior to this publication, the agencies and groups listed below were consulted and given an opportunity to participate in the development of effluent limitations, guidelines and standards proposed for the ore mining and dressing point source category. All participating agencies have been informed of project developments. An initial draft of the Development Document was sent to all participants and comments were solicited on that report. The following are the principal agencies and groups consulted: (1) Effluent Standards and Water Quality Information Advisory Committee (established under section 515 of the Act); (2) all State and U.S. Territory Pollution Control Agencies; (3) the Ohio River Valley Sanitation Commission; (4) the Delaware River Basin Commission; (5) the New England Interstate Water Pollution Control Commission; (6) U.S. Department of Commerce; (7) U.S. Department of the Interior; (8) U.S. Department of Defense; (9) U.S. Department of Agriculture; (10) U.S. Department of Transportation; (11) U.S. Department of Health, Education, and Welfare; (12) U.S. Department of Housing and Urban Development; (13) U.S. Department of Treasury; (14) Tennessee Valley Authority; (15) Council on Environmental Quality; (16) National Commission on Water Quality; (17) Federal Power Commission; (18) Federal Energy Administration; (19) Office of Management and Budget; (20) Internal Revenue Service; (21) Nuclear Regulatory Commission; (22) The American Society of Mechanical Engineers; (23) The Conservation Foundation; (24) Businessmen for the Public Interest; (25) Environmental Defense Fund, Inc.; (26) National Resources Defense Council; (27) The American Society of Civil Engineers; (28) Water Pollution Control Federation; (29) National Wildlife Federation; (30) The American Mining Congress; (31) The American Iron Ore Association; (32) Environment Canada; and (33) Isaac Walton League. In addition all the individual companies that participated in the contractor's study were consulted.

The following responded with comments: (1) Effluent Standards and Water Quality Information Advisory Committee (established under section 515 of the Act); (2) Utah International, Inc.; (3) Aluminum Company of America; (4) Amax Inc.; (5) Amax Lead Company of Missouri; (6) American Mining Congress; (7) American Smelting and Refining Company; (8) Anaconda; (9) Bethlehem Steel Corporation; (10) Bunker Hill Company; (11) Colorado Department of Health; (12) Cominco American Inc.; (13) Copper Range Company; (14) Eagle-Picher Industries Inc.; (15) E. I. DuPont de Nemours & Company; (16) Hanna Mining Company; (17) Hecla Mining Company; (18) Iron Ore Association; (19) Jones and Laughlin Steel Corporation; (20) Kennecott Copper Corporation; (21) Kerr American Inc.; (22) Kerr-McGee Nuclear Corporation; (23) Knob Hill Mine; (24) Minnesota Pollution Control; (25) Molybdenum Project, University of Colorado; (26) New Jersey Zinc; (27) New York State Department of Environmental Conservation; (28) N. L. Industries; (29) North Carolina Department of Natural and Economic Resources; (30) Oat Hill Mining Company; (31) Ozark Lead; (32) Reynolds Metals Company; (33) St. Joe Minerals Corporation; (34) State of Delaware; (35) State of Idaho; (36) State of Florida; (37) State of Michigan; (38) Sunshine Mining Corporation; (39) Tennessee Valley Authority; (40) Texas Water Quality Board; (41) Titanium Enterprises; (42) Union Carbide Corporation; (43) Union Copper Corporation; (44) U.S. Antimony Corporation; (45) U.S. Department of the Interior; (46) U.S. Department of Health, Education and Welfare; (47) U.S. Department of Transportation; (48) U.S. Environmental Protection Agency; (49) U.S. Nuclear Regulatory Commission; (50) U.S. Office of Environmental Affairs; (51) U.S. Water Resources Council.

The primary issues raised in the development of the interim final effluent limitations and guidelines and the treatment of these issues herein are as follows:

(1) Two commenters questioned the reason for different effluent limitations for mines and mills processing the same ore.

It was determined that when mine and mill waste water are treated separately, the mill waste water alone can often be treated to a better quality than can the mine waste water alone. When mine waste water and mill waste water are mixed, coprecipitation often occurs and the resultant effluent can readily meet the effluent limitations recommended for discharges from the mill.

(2) Several commenters suggested that a higher level of treatment could be obtained with a resultant benefit to the environment by allowing a mixing of mine waste water and mill process waste water in a combined treatment system or by using mine waste water as mill process water prior to treatment in a combined system. It was noted that when the mine waste water is in excess of that which can be consumptively used as mill process water, a discharge must occur.

Because a benefit to the environment can be shown by using mine waste water as mill process water or treating the mine waste water in a combined treatment system, the development document and the regulation have been revised to allow a discharge, subject to stringent limitations, if a combined treatment system is used.

(3) Several commenters expressed concern that the attainment of "zero" discharge through the use of recycle was impossible for facilities beneficiating ore by the flotation process. It was stated that the flotation process is a very complex process which can be easily upset by the addition of recycle water containing even minute amounts of degraded chemicals initially used in the process. It was also stated that a build-up of salts and other pollutants in the system (without a bleed) will prevent recycle. One commenter stated that the beneficiating process includes a built-in bleed in the form of water trapped in the interstitial voids of the tailings. This commenter further stated that this "bleed" will remove a part of the dissolved salts from a recycle mill's process water, with the result that the circuit can operate on a zero discharge.

Experience at a number of facilities have shown that zero discharge can be achieved on a full scale basis through the use of recycle. Several of these facilities expressed concern over loss of recovery of metal values because of recycle. However, no adverse effect has been demonstrated. Those facilities that have run bench scale tests to determine the effect of recycle on production have noticed a loss in production; however, the bench scale tests were run using the effluent from the existing treatment system with no process modification or reagent change. Based on the experience of those now recycling, it is believed that when all process waste water is recycled, some consideration of process modification or reagent use will be necessary.

(4) Two commenters recommended that limitations not be set for those parameters that are present in the discharge in lower concentrations than are specified in the effluent limitations. Several commenters requested that parameters not present in the process waste water or added in the process not be limited. Several commenters requested that no limitations be set for parameters not removed by the identified treatment systems. Several commenters recommended that only indicator parameters, i.e. the limitation of one parameter will result in the limitation of other parameters, be limited rather than a great number of parameters. One commenter stated that limitations were less stringent than the state water quality standards. Another commenter stated that the limitations were more stringent than the state stream standards.

The effluent limitations have been based on what can be obtained by the application of BPCTCA and BATEA. If a particular facility does not have one of the limited parameters present in the waste water or it is present in quantities below the limitations, then that facility naturally will not have to treat to remove that parameter.

A reanalysis of the parameters to be limited indicated that a number of parameters would be controlled if indicator parameters were controlled. The reanalysis also indicated that some of the limited parameters were not removed by the recommended treatment systems. Therefore, in the regulations only those indicator parameters that are removed by the treatment systems identified are limited.

(5) It was stated that the definition of a mine is too general. One commenter stated that the definition of a mine did not cover drainage tunnels.

The definition of a mine was intended to be sufficiently broad to cover all point source pollution resulting from all of the activities related to operation of the mine including drainage tunnels, haul roads, storage piles, etc.

(6) A number of commenters stated that a variation in raw waste loads impacted on the ability of the discharger to meet the effluent limitations. Several commenters also recommended that effluent limitations be net rather than gross to consider the variation in raw waste loads caused by variation in influent water quality.

It was determined that the treatment systems recommended can achieve the specified effluent limitations regardless of the raw waste quality (within the limits experienced in the ore mining and dressing industry). Of course, as with any treatment system, the treatment systems for the ore mining and dressing industry must be routinely monitored to compensate for changes in the raw waste load. The Environmental Protection Agency has promulgated a regulation (40 CFR Part 125) that provides the Regional Administrator the authority to adjust the effluent limitations to consider specified pollutants in the water supply if the source of the water supply is the same body of water into which the discharge is made and if the waste water treatment system (equal to BPCTCA or BATEA) is not designed to reduce the specified parameters to the level required by the applicable limitations or standards. This latter provision is not expected to be applicable in the ore mining and dressing industry.

(7) It was stated that control of mine closures, revegetation and mine safety should not be considered as part of the effluent limitations setting process.

The contractor's draft report was intended to give an overview of the mining industry in addition to identifying available treatment technologies. The regulation will only consider those items directly impacting on effluent limitations.

(8) One commenter preferred a waste loading limitation rather than a concentration limitation because process water conservation efforts result in higher concentrations in the discharge although waste loadings remain the same.

The technology identified will achieve the effluent levels recommended.

(9) One commenter disagreed with the discussion in Section VI of the draft development document regarding toxicity levels of pollutants.

The discussion in Section VI is only a compilation of some of the toxicity data available.

(10) Several commenters stated that effluent limitations should be based on water quality considerations rather than just technology. One commenter stated that there is no valid reason for total recycle if the discharges do not result in an adverse impact to the environment.

Effluent guidelines and standards are national standards. Sections 301, 304 and 306 of PL 92–500 require that EPA identify the effluent limitations that can be obtained through the application of available treatment technologies. Receiving water quality and water quality standards will be taken into consideration by the permitting authority when a NPDES permit is issued and may result in individual effluent limitations more stringent than the national standards.

(11) One commenter suggested that both ion exchange and coprecipitation for the removal or reduction of molybdenum are treatment techniques in the early stages of development and should not be considered for BATEA or BADT (to establish NSPS).

It has been determined that the technology development is sufficient to allow consideration of ion exchange and coprecipitation techniques as BATEA. It has been recognized that ion exchange and coprecipitation techniques for the removal or reduction of molybdenum, however, are not sufficiently developed to consider as BADT and the development document has been revised accordingly.

(12) Several commenters stated that proposed maximum limitations are not consistently obtainable for all parameters. Other commenters objected to limitations being based on grab samples rather than statistically significant samples.

Maximum and average limitations were based on data supplied by the industry, data presented in the literature and on data obtained during the contractors sampling program. Generally the contractors grab samples, supplemented by 24-hour composite samples, were used to verify the efficiency of the treatment systems recommended.

(13) Several commenters suggested that determination of solubilization potential should be based on pH rather than metal concentration. One commenter suggested the copper industry be subcategorized into solubilization no-solubilization subcategories.

The solubilization no-solubilization potential subcategories for the lead and zinc mines has been found to be an unworkable concept and consequently has been dropped. The effluent limitations are based on what quality can be obtained by treating mine water with solubilization potential (the most difficult mine water to treat). Mine waters with no-solubilization potential can probably meet the limitations either with relatively little treatment or with settling alone.

(14) Several commenters stated that the technology identified as BPCTCA is correct, however, the effluent limitations cannot be met.

Not all of the facilities with the technology identified as BPCTCA inplaced are operated as exemplary facilities, therefore, discharges from those facilities cannot be considered as representative of what can be obtained with proper operation of the treatment system. Data is available that shows the limitations can be achieved.

(15) A number of commenters took exception to the cost data provided in the draft development document. One commenter pointed out that the cost data provided in the draft development document did not agree with data in other EPA publications. Another commenter suggested that the costs were not

V 40 215 NOV 6 75 XUM

based on actual costs incurred by the industry. Several of the commenters objected to the lack of cost data for lining of tailing ponds. Several commenters also commented that the "economic impact study" in the draft development document was inadequate. One commenter recommended that costs include the costs to abate pollution from sources other than point source discharges.

The cost data presented in the development document was obtained from the industry and from sources supplying equipment to the industry. The costs presented are the estimated costs that a typical facility within an industrial subcategory would incur in the installation of BPCTCA and BATEA. A typical facility may not be an actual facility but rather a hypothetical facility that is representative of the industrial subcategory. Disagreement with other EPA documents was noted; however, it was determined that typographical errors in other documents explained the discrepancies. Only those costs which directly result from the implementation of the requirements set forth in the development document are considered. Items currently in general use throughout the industry are not costed; Items currently in general use throughare not required for the achievement of the recommended effluent limitations are not costed. The cost data in the development document is not the economic impact study but rather has been utilized as input to the economic impact study which was prepared by another EPA contractor (EPA contract #68–01–1541).

(16) One commenter stated that the costs of diversion ditching to control the runoff resulting from rainfall have not been considered.

Diversion ditching to control excess water passing through the mine and mill facilities is generally considered a part of the industrial process rather than for water pollution control. In those cases where the industry or the contractor identified a need for additional diversion ditches for pollution control, the costs have been included.

(17) Four commenters questioned whether the metals limitations are total or dissolved.

Test methods specified in the October 16, 1973 FEDERAL REGISTER (40 CFR Part 136) Procedures for Analysis of Pollutants are the methods that the contractor used in determining obtainable levels (unless specifically noted otherwise) and are the methods which should be used by a discharger in determining whether he is in compliance with the applicable limitations. With the exception of the procedure for analysis of hexavalent chromium and filtrable iron, all analysis for metals provide a total metals concentration.

(18) Several commenters either recommended using drinking water standards for effluent limitations or objected that the recommended effluent limitations are different than the drinking water standards.

The recommended effluent limitations are based on the technology available as required by Pub. L. 92–500. Drinking water standards have been used as a guide in determining which parameters to limit, however, the standards for drinking water are not applicable to effluent limitations.

(19) Several commenters recommended only concentration limits for mill discharges rather than mass loading limitations.

It has been determined that variability in ore mineralogy results in differing water requirements to concentrate products within the same subcategory. For example, water use within the grinding circuit is directly dependent upon the fineness of grind required to liberate the metal ore. Furthermore, is has been determined that in general, water use in a mill is minimized to minimize pumping and treatment costs. Therefore, the effluent limitations have been revised to be concentration limitations only.

(20) One commenter stated that the pH limitations of 6 to 9 are inconsistent with the treatment technologies identified as BPCTCA and BATEA.

The technologies identified generally call for raising the pH (in some cases above pH 9) to reduce the metals concentrations, however, neutralization prior to discharge is also required. The revised development document now clearly specifies neutralization prior to discharge.

(21) One commenter questioned the advisability of different effluent limitations for different subcategories.

It has been determined that the treatability of raw waste loads varies between some subcategories. Effluent limitations that can be achieved for one subcategory may not be achievable for another. Where possible, however, effluent limitations are consistent between subcategories.

(22) One commenter stated that the draft development document did not explain why the issue of net evaporation was used only for the subcategory of copper mills using flotation and not for other subcategories. Several commenters stated that in the development of the recommended effluent limitations, consideration was not given to those areas having an unfavorable water balance (i.e. net precipitation areas).

It was determined that use of net precipitation net evaporation was not a good method for subcategorization and this system was dropped. For BPCTCA, those facilities already at zero discharge will not be allowed by the permitting authority to discharge. Those facilities in net precipitation areas and those facilities currently having a discharge will have until 1983 to eliminate discharges where zero discharge is required. The regulation resulting from the information presented in the draft development document will allow a discharge in those areas where the annual precipitation exceeds the anevaporation; the allowable discharge is equal to the difference between precipitation and evaporation.

(23) One commenter stated that the recommended limitations did not consider the toxic standards.

The recommended limitations have been based on what can be achieved with the available technology. No toxic standards have been promulgated at this time.

(24) One commenter objected to having limitations placed on waste water within the tailing pond.

Limitations apply only to point source discharges to the waters of the United States. Limitations do not apply within a tailing pond or other treatment system.

(25) Several commenters objected to the requirement to contain the runoff from a 1 in 25 year precipitation event. One commenter requested that the requirement for containing a 1 in 25 year precipitation event be clarified.

The requirement to contain or treat all discharges from a specified storm or precipitation event was intended to provide the discharger with a reasonable design criteria and to allow a variance whenever catastrophic conditions occur. The requirements for control or treatment of a catastrophic occurrence have been clarified.

(26) One commenter stated that ammonia levels should be applied to preclude discharges of toxic concentrations of ammonia.

The technology identified for BPC TCA, BATEA and NSPS for the industries referred to does not remove ammonia, consequently ammonia was not limited.

(27) Two commenters stated that sulfide precipitation was not well enough proven to be used for BPCTCA technology.

It has been determined that the level of reliability of sulfide precipitation was not high enough to justify recommending sulfide precipitation as BPCTCA. It is believed, however, that sulfide precipitation is valid for BATEA.

(28) Two commenters suggested that consideration should be given to combined treatment systems for mines, for mills, smelters and refineries.

The revised draft development document has addressed the issue of discharges from combined mine, mill. smelter and refinery treatment systems.

(29) Several commenters objected to the factors used as primary categorization factors. The commenters wanted more factors used to categorize the facilities.

A great number of factors which influence subcategorization of the industry were examined. It was determined that while all of the factors influenced the quality and quantity of wastes from the various facilities, they did not influence the treatability of the waste sufficiently to warrant separate subcategorization.

(30) Two commenters objected to defining process-water as any water including runoff in contact with the ore. These commenters suggested that runoff be considered on an individual basis. One commenter expressed approval as to the definition of process water.

Any water in contact with the ore may become contaminated; therefore, it is important that limitations be set. If the runoff water is not contaminated then the limitations can normally be met without treatment. The technology is available and in use within the industry to control pollution from runoff.

(31) One commenter recommended that limitations be set for mills doing custom work or for mills producing a variety of ores.

The guidelines have been revised to include instructions for determining effluent limitations for mills doing custom work or for mills producing a variety of ores.

(32) One commenter stated that recycle was prohibitive because of long pumping distances.

While it is realized that long pumping distances increase the recycle costs, other facilities have accepted the increased cost with no apparent economic disadvantage. The economic impact study did not determine pumping costs to be excessive.

(33) One commenter objected to using the same technology for controlling Ra 226 for both mines and mills. The commenter further stated that the limitations specified could not be reliably obtained.

The survey of the industry indicated that the technology for removal of Ra 226 is the same for both mines and mills. The limitations have been revised upward to insure that they can be reliably achieved by the recommended treatment system.

(34) One commenter stated that uranium mills in areas of net precipitation or using an acid leach process may not be able to obtain zero discharge of pollutants.

A provision has been made in the regulation to allow a discharge in areas of net precipitation. The technology currently exists and is in use to recycle process water from facilities using an acid leach process.

(35) One commenter stated that no facilities using a fatty acid flotation process have achieved any degree of recycle.

At least one facility (located in California) has had success recycling process water from a fatty acid flotation process.

(36) On commenter objected to the use of 1972 dollars in the cost analysis section of the draft development document. The commenter recommended using 1975 dollars.

A uniform base year, 1972, has been used in all effluent guidelines documents to permit a compilation of all program costs to evaluate the impact of all Effluent Guidelines Division programs on a systematic basis. Appropriate indices are available and were used to convert the dollar costs for pollution control, the industry output and the annual industry capital expenditures to a base year so that all costs could be fairly compared.

(37) Several commenters expressed concern that no recommendations for disposal of solid wastes removed by the recommended treatment systems were provided.

The principles set forth in "Land Disposal of Solid Wastes Guidelines" (40 CFR Part 241) may be used as guidance for acceptable land disposal techniques. Potentially hazardous wastes may require special considerations to ensure their proper disposal. Additionally, state and local guidelines and regulations should be considered wherever applicable.

(38) Two commenters objected to the use of transfer technology from mills to mines within the same subcategory in determining that a barium chloride coprecipitations treatment system for wastes from uranium mines is BPCTCA. One commenter did not agree that the system could be used on large mine flows.

The barium chloride coprecipitation system is currently in use treating mill waste water (300,000 gpd). The mill waste water in question has compositional characteristics similar to those of the mine waste water. The system in use has been successfully scaled up from pilot size and there appears to be no technical reason that the system cannot be enlarged further to treat any size flow.

(39) One commenter stated that there are contradictions between the draft development document for the ore mining and dressing point source category and other development documents.

The recommended effluent limitations are believed to be obtainable with the technologies identified. Limitations recommended in other documents are not directly applicable to industries in the ore mining and dressing point source category.

(40) One commenter stated that the effluent limitations are below detectable levels.

All limitations have been checked to insure that the levels are above the detection levels for the analytical methods specified in 40 CFR Part 136.

(41) One commenter stated that the time recommended for retention of wastes in a tailing pond was not practical.

Recommended waste water retention time within a treatment system have been eliminated. Each treatment system and the retention time within the treatment systems must be designed and operated for optimum efficiency for each situation.

(42) One commenter suggested that the development document should consider waste water from an air scrubber (used for air pollution control in a pelletizing facility) in determining treatment requirements and cost.

Most pelletizing facilities were found to be reusing their air scrubber waste water as make-up water for adjusting the water content of the concentrate prior to the "balling" process (ball mill feed) to obtain a more uniformly sized pellet. This air scrubber waste water contains iron values obtained from the pelletizing kilns so that this practice results in conservation of iron in addition to reduction of air emissions. Because the practice of air scrubber waste water reuse is wide spread and the costs of reuse are minimal, it has been determined that the impact of scrubber waste water on treatment requirements and treatment costs is negligible.

The Agency is subject to an order of the United States District Court for the District of Columbia entered in Natural Resources Defense Council vs. Train et al. (Cv. No. 1609–73) which requires the promulgation of regulations for this industry category no later than November 15, 1975. This order also requires that such regulations become effective immediately upon publication. In addition, it is necessary to promulgate regulations establishing limitations on the discharge of pollutants from point sources in this category so that the process of issuing permits to individual dischargers under section 402 of the Act is not delayed.

It has not been practicable to develop and publish regulations for this category in proposed form, to provide a 30 day comment period, and to make any necessary revisions in light of the comments received within the time constraints imposed by the court order referred to above. Accordingly, the Agency has determined pursuant to 5 USC 553(b) that notice and comment on the interim final regulations would be impracticable and contrary to the public interest. Good cause is also found for these regulations to become effective immediately upon publication.

Interested persons are encouraged to submit written comments. Comments should be submitted in triplicate to the Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, Attention: Distribution Officer, WH–552. Comments on all aspects of the regulation are solicited. In the event comments are in the nature of criticisms as to the adequacy of data which are available, or which may be relied upon by the Agency, comments should identify and, if possible, provide any additional data which may be available and should indicate why such data are essential to the amendment or modification of the regulation. In the event comments address the approach taken by the Agency in establishing an effluent limitation or guideline EPA solicits suggestions as to what alternative approach should be taken and why and how this alternative better satisfies the detailed requirements of sections 301 and 304(b) of the Act.

In addition to encouraging written comments on the interim final regulation, the Agency would like to encourage written comments on the problem of defining which activities and which land areas should be covered by this regulation. Such comments should be submitted following the procedure for comments addressed to the interim final regulation.

A copy of all public comments will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2404, Waterside Mall, 401 M Street, SW., Washington, D.C. A copy of preliminary draft contractor reports, the Development Document and economic study referred to above, and certain supplementary materials support-

V 40 215 NOV 6 75 XUM

ing the study of the industry concerned will also be maintained at this location for public review and copying. The EPA information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

All comments received on or before December 8, 1975, will be considered. Steps previously taken by the Environmental Protection Agency to facilitate public response within this time period are outlined in the advance notice concerning public review procedures published on August 6, 1973 (38 FR 21202). In the event that the final regulation differs substantially from the interim final regulation set forth herein the Agency will consider petitions for reconsideration of any permits issued in accordance with these interim final regulations.

In consideration of the foregoing, 40 CFR Part 440 is hereby established as set forth below.

Dated: October 17, 1975.

JOHN QUARLES,
Acting Administrator.

Subpart A—Iron Ore Subcategory

Sec.
440.10 Applicability; description of the iron ore subcategory.
440.11 Specialized definitions.
440.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Subpart B—Base and Precious Metals Subcategory

440.20 Applicability; description of the base and precious metals subcategory.
440.21 Specialized definitions.
440.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Subpart C—Bauxite Subcategory

440.30 Applicability; description of the bauxite subcategory.
440.31 Specialized definitions.
440.32 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Subpart D—Ferroalloy Ores Subcategory

440.40 Applicability; description of the ferroalloy ores subcategory.
440.41 Specialized definitions.
440.42 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Subpart E—Uranium, Radium and Vanadium Ores Subcategory

440.50 Applicability; description of the uranium, radium and vanadium ores subcategory.
440.51 Specialized definitions.
440.52 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Subpart F—Mercury Ores Subcategory

440.60 Applicability; description of the mercury ores subcategory.
440.61 Specialized definitions.
440.62 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Subpart G—Titanium Ore Subcategory

440.70 Applicability; description of the titanium ore subcategory.
440.71 Specialized definitions.
440.72 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

AUTHORITY: Secs. 301, 304 (b) and (c), 306 (b) and (c), 307(c), Federal Water Pollution Control Act, as amended (the Act); 33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316 (b) and (c), 1317(c); 86 Stat. 816 et seq.; Pub L. 92-500.

Subpart A—Iron Ore Subcategory

§ 440.10 Applicability; description of the iron ore subcategory.

The provisions of this subpart are applicable to discharges from (a) mines operated to obtain iron ore, regardless of the type of ore or its mode of occurrence (b) mills beneficiating iron ores by physical and chemical separation and mills beneficiating iron ores by only physical (not magnetic) methods; and (c) mills beneficiating iron ores by magnetic and physical separation.

§ 440.11 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "ten year 24-hour precipitation event" means the maximum 24-hour precipitation event with a probable recurrence of once in 10 years as defined by the National Weather Service in Technical Paper No. 40, "Rainfall Frequency Atlas of the U.S.," May 1961, and NOAA Atlas #2, "Precipitation-Frequency Atlas of the Western United States," 1973, or equivalent regional or rainfall probability information developed therefrom.

(c) The term "mine" shall mean an active mining area of land with all property placed upon, under or above the surface of such land, used in or resulting from the extraction of metal ores from natural deposits by any means or method or the secondary recovery of metal ores from storage piles derived from the mining, cleaning or concentration of metal ores.

(d) The term "mine drainage" shall mean any water drained, pumped or siphoned from an ore mine.

(e) The term "mill" shall mean a preparation facility within which the metal ore is cleaned, concentrated or otherwise processed prior to shipping to the consumer, refiner, smelter or manufacturer. A mill includes all ancillary operations and structures necessary for the cleaning, concentrating or other processing of the metal ore such as ore and gangue storage areas, and loading facilities.

(f) The terms "annual precipitation" and "annual evaporation" mean the mean annual precipitation and mean annual lake evaporation respectively, as defined in the publication, Climatic Atlas of the United States, U.S. Department of Commerce, Environmental Science Services Administration, Environmental Data Services, June 1968 or equivalent regional rainfall and evaporation data.

(g) The effluent characteristic "Fe (filtrable)" shall be measured by the atomic absorption or colorimetric method in accordance with the procedure discussed in "Standard Methods for the Examination of Water and Wastewater," 13th Edition, 1971, pg. 191, or an equivalent method.

§ 440.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutant or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines operated to obtain iron ore shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe (filtrable)	2.0	1.0
pH	Within the range 6.0 to 9.0.	

(2) The quantity of pollutants or pollutant properties discharged from mills that employ chemical and physical methods to beneficiate iron ore and mills that employ only physical (not magnetic) methods to beneficiate iron ore shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe (filtrable)	2.0	1.0
pH	Within the range 6.0 to 9.0.	

(3) There shall be no discharge of pollutants from mills that employ magnetic and physical methods to beneficiate iron ore.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the limitations set forth in paragraph (a) (2) of this section.

(4) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a) (1) through (a) (3) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 10 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

Subpart B—Base and Precious Metals Subcategory

§ 440.20 Applicability; description of the base and precious metals subcategory.

The provisions of this subpart are applicable to discharges from (a) mines operated to obtain copper bearing ores, lead bearing ores, zinc bearing ores, gold bearing ores, or silver bearing ores or any combination of these ores from open-pit or underground operations other than placer deposits; (b) mills which employ the froth-flotation process alone or in conjunction with other processes, for the beneficiation of copper ores, lead ores, zinc ores, gold ores or silver ores or any combination of these ores; (c) mines and mills which employ dump, heap, in-situ leach or vat-leach processes for the extraction of copper from ores or ore waste materials; (d) mills which extract gold or silver by the cyanidation process alone; (e) mills which extract gold or silver by the amalgamation process alone; and (f) mines or mine and mill complexes beneficiating gold ores, silver ores, tin ores or platinum ores by gravity separation methods, (this includes placer or dredge mining or concentrating operations, and hydraulic mining operations).

§ 440.21 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "ten year 24-hour precipitation event" means the maximum 24-hour precipitation event with a probable reoccurrence of once in 10 years as defined by the National Weather Service in Technical Paper No. 40, "Rainfall Frequency Atlas of the U.S.," May 1961, and NOAA Atlas #2, "Precipitation-Frequency Atlas of the Western United States," 1973, or equivalent regional or rainfall probability information developed therefrom.

(c) The term "mine" shall mean an active mining area of land with all property placed upon, under or above the surface of such land, used in or resulting from the extraction of metal ores from natural deposits by any means or method or the secondary recovery of metal ores from storage piles derived from the mining, cleaning or concentration of metal ores.

(d) The term "mine drainage" shall mean any water drained, pumped or siphoned from an ore mine.

(e) The term "mill" shall mean a preparation facility within which the metal ore is cleaned, concentrated or otherwise processed prior to shipping to the consumer, refiner, smelter or manufacturer. A mill includes all ancillary operations and structures necessary for the cleaning, concentrating or other processing of the metal ore such as ore and gangue storage areas, and loading facilities.

(f) The terms "annual precipitation" and "annual evaporation" mean the mean annual precipitation and mean annual lake evaporation respectively, as defined in the publication, Climatic Atlas of the United States, U.S. Department of Commerce, Environmental Science Services Administration, Environmental Data Services, June 1968 or equivalent regional rainfall and evaporation data.

§ 440.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutant or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines operated to obtain copper bearing ores, lead bearing ores, zinc bearing ores, gold bearing ores, or silver bearing ores or any combination

V 40 215
NOV 6 75
XUM

of these ores from open-pit or underground operations other than placer deposits shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cu	0.10	0.05
Zn	1.0	0.5
Pb	0.4	0.2
Hg	0.002	0.001
pH	Within the range 6.0 to 9.0.	

(2) The quantity of pollutants or pollutant properties discharged from mills which employ the froth-flotation process alone or in conjunction with other processes, for the beneficiation of copper ores, lead ores, zinc ores, gold ores, or silver ores or any combination of these ores shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed
	Milligrams per liter	
TSS	30	20
Cu	0.1	0.05
Zn	0.4	0.2
Pb	0.4	0.2
Hg	0.002	0.001
Cd	0.10	0.05
CN	0.02	0.01
pH	Within the range 6.0 to 9.0.	

(3) There shall be no discharge of pollutants from mines and mills which employ dump, heap, insitu leach or vat-leach processes for the extraction of copper from ores or ore waste materials.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the limitations set forth in paragraph (a) (2) of this section.

(4) There shall be no discharge of pollutants from mills which extract gold or silver by use of the cyanidation process alone.

In the event that the annual precipitation falling on the treatment system exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and annual evaporation may be discharged subject to the provisions set forth in paragraph (a) (2) of this section.

(5) The quantity of pollutants or pollutant properties from mills which extract gold or silver by use of the amalgamation process alone shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cu	0.10	0.05
Zn	0.4	0.2
Hg	0.002	0.001
pH	Within the range 6.0 to 9.0.	

(6) The quantity of pollutants or pollutant properties discharged in mine drainage from mines or discharged from mine and mill complexes beneficiating gold ores, silver ores, tin ores or platinum ores by gravity separation methods (including mining of placer deposits, dredge mining and hydraulic mining operations) shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	50	30
pH	Within the range 6.0 to 9.0.	

(7) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a) (1) through (a) (6) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 10 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

Subpart C—Bauxite Subcategory

§ 440.30 Applicability; description of the bauxite subcategory.

The provisions of this subpart are applicable to discharges from facilities engaged in the mining of bauxite and other aluminum ores.

§ 440.31 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "ten year 24-hour precipitation event" means the maximum 24-hour precipitation event with a probable reoccurrence of once in 10 years as defined by the National Weather Service in Technical Paper No. 40, "Rainfall Frequency Atlas of the U.S.," May 1961, and NOAA Atlas #2, "Precipitation-Frequency Atlas of the Western United States," 1973, or equivalent regional or rainfall probabilility information developed therefrom.

(c) The term "mine" shall mean an active mining area of land with all property placed upon, under or above the surface of such land, used in or resulting from the extraction of metal ores from natural deposits by any means or method or the secondary recovery of metal ores from storage piles derived from the mining, cleaning or concentration of metal ores.

(d) The term "mine drainage" shall mean any water drained, pumped or siphoned from an ore mine.

(e) The term "mill" shall mean a preparation facility within which the metal ore is cleaned, concentrated or otherwise processed prior to shipping to the consumer, refiner, smelter or manufacturer. A mill includes all ancillary operations and structures necessary for the cleaning, concentrating or other processing of the metal ore such as ore and gangue storage areas, and loading facilities.

(f) The terms "annual precipitation" and "annual evaporation" mean the mean annual precipitation and mean annual lake evaporation respectively, as defined in the publication, Climatic Atlas of the United States, U.S. Department of Commerce, Environmental Science Services Administration, Environmental Data Services, June 1968 or equivalent regional rainfall and evaporation data.

§ 440.32 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue

NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutant or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

The quantity of pollutants or pollutant properties discharged in mine drainage from mines producing bauxite and other aluminum ores shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	1.0	0.5
Zn	0.2	0.1
Al	1.2	0.6
pH	Within the range 6.0 to 9.0.	

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 10 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

Subpart D—Ferroalloy Ores Subcategory

§ 440.40 Applicability; description of the ferroalloy ores subcategory.

The provisions of this subpart are applicable to discharges from (a) mines producing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year; (b) mines and mills processing less than 5,000 metric tons (5,512 short tons) of ferroalloy ores per year by methods other than ore leaching; (c) mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by purely physical methods including ore crushing, washing, jigging, heavy media and gravity separation, and magnetic and electrostatic separation; (d) mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by froth flotation methods, and (e) mills processing ferroalloy ores by leaching techniques (either acid or alkaline) and associated chemical beneficiation techniques. Ferroalloy metals include: chromium, cobalt, columbium, tantalum, manganese, molybdenum, nickel, tungsten and vanadium (recovered alone and not as a by-product of uranium mining and mills).

§ 440.41 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "ten year 24-hour precipitation event" means the maximum 24-hour precipitation event with a probable reoccurrence of once in 10 years as defined by the National Weather Service in Technical Paper No. 40, "Rainfall Frequency Atlas of the U.S.," May 1961, and NOAA Atlas #2, "Precipitation-Frequency Atlas of the Western United States," 1973, or equivalent regional or rainfall probability information developed therefrom.

(c) The term "mine" shall mean an active mining area of land with all property placed upon, under or above the surface of such land, used in or resulting from the extraction of metal ores from natural deposits by any means or method or the secondary recovery of metal ores from storage piles derived from the mining, cleaning or concentration of metal ores.

(d) The term "mine drainage" shall mean any water drained, pumped or siphoned from an ore mine.

(e) The term "mill" shall mean a preparation facility within which the metal ore is cleaned, concentrated or otherwise processed prior to shipping to the consumer, refiner, smelter or manufacturer. A mill includes all ancillary operations and structures necessary for the cleaning, concentrating or other processing of the metal ore such as ore and gangue storage areas, and loading facilities.

(f) The terms "annual precipitation" and "annual evaporation" mean the mean annual precipitation and mean annual lake evaporation respectively, as defined in the publication, Climatic Atlas of the United States, U.S. Department of Commerce, Environmental Science Services Administration, Environmental Data Services, June 1968 or equivalent regional rainfall and evaporation data.

§ 440.42 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutant or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines producing 5,000 metric tons (5,512 short tons) or more of ferroalloy bearing ores per year shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	1.0	0.5
Pb	0.4	0.2
As	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(2) The quantity of pollutants or pollutant properties discharged in mine drainage from mines or discharged from

V 40 215 NOV 6 75 N XUM

mills processing less than 5,000 metric tons (5,512 short tons) of ferroalloy ores per year by methods other than ore leaching shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	50	30
pH	Within the range 6.0 to 9.0.	

(3) The quantity of pollutants or pollutant properties discharged from mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by purely physical methods including ore crushing, washing, jigging, heavy media separation, and magnetic and electrostatic separation shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.4	0.2
As	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(4) The quantity of pollutants or pollutant properties discharged from mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by froth flotation methods shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.4	0.2
CN	0.10	0.05
As	1.0	0.5
COD	100	50
pH	Within the range 6.0 to 9.0.	

(5) The quantity of pollutants or pollutant properties discharged from mills processing ferroalloy ores by leaching techniques (either acid or alkaline) and associated chemical beneficiation techniques shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.4	0.2
As	1.0	0.5
Ammonia	60	30
pH	Within the range 6.0 to 9.0.	

(6) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a)(1) through (a)(5) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 10 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

Subpart E—Uranium, Radium and Vanadium Ores Subcategory

§ 440.50 Applicability; description of the uranium, radium and vanadium ores subcategory.

The provisions of this subpart are applicable to discharges from (a) mines, either open-pit or underground, from which uranium, radium and vanadium ore are produced; and (b) mills using the acid leach, alkaline leach, or combined acid and alkaline leach process for the extraction of uranium, radium and vanadium. Only vanadium by-product production from uranium ores is covered under this subpart.

§ 440.51 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "ten year 24-hour precipitation event" means the maximum 24-hour precipitation event with a probable reoccurrence of once in 10 years as defined by the National Weather Service in Technical Paper No. 40, "Rainfall Frequency Atlas of the U.S.," May 1961, and NOAA Atlas #2, "Precipitation-Frequency Atlas of the Western United States," 1973, or equivalent regional or rainfall probability information developed therefrom.

(c) The term "mine" shall mean an active mining area of land with all property placed upon, under or above the surface of such land, used in or resulting from the extraction of metal ores from natural deposits by any means or method or the secondary recovery of metal ores from storage piles derived from the mining, cleaning or concentration of metal ores.

(d) The term "mine drainage" shall mean any water drained, pumped or siphoned from an ore mine.

(e) The term "mill" shall mean a preparation facility within which the metal ore is cleaned, concentrated or otherwise processed prior to shipping to the consumer, refiner, smelter or manufacturer. A mill includes all ancillary operations and structures necessary for the cleaning, concentrating or other processing of the metal ore such as ore and gangue storage areas, and loading facilities.

(f) The terms "annual precipitation" and "annual evaporation" mean the mean annual precipitation and mean annual lake evaporation respectively, as defined in the publication, Climatic Atlas of the United States, U.S. Department of Commerce, Environmental Science Services Administration, Environmental Data Services, June 1968 or equivalent regional rainfall and evaporation data.

(g) The effluent characteristic "U" shall be measured by the procedure discussed in the "HASL Procedural Manual," edited by John H. Harley, HASL 300 Health and Safety Laboratory, U.S. Atomic Energy Commission, 1973, pg. EU–03, or an equivalent method.

(h) The effluent characteristic "Ra226" shall be measured by Method 305 "Radium 226 in Water" in accordance with the procedure discussed for total Radium 226 in "Standard Methods for the Examination of Water and Wastewater," 13th Edition, 1971, pg. 617, or an equivalent method.

§ 440.52 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutant or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines, either open-pit or underground, from which uranium, radium and vanadium ores are produced shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Zn	1.0	0.5
As	1.0	0.5
Ra226 [1]	10	3
U	4	2
COD	200	100
pH	Within the range 6.0 to 9.0.	

[1] Values in picocuries per liter.

(2) There shall be no discharge of pollutants from mills using the acid leach, alkaline leach or combined acid and alkaline leach process for the extraction of uranium, radium and vanadium.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the limitations set forth in paragraph (a)(1) of this section.

(3) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a)(1) and (a)(2) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 10 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

Subpart F—Mercury Ore Subcategory

§ 440.60 Applicability; description of the mercury ore subcategory.

The provisions of this subpart are applicable to discharges from (a) mines, either open-pit or underground, operated for the production of mercury ores; and (b) mills beneficiating mercury ores by gravity separation methods or by froth-flotation methods.

§ 440.61 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "ten year 24-hour precipitation event" means the maximum 24-hour precipitation event with a probable reoccurrence of once in 10 years as defined by the National Weather Service in Technical Paper No. 40, "Rainfall Frequency Atlas of the U.S.," May 1961, and NOAA Atlas #2, "Precipitation-Frequency Atlas of the Western United States," 1973, or equivalent regional or rainfall probability information developed therefrom.

(c) The term "mine" shall mean an active mining area of land with all property placed upon, under or above the surface of such land, used in or resulting from the extraction of metal ores from natural deposits by any means or method or the secondary recovery of metal ores from storage piles derived from the mining; cleaning or concentration of metal ores.

(d) The term "mine drainage" shall mean any water drained, pumped or siphoned from an ore mine.

(e) The term "mill" shall mean a preparation facility within which the metal ore is cleaned, concentrated or otherwise processed prior to shipping to the consumer, refiner, smelter or manufacturer. A mill includes all ancillary operations and structures necessary for the cleaning, concentrating or other processing of the metal ore such as ore and gangue storage areas, and loading facilities.

(f) The terms "annual precipitation" and "annual evaporation" mean the mean annual precipitation and mean annual lake evaporation respectively, as defined in the publication, Climatic Atlas of the United States, U.S. Department of Commerce, Environmental Science Services Administration, Environmental Data Services, June 1968 or equivalent regional rainfall and evaporation data.

§ 440.62 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutant or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines, either open-pit or

V 40 215 NOV 6 75 XUM

underground, operated for the production of mercury ores shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Hg	0.002	0.001
Ni	0.2	0.1
pH	Within the range 6.0 to 9.0.	

(2) There shall be no discharge of pollutants from mills beneficiating mercury ores by gravity separation methods or by froth-flotation methods.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the limitations set forth in paragraph (a)(1) of this section.

(3) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a)(1) and (a)(2) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 10 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

Subpart G—Titanium Ore Subcategory

§ 440.70 Applicability; description of the titanium ore subcategory.

The provisions of this subpart are applicable to discharges from (a) mines obtaining titanium ores from lode deposits; (b) mills beneficiating titanium ores by electrostatic methods, magnetic and physical methods, or flotation methods; and (c) mines engaged in the dredge mining of placer deposits of sands containing rutile, ilmenite, leucoxene, monazite, zircon, and other heavy metals, and the milling techniques employed in conjunction with the dredge mining activity (milling techniques employed include the use of wet gravity methods in conjunction with electrostatic or magnetic methods).

§ 440.71 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "ten year 24-hour precipitation event" means the maximum 24-hour precipitation event with a probable reoccurrence of once in 10 years as defined by the National Weather Service in Technical Paper No. 40, "Rainfall Frequency Atlas of the U.S.," May 1961, and NOAA Atlas No. 2, "Precipitation-Frequency Atlas of the Western United States," 1973, or equivalent regional or rainfall probability information developed therefrom.

(c) The term "mine" shall mean an active mining area of land with all property placed upon, under or above the surface of such land, used in or resulting from the extraction of metal ores from natural deposits by any means or methods or the secondary recovery of metal ores from storage piles derived from the mining, cleaning or concentration of metal ores.

(d) The term "mine drainage" shall mean any water drained, pumped or siphoned from an ore mine.

(e) The term "mill" shall mean a preparation facility within which the metal ore is cleaned, concentrated or otherwise processed prior to shipping to the consumer, refiner, smelter or manufacturer. A mill includes all ancillary operations and structures necessary for the cleaning, concentrating or other processing of the metal ore such as ore and gangue storage areas, and loading facilities.

(f) The terms "annual precipitation" and "annual evaporation" mean the mean annual precipitation and mean annual lake evaporation respectively, as defined in the publication, Climatic Atlas of the United States, U.S. Department of Commerce, Environmental Science Services Administration, Environmental Data Services, June 1968 or equivalent regional rainfall and evaporation data.

§ 440.72 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutant or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines obtaining titanium ores from lode deposits shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	2.0	1.0
pH	Within the range 6.0 to 9.0.	

(2) The quantity of pollutants or pollutant properties discharged from mills beneficiating titanium ores by electrostatic methods, magnetic and physical methods, or flotation methods shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for and 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	0.2	0.1
Zn	0.4	0.2
Ni	0.2	0.1
pH	Within the range 6.0 to 9.0.	

(3) The quantity of pollutants or pollutant properties discharged in mine drainage from mines engaged in the dredge mining of placer deposits of sands containing rutile, ilmenite, leucoxene, monazite, zircon, or other heavy metals, and the milling techniques employed in conjunction with the dredge mining activity (milling techniques employed include the use of wet gravity methods in conjunction with electrostatic or magnetic methods) shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	2	1
COD	30	15
pH	Within the range 6.0 to 9.0.	

(4) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a)(1) and (a)(3) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 10 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

[FR Doc.75-29451 Filed 11-5-75;8:45 am]

V 40 215 NOV 6 75 XUM

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 440]

[450–3]

ORE MINING AND DRESSING POINT SOURCE CATEGORY

Proposed Effluent Guidelines and Standards

Notice is hereby given that effluent limitations for existing sources, standards of performance and pretreatment standards for new sources and pretreatment standards for existing sources set forth in tentative form below are proposed by the Environmental Protection Agency (EPA). Simultaneously with this notice of proposed rulemaking, EPA is promulgating a regulation adding Part 440 to Chapter 40 of the Code of Federal Regulations. That regulation establishes effluent limitations and guidelines for existing sources based on the best practicable control technology currently available for the ore mining and dressing point source category. The regulation proposed below will amend 40 CFR 440, *Ore Mining and Dressing Point Source Category*, by adding §§ 440.13, 440.14, 440.15 and 440.16 to the iron ore subcategory (Subpart A), §§ 440.23, 440.24, 440.25, and 440.26 to the base and precious metals subcategory (Subpart B), §§ 440.33, 440.34, 440.35 and 440.36 to the bauxite subcategory (Subpart C), §§440.43, 440.44, 440.45 and 440.46 to the ferroalloy ores subcategory (Subpart D), §§ 440.53, 440.54, 440.55 and 440.56 to the uranium, radium and vanadium ores subcategory (Subpart E), §§ 440.63, 440.64, 440.65 and 440.66 to the mercury ore subcategory (Subpart F), and §§ 440.73, 440.74, 440.75 and 440.76 to the titanium ore subcategory (Subpart G) pursuant to sections 306(b) and 307 (b) and (c) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1316(b) and 1317(b) and (c), 86 Stat. 816 et seq.; Pub. L. 92–500) (the Act). Simultaneously with this proposed rule making EPA is promulgating interim final regulations which establish the above listed subparts.

(a) Legal authority.

(1) Existing Point sources.

Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) of the Act.

Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedural innovations, operating methods and other alternatives. The regulation herein sets forth effluent limitations and guidelines, pursuant to sections 301 and 304 (b) of the Act, for the iron ore subcategory (Subpart A); base and precious metals subcategory (Subpart B); bauxite subcategory (Subpart C); ferroalloy ores subcategory (Subpart D); uranium, radium and vanadium ores subcategory (Subpart E); mercury ore subcategory (Subpart F); titanium ore subcategory (Subpart G) of the ore mining and dressing point source category.

Section 304(c) of the Act requires the Administrator to issue to the States and appropriate water pollution control agencies information on the processes, procedures or operating methods which result in the elimination or reduction of the discharge of pollutants to implement standards of performance under section 306 of the Act. The report or "Development Document" referred to below provides, pursuant to section 304(c) of the Act, information on such processes, procedures or operating methods.

(2) New sources.

Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

Section 306(b)(1)(B) of the Act requires the Administrator to propose regulations establishing Federal standards of performance for categories of new sources included in a list published pursuant to section 306(b)(1)(A) of the Act. Simultaneously with the appearance of this proposed rulemaking is a notice, appearing elsewhere in Part II of this issue, titled "Addition to the List of Categories of Sources." This notice adds the ore mining and dressing point source category and is in accordance with the provisions of section 306(b)(1)(A) of the Act. The regulations proposed herein set forth the standards of performance applicable to new sources for the iron ore subcategory (Subpart A); base and precious metals subcategory (Subpart B); bauxite subcategory (Subpart C); ferroalloy ores subcategory (Subpart D); uranium, radium and vanadium ores subcategory (Subpart E); mercury ore subcategory (Subpart F); titanium ore subcategory (Subpart G) of the ore mining and dressing point source category.

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for new sources at the same time that standards of performance for new sources are promulgated pursuant to § 306. Sections 440.16, 440.26, 440.36, 440.46, 440.56, 440.66 and 440.76, proposed below, provide pretreatment standards for new sources within the iron ore subcategory (Subpart A); base and precious metals subcategory (Subpart B); bauxite subcategory (Subpart C); ferroalloy ores subcategory (Subpart D); uranium, radium and vanadium ores subcategory (Subpart E); mercury ore subcategory (Subpart F); titanium ore subcategory (Subpart G) of the ore mining and dressing point source category. Section 307(b) of the Act requires the establishment of pretreatment standards for pollutants introduced into publicly owned treatment works and 40 CFR 128 establishes that the Agency will propose specific pretreatment standards at the time effluent limitations are established for point source discharges. Sections 440.14, 440.24, 440.34, 440.44, 440.54, 440.64 and 440.74, proposed below provide pretreatment standards for existing sources within the iron ore subcategory (Subpart A); base and precious metals subcategory (Subpart B); bauxite subcategory (Subpart C); ferroalloy ores subcategory (Subpart D); uranium, radium and vanadium ores subcategory (Subpart E); mercury ore subcategory (Subpart F); titanium ore subcategory (Subpart G) of the ore mining and dressing point source category.

(b) Summary and basis of proposed standards of performance and pretreatment standards for new sources and pretreatment standards for existing sources.

The general methodology and summary of conclusions are discussed in considerable detail in the preamble of the interim final regulations for the iron ore subcategory (Subpart A); base and precious metals subcategory (Subpart B); bauxite subcategory (Subpart C); ferroalloy ores subcategory (Subpart D); uranium, radium and vanadium ores subcategory (Subpart E); mercury ore subcategory (Subpart F); titanium ore subcategory (Subpart G) of the ore mining and dressing point source category which are being promulgated by EPA simultaneously with publication of this proposed regulation. The information contained in the preamble to the interim final regulation is incorporated herein by reference. The proposed regulation set forth below purposes pretreatment standards for pollutants introduced into publicly owned treatment works. The proposal will establish for each subpart the extent of application of effluent limitations to existing sources and to new sources which discharge to publicly owned treatment works. This regulation is intended to be complementary to the general regulation for pretreatment standards for existing sources set forth at 40 CFR 128. The general regulation was proposed July 19, 1973 (38 FR 19236), and published in final form on November 8, 1973 (38 FR 30982). The regulation proposed below applies to users of publicly owned treatment works which fall within the description of the point source category to which the limitations and standards apply. However, the proposed pretreatment regulation applies to the introduction of pollutants which are directed into a publicly owned treatment works, rather than to discharges of pollutants to navigable waters.

The general pretreatment standard divides pollutants discharged by users of publicly owned treatment works into two broad categories: "compatible" and "incompatible." Compatible pollutants are generally not subject to specific numerical pretreatment standards. However, 40 CFR 128.131 (prohibited wastes) may be applicable to compatible pollutants. Additionally, local pretreatment requirements may apply (See 40 CFR 128.110). Incompatible pollutants are subject generally to pretreatment standards as provided in 40 CFR 128.133. Sections 440.16, 440.26, 440.36, 440.46, 440.56, 440.66 and 440.76, proposed below, are intended to implement the intent of § 128.133, by setting forth specific numeric limitations for particular pollutants subject to pretreatment requirements.

Questions were raised during the public comment period on the proposed general pretreatment standard (40 CFR 128) about the propriety of applying a standard based upon best practicable control technology currently available to all plants subject to pretreatment standards. In general, EPA believes the analysis supporting the effluent limitations and guidelines is adequate to make a determination regarding the application of those standards to users of publicly owned treatment works. However, to ensure that those standards are appropriate in all cases, EPA now seeks additional comments focusing upon the application of effluent limitations guidelines to users of publicly owned treatment works.

The report entitled "Development Document for Proposed Effluent Limitations Guidelines and New Source Performance Standards for the Ore Mining and Dressing Industry Point Source Category" details the analysis undertaken in support of the regulation being proposed herein and is available for inspection in the EPA Public Information Reference Unit, Room 2404, Waterside Mall, 401 M St., SW., Washington, D.C. 20460, at all EPA regional offices, and at State water pollution control offices. A supplementary analysis prepared for EPA of the possible economic effects of the proposed regulation is also available for inspection at these locations. Copies of both of these documents are being sent to persons or institutions affected by the proposed regulation or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August 6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write the EPA Effluent Guidelines Division, Washington, D.C. 20460, Attention: Distribution Officer, WH552.

When this regulation is promulgated, revised copies of the Development Document will be available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Copies of the Economic Analysis will be available through the National Technical Information Service, Springfield, Virginia 22151.

(c) Summary of public participation.

A full listing of participants and discussion of comments and responses is included in the preamble of the interim final regulation for the ore mining and dressing subcategory being simultaneously promulgated by EPA and are incorporated herein by reference.

Interested persons may participate in this rulemaking by submitting written comments in triplicate to the Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, Attention: Distribution Officer, WH–552. Comments on all aspects of the proposed regulation are solicited. In the event comments are in the nature of criticisms as to the adequacy of data which are available, or which may be relied upon by the Agency, comments should identify and, if possible, provide any additional data which may be available and should indicate why such data are essential to the development of the regulations. In the event comments address the approach taken by the Agency in establishing a standard of performance or pretreatment standard, EPA solicits suggestions as to what alternative approach should be taken and why and how this alternative better satisfies the detailed requirements of sections 306 and 307 (b) and (c) of the Act.

A copy of all public comments will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2404, Waterside Mall, 401 M St., SW., Washington, D.C. 20460 draft contractor reports, the Development Document and economic study referred to above, and certain supplementary materials supporting the study of the industry concerned will also be maintained at this location for public review and copying. The EPA information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

All comments received on or before December 8, 1975, will be considered. Steps previously taken by the Environmental Protection Agency to facilitate public response within this time period are outlined in the advance notice concerning public review procedures published on August 6, 1973 (33 FR 21202).

(Secs. 301, 304 (b) and (c), 306 (b) and (c), 307(c), Federal Water Pollution Control Act, as amended (the Act) (33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316 (b) and c), 1317(c)); 86 Stat. 816 et seq.; Pub. L. 92–500)

Dated: October 17, 1975.

JOHN QUARLES,
Acting Administrator.

PART 440—ORE MINING POINT SOURCE CATEGORY

1. The table of contents is amended by adding the following sections:

Subpart A—Iron Ore Subcategory

Sec.
440.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
440.14 Pretreatment standard for existing sources.
440.15 Standards of performance for new sources.
440.16 Pretreatment standards for new sources.

Subpart B—Base and Precious Metals Subcategory

440.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
440.24 Pretreatment standard for existing sources.
440.25 Standards of performance for new sources.
440.26 Pretreatment standards for new sources.

Subpart C—Bauxite Subcategory

440.33 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
440.34 Pretreatment standard for existing sources.
440.35 Standards of performance for new sources.
440.36 Pretreatment standards for new sources.

Subpart D—Ferroalloy Ores Subcategory

440.43 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
440.44 Pretreatment standard for existing sources.
440.45 Standards of performance for new sources.
440.46 Pretreatment standards for new sources.

Subpart E—Uranium, Radium and Vanadium Ores Subcategory

440.53 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
440.54 Pretreatment standard for existing sources.
440.55 Standards of performance for new sources.
440.56 Pretreatment standards for new sources.

Subpart F—Mercury Ore Subcategory

440.63 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
440.64 Pretreatment standard for existing sources.
440.65 Standards of performance for new sources.
440.66 Pretreatment standards for new sources.

V 40 215 NOV 6 75 XUM

Subpart G—Titanium Ore Subcategory

Sec.
440.73 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
440.74 Pretreatment standard for existing sources.
440.75 Standards of performance for new sources.
440.76 Pretreatment standards for new sources.

Subpart A—Iron Ore Subcategory

2. Subpart A is amended by adding §§ 440.13, 440.14, 440.15, and 440.16 as follows:

§ 440.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

(1) The quantity of pollutant properties discharged in mine drainage from mines operated to obtain iron ore shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe (filtrable)	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(2) The quantity of pollutants or pollutant properties discharged from mills that employ chemical and physical methods to beneficiate iron ore and mills that employ only physical (not magnetic) methods to beneficiate iron ore shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe (filtrable)	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(3) There shall be no discharge of pollutants from mills that employ magnetic and physical methods to beneficiate iron ore.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the provisions set forth in paragraph (a) (2) of this section.

(4) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a) (1) through (a) (3) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.14 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.13 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

§ 440.15 Standards of performance for new sources.

(a) Subject to the provisions of paragraph (b) below, the following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines operated to obtain iron ore shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe (filtrable)	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(2) The quantity of pollutants or pollutant properties discharged from mills that employ chemical and physical methods to beneficiate iron ore and mills that employ only physical (not magnetic) methods to beneficiate iron ore shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe (total)	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(3) There shall be no discharge of pollutants from milling operations that employ magnetic and physical methods to beneficiate iron ore.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the provisions set forth in paragraph (a) (2) of this section.

(4) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a) (1) through (a) (3) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.16 Pretreatment standards for new sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.15 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

Subpart B—Base and Precious Metals Subcategory

3. Subpart B is amended by adding §§ 440.23, 440.24, 440.25, and 440.26 as follows:

§ 440.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines operated to obtain copper bearing ores, lead bearing ores, zinc bearing ores, gold bearing ores, or silver bearing ores or any combination of these ores from open-pit or underground operations other than placer deposits shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cu	0.10	0.05
Zn	1.0	0.5
Pb	0.2	0.1
Hg	0.002	0.001
pH	Within the range 6.0 to 9.0.	

(2) There shall be no discharge of pollutants from mill operations which employ the froth-flotation process alone or in conjunction with other processes, for the beneficiation of copper ores, lead ores, zinc ores, gold ores, or silver ores or any combination of these ores.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cu	0.1	0.05
Zn	0.2	0.1
Pb	0.2	0.1
Hg	0.002	0.001
Cd	0.02	0.01
CN	0.02	0.01
pH	Within the range 6.0 to 9.0.	

(3) There shall be no discharge of pollutants from mines and mills which employ dump, heap, insitu leach or vat-leach processes for the extraction of copper from ores or ore waste materials.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the provisions set forth in paragraph (a) (2) of this section.

(4) There shall be no discharge of pollutants from mills which extract gold or silver by the cyanidation process alone.

In the event that the annual precipitation falling on the treatment system exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and annual evaporation may be discharged subject to the limitations in (a) (2) of this section.

(5) There shall be no discharge of pollutants from mills which extract gold or silver by the amalgamation process alone.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the provisions set forth in paragraph (a) (2) of this section.

(6) The quantity of pollutants or pollutant properties discharged in mine drainage from mines or discharged from mine and mill complexes beneficiating gold ores, silver ores, tin ores or platinum ores by gravity separation methods (including mining of placer deposits, dredge mining and hydraulic mining operations) shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cu	0.1	0.05
Zn	0.2	0.1
Pb	0.2	0.1
Hg	0.002	0.001
Cd	0.02	0.01
CN	0.02	0.01
pH	Within the range 6.0 to 9.0.	

(7) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a) (1) through (a) (6) of this section shall be subject to the limitations in (a) (2) of this section and in case shall exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.24 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.32 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

§ 440.25 Standards of performance for new sources.

(a) Subject to the provisions of paragraph (b) of this section the following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

V 40 215 NOV 6 75 XUM

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines operated to obtain copper bearing ores, lead bearing ores, zinc bearing ores, gold bearing ores, or silver bearing ores or any combination of these ores from open-pit or underground operations other than placer deposits shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cu	0.10	0.05
Zn	1.0	0.5
Pb	0.2	0.1
Hg	0.002	0.001
pH	Within the range 6.0 to 9.0.	

(2) There shall be no discharge of pollutants from mill operations which employ the froth-flotation process alone or in conjunction with other processes, for the beneficiation of copper ores, lead ores, zinc ores, gold ores, or silver ores or any combination of these ores.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
	Milligrams per liter	
TSS	30	20
Cu	0.1	0.05
Zn	0.2	0.1
Pb	0.2	0.1
Hg	0.002	0.001
Cd	0.10	0.05
CN	0.02	0.01
pH	Within the range 6.0 to 9.0.	

(3) There shall be no discharge of pollutants from mines and mills which employ dump, heap, in situ leach or vat-leach processes for the extraction of copper from ores or ore waste materials.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the provisions set forth in paragraph (a)(2) of this section.

(4) There shall be no discharge of pollutants from mills which extract gold or silver by the cyanidation process alone.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the provisions set forth in paragraph (a)(2) of this section.

(5) There shall be no discharge of pollutants from mills which extract gold or silver by the amalgamation process alone.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the provisions set forth in paragraph (a)(2) of this section.

(6) The quantity of pollutants or pollutant properties discharged in mine drainage from mines or discharged from mine and mill complexes beneficiating gold ores, silver ores, tin ores, and platinum ores by gravity separation methods (including mining of placer deposits, dredge mining and hydraulic mining operations) shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	50	30
pH	Within the range 6.0 to 9.0.	

(7) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a)(1) through (a)(6) of this section shall be subject to the limitations in (a)(2) of this section and in no case shall exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.34 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.33 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

Subpart C—Bauxite Subcategory

4. Subpart C is amended by adding §§ 440.33, 440.34, 440.35, and 440.36 as follows:

§ 440.33 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) Subject to the provisions of paragraph (b) of this section the following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the ebst available technology economically achievable:

The quantity of pollutants or pollutant properties discharged in mine drainage from mines producing bauxite and other aluminum ores shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	0.6	0.3
Zn	0.2	0.1
Al	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.36 Pretreatment standards for new sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.35 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

§ 440.35 Standards of performance for new sources.

(a) Subject to the provisions of paragraph (b) of this section the following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

The quantity of pollutants or pollutant properties discharged in mine drainage from mines producing bauxite and other aluminum ores shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.2	0.1
Pb	0.2	0.1
As	1.0	0.5
Mo	2.0	1.0
pH	Within the range 6.0 to 9.0.	

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25-year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.36 Pretreatment standards for new sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.35 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

Subpart D—Ferroalloy Subcategory

5. Subpart D is amended by adding §§ 440.43, 440.44, 440.45 and 440.46 as follows:

§ 440.43 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) Subject to the provisions of paragraph (b) of this section the following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines producing 5,000 metric tons (5,512 short tons) or more of ferroalloy bearing ores per year shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.2	0.1
Pb	0.2	0.1
As	1.0	0.5
Mo	2.0	1.0
pH	Within the range 6.0 to 9.0.	

(2) The quantity of pollutants or pollutant properties discharged in mine drainage from mines or discharged from mills processing less than 5,000 metric tons (5,512 short tons) of ferroalloy ores per year by methods other than ore leaching shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	50	30
pH	Within the range 6.0 to 9.0.	

(3) The quantity of pollutants or pollutant properties discharged from mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by purely physical methods including ore crushing, washing, jigging, heavy media separation, and magnetic and electrostatic separation shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.2	0.1
CN	0.04	0.02
As	1.0	0.5
COD	50	25
Mo	2.0	1.0
pH	Within the range 6.0 to 9.0.	

(4) The quantity of pollutants or pollutant properties discharged from mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by froth flotation methods shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.1	0.05
Zn	0.2	0.1
CN	0.04	0.02
As	1.0	0.5
COD	50	25
Mo	2.0	1.0
pH	Within the range 6.0 to 9.0.	

(5) The quantity of pollutants or pollutant properties discharged from mills processing ferroalloy ores by leaching techniques (either acid or alkaline) and associated chemical beneficiation techniques shall not exceed the following limitations:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Cr	0.10	0.05
Zn	0.2	0.1
As	1.0	0.5
NH_3	10	5
pH	Within the range 6.0 to 9.0.	

(6) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a)(1) through (a)(5) of

V 40 215
NOV 6 75
XUM

this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.44 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.43 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

§ 440.45 Standards of performance for new sources.

(a) Subject to the provisions of paragraph (b) of this section the following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines producing 5,000 metric tons (5,512 short tons) or more of ferroalloy bearing ores per year shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	50	30
pH	Within the range 6.0 to 9.0.	

(2) The quantity of pollutants or pollutant properties discharged in mine drainage from mines or discharged from mills processing less than 5,000 metric tons (5,512 short tons) of ferroalloy ores per year by methods other than ore leaching shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.2	0.1
As	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(3) The quantity of pollutants or pollutant properties discharged from mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by purely physical methods including ore crushing, washing, jigging, heavy media separation, and magnetic and electrostatic separation shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.2	0.1
As	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(4) The quantity of pollutants or pollutant properties discharged from mills processing 5,000 metric tons (5,512 short tons) or more of ferroalloy ores per year by froth flotation methods shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.2	0.1
CN	0.04	0.02
As	1.0	0.5
COD	50	25
pH	Within the range 6.0 to 9.0.	

(5) The quantity of pollutants or pollutant properties discharged from mills processing ferroalloy ores by leading techniques (either acid or alkaline) and associated chemical beneficiation techniques shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Cu	0.10	0.05
Zn	0.2	0.1
As	1.0	0.5
pH	Within the range 6.0 to 9.0.	

(6) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a)(1) through (a)(5) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitation set forth in this section.

§ 440.46 Pretreatment standards for new sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.45 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

Subpart E—Uranium, Radium and Vanadium Ores Subcategory

6. Subpart E is amended by adding §§ 440.53, 440.54, 440.55, and 440.56 as follows:

§ 440.53 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) Subject to the provisions of paragraph (b) of this section the following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines, either open-pit or underground, from which uranium, radium and vanadium ores are produced shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Zn	0.2	0.1
As	0.1	0.1
Ra226 [1]	10	3
U	4	2
COD	100	50
Mo	2.0	1.0
V	10	5
pH	Within the range 6.0 to 9.0.	

[1] Values in picocuries per liter.

(2) There shall be no discharge of pollutants from mills using the acid leach, alkaline leach or combined acid and alkaline leach process for the extraction of uranium, radium and vanadium.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaportion may be discharged subject to the provisions set forth in paragraph (a)(1) of this section.

(3) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a)(1) and (a)(2) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.54 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.53 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

§ 440.55 Standards of performance for new sources.

(a) Subject to the provisions of paragraph (b) of this section the following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines, either open-pit or underground, from which uranium, radium and vanadium ores are produced shall no exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Cd	0.10	0.05
Zn	0.2	0.1
As	0.1	0.1
Ra226	10	3
U	4	2
COD	100	50
pH	Within the range 6.0 to 9.0.	

(2) There shall be no discharge of pollutants from mills using the acid leach, alkaline leach or combined acid and alkaline leach process for the extraction of uranium, radium and vanadium.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the provisions set forth in paragraph (a)(1) of this section.

(3) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a)(1) and (a)(2) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.56 Pretreatment standards for new sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.55 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

Subpart F—Mercury Ore Subcategory

7. Subpart F is amended by adding §§ 440.63, 440.64, 440.65, and 440.66 as follows:

§ 440.63 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) Subject to the provisions of paragraph (b) of this section the following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines, either open-pit or underground, operated for the production of mercury ores shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Hg	0.001	0.0005
Ni	0.3	0.1
pH	Within the range 6.0 to 9.0.	

FEDERAL REGISTER, VOL. 40, NO. 215—THURSDAY, NOVEMBER 6, 1975

V 40 215 NOV 6 75 XUM

(2) There shall be no discharge of pollutants from mills beneficiating mercury ores by gravity separation methods or by froth-flotation methods.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the provisions set forth in paragraph (a) (1) of this section.

(3) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a) (1) and (a) (2) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.64 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.63 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

§ 440.65 Standards of performance for new sources.

(a) Subject to the provisions of paragraph (b) of this section the following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines, either open-pit or underground, operated for the production of mercury ores shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Hg	0.002	0.001
Ni	0.2	0.1
pH	Within the range 6.0 to 9.0.	

(2) There shall be no discharge of pollutants from mills beneficiating mercury ores by gravity separation methods or by froth-flotation methods.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the limitations set forth in paragraph (a) (1) of this section.

(3) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a) (1) and (a) (2) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.66 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.66 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

Subpart G—Titanium Ore Subcategory

8. Subpart G is amended by adding §§ 440.73, 440.74, 440.75, and 440.76 as follows:

§ 440.73 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) Subject to the provisions of paragraph (b) of this section the following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achieveable:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines obtaining titanium ores from lode deposits shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	2.0	1.0
pH	Within the range 6.0 to 9.0.	

(2) There shall be no discharge of pollutants from mills beneficiating titanium ores by electrostatic methods, magnetic and physical methods or flotation methods.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	2	1
Zn	0.3	0.1
Ni	0.3	0.1
pH	Within the range 6.0 to 9.0.	

(3) The quantity of pollutants or pollutant properties discharged in mine drainage from mines engaged in the dredge mining of placer deposits of sands containing rutile, ilmenite, leucoxene, monazite, zircon, and other heavy metals, and the milling technique employed in conjunction with the dredge mining activity (milling techniques employed include the use of wet gravity methods in conjunction with electrostatic or magnetic methods) shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	2	1
COD	30	15
pH	Within the range 6.0 to 9.0.	

(4) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a) (1) through (a) (3) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.74 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.73 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

§ 440.75 Standards of performance for new sources.

(a) Subject to the provisions of paragraph (b) of this section the following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

(1) The quantity of pollutants or pollutant properties discharged in mine drainage from mines obtaining titanium ores from lode deposits shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	2.0	1.0
pH	Within the range 6.0 to 9.0.	

(2) There shall be no discharge of pollutants from mills beneficiating titanium ores by electrostatic methods, magnetic and physical methods or flotation methods.

In the event that the annual precipitation falling on the treatment system and its associated drainage area exceeds the annual evaporation, a volume of water equivalent to the difference between annual precipitation falling on the treatment system and its associated drainage area and annual evaporation may be discharged subject to the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	0.2	0.1
Zn	0.2	0.1
Ni	0.2	0.1
pH	Within the range 6.0 to 9.0.	

(3) The quantity of pollutants or pollutant properties discharged in mine drainage from mines engaged in the dredge mining of placer deposits of sands containing rutile, ilmenite, leucoxene, monazite, zircon, and other heavy metals, and the milling techniques employed in conjunction with the dredge mining activity (milling techniques employed include the use of wet gravity methods in conjunction with electrostatic or magnetic methods) shall not exceed the following limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Milligrams per liter	
TSS	30	20
Fe	2	1
COD	30	15
pH	Within the range 6.0 to 9.0.	

(4) In the event that waste streams from various sources are combined for treatment and discharge, the quantity or quality of each pollutant or pollutant property in the combined discharge that is subject to the limitations set forth in paragraphs (a) (1) through (a) (3) of this section shall not exceed the quantity or quality of each pollutant or pollutant property that would have been discharged had each waste stream been treated separately. The discharge flow from a combined discharge shall not exceed the volume that would have been discharged had each waste stream been treated separately.

(b) Any untreated overflow which is discharged from facilities designed, constructed and operated to contain or treat as applicable all process generated waste water and the surface runoff to the treatment facility, resulting from a 25 year 24-hour precipitation event shall not be subject to the limitations set forth in this section.

§ 440.76 Pretreatment standards for new sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 440.76 above shall not presently apply. Some of the constituents of the process waste waters from this subcategory may interfere with certain treatment works or may pass through such treatment works inadequately treated. Therefore, such process waste waters should receive special consideration by the operator of the publicly owned treatment works and may be the subject of subsequent further regulation pursuant to section 307(b) of the Act.

ENVIRONMENTAL PROTECTION AGENCY

[450-4]

WATER POLLUTION PREVENTION AND CONTROL

Addition to the List of Categories of Sources

Section 306(b)(1)(A) of the Federal Water Pollution Control Act, as amended October 18, 1972 (Pub. L. 92-500), directs the Administrator of the Environmental Protection Agency to publish, and from time to time revise a list of categories of sources which shall, at the minimum, include those listed in section 306(b)(1)(A). As soon as practicable, but in no case more than one year after the inclusion of a category of sources in such list, the Administrator is required to propose and publish regulations establishing Federal standards of performance for new sources within such categories. The original list of 27 source categories was published January 16, 1973 (38 FR 1624). Standards of performance have been promulgated for all 27 source categories.

The Administrator, after evaluating available information, has determined that ore mining and dressing is an additional category of point sources which meets the above requirements. Evaluation of other point source categories is in progress, and the list will be supplemented from time to time as the Administrator deems appropriate. Accordingly, notice is given that the Administrator, pursuant to section 306(b)(1)(A) of the Act amends the list of categories of sources as follows:

List of Categories of Sources

34. Ore Mining and Dressing

Proposed effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources applicable to the above point source categories appear elsewhere in Part III in this issue of the FEDERAL REGISTER.

Dated: October 17, 1975.

JOHN QUARLES,
Acting Administrator.

• List of Schools Determined to Have a High Concentration of Students from Low-Income Families—List of Schools in Which the Enrollment of Students from Low-Income Families Exceeds Thirty Percent of the Total Enrollment of Students •

Pursuant to the provisions of section 205(b)(3)(A)(i) of the National Defense Education Act of 1958, as amended (20 U.S.C. 425(b)(3)(A)(i)), notice is hereby given of the public and other nonprofit elementary and secondary schools which have been listed in accordance with the regulations governing the administration of the National Defense Student Loan Program (45 CFR 144.8(i)(2)) as being in school districts of local educational agencies eligible for assistance pursuant to Title II of Public Law 874, 81st Congress, as amended (Title I of the Elementary and Secondary Education Act of 1965), and as having high concentrations of children from low-income families for the 1975–76 school year.

Pursuant to the provisions of section 465(a)(2) of the Higher Education Act of 1965, as amended (10 U.S.C. 1087ee(a)(2)), notice is hereby also given of the public and other nonprofit elementary and secondary schools which have been listed as being in school districts of local educational agencies eligible for assistance pursuant to Title I of the Elementary and Secondary Education Act of 1965 and which have been determined for the 1975–76 school year to be schools in which the enrollment of children described in section 103(c)(1)(A), (B), or (C) (formerly clauses (A), (B), or (C) of section 103(a)(2)) of Title I of the Elementary and Secondary Education Act of 1965 using a low-income factor of $3,000, exceeds 30 percent of that school's enrollment.

Teachers with outstanding indebtedness as a result of loans made prior to July 1, 1972 under the National Defense Student Loan Program are entitled to a 15 percent per annum rate of loan cancellation for each complete academic year (or equivalent) of full-time teaching service performed in a public or other nonprofit elementary or secondary school which for that year has been designated by the U.S. Commissioner of Education as having a high concentration of students from low-income families.

Teachers with outstanding indebtedness as a result of loans made on or after July 1, 1972 under the National Direct Student Loan Program are entitled to a 15 percent per annum rate of loan cancellation for each of the first two complete academic years (or equivalent) of full-time teaching service performed in a public or other nonprofit elementary or secondary school which has been designated by the U.S. Commissioner of Education for those years as being a school in which the enrollment of children described in section 103(c)(1)(A), (B), or (C) (formerly clauses (A), (B), or (C) of section 103(a)(2)) of Title I of the Elementary and Secondary Education Act of 1965 using a low-income factor of $3,000, exceeds 30 percent of that school's enrollment. The rate of National Direct Student Loan cancellation for teaching a third or fourth year in one of these designated schools is 20 percent per annum, and the rate of cancellation for teaching the fifth year in one of these designated schools is 30 percent per annum.

The school lists appear in alphabetical order by State. The entries for American Samoa, Guam, Puerto Rico, the Trust Territory of the Pacific Islands, and the Virgin Islands appear following the list for the State of Wyoming. The District of Columbia is included in the alphabetical sequence.

Inquiries concerning these lists may be made to the appropriate State educational agency or to the Program Support Branch, Division of Student Support and Special Programs, Bureau of Postsecondary Education, U.S. Office of Education, Washington, D.C. 20202.

(Catalog of Federal Domestic Assistance Number 13.470; Higher Education—National Defense/Direct Student Loan Cancellations)

Dated: October 23, 1975.

T. H. BELL,
U.S. Commissioner of Education.
